## **Non-GAAP Financial Measures**

This release contains the following non-GAAP financial measures: non-GAAP costs and expenses, non-GAAP income from operations, non-GAAP net income attributable to Weibo, non-GAAP diluted net income per share attributable to Weibo and adjusted EBITDA. These non-GAAP financial measures should be considered in addition to, not as a substitute for, measures of the Company's financial performance prepared in accordance with U.S. GAAP.

The Company's non-GAAP financial measures exclude stock-based compensation, amortization of intangible assets, net gain on the sale of investments and impairment on investments, non-GAAP to GAAP reconciling items for the loss attributable to non-controlling interest, and provision for income tax related to the amortization of intangible assets (other non-GAAP to GAAP reconciling items have no tax effect). Adjusted EBITDA excludes interest income, income tax expenses, and depreciation expenses. The Company's management uses these non-GAAP financial measures in their financial and operating decision-making, because management believes these measures reflect the Company's ongoing operating performance in a manner that allows more meaningful period-to-period comparisons. The Company believes that these non-GAAP financial measures provide useful information to investors and others in the following ways: (i) in comparing the Company's current financial results with the Company's past financial results in a consistent manner, and (ii) in understanding and evaluating the Company's current operating performance and future prospects in the same manner as management does, if they so choose. The Company also believes that the non-GAAP financial measures provide useful information to both management and investors by excluding certain expenses, gains (losses) and other items (i) that are not expected to result in future cash payments or (ii) that are non-recurring in nature or may not be indicative of the Company's core operating results and business outlook.

Use of non-GAAP financial measures has limitations. The Company's non-GAAP financial measures do not include all income and expense items that affect the Company's operations. They may not be comparable to non-GAAP financial measures used by other companies. Accordingly, care should be exercised in understanding how the Company defines its non-GAAP financial measures. Reconciliations of the Company's non-GAAP financial measures to the nearest comparable GAAP measures are set forth in the section below titled "Unaudited Reconciliation of Non-GAAP to GAAP Results."
