

Weibo Announces Chairman's Response to Certain Market Speculation

July 6, 2021

BEIJING, July 6, 2021 /PRNewswire/ -- Weibo Corporation ("Weibo" or the "Company") (NASDAQ: WB), a leading social media in China, noted a Reuters article issued today saying the Company's chairman Charles Chao and a state investor are in talks to take the Company private. In response to the Company's inquiry, Mr. Chao informed the Company that the above information is untrue and he has had no discussion with anyone regarding privatization of the Company.

About Weibo

Weibo is a leading social media for people to create, share and discover content online. Weibo combines the means of public self-expression in real time with a powerful platform for social interaction, content aggregation and content distribution. Any user can create and post a feed and attach multi-media and long-form content. User relationships on Weibo may be asymmetric; any user can follow any other user and add comments to a feed while reposting. This simple, asymmetric and distributed nature of Weibo allows an original feed to become a live viral conversation stream.

Weibo enables its advertising and marketing customers to promote their brands, products and services to users. Weibo offers a wide range of advertising and marketing solutions to companies of all sizes. The Company generates a substantial majority of its revenues from the sale of advertising and marketing services, including the sale of social display advertisement and promoted marketing offerings. Designed with a "mobile first" philosophy, Weibo displays content in a simple information feed format and offers native advertisement that conform to the information feed on our platform. To support the mobile format, we have developed and continuously refining our social interest graph recommendation engine, which enables our customers to perform people marketing and target audiences based on user demographics, social relationships, interests and behaviors, to achieve greater relevance, engagement and marketing effectiveness.
