Securities registered or to be registered pursuant to Section 12(g) of the Act.

Not Applicable
(Title of Class)
As of December 31, 2016, there were 218,076,207 ordinary shares outstanding, par value $0.00025 per share, being the sum of 109,155,101 Class A ordinary shares and 108,921,106 Class B ordinary shares.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

x Yes  o No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.

o Yes  x No

Indicate by check mark whether the registrant has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

x Yes  o No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§229.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

x Yes  o No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or an emerging growth company. See the definitions of “large accelerated filer,” “accelerated filer,” and “emerging growth company” in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer x  Accelerated filer o  Non-accelerated filer o  Emerging growth company o

If an emerging growth company that prepares its financial statements in accordance with U.S. GAAP, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards† provided pursuant to Section 13(a) of the Exchange Act.

† The term “new or revised financial accounting standard” refers to any update issued by the Financial Accounting Standards Board to its Accounting Standards Codification after April 5, 2012.

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

U.S. GAAP x  International Financial Reporting Standards as issued by the International Accounting Standards Board o  Other o

If “Other” has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow.

o Item 17  o Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

o Yes  x No

(APPLICABLE ONLY TO ISSUERS INVOLVED IN BANKRUPTCY PROCEEDINGS DURING THE PAST FIVE YEARS)

Indicate by check mark whether the registrant has filed all documents and reports required to be filed by Sections 12, 13 or 15(d) of the Securities Exchange Act of 1934 subsequent to the distribution of securities under a plan confirmed by a court.

o Yes  o No

INTRODUCTION

In this annual report, except where the context otherwise requires and for purposes of this annual report only:

- “we,” “us,” “our company,” “the Company” and “our” refer to Weibo Corporation, a Cayman Islands company, its subsidiaries, and, in the context of describing its operations and consolidated financial information, include its consolidated PRC affiliated entities;
- “Weibo” refers to our social media platform and the products and services that we provide to users, customers and platform partners through that platform;
- “SINA” refers to Sina Corporation, our parent company and controlling shareholder;
- “Weimeng” refers to Beijing Weimeng Technology Co., Ltd.;
- “China” or “PRC” refers to the People’s Republic of China, excluding, for the purpose of this annual report only, Hong Kong Special Administrative Region, the Macau Special Administrative Region and Taiwan;
- “MAUs” refers to monthly active users, which are Weibo users who logged on with a unique Weibo ID and accessed Weibo through our website, mobile website, desktop or mobile applications, SMS or connections via our platform partners’ websites or applications that are integrated with Weibo, during a given calendar month. The numbers of our MAUs are calculated using internal company data that has not been independently verified, and we treat each account as a separate user for purposes of calculating MAUs, although it is possible that some people and organizations may have set up more than one account and some accounts used by organizations are used by many people within the organization;
- “DAUs” refers to daily active users, which are Weibo users who logged on with a unique Weibo ID and accessed Weibo through our website, mobile website, desktop or mobile applications, SMS or connections via our platform partners’ websites or applications that are integrated with Weibo, on a given day, and “average DAUs” for a month refers to the average of the DAUs for each day during the month. The numbers of our DAUs are calculated using internal company data that has not been independently verified, and we treat each account as a separate user for purposes of calculating DAUs, although it is possible that some people and organizations may have set up more than one account and some accounts used by organizations are used by many people within the organization;
- “feeds” include both posts and reposts;
- “shares” or “ordinary shares” refers to our Class A and Class B ordinary shares, par value $0.00025 per share;
- “ADSs” refers to our American depositary shares. Each ADS represents one Class A ordinary share;
- “GAAP” refers to generally accepted accounting principles in the United States;
- all references to “RMB” or “renminbi” are to the legal currency of China, and all references to “$, “dollars,” “US$” and “U.S. dollars” are to the legal currency of the United States. Unless otherwise noted, all translations from RMB to U.S. dollars and from U.S. dollars to RMB in this annual report were made at a rate of RMB6.9430 to US$1.00, the exchange rate on December 30, 2016 as set forth in the H.10 statistical release published by the Federal Reserve Board; and
- all discrepancies in any table between the amounts identified as total amounts and the sum of the amounts listed therein are due to rounding.
INFORMATION REGARDING FORWARD-LOOKING STATEMENTS

This annual report contains forward-looking statements that involve risks and uncertainties. All statements other than statements of current or historical facts are forward-looking statements. These statements involve known and unknown risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from those expressed or implied by the forward-looking statements.

You can identify these forward-looking statements by words or phrases such as “may,” “will,” “expect,” “anticipate,” “aim,” “estimate,” “intend,” “plan,” “believe,” “likely to” or other similar expressions. We have based these forward-looking statements largely on our current expectations and projections about future events and financial trends that we believe may affect our financial condition, results of operations, business strategy and financial needs. These forward-looking statements include, but are not limited to, statements about:

- our goals and strategies;
- our future business development, financial condition and results of operations;
- expected changes in our revenues, costs or expenditures;
- the growth of social media, internet and mobile users and internet and mobile advertising in China; and
- PRC governmental policies relating to media, the internet, internet content providers and online advertising.

You should thoroughly read this annual report and the documents that we refer to in this annual report with the understanding that our actual future results may be materially different from and worse than what we expect. Other sections of this annual report include additional factors which could adversely impact our business and financial performance. Moreover, we operate in an evolving environment. New risk factors and uncertainties emerge from time to time and it is not possible for our management to predict all risk factors and uncertainties, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements. We qualify all of our forward-looking statements by these cautionary statements.

You should not rely upon forward-looking statements as predictions of future events. We undertake no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

D. Risk Factors

Risks Relating to Our Business

If we fail to grow our active user base, or if user engagement on our platform declines, our business, financial condition and operating results may be materially and adversely affected.

The growth of our active user base and the level of user engagement are critical to our success. We had 313 million MAUs and 139 million average DAUs in December 2016. Our business has been and will continue to be significantly affected by our success in growing the number of active users and increasing their overall level of engagement on our platform, including their engagement with promoted feeds, other advertising and marketing products and other services on our platform. We anticipate that our user growth rate will slow over time as the size of our user base increases and as we achieve higher market penetration in China. To the extent our user growth rate slows, our success will become increasingly dependent on our ability to increase user engagement. If people do not perceive content and other products and services on our platform to be interesting and useful, we may not be able to attract users or increase their engagement. A number of user-oriented websites that achieved early popularity have since seen their user bases or levels of engagement decline, in some cases precipitously. There is no guarantee that we will not experience a similar erosion of our active user base or engagement level. A number of factors could potentially negatively affect user growth and engagement, including if:

- we are unable to retain existing users and attract new users to our platform, or achieve greater penetration into lower tier cities in China;
- there is a decrease in the perceived quality or reliability of the content generated by our users;
- a large number of influencers, such as celebrities, key opinion leaders, or KOLs and other public figures, and platform partners, such as media outlets and organizations with media rights, switch to alternative platforms or use other products and services more frequently;
- we are unable to manage and prioritize information to ensure users are presented with content that is appropriate, interesting, useful and relevant;
- we fail to introduce new and improved products or services or we introduce new or improved products or services that are not well received by users;
- technical or other problems prevent us from delivering our products or services in a rapid and reliable manner or otherwise adversely affect the user experience;
- users believe that their experience is diminished as a result of the decisions we make with respect to the frequency, relevance, prominence, format and quality of the ads displayed on our platform;
- we are unable to combat spam or other hostile or inappropriate usage on our platform;
- there are user concerns related to privacy and communication, safety, security or other factors;
- we fail to provide adequate customer service to our users;
- users engage with other platforms or activities instead of ours;
- there are adverse changes in our products or services that are mandated by, or that we elect to make to address, legislation, regulations or government policies; or
- we do not maintain our brand image or our reputation is damaged.

We have undertaken various initiatives to stimulate the growth of our users and user engagement. For instance, in addition to the microblogging service with which Weibo originally started, we have added new functionalities, such as short videos, live streaming and interest-based information feeds, which we believe will help broaden our appeal and generate more user traffic and engagement. However, there can be no assurance that these and other strategies will be effective. If we are unable to increase our user base and user engagement, our platform could be less attractive to potential new and existing users and customers, which would have a material and adverse impact on our business, financial condition and operating results.
If our users and platform partners do not continue to contribute content or their contributions are not valuable to other users, we may experience a decline in the number of users accessing our platform and a decline in user engagement.

Our success depends on our ability to provide users with interesting and useful content, which in turn depends on the content contributed by our users and platform partners. We believe that one of our competitive advantages is the quality, quantity and open nature of the content on Weibo, and that access to rich content is one of the main reasons users visit Weibo. We seek to foster a broader and more engaged user community, and we encourage influencers, such as celebrities, KOLs and other public figures, and platform partners, such as media outlets and organizations with media rights to use our platform to express their views and share interesting, high quality content. If users and platform partners do not continue to contribute content to Weibo due to policy changes, their use of alternative communication channels or any other reasons, and we are unable to provide users with interesting, useful and timely content, our user base and user engagement may decline. If we experience a decline in the number of users or the level of user engagement, customers may not view our products and services as attractive for their advertising and marketing expenditures and may reduce their spending with us, which would materially harm our business and operating results.

We rely on our partnership program with channel partners, including application marketplaces, internet search engines, navigation sites, app preinstall partners and web browsers, to drive traffic to our platform, and if our partnership program becomes less effective or if the smartphone market slows down compared to the prior years, traffic to our platform could decline and our business and operating results could be adversely affected.

We work with application marketplaces, such as Apple’s App Store, Baidu Mobile Assistant, 360 Mobile Assistant and Wanda Mobile, to drive downloads of our mobile applications. In the future, Google (Android), Apple or other operators of application marketplaces may make changes to their marketplaces and make access to our products and services more difficult. We also partner with internet search engines, navigation sites and web browsers, such as Baidu, Sogou, Hao123, Hao360, UC Browser and 360 Browser, to drive traffic to our applications and websites. For example, when a user types an inquiry into a search engine, we rely on high organic ranking of our webpages in these search results referring the user to our website. Internet search engines may modify their search algorithms, our competitors’ search engine optimization efforts may become more successful than ours, and other factors uncontrollable to us may cause our search result ranking to decline and adversely impact traffic to our platform. Similarly, navigation websites or web browsers may make decisions that result in directing less traffic to our platform. Due to intense competition in the marketplace, app preinstall partners may raise prices to a point where it becomes cost prohibitive for us to rely on them for Weibo user activation, or they may decide to discontinue their services to us altogether. Any reduction in the traffic directed to our mobile applications or websites from our channel partners, including application marketplaces, internet search engines, navigation sites, app preinstall partners and web browsers, could have a material adverse impact to our business and operating results and ultimately to our stock price.

If we are unable to compete effectively for user traffic or user engagement, our business and operating results may be materially and adversely affected.

Competition for user traffic and user engagement is intense and we face strong competition in our business. Major Chinese internet companies, including Tencent, Baidu and NetEase, as well as new players in China who provide online media, including content aggregation and distribution services, compete directly with us for user traffic and user engagement, content, talent and marketing resources. As a media platform in nature, we also compete with offline media companies for audiences and content. In addition, as a social media featuring social networking services and messenger features, we are subject to intense competition from providers of similar services as well as potentially new types of online services. These services include (i) messengers and other social apps and sites, such as Weixin/WeChat, QQ Mobile, Qzone Mobile, Yixin, Laiwang, Douban, Baidu Post and Momo; (ii) news apps and sites, such as those operated by other major internet companies, including Tencent, Baidu, NetEase, Sohu, Phoenix New Media and Bytedance; (iii) multi-media apps (photo, short video, live streaming, etc.), such as Momo, Kuaishou, Inke, YY, Youku Tudou, iQiyi, Tencent Video, Nice, Paipai and Meipai.

We also compete with both offline and online games for the time and money of gamers. We have begun to offer social commerce solutions to our customers that enable them to conduct e-commerce on our platform. Consequently, our offerings compete with e-commerce companies and online verticals that enable merchants to conduct e-commerce, including location-based services and online-to-offline services. In addition to direct competition, we face indirect competition from companies that sponsor or maintain high traffic volume websites or provide an initial point of entry for internet users, including but not limited to providers of search services, web browser and navigation pages, such as Baidu, UC Web and Qihoo 360. We may also face increasing competition from global social media, social networking services and messengers, such as Snapchat, Instagram, Facebook, Youtube, Twitter, WhatsApp, Line, Kakao Talk and Snow. Some of our competitors may have substantially more cash, traffic, technical and other resources than we do. We may be unable to compete successfully against these competitors or new market entrants, which may adversely affect our business and financial performance.
our ability to establish and maintain relationships with platform partners;

- our ability to provide effective customer service and support;

- changes mandated by, or that we elect to make to address, legislation, regulations or government policies, some of which may have a disproportionate effect on us;

- acquisitions or consolidation within our industry, which may result in more formidable competitors; and

- our reputation and brand strength relative to our competitors.

We generate a substantial majority of our revenues from advertising and marketing. A decline in our advertising and marketing revenues could harm our business.

Our monetization model is new and evolving. We started to generate revenues in 2012 through advertising and marketing, as well as other services, such as game-related services, VIP membership and data licensing. Advertising and marketing services accounted for 87% of our revenues in 2016.

We cannot guarantee that the monetization strategies we have adopted can generate sustainable revenues and profit. As is common in the industry, our advertising and marketing customers do not have long-term commitments with us. In addition, our major brand customers typically purchase our advertising and marketing services through advertising agencies. Advertising agencies and potential new customers may view our advertising and marketing services as experimental and unproven, and we may need to devote additional time and resources to convince them. Customers also may choose to reach users through our free products instead of our paid advertising and marketing services or through our partner websites and applications. Customers will not continue to do business with us or may only be willing to advertise with us at reduced prices if we do not deliver advertising and marketing services in an effective manner, or if they do not believe that their investment in advertising and marketing with us will generate a competitive return relative to alternative advertising platforms. If we fail to retain existing customers or attract new advertisers and marketing customers to our platform or if we are unable to collect accounts receivable from advertisers or advertising agencies in a timely manner, our financial condition, results of operations and prospects may be materially and adversely affected.

If we are unable to compete effectively for advertising and marketing spending, our business and operating results may be materially and adversely affected.

In addition, some of our customers, especially key accounts, rely on ad measurement to evaluate advertising effectiveness. Our ability to add new customers and increase spending of existing customers will be affected by our ability to provide timely and reliable measurement analysis of their ad campaigns on Weibo. We are working with third-party measurement firms to provide these data services to our customers but the online ad measurement market in China is nascent. We cannot assure you that our measurement partners will be able to provide measurement to the satisfaction of our customers. If our customers are unable to obtain measurement results on their marketing campaigns on Weibo to their satisfaction, our customers may be less willing to maintain or expand their advertising spending on our platform, and our financial conditions, results of operations and prospects may be materially and adversely affected.

We introduced mobile-adapted promoted marketing solutions, such as promoted feeds, in 2013 to small and medium-sized enterprises, or SMEs, and to key accounts in 2014. Approximately 90% of our MAUs in December 2016 accessed Weibo through mobile devices at least once during the month. If users access our mobile products as a substitute for access through PCs, our ability to grow our revenues would be dependent on the successful adoption of our mobile monetization. As new devices and platforms are continually being released, users may consume content in a manner that is more difficult to monetize. It is difficult to predict the problems we may encounter in adapting our products and services and developing competitive new products and services that are compatible with new devices or platforms. If we are unable to develop products and services that are compatible with new devices and platforms, or if we are unable to drive continued adoption of our mobile applications, our financial condition, results of operations and prospects may be materially and adversely affected.

In addition, online content in video format is becoming increasingly prevalent. If we are unable to adapt our products and services for the video environment and develop products and services to generate video ads revenues, especially for the mobile environment, our financial condition, results of operations and prospects may be materially and adversely affected.

If we are unable to compete effectively for advertising and marketing spending, our business and operating results may be materially and adversely affected.

In addition to intense competition for users and user engagement, we also face significant competition for advertising and marketing spending. A substantial majority of our revenues are currently generated through advertising and marketing services. We compete against online and mobile businesses that offer such services, including Tencent, Baidu, Youku Tudou, Bytedance, Momo, Sohu, NetEase and Phoenix New Media. We also compete with internet companies that offer online-to-offline (O2O), purchase solutions and other performance-based advertising and marketing services and digital media tailored to specific vertical industries including fast moving consumer goods, IT, automobile, e-commerce, entertainment and travel, such as Autohome, Bitauto, Meituan Dianping, Ctrip and Focus Media. We also compete against traditional media outlets, such as television, radio and print, for advertising and marketing budgets.

In order to grow our revenues and improve our operating results, we must increase our market share of advertising and marketing spending relative to our competitors, many of which are larger companies that offer more traditional and widely accepted advertising products. In addition, some of our larger competitors have substantially broader product or service offerings and leverage their relationships based on other products or services to gain additional share of advertising and marketing budgets.

We believe that our ability to compete effectively for advertising and marketing spending depends upon many factors both within and beyond our control, including:

- the size, composition and activeness of our user base relative to those of our competitors;

- the breadth, innovation and effectiveness of our online and mobile-offerings;
· the timing and market acceptance of our advertising and marketing products and services, including breadth, quality and variety of our ad formats and features and those of our competitors;

· the effectiveness of our ad targeting capabilities, and those of our competitors;

---

Table of Contents

· the volume, pricing and return on investment of our products and services relative to those of our competitors;

· the reach, engagement and effectiveness of our advertising and marketing products and services relative to those of our competitors;

· the availability, accuracy and utility of analytics and measurement solutions offered by us or our partners relative to those of our competitors;

· our ability to attract, retain and motivate talented employees;

· the effectiveness of our performance-based ads and real-time bidding system relative to those of our competitors;

· our sales and marketing efforts, and those of our competitors; and

· our reputation and the strength of our brand relative to our competitors.

Significant acquisitions and consolidation by and among our actual and potential competitors may present heightened competitive challenges for our business. Acquisitions of our platform partners by our competitors could result in reduced content and functionality of our products and services. Consolidation may also enable our larger competitors to offer bundled or integrated products that feature alternatives to our platform. Reduced content and functionality of our products and services, or our competitors’ ability to offer bundled or integrated products that compete directly with us, may cause our user base and user engagement to decline and customers to reduce their spending with us. If we are not able to compete effectively for advertising and marketing spending, our business and operating results may be materially and adversely affected.

Our value-added services may fail to attract or retain users or generate revenue.

In addition to advertising and marketing services, we generate part of our revenues from value-added services, including game-related services, VIP membership and data licensing. Revenues generated from our value-added services were $84.8 million in 2016, accounting for 13% of our total revenues in the same period. Our value-added services are mostly on a fee-based revenue model and failure to retain existing customers, improve spending per user and attract new customers may adversely impact our overall business and financial performance. A number of factors may affect our ability to grow game-related services, such as our ability to retain, increase, and engage our game players, our ability to introduce more successful games to our platform in a cost-efficient manner, our ability to increase the average spending per player. In 2016, revenue from game-related services declined 30% year over year, and this trend may continue in the future. Factors that may affect our ability to grow VIP membership revenues include our ability to grow Weibo users, our ability to convert Weibo users into paying members, our ability to offer new services that retain existing members and attract new members and our ability to raise the prices of our membership fees. With respect to data licensing, we adopted a new strategy aiming to promote the growth of our advertising and marketing revenues in 2014. Our data licensing business increased slightly in 2016, but due to our strategy to leverage user data to sell more advertising and marketing services, we cannot assure you that our data licensing business will continue to grow going forward. If we are unable to develop new products and services, increase the spending per user and attract more users for our value-added services, our financial condition, results of operations and prospects may be materially and adversely affected.

We have a limited operating history in a new and unproven market, which makes it difficult to evaluate our future prospects.

The market for social media is relatively new and may not develop as expected. People who are not our users, customers or platform partners may not understand the value of our products and services and new users, customers or platform partners may initially find our products and services confusing. There may be a perception that our products and services are only useful to users who post, or to influential users with large audiences. Convincing potential new users, customers and platform partners of the value of our products and services is critical to increasing the number of our users, customers and platform partners and to the success of our business. Although we have experienced continued user growth as shown by the increase of our MAU and DAU for the past few years, some of our peers may have experienced a decline in user base. If microblogging, social media, online media or social product, in general, declines in popularity among Chinese internet users, we may be unable to grow our user base or maintain or increase user engagement.
generate revenues from our new products or services. If our strategic initiatives do not enhance our ability to monetize our existing products and services or revenues but which we believe will enhance our attractiveness to users, customers and platform partners. We may not be successful in future efforts to investments, and our business and operating results could be adversely affected. In addition, we may launch strategic initiatives that do not directly generate services fail to engage users, customers and platform partners, we may fail to attract or retain users or to generate sufficient revenues to justify our financial results may be adversely and materially affected.

If we fail to educate potential users, customers and platform partners about the value of our products and services, if the market for our platform does not develop as we expect or if we fail to address the needs of this market, our business will be harmed. Failure to adequately address these or other risks and challenges could harm our business and cause our operating results to suffer.

We have incurred significant net losses in the past, and we may not be able to subsequently maintain profitability.

Since inception, we have incurred significant net losses and only started to record net profit in 2015. As of December 31, 2016, we had an accumulated deficit of $199.6 million. We believe that our future revenue growth will depend on, among other factors, the popularity of social media as well as our ability to attract new users, increase user engagement, establish effective monetization strategies, compete effectively and successfully, and develop new products and services. Accordingly, you should not rely on the revenues of any prior quarterly or annual periods as an indication of our future performance. We also expect our costs to increase in future periods as we continue to expand our business and operations. Although we started to earn net income in 2015, if we are unable to continuously generate adequate revenues and to manage our expenses, we may not be able to maintain profitability and may again incur significant losses in the future.

Historically we relied on Alibaba for a significant portion of our advertising and marketing revenues. If we fail to maintain our collaboration with Alibaba going forward, our results of operations and growth prospect may be adversely and materially affected.

In April 2013, we formed a strategic collaboration with Alibaba and its affiliated entities to jointly explore social commerce and develop innovative marketing solutions to enable merchants on Alibaba’s e-commerce platforms to better connect and build relationships with our users. The strategic collaboration generated approximately $294 million in advertising and marketing revenues from 2013 to 2015 and accounted for 26%, 32% and 29% of our revenues for fiscal years ended December 31, 2013, 2014 and 2015, respectively. Because of our efforts to diversify our sources of revenues after the expiration of the strategic collaboration agreement with Alibaba in January 2016, the advertising and marketing revenues generated from Alibaba decreased to approximately 9% of our revenues for 2016 while our total revenues in 2016 increased by 37% year over year. Alibaba, however, still remains as our largest customer, and we rely on them to enable us to offer e-commerce ad solutions to their merchants. If we are unable to maintain strong cooperation with Alibaba or find other customers that can bring in similar amount of revenues to offset the possible further decline of revenue from Alibaba or the revenue associated with Alibaba’s ecosystem, our results of operations and growth prospects may be adversely and materially affected.

Our future performance depends in part on support from our platform partners.

As content format on our platform expands from text to photo and then to video, the role of multi-channel networks, MCNs, as talent agencies for content creators, are becoming increasingly important. We have built a large network of MCNs in different domains, such as e-commerce and video, and rely on these platform partners to incubate and grow content creators and help them share more and better content on Weibo. If we are unable to expand our network of MCNs and content creators and entice them to share more content, our content offerings may not be as robust and competitive and our user base and user engagement may be adversely and materially affected.

We also rely on third-party developers to build Weibo-integrated applications to enhance Weibo’s functionalities and users to generate contents displayed on our platform. We have made and are continuing to make investments to enable third-party developers to build, grow and monetize mobile and web applications that integrate with Weibo. Such existing and prospective developers may not be successful in building, growing, or monetizing mobile and/or web applications that create, maintain and enhance user engagement. Additionally, developers may choose to build on other platforms, including mobile platforms controlled by third parties, rather than building products that integrate with Weibo. We are continuously seeking to balance the distribution objectives of our developers with our desire to provide an optimal user experience, and we may not be successful in achieving a balance that continues to attract and retain such developers. If we are not successful in our efforts to continue to grow the number of developers that choose to build products that integrate with Weibo or if we are unable to continue to build and maintain good relationships with such developers, our user growth and user engagement and our financial results may be adversely and materially affected.

Our new products, services and initiatives and changes to existing products, services and initiatives could fail to attract users and customers or generate revenues.

Our ability to increase the size and engagement of our user base, attract customers and generate revenues will depend in part on our ability to create and offer successful new products and services. We may introduce significant changes to our existing products and services or develop and introduce new products and services, including technologies with which we have little or no prior development or operating experience. If new or enhanced products or services fail to engage users, customers and platform partners, we may fail to attract or retain users or to generate sufficient revenues to justify our investments, and our business and operating results could be adversely affected. In addition, we may launch strategic initiatives that do not directly generate revenues but which we believe will enhance our attractiveness to users, customers and platform partners. We may not be successful in future efforts to generate revenues from our new products or services. If our strategic initiatives do not enhance our ability to monetize our existing products and services or
Table of Contents

If we fail to effectively manage our growth, our business and operating results could be harmed.

We continue to experience rapid growth in our business and operations, which will continue to place significant demands on our management, operational and financial resources. However, we may encounter difficulties as we establish and expand our operations, product development, sales and marketing, and general and administrative capabilities. We face significant competition for talented employees from other high-growth companies, which include both publicly traded and privately held companies, and we may not be able to hire new employees quickly enough to meet our needs. To attract highly skilled personnel, we have had to offer, and believe we will need to continue to offer, competitive compensation packages. As we continue to grow, we are subject to the risks of over-hiring, over-compensating our employees and over-expanding our operating infrastructure, and to the challenges of integrating, developing and motivating a growing employee base. In addition, we may not be able to innovate or execute as quickly as a smaller and more efficient organization. If we fail to effectively manage our hiring needs and successfully integrate our new hires, our efficiency and ability to meet our forecasts and our employee morale, productivity and retention could suffer, and our business and operating results could be adversely affected.

Our success depends on our ability to provide users with interesting and useful content, which in turn depends on the content contributed by our users. Content creators, especially influencers, contribute content to Weibo to grow their fan base and increase awareness of their brands. We provide content creators with the opportunity to monetize their social assets on Weibo through advertising, e-commerce, subscription, tipping and other means. If content creators do not see significant value from their social marketing activities on Weibo and find monetization on Weibo inadequate, we may have to subsidize them through direct content cost payout, which may have an adverse and material impact on our business, financial condition and operating results. Alternatively, content creators may choose to contribute less or no content to Weibo, which may cause our user base and user engagement to decline and our customers view our products and services less attractive for advertising and marketing purposes. If that were to occur, our customers would reduce their spending on our platform.

Providing products and services to users may be costly and we expect our expenses to continue to increase in the future as we broaden our user base and increase user engagement, and develop and implement new features, products and services that require more infrastructure, such as video-related functionalities. In addition, our costs and expenses, such as our labor-related expenses, product development expenses and sales and marketing expenses, have grown rapidly as we have expanded our business. Historically, our costs have increased each year due to these factors and we expect to continue to incur increasing costs to support ouranticipated future growth. We expect to continue to invest in our infrastructure in order to enable us to provide our products and services rapidly and reliably to users. Continued growth could also strain our ability to maintain reliable service levels for our users and customers, develop and improve our operational, financial, legal and management controls, and enhance our reporting systems and procedures. Our expenses may grow faster than our revenues, and our expenses may be greater than we anticipate. Managing our growth will require significant expenditures and allocation of valuable management resources. If we fail to achieve the necessary level of efficiency in our organization as it grows, our business, operating results and financial condition could be harmed.

Our operating results may fluctuate from quarter to quarter, which makes it difficult to predict.

Our quarterly operating results have fluctuated in the past and will fluctuate in the future. As a result, our past quarterly operating results are not necessarily indicators of future performance. Our operating results in any given quarter can be influenced by numerous factors, many of which we are unable to predict or are outside of our control, including:

- our ability to grow our user base and user engagement;
- fluctuations in spending by our advertising and marketing customers, including as a result of seasonality, major events and extraordinary news events, or other factors;
- our ability to attract and retain advertising and marketing customers;
- the occurrence of planned or unplanned significant events, including events that may cause substantial stock-based compensation or other charges;
- the development and introduction of new products or services or changes in features of existing products or services;
- the impact of competitors or competitive products and services;
- the pricing of our products and services;
- our ability to maintain or increase revenue;
- our ability to maintain or improve gross margins, operating margins and net margins;
- increases in our costs and expenses that we may incur to grow and expand our operations and to remain competitive;
- system failure or outages, which could prevent us from displaying advertisements for any period of time;
- changes in GAAP and the related policies, guidance or interpretations;
· changes in the legal or regulatory environment or proceedings, including with respect to security, privacy or enforcement by government regulators, including fines, orders or consent decrees; and
· changes in Chinese or global business or macroeconomic conditions.

Given our limited operating history and the rapidly evolving market in which we compete, our historical operating results may not be useful to you in predicting our future operating results. Our short operating history and our rapid growth make it difficult for us to identify recurring seasonal trends in our business. The advertising industry in China experiences seasonality. Historically, advertising spending tends to be the lowest in the first quarter of each calendar year due to long holidays around the Lunar New Year, and we believe that this seasonality affects our quarterly results. In addition, economic concerns continue to create uncertainty and unpredictability and add risk to our future outlook. An economic downturn in China or globally could cause our advertising and marketing customers to reduce their advertising budgets, and result in other adverse effects that could harm our operating results. Other factors that may cause our operating results to fluctuate include popular sports events, such as the FIFA World Cup and the Olympic Games. For example, the Rio 2016 Olympics took place in the third quarter of 2016, impacted our revenues and operating results during the quarter of the event and perhaps in the adjacent quarters, though we are unable to isolate and quantify its impact. Due to our rapid growth and limited operating history, the seasonal trends that we have experienced in the past may not apply to, or be indicative of, our future operating results.

**Spam could diminish the user experience on our platform, which could damage our reputation and deter our current and potential users from using our products and services.**

“Spam” on Weibo refers to a range of abusive activities that are prohibited by our terms of service and is generally defined as unsolicited actions that negatively impact other users with the general goal of drawing user attention to a given account, site, product or idea. This includes posting large numbers of unsolicited mentions of a user, duplicate feeds, misleading links (e.g., to malware or click-jacking pages) or other false or misleading content, and aggressively following and un-following accounts, adding users to lists, sending unsolicited invitations, reposting feeds and favoriting feeds to inappropriately attract attention. Our terms of service also prohibit the creation of serial or bulk accounts, both manually or using automation, for disruptive or abusive purposes, such as to post spam or to artificially inflate the popularity of users seeking to promote themselves on Weibo. Although we continue to invest resources in reducing spam on Weibo, we expect spammers will continue to seek ways to act inappropriately on our platform. In addition, we expect that increases in the number of users on our platform will result in increased efforts by spammers to misuse our platform. We continuously combat spam, including by suspending or terminating accounts we believe to be spammers and launching algorithmic changes focused on curbing abusive activities. Our actions to combat spam require the diversion of significant time and focus of our engineering team from improving our products and services. If we are unable to effectively manage and reduce spam on Weibo, our reputation for delivering relevant content could be damaged, user engagement could decline and our operational costs could increase.
their Weibo identities, could increase the scope of access of hackers to user accounts. Our security measures may also be breached due to employee error, 
malfeasance or otherwise. Additionally, outside parties may attempt to fraudulently induce employees, users or customers to disclose sensitive information in 
to gain access to our data or our users’ or customers’ data or accounts, or may otherwise obtain access to such data or accounts. Since our users and 
customers may use their Weibo accounts to establish and maintain online identities, unauthorized communications from Weibo accounts that have been 
compromised may damage their reputations and brands as well as ours. Any such breach or unauthorized access could result in significant legal and financial 
exposure, damage to our reputation and a loss of confidence in the security of our products and services that could have an adverse effect on our business and 
operating results. Because the techniques used to obtain unauthorized access, disable or degrade service or sabotage systems change frequently and often are 
not recognized until launched against a target, we may be unable to anticipate these techniques or to implement adequate preventative measures. If an actual 
or perceived breach of our security occurs, the market perception of the effectiveness of our security measures could be harmed, we could lose users and 
customers and we may be exposed to significant legal and financial risks, including legal claims and regulatory fines and penalties. Any of these actions could 
have a material and adverse effect on our business, reputation and operating results.

Table of Contents

We rely on assumptions and estimates to calculate certain key operating metrics, and real or perceived inaccuracies in such metrics may harm our 
reputation and negatively affect our business.

The numbers of daily and monthly active users of Weibo are calculated using internal company data that has not been independently verified. While 
these numbers are based on what we believe to be reasonable calculations for the applicable periods of measurement, there are inherent challenges in 
measuring usage and user engagement across our large user base. For example, there are a number of false or spam accounts in existence on Weibo. Although 
we continuously combat spam by suspending or terminating these accounts, our active user number may include a number of false or spam accounts and 
therefore may not accurately represent the actual number of active accounts. We treat each account as a separate user for purposes of calculating our active 
users, because it may not always be possible to identify people and organizations that have set up more than one account. Additionally, some accounts used by 
organizations are used by many people within the organization. Accordingly, the calculations of our active users may not accurately reflect the actual number 
of people or organizations using Weibo.

We regularly review and may adjust our processes for calculating our internal metrics to improve their accuracy. Our measures of user growth and 
user engagement may differ from estimates published by third parties or from similarly titled metrics used by our competitors due to differences in 
methodology. If customers, platform partners or investors do not perceive our user metrics to be accurate representations of our user base or user engagement, 
or if we discover material inaccuracies in our user metrics, our reputation may be harmed and customers and platform partners may be less willing to allocate 
their spending or resources to Weibo, which could negatively affect our business and operating results.

Our business is highly sensitive to the strength of our brand and market influence, and we may not be able to maintain current or attract new users, 
customers and platform partners for our products and services if we do not continue to increase the strength of our brand and develop new brands 
successfully in the marketplace.

Our operational and financial performance is highly dependent on the strength of our brand and market influence. Such dependency will increase 
further as the number of internet and mobile users as well as the number of market entrants in China grows. In order to retain existing and attract new internet 
users, customers and platform partners, we may need to substantially increase our expenditures to create and maintain brand awareness and brand loyalty.

In addition, we receive a high degree of media coverage in Chinese communities around the world. Negative coverage in the media of our company, 
including about our product quality and reliability, changes to our products and services, privacy and security practices, litigation, regulatory activity, the 
actions of our users, or the experience of our users, platform partners and advertisers with our products and services, even if inaccurate, could threaten the 
perception of our brands. We cannot assure you that we will be able to defuse negative press coverage about our company to the satisfaction of our investors, 
users, customers and platform partners. If we are unable to defuse negative press coverage about our company, our brand may suffer in the marketplace, our 
operational and financial performance may be negatively impacted and the price of our ADSs may decline.

Table of Contents

If our goodwill or intangible assets become impaired, we may be required to record a significant charge to earnings.

We review our intangible assets for impairment when events or changes in circumstances indicate that the carrying value may not be recoverable, 
such as a decline in stock price and market capitalization. We test goodwill for impairment at least once a year. If such goodwill or intangible assets are 
deemed to be impaired, an impairment loss equal to the amount by which the carrying amount exceeds the fair value of the assets would be recognized. We 
may be required to record a significant charge in our financial statements during the period in which any impairment of goodwill or intangible assets is 
determined, which would negatively affect our results of operations. As of December 31, 2015 and 2016, the total amount of our goodwill and intangible 
assets was $13.1 million and $11.4 million, respectively.

The monetization of our services may require users to accept promoted marketing in their feeds or private messages, which may affect user 
experience and cause a decline in user traffic and a delay in our monetization.

Weibo users typically can log in to their personal accounts to view feeds and private messages from accounts that they have selected to follow. Social 
platform have been subject to negative comments, and even lawsuits, for introducing promoted advertising into their users’ information feeds. We started to 
test promoted products on Weibo at the end of 2012 and have also received user complaints. If we are unable to address user complaints adequately, user 
experience may be negatively affected, the monetization of our products and services may be delayed and our user base or user engagement may decline, 
which may adversely impact our operations.

New technologies could block our advertisements. Users of PC and mobile devices may enable technical measures that could hinder our traffic 
growth and limit our monetization opportunities.
Technologies have been developed that can disable the display of our advertisements and that provide tools to users to opt out of our advertising products. Most of our revenues are derived from fees paid to us by customers in connection with the display of advertisements to our users. In addition, our traffic growth is significantly dependent on content viewed via mobile devices, such as smartphones and tablets. Technologies and tools for personal computers and mobile devices, such as operating systems, internet browsers, anti-virus software and other applications, as well as mobile application stores could set up technical measures to divert user traffic, require a fee for the download of our products or block our products and services altogether, which could adversely affect our overall traffic and ability to monetize our products and services.

**Our business and growth could suffer if we are unable to hire and retain key personnel.**

We depend on the continued contributions of our senior management and other key employees, many of whom are difficult to replace. The loss of the services of any of our executive officers or other key employees could harm our business. Competition for qualified talent in China is intense. Our future success is dependent on our ability to attract a significant number of qualified employees and retain existing key employees. If we are unable to do so, our business and growth may be materially and adversely affected and the trading price of our ADSs could suffer. Our need to significantly increase the number of our qualified employees and retain key employees may cause us to materially increase compensation-related costs, including stock-based compensation.

**We have incurred and may continue to incur substantial stock-based compensation expenses.**

We have adopted share incentive plans in August 2010 and March 2014. See “Item 6.B. Directors, Senior Management and Employees—Compensation—Share Incentive Plans” for a detailed discussion. For the years ended December 31, 2014, 2015 and 2016, we recorded $13.8 million, $26.4 million and $36.9 million, respectively, in stock-based compensation expenses. We will continue to grant stock-based compensation in the future in order to attract and retain key personnel and employees. Consequently, our stock-based compensation expenses may be recurring and even significantly increase in absolute amount, which may have a material adverse effect on our results of operations.

---

**Table of Contents**

**Future investments in and acquisitions of complementary assets, technologies and businesses may fail and may result in equity or earnings dilution.**

We have in the past and may continue to invest in or acquire assets, technologies and businesses that are complementary to our existing business. Our investments or acquisitions may not yield the results we expect. In addition, investments and acquisitions could result in the use of substantial amounts of cash, potentially dilutive issuances of equity securities, significant amortization expenses related to intangible assets and exposure to potential unknown liabilities of the acquired business. Moreover, the cost of identifying and consummating investments and acquisitions, and integrating the acquired businesses into ours, may be significant, and the integration of acquired businesses may be disruptive to our existing business operations. In addition, we may have to obtain approval from the relevant PRC governmental authorities for the investments and acquisitions and comply with any applicable PRC rules and regulations, which may be costly. In the event that our investments and acquisitions are not successful, our financial condition and results of operations may be materially and adversely affected.

**Our financial results could be adversely affected by our long-term investments.**

We periodically review our long-term investments in publicly traded companies and privately held companies for impairment. If we conclude that any of these investments is impaired and that such impairment is other-than-temporary, we will write down the asset to its fair value and take a corresponding charge to our consolidated statements of comprehensive income (loss). For the fiscal years ended December 31, 2014, 2015 and 2016, we recognized an impairment charge of $2.5 million, $6.6 million and $36.4 million, respectively, on the carrying value of our long-term investments. We may continue to incur impairment charges in the future, which could depress our profitability or subject us to incur a net loss.

As of December 31, 2016, our long-term investments included $394.7 million in private companies, which may not have the resources nor level of controls in place like public companies to timely and accurately provide updates about their company to us. Furthermore, many of our investments are at an early, pre-revenue stage of development, and their impairment may be difficult to assess as market information on internet-related startups is not readily available. Determination of estimated fair value of these investments require complex and subjective judgments due to their limited financial and operating history, unique business risks and limited public information. Consequently, we may not receive information about our investments on a timely basis to properly account for them. We are unable to control these factors and an impairment charge recognized by us, especially untimely recorded, may adversely impact our financial results and share price.

Many of our products and services contain open source software, and we license some of our software through open source projects, which may pose particular risks to our proprietary software, products, and services in a manner that could have a negative effect on our business.

We use open source software in our products and services and will use open source software in the future. In addition, from time to time, we contribute software source code to open source projects under open source licenses or release internal software projects under open source licenses, and anticipate doing so in the future. The terms of many open source licenses to which we are subject have not been interpreted by domestic or foreign courts, and there is a risk that open source software licenses could be construed in a manner that imposes unanticipated conditions or restrictions on our ability to provide or distribute our products or services. Additionally, we may from time to time face claims from third parties claiming ownership of, or demanding release of, the open source software or derivative works that we developed using such software, which could include our proprietary source code, or otherwise seeking to enforce the terms of the applicable open source license. These claims could result in litigation and could require us to make our software source code freely available, purchase a costly license or cease offering the implicated products or services unless and until we can re-engineer them to avoid infringement. This re-engineering process could require significant additional research and development resources, and we may not be able to complete it successfully. In addition to risks related to license requirements, use of certain open source software can lead to greater risks than use of third-party commercial software, as open source licensors generally do not provide warranties or controls on the origin of software. Additionally, because any software source code we contribute to open source projects is publicly available, our ability to protect our intellectual property rights with respect to such software source code may be limited or lost entirely, and we are unable to prevent our competitors or others from using such contributed software source code. Any of these risks could be difficult to eliminate or manage, and, if not addressed, could have a negative effect on our business, financial condition and operating results.
We may not be able to adequately protect our intellectual property, which could cause us to be less competitive.

We rely on a combination of patent, copyright, trademark and trade secret laws and restrictions on disclosure to protect our intellectual property rights. Despite our efforts to protect our proprietary rights, third parties may attempt to copy or otherwise obtain and use our intellectual property or seek court declarations that they do not infringe upon our intellectual property rights. Monitoring unauthorized use of our intellectual property is difficult and costly, and we cannot be certain that the steps we have taken will prevent misappropriation of our intellectual property. From time to time, we may have to resort to litigation to enforce our intellectual property rights, which could result in substantial costs and diversion of our resources.

We may be subject to intellectual property infringement claims or other allegations by third parties for information or content displayed on, retrieved from or linked to our platform, or distributed to our users, which may materially and adversely affect our business, financial condition and prospects.

Companies in the internet, technology and media industries are frequently involved in litigation based on allegations of infringement of intellectual property rights, unfair competition, invasion of privacy, defamation, and other violations of others’ rights. The validity, enforceability and scope of protection of intellectual property rights in internet-related industries, particularly in China, are uncertain and still evolving. As we face increasing competition and as litigation becomes more common in China in resolving commercial disputes, we face a higher risk of being the subject of intellectual property infringement claims.

We allow users to upload written materials, images, pictures and other content on our platform and download, share, link to and otherwise access games and applications (some of which are developed by third parties) as well as audio, video and other content either on our platform or from other websites through our platform. We have procedures designed to reduce the likelihood that content might be used without proper licenses or third-party consents. However, these procedures may not be effective in preventing the unauthorized posting of copyrighted content.

With respect to games and applications available on our platform, we have procedures designed to reduce the likelihood of infringement. However, such procedures might not be effective in preventing games and applications, particularly those developed by third parties, from infringing upon other parties’ rights. We may face liability for copyright or trademark infringement, defamation, unfair competition, libel, negligence, and other claims based on the nature and content of the materials that are delivered, shared or otherwise accessed through our platform.

Defending intellectual property litigation is costly and can impose a significant burden on our management and employees, and there can be no assurances that favorable final outcomes will be obtained in all cases. Such claims, even if they do not result in liability, may harm our reputation. Any resulting liability or expenses, or changes required to our platform to reduce the risk of future liability, may have a material adverse effect on our business, financial condition and prospects.

User growth and engagement depend upon effective interoperation with operating systems, networks, devices, web browsers and standards that we do not control.

We make our products and services available across a variety of operating systems and through websites. We are dependent on the interoperability of our products and services with popular devices, desktop and mobile operating systems and web browsers that we do not control, such as Windows, Mac OS, Android, iOS, and others. Any changes in such systems, devices or web browsers that degrade the functionality of our products and services or give preferential treatment to competitive products or services could adversely affect usage of our products and services. Further, if the number of platforms for which we develop our products increases, it will result in an increase in our costs and expenses. In order to deliver high quality products and services, it is important that our products and services work well with a range of operating systems, networks, devices, web browsers and standards that we do not control. In addition, because a majority of our users access our products and services through mobile devices, we are particularly dependent on the interoperability of our products and services with mobile devices and operating systems. We may not be successful in developing relationships with key participants in the mobile industry or in developing products or services that operate effectively with these operating systems, networks, devices, web browsers and standards. In the event that it is difficult for our users to access and use our products and services, particularly on their mobile devices, our user growth and user engagement could be harmed, and our business and operating results could be adversely affected.

Our operations depend on the performance of the internet infrastructure and fixed telecommunications networks in China.

Almost all access to the internet in China is maintained through state-owned telecommunication operators under the administrative control and regulatory supervision of the Ministry of Industry and Information Technology, or the MIIT. Moreover, we primarily rely on a limited number of telecommunication service providers to provide us with data communications capacity through local telecommunications lines and internet data centers to host our servers. We have limited access to alternative networks or services in the event of disruptions, failures or other problems with China’s internet infrastructure or the fixed telecommunications networks provided by telecommunication service providers. Web traffic in China has experienced significant growth during the past few years. Effective bandwidth and server storage at internet data centers in large cities such as Beijing are scarce. With the expansion of our business, we may be required to upgrade our technology and infrastructure to keep up with the increasing traffic on our platform. We cannot assure you that the internet infrastructure and the fixed telecommunications networks in China will be able to support the demands associated with the continued growth in internet usage. If we are unable to increase our online content and service delivering capacity accordingly, we may not be able to continuously grow our traffic, and the adoption of our products and services may be hindered, which could adversely impact our business and our share price.

In addition, we have no control over the costs of the services provided by telecommunication service providers. If the prices we pay for telecommunications and internet services rise significantly, our results of operations may be materially and adversely affected. Furthermore, if internet access fees or other charges to internet users increase, particularly as content shifts toward video, some users may be prevented from accessing the internet and thus cause the growth of internet users to decelerate. Such deceleration may adversely affect our ability to continue to expand our user base and increase our attractiveness to online customers.
Our business and operating results may be harmed by service disruptions, or by our failure to timely and effectively scale and adapt our existing technology and infrastructure.

One of the reasons people come to Weibo is for real-time information. We have experienced, and may in the future experience, service disruptions, outages and other performance problems due to a variety of factors, including infrastructure changes, human or software errors, hardware failure, capacity constraints due to an overwhelming number of people accessing our products and services simultaneously, computer viruses and denial of service, fraud and security attacks. For example, in January 2013 a large number of our users temporarily lost access to their own Weibo Pages due to our failure to properly control software updates and other issues. Any disruption or failure in our infrastructure could hinder our ability to handle existing or increased traffic on our platform or cause us to lose content stored on our platform, which could significantly harm our business and our ability to retain existing users and attract new users.

As the number of our users increases and our users generate more content, including photos and videos on our platform, we may be required to expand and adapt our technology and infrastructure to continue to reliably store and analyze this content. It may become increasingly difficult to maintain and improve the performance of our products and services, especially during peak usage times, as our products and services become more complex and our user traffic increases. In addition, because we lease our data center facilities, we cannot be assured that we will be able to expand our data center infrastructure to meet user demand in a timely manner, or on favorable economic terms. We rely on SINA, our controlling shareholder, and third-party vendors to provide infrastructure services. We cannot assure you that their infrastructure will operate without interruptions and that we can maintain a relationship with these parties on favorable economic terms. If our users are unable to access Weibo or we are not able to make information available rapidly on Weibo, or at all, users may become frustrated and seek other channels to obtain the information, and may not return to Weibo or use Weibo as often in the future, or at all. This would negatively impact our ability to attract users and customers and maintain the level of engagement of our users.

We face risks related to health epidemics and natural disasters.

The insurance industry in China is still young and the business insurance products offered in China are limited. We do not have any business liability or disruption insurance coverage for our operations. Any business disruption, litigation or natural disaster may cause us to incur substantial costs and divert our resources.

We prioritize product innovation and user experience over short-term operating results, which may harm our revenues and operating results.

We encourage employees to quickly develop and help us launch new and innovative features. We focus on improving the user experience for our products and services and on developing new and improved products and services for the customers on our platform. We prioritize innovation and the experience for users and customers on Weibo over short-term operating results. We frequently make product and service decisions that may reduce our short-term operating results if we believe that the decisions are consistent with our goals to improve the user experience and performance for customers, which we believe will improve our operating results over the long term. These decisions may not be consistent with the short-term expectations of investors and may not produce the long-term benefits that we expect, in which case our user growth and user engagement, our relationships with customers and our business and operating results could be adversely and materially harmed. In addition, our focus on the user experience may negatively impact our relationships with our existing or prospective customers. This could result in a loss of customers and platform partners, which could adversely and materially harm our revenues and operating results.

We may face lawsuits or incur liability as a result of content published, made available through, or linked to our social media platform.

As a social media platform, we have faced and will continue to face liability relating to content that is published, made available through, or linked to our platform. In particular, the nature of our business exposes us to claims related to defamation, intellectual property rights, rights of publicity and privacy, illegal content, content regulation and personal injury torts. The law relating to the liability of providers of online products or services for activities of their users remains somewhat unsettled in China. In addition, the public nature of communications on our platform exposes us to risks arising from the creation of impersonation accounts intended to be attributed to our users or customers. We could incur significant costs investigating and defending these claims. If we incur costs or liability as a result of these events, our business, financial condition and operating results could be adversely affected.

We may be subject to litigation for user-generated content provided on our platform, which may be time-consuming and costly to defend.

Our platform is open to the public for posting user-generated content. Although we have required our users to post only legally compliant and inoffensive materials and have set up screening procedures, our screening procedures may fail to screen out all potentially offensive or non-compliant user-generated content, and, even if properly screened, a third party may still find user-generated content postings on our platform offensive and take action against us in connection with the posting of such information. As with other companies who provide user-generated content on their websites, we have had to deal with such claims in the past and anticipate that such claims will increase as user-generated content becomes more popular in China. Any such claim, with or without merit, could be time-consuming and costly to defend, and may result in litigation and divert management’s attention and resources.

We have limited business insurance coverage.

The insurance industry in China is still young and the business insurance products offered in China are limited. We do not have any business liability or disruption insurance coverage for our operations. Any business disruption, litigation or natural disaster may cause us to incur substantial costs and divert our resources.

We face risks related to health epidemics and natural disasters.

Our business could be adversely affected by the effects of Ebola virus disease, H1N1 flu, H7N9 flu, avian flu, Severe Acute Respiratory Syndrome, or SARS, or other epidemics. China reported a number of cases of SARS in 2003, which resulted in the closure of many businesses by the PRC government to prevent the transmission of SARS. In recent years, there have been reports of occurrences of avian flu in various parts of China, including a few confirmed human cases and deaths. In 2009, the global spread of H1N1 flu resulted in several confirmed infections and deaths in China. Our business operations could be disrupted if any of our employees is suspected of having Zika virus disease, Ebola virus disease, H1N1 flu, avian flu, SARS or other epidemics, since it could require our employees to be quarantined and/or our offices to be disinfected. In addition, our results of operations could be adversely affected to the extent that Zika virus disease, Ebola virus disease, H1N1 flu, avian flu, SARS or another outbreak harms the Chinese economy in general and the online advertising industry in particular.
We are also vulnerable to natural disasters and other calamities. Although we have servers that are hosted in an offsite location, our backup system does not capture data on a real-time basis and we may be unable to recover certain data in the event of a server failure. We cannot assure you that any backup systems will be adequate to protect us from the effects of fires, floods, typhoons, earthquakes, power loss, telecommunications failures, break-ins, war, riots, terrorist attacks or similar events. Any of the foregoing events may give rise to server interruptions, breakdowns, system failures, technology platform failures or internet failures, which could cause the loss or corruption of data or malfunctions of software or hardware as well as adversely affect our ability to provide products and services on our platform.

Risks Relating to Our Carve-out from SINA and Our Relationship with SINA

We have limited experience operating as a stand-alone public company.

We were incorporated in 2010 in the Cayman Islands as a wholly owned subsidiary of SINA. We have limited experience conducting our operations as a stand-alone public company. Prior to our initial public offering in April 2014, SINA has provided us with financial, administrative, sales and marketing, human resources and legal services, and also has provided us with the services of a number of its executives and employees. After we became a stand-alone public company, SINA has continued to provide us with certain support services, but to the extent SINA does not continue to provide us with such support, we will need to create our own support systems. We may encounter operational, administrative and strategic difficulties as we adjust to operating as a stand-alone public company. This may cause us to react more slowly than our competitors to industry changes and may divert our management’s attention from running our business or otherwise harm our operations.

In addition, since we have become a public company, our management team has been required to develop the expertise necessary to comply with the numerous regulatory and other requirements applicable to public companies, including requirements relating to corporate governance, listing standards and securities and investor relations issues. Prior to our initial public offering, we, as a subsidiary of SINA, were indirectly subject to requirements to maintain an effective internal control over financial reporting under Section 404 of the Sarbanes-Oxley Act of 2002. However, as a stand-alone public company, our management has to evaluate our internal control system independently with new thresholds of materiality, and to implement necessary changes to our internal control system. We cannot guarantee that we are able to do so in a timely and effective manner.

Our financial information included in this annual report may not be representative of our financial condition and results of operations if we had been operating as a stand-alone company for all periods presented.

Prior to the establishment of Weibo Corporation in 2010, the operations of our social media business were carried out by companies owned or controlled by SINA. For all periods presented, our consolidated financial statements include all assets, liabilities, revenues, expenses and cash flows that were directly attributable to our social media business whether held or incurred by SINA or by us. Only those assets and liabilities that are specifically identifiable to our business are included in our consolidated balance sheets. With respect to costs of operations of the social media business, an allocation of certain costs and expenses of SINA were also included. These allocations were made using a proportional cost allocation method by considering the proportion of revenues, infrastructure usage metrics, labor usage metrics among other things attributable to us. We made numerous estimates, assumptions and allocations in our historical financial statements because SINA did not account for us, and we did not operate as a stand-alone company for any period prior to our initial public offering. See “Item 7.B. Major Shareholders and Related Party Transactions—Related Party Transactions—Our Relationship with SINA” for our arrangements with SINA and “Item 5. Operating and Financial Review and Prospects” and the notes to our consolidated financial statements included elsewhere in this annual report for our historical cost allocation. Although our management believes that the assumptions underlying our financial statements and the above allocations are reasonable, our financial statements may not necessarily reflect our results of operations, financial position and cash flows as if we had operated as a stand-alone public company during the periods presented. Therefore, you should not view our historical results as indicators of our future performance.

We may not continue to receive the same level of support from SINA.

SINA is a leading internet media company in China, and our social media business has benefited significantly from SINA’s strong market position in China and its expertise in both internet and media-related businesses. For example, our advertising and marketing revenues have benefited from SINA’s ability to attract large brand advertisers that are interested in advertising on the internet. Although we have entered into a series of agreements with SINA relating to our ongoing business partnership and service arrangements with SINA, we cannot assure you we will continue to receive the same level of support from SINA as we now operate as a stand-alone public company.

Our agreements with SINA may be less favorable to us than similar agreements negotiated between unaffiliated parties. In particular, our non-competition agreement with SINA limits the scope of business that we are allowed to conduct.

We have entered into a series of agreements with SINA and the terms of such agreements may be less favorable to us than would be the case if they were negotiated with unaffiliated third parties. In particular, under the non-competition agreement we have entered into with SINA, we agree during the non-competition period (which will end on the later of (1) five years after the first date when SINA ceases to own in aggregate at least 20% of the voting power of our then outstanding securities and (2) the fifteenth anniversary of the completion of our initial public offering) not to compete with SINA in the business currently conducted by SINA, as described in its periodic filings with the SEC, other than the microblogging and social networking business currently operated by us and any business developed by us operating under either the domain names or the brands owned by us as of the date of the agreement. Such contractual limitations significantly affect our ability to diversify our revenue sources and may materially and adversely impact our business and prospects should the growth of social media in China slow down. In addition, pursuant to our master transaction agreement with SINA, we have agreed to indemnify SINA for liabilities arising from litigation and other contingencies related to our business and assumed these liabilities as part of our carve-out from SINA. The allocation of assets and liabilities between SINA and our company may not reflect the allocation that would have been reached by two unaffiliated parties. Moreover, so long as SINA continues to control us, we may not be able to bring a legal claim against SINA in the event of contractual breach, notwithstanding our contractual rights under the agreements described above and other inter-company agreements entered into from time to time.
As a controlled subsidiary of SINA, we have benefited significantly from our association with SINA in marketing our brand and our platform. For example, we have benefited by providing services to SINA’s clients. We also benefit from SINA’s strong brand recognition in China, which has provided us credibility and a broad marketing reach. If SINA loses its market position, the effectiveness of our marketing efforts through our association with SINA may be materially and adversely affected. In addition, any negative publicity associated with SINA will likely have an adverse impact on the effectiveness of our marketing as well as our reputation and our brand.

SINA will control the outcome of shareholder actions in our company.

SINA held 49.8% of our ordinary shares, representing 74.9% of our total voting power as of March 31, 2017. SINA has advised us that it does not anticipate disposing of its voting control in us in the near future. SINA’s voting power gives it the power to control actions that require shareholder approval under Cayman Islands law, our memorandum and articles of association and NASDAQ requirements, including the election and removal of a majority of our board of directors, approval of significant mergers and acquisitions and other business combinations, changes to our memorandum and articles of association, the number of shares available for issuance under share incentive plans, and the issuance of significant amounts of our ordinary shares in private placements.

SINA’s voting control may cause transactions to occur that might not be beneficial to you as a holder of ADSs and may prevent transactions that would be beneficial to you. For example, SINA’s voting control may prevent a transaction involving a change of control of us, including transactions in which you as a holder of our ADSs might otherwise receive a premium for your securities over the then-current market price. In addition, SINA is not prohibited from selling a controlling interest in us to a third party and may do so without your approval and without providing for a purchase of your ADSs. If SINA is acquired or otherwise undergoes a change of control, any acquirer or successor will be entitled to exercise the voting control and contractual rights of SINA, and may do so in a manner that could vary significantly from that of SINA.

Table of Contents

We are a “controlled company” within the meaning of the NASDAQ Stock Market Rules and, as a result, may rely on exemptions from certain corporate governance requirements that provide protection to shareholders of other companies.

We are a “controlled company” as defined under the NASDAQ Stock Market Rules because SINA holds more than 50% of our voting power. For so long as we remain a controlled company under that definition, we are permitted to elect to rely, and will rely, on certain exemptions from corporate governance rules, including:

- an exemption from the rule that our director nominees must be selected or recommended solely by independent directors; and
- an exemption from having a corporate governance and nominating committee that is composed entirely of independent directors with a written charter addressing the committee’s purpose and responsibilities.

As a result, you will not have the same protection afforded to shareholders of companies that are subject to these corporate governance requirements.

We may have conflicts of interest with SINA and, because of SINA’s controlling ownership interest in our company, we may not be able to resolve such conflicts on favorable terms for us.

Conflicts of interest may arise between SINA and us in a number of areas relating to our past and ongoing relationships. Potential conflicts of interest that we have identified include the following:

- Indemnification arrangements with SINA. We have agreed to indemnify SINA with respect to lawsuits and other matters relating to our social media business, including operations of that business when it was a private company and a subsidiary of SINA. These indemnification arrangements could result in our having interests that are adverse to those of SINA, for example, with respect to settlement arrangements in litigation. In addition, under these arrangements, we have agreed to reimburse SINA for liabilities incurred (including legal defense costs) in connection with any litigation, while SINA will be the party prosecuting or defending the litigation.

- Non-competition arrangements with SINA. We and SINA have entered into a non-competition agreement under which we agree not to compete with each other’s core business. SINA agrees not to compete with us in a business that is of the same nature as the microblogging and social networking business operated by us as of the date of the agreement. We agree not to compete with SINA in the business currently conducted by SINA, as described in its periodic filings with the SEC, other than the microblogging and social networking business operated by us as of the date of the agreement.

- Employee recruiting and retention. Because both SINA and we are engaged internet-related businesses in China, we may compete with SINA in the hiring of new employees, in particular with respect to media and advertising-related matters. We have a non-solicitation arrangement with SINA that restricts us and SINA from hiring any of each other’s employees.

- Our board members or executive officers may have conflicts of interest. Two directors of our company are also executive officers of SINA. In addition, we may continue to grant incentive share compensation to SINA’s employees and consultants from time to time. These relationships could create, or appear to create, conflicts of interest when these persons are faced with decisions with potentially different implications for SINA and us.

- Sale of shares in our company. SINA may decide to sell all or a portion of our shares that it holds to a third party, including to one of our competitors, thereby giving that third party substantial influence over our business and our affairs. Such a sale could be contrary to the interests of our employees or our other shareholders.
Allocation of business opportunities. Business opportunities may arise that both we and SINA find attractive, and which would complement our respective businesses. SINA may decide to take the opportunities itself, which would prevent us from taking advantage of those opportunities.

Developing business relationships with SINA’s competitors. So long as SINA remains as our controlling shareholder, we may be limited in our ability to do business with its competitors, such as other online media companies in China. This may limit our ability to market our services for the best interests of our company and our other shareholders.

Although our company has become a stand-alone public company, we expect to operate, for as long as SINA is our controlling shareholder, as an affiliate of SINA. SINA may from time to time make strategic decisions that it believes are in the best interests of its business as a whole, including our company. These decisions may be different from the decisions that we would have made on our own. SINA’s decisions with respect to us or our business may be resolved in ways that favor SINA and therefore SINA’s own shareholders, which may not coincide with the interests of our other shareholders. We may not be able to resolve any potential conflicts, and even if we do so, the resolution may be less favorable to us than if we were dealing with a non-controlling shareholder. Even if both parties seek to transact business on terms intended to approximate those that could have been achieved among unaffiliated parties, this may not succeed in practice.

Risks Relating to Our Corporate Structure

Substantial uncertainties exist with respect to the enactment timetable, final content, interpretation and implementation of draft PRC Foreign Investment Law published for public comments and how it may impact the viability of our current corporate structure, corporate governance and business operations.

The Ministry of Commerce published a discussion draft of the proposed Foreign Investment Law in January 2015 aiming to, upon its enactment, replace the trio of existing laws regulating foreign investment in China, namely, the Sino-foreign Equity Joint Venture Enterprise Law, the Sino-foreign Cooperative Joint Venture Enterprise Law and the Wholly Foreign-invested Enterprise Law, together with their implementation rules and ancillary regulations. The draft Foreign Investment Law embodies an expected PRC regulatory trend to rationalize its foreign investment regulatory regime in line with prevailing international practice and the legislative efforts to unify the corporate legal requirements for both foreign and domestic investments. The Ministry of Commerce solicited comments on this draft in 2015, but there is no timetable as to when it will be enacted. As such, substantial uncertainties exist with respect to its enactment timetable, final content, interpretation and implementation. The draft Foreign Investment Law, if enacted as proposed, may materially impact the viability of our current corporate structure, corporate governance and business operations in many aspects.

Among other things, the draft Foreign Investment Law expands the definition of foreign investment and introduces the principle of “actual control” in determining whether a company is considered a foreign-invested enterprise, or an FIE. The draft Foreign Investment Law specifically provides that entities established in China but “controlled” by foreign investors will be treated as FIEs, whereas an entity set up in a foreign jurisdiction would nonetheless be, upon market entry clearance by the Ministry of Commerce, treated as a PRC domestic investor provided that the entity is “controlled” by PRC entities and/or citizens. In this connection, “control” is broadly defined in the draft law to cover the following summarized categories: (i) holding 50% of more of the voting rights of the subject entity; (ii) holding less than 50% of the voting rights of the subject entity but having the power to secure at least 50% of the seats on the board or other equivalent decision making bodies, or having the voting power to exert material influence on the board, the shareholders’ meeting or other equivalent decision making bodies; or (iii) having the power to exert decisive influence, via contractual or trust arrangements, over the subject entity’s operations, financial matters or other key aspects of business operations. Once an entity is determined to be an FIE, it will be subject to the foreign investment restrictions or prohibitions set forth in a “negative list,” separately issued by the State Council, if the FIE is engaged in the industry listed in the negative list. Unless the underlying business of the FIE falls within the negative list, which calls for market entry clearance by the Ministry of Commerce, prior approval from the government authorities as mandated by the existing foreign investment legal regime would no longer be required for establishment of the FIE.

The VIE structure has been adopted by many PRC-based companies, including us, to obtain necessary licenses and permits in the industries that are currently subject to foreign investment restrictions in China. See “Item 4.C. Information on the Company—Organizational Structure—Contractual Arrangements with Weimeng and Its Shareholders” and “Item 3. Key Information—D. Risk Factors—Risks Relating to Our Corporate Structure.” Under the draft Foreign Investment Law, variable interest entities, or VIEs, that are controlled via contractual arrangement would also be deemed as FIEs, if they are ultimately “controlled” by foreign investors. Therefore, for any companies with a VIE structure in an industry category that is on the “negative list,” the VIE structure may be deemed legitimate only if the ultimate controlling person(s) is/are of PRC nationality (either PRC companies or PRC citizens). Conversely, if the actual controlling person(s) is/are of foreign nationalities, variable interest entities will be treated as FIEs and any operation in the industry category on the “negative list” without market entry clearance may be considered illegal. The internet content services, which we conduct through Weimeng, is subject to foreign investment restrictions set forth in the Catalogue for the Guidance of Foreign Investment Industries issued by the National Development and Reform Commission and the Ministry of Commerce in March 2015, or the Catalogue.

SINA is our controlling shareholder. Whether we will be considered as ultimately controlled by Chinese parties relies on whether SINA will be considered as ultimately controlled by Chinese parties. However, the draft Foreign Investment Law has not taken a position on what actions shall be taken with respect to the existing companies with a VIE structure, whether or not these companies are controlled by Chinese parties, while it is soliciting comments from the public on this point. If the enacted version of the Foreign Investment Law mandate further actions, such as market entry clearance with the Ministry of Commerce, to be completed by companies with existing VIE structure like us, we face uncertainties as to whether such clearance can be timely obtained, or at all.

The draft Foreign Investment Law, if enacted as proposed, may also materially impact our corporate governance practice and increase our compliance costs. For instance, the draft Foreign Investment Law imposes stringent ad hoc and periodic information reporting requirements on foreign investors and the applicable FIEs. Aside from investment implementation report and investment amendment report that are required at each investment and alteration of investment specifics, an annual report is mandatory, and large foreign investors meeting certain criteria are required to report on a quarterly basis. Any company found to be non-compliant with these information reporting obligations may potentially be subject to fines and/or administrative or criminal liabilities, and the persons directly responsible may be subject to criminal liabilities.
Current PRC laws and regulations impose certain restrictions or prohibitions on foreign ownership of companies that engage in internet and other related businesses, including the provision of internet content and online game operations. Specifically, foreign ownership of an internet content provider may not exceed 50%. We are a company registered in the Cayman Islands and Weibo Technology, our PRC subsidiary, is considered a foreign-invested enterprise. To comply with PRC laws and regulations, we conduct our business in China through Weimeng, and its subsidiaries based on a series of contractual arrangements by and among Weibo Technology, Weimeng and its shareholders. As a result of these contractual arrangements, we exert control over Weimeng and consolidate its operating results in our financial statements under U.S. GAAP. Weimeng holds the licenses, approvals and key assets that are essential for our business operations.

In the opinion of our PRC counsel, TransAsia Lawyers, our current ownership structure, the ownership structure of our PRC subsidiary and Weimeng, and the contractual arrangements among our PRC subsidiary, Weimeng and its shareholders are in compliance with existing PRC laws, rules and regulations. There are, however, substantial uncertainties regarding the interpretation and application of current or future PRC laws and regulations. Thus, we cannot assure you that the PRC government will not ultimately take a view contrary to the opinion of our PRC counsel. If we are found in violation of any PRC laws or regulations, the relevant governmental authorities would have broad discretion in dealing with such violation, including, without limitation, levying fines, restricting our right to collect revenues, confiscating our income or the income of Weimeng, revoking our business licenses or the business licenses of Weimeng, requiring us to restructure our ownership structure or operations, and requiring us or Weimeng to discontinue any portion or all of our business. Any of these actions could cause significant disruption to our business operations and may materially and adversely affect our business, financial condition and results of operations.

Although we have been advised by our PRC counsel, TransAsia Lawyers, that these contractual arrangements are valid, binding and enforceable under existing PRC laws and regulations, these contractual arrangements may not be as effective in providing control over Weimeng as direct ownership. If Weimeng or its shareholders fail to perform their respective obligations under the contractual arrangements, we may incur substantial costs and expend substantial resources to enforce our rights. All of these contractual arrangements are governed by and interpreted in accordance with PRC law, and disputes arising from these contractual arrangements will be resolved through arbitration in China. However, the legal system in China, particularly as it relates to arbitration proceedings, is not as developed as in other jurisdictions, such as the United States. See “Item 3.D. Key Information—Risk Factors—Risks Relating to Doing Business in China—Uncertainties in the interpretation and enforcement of PRC laws and regulations could limit the legal protections available to you and us.” There are very few precedents and little official guidance as to how contractual arrangements in the context of a variable interest entity should be interpreted or enforced under PRC law. There remain significant uncertainties regarding the ultimate outcome of arbitration should legal action become necessary. These uncertainties could limit our ability to enforce these contractual arrangements. In addition, arbitration awards are final and can only be enforced in PRC courts through arbitration award recognition proceedings, which could cause additional expenses and delays. In the event we are unable to enforce these contractual arrangements or we experience significant delays or other obstacles in enforcing these contractual arrangements, we may not be able to exert effective control over our affiliated entities and may lose control over the assets owned by Weimeng and its subsidiaries. As a result, we may be unable to consolidate Weimeng and its subsidiaries in our consolidated financial statements, our ability to conduct our business may be negatively affected, and our business operations could be severely disrupted, which could materially and adversely affect our results of operations and financial condition.

Weimeng’s shareholders are non-executive PRC employees of our company or SINA and only hold immaterial equity interest in our company. Although each of these shareholders has authorized Weibo Technology to exercise all of his voting powers in Weimeng, and we may replace any of these shareholders at any time pursuant to the share transfer agreements, we cannot assure you that these shareholders will act in the best interest of our company should any conflict arise. If they were to act in bad faith towards us, we may have to take legal actions to enforce their contractual obligations, which may be expensive, time-consuming and disruptive to our operations. As there remain significant uncertainties regarding the ultimate outcome of a legal action due to the limited number of precedents and lack of official guidance as to how contractual arrangements in the context of a variable interest entity should be interpreted or enforced under PRC law, we cannot assure you that conflicts will be resolved in our favor. If we are unable to resolve any such conflicts, or if we suffer significant delays or other obstacles as a result of such conflicts, our business and operations could be severely disrupted, which could materially and adversely affect our results of operations and financial condition.

We may lose the ability to use and enjoy assets held by Weimeng that are important to the operation of our business if Weimeng declare bankruptcy or becomes subject to a dissolution or liquidation proceeding.

Weimeng holds certain assets that are important to our business operations, including the Internet Content Provision License, the Online Culture Operating Permit, domain names and our investments. Under our contractual arrangements with Weimeng, the shareholders of Weimeng may not voluntarily
liquidate Weimeng or approve Weimeng to sell, transfer, mortgage or dispose of its assets or legal or beneficial interests in the business in any manner without our prior consent. However, in the event that the shareholders breach this obligation and voluntarily liquidate Weimeng, or Weimeng declares bankruptcy, or all or part of its assets become subject to liens or rights of third-party creditors, we may be unable to continue some or all of our business operations, which could materially and adversely affect our business, financial condition and results of operations. Furthermore, if Weimeng or its subsidiaries undergoes a voluntary or involuntary liquidation proceeding, their shareholders or unrelated third-party creditors may claim rights to some or all of their assets, thereby hindering our ability to operate our business, which could materially and adversely affect our business, financial condition and results of operations.

**Contractual arrangements we have entered into with Weimeng may be subject to scrutiny by the PRC tax authorities. A finding that we owe additional taxes could substantially reduce our consolidated net income and the value of your investment.**

Pursuant to applicable PRC laws and regulations, arrangements and transactions among related parties may be subject to audit or challenge by the PRC tax authorities. We may be subject to adverse tax consequences if the PRC tax authorities determine that the contractual arrangements among our PRC subsidiary, Weimeng and its shareholders are not on an arm’s length basis and therefore constitute favorable transfer pricing. As a result, the PRC tax authorities could require that Weimeng adjust its taxable income upward for PRC tax purposes. Such a pricing adjustment could adversely affect us by increasing Weimeng’s tax expenses without reducing the tax expenses of our PRC subsidiary, subjecting Weimeng to late payment fees and other penalties for under-payment of taxes, and resulting in our PRC subsidiary’s loss of its preferential tax treatment. Our results of operations may be adversely affected if Weimeng’s tax liabilities increase or if it is subject to late payment fees or other penalties.

If the chops of our PRC subsidiary, Weimeng and its subsidiaries are not kept safely, are stolen or are used by unauthorized persons or for unauthorized purposes, the corporate governance of these entities could be severely and adversely compromised.

In China, a company chop or seal serves as the legal representation of the company towards third parties even when unaccompanied by a signature. Each legally registered company in China is required to maintain a company chop, which must be registered with the local Public Security Bureau. In addition to this main chop, companies may have several other chops which can be used for specific purposes. The chops of our PRC subsidiary, Weimeng and its subsidiaries are generally held securely by personnel designated or approved by us in accordance with our internal control procedures. To the extent those chops are not kept safely, are stolen or are used by unauthorized persons or for unauthorized purposes, the corporate governance of these entities could be severely and adversely compromised and those corporate entities may be bound to abide by the terms of any documents so chopped, even if they were chopped by an individual who lacked the requisite power and authority to do so. In addition, if the holders of such chops at Weimeng failed to employ them in accordance with the terms of the various VIE-related agreements or removed them from the premises, the operation of Weimeng could be significantly and adversely impacted.

**Risks Relating to Doing Business in China**

**Regulation and censorship of information disseminated over the internet in China may adversely affect our business and subject us to liability for information displayed on our platform.**

The PRC government has adopted regulations governing internet access and the distribution of information over the internet. Under these regulations, internet content providers and internet publishers are prohibited from posting or displaying the internet content that, among other things, impairs the national dignity of China, is reactionary, obscene, superstitious, fraudulent or defamatory, or otherwise violates PRC laws and regulations. Failure to comply with these requirements may result in the revocation of licenses to provide internet content and other licenses and the closure of the concerned websites and levying of fines. The website operator may also be held liable for such censored information displayed on or linked to the website.

**Substantial uncertainties exist with respect to the interpretation and implementation of Cyber Security Law as well as any impact it may have on our business operations.**
On July 1, 2015, the Standing Committee of the National People’s Congress issued the National Security Law, which came into effect on the same day. The National Security Law provides that the state shall safeguard the sovereignty, security and cybersecurity development interests of the state, and that the state shall establish a national security review and supervision system to review, among other things, foreign investment, key technologies, internet and information technology products and services, and other important activities that are likely to impact the national security of China.

On November 7, 2016, the Standing Committee of the National People’s Congress issued the Cyber Security Law, which will come into effect on June 1, 2017. This is the first Chinese law that focuses exclusively on cyber security. The Cyber Security Law provides that network operators must set up internal security management systems that meets the requirements of a classified protection system for cybersecurity, including appointing dedicated cybersecurity personnel, taking technical measures to prevent computer viruses, network attacks and intrusions, taking technical measures to monitor and record network operation status and cybersecurity incidents, and taking data security measures such as data classification, backups and encryption. The Cybersecurity Law also imposes a relatively vague but broad obligation to provide technical support and assistance to the public and state security authorities in connection with criminal investigations or for reasons of national security. The Cybersecurity Law also requires network operators that provide network access or domain name registration services, landline or mobile phone network access, or that provide users with information publication or instant messaging services, to require users to provide a real identity when they sign up.

We do not believe that we are an operator of “key information infrastructure” as defined in the Cyber Security Law. However, there is no assurance that we may not be considered an operator of “key information infrastructure” in the future as the definition is not precise, and there are substantial uncertainties as to the ultimate interpretation and implementation of the Cyber Security Law. The Cyber Security Law, if enacted as proposed, could cause us to incur substantial costs or require us to change our business practices in a manner materially adverse to our business.

We are required to verify the identities of all of our users who post on Weibo, but have not been able to do so, and our noncompliance exposes us to potentially severe penalty by the Chinese government.

The Rules on the Administration of Microblog Development, issued by the Beijing Municipal Government in 2011, stipulate that users who post publicly on microblogs are required to disclose their real identity to the microblogging service provider, though they may still use pen names on their accounts. Microblogging service providers are required to verify the identities of their users. In addition, microblogging service providers based in Beijing were required to verify the identities of all of their users by March 16, 2012, including existing users who post publicly on their websites. Furthermore, pursuant to the Cyber Security Law passed by the Standing Committee of the National People’s Congress, which will come into effect on June 1, 2017, we will also be required to verify users’ real identities when they sign up. The user identity verification requirements have deterred new users from completing their registrations on Weibo, and a significant portion of the registrations in which user identity information was provided were rejected because they do not match the Chinese government database.

We have made significant efforts to comply with the user verification requirements. However, for reasons including existing user behaviors, the nature of the microblogging product and the lack of clarity on specific implementation procedures, we have not been able to verify the identities of all of the users who post content publicly on Weibo. While the rules are not clear regarding the type and extent of penalties that may be imposed on non-compliant microblogging service providers, we are potentially liable for our noncompliance and may be subject to penalties including the deactivation of certain features on Weibo, termination of Weibo operations or other penalties imposed by the Chinese government. Any of the above actions may have a material and adverse impact on the trading price of our ADSs.

Regulatory investigations could cause us to incur additional expenses or change our business practices in a manner materially adverse to our business.

We may be subject to regulatory investigations and audits in the future as we continue to grow and expand our operations. It is possible that a regulatory investigation might result in changes to our policies or practices, and may cause us to incur substantial costs or could result in reputational harm, prevent us from offering certain products, services, features or functionalities, cause us to incur substantial costs or require us to change our business practices in a manner materially adverse to our business.

We may have to register our encryption software with Chinese regulatory authorities, and if they request that we change our encryption software, our business operations could be disrupted as we develop or license replacement software.

Pursuant to the Regulations for the Administration of Commercial Encryption promulgated in 1999, foreign and domestic companies operating in China are required to seek approval from the Office of the State for Cipher Code Administration, the Chinese encryption regulatory authority, for the commercial encryption products they use. Companies operating in China are allowed to use only commercial cipher code products approved by this authority and are prohibited to use self-developed or imported cipher code products without approval. In addition, all cipher code products shall be produced by those producers appointed and approved by this authority. Additional rules became effective in 2006 regulating many aspects of commercial cipher code products in detail, including development, production and sales.
Because these regulations do not specify what constitutes a cipher code product, we are unsure as to whether or how they apply to us and the encryption software we utilize. We may be required to register or apply for permits for our current or future encryption software. If the PRC authorities request that we register our encryption software or change our current encryption software to an approved cipher code product produced by an appointed producer, it could disrupt our business operations.

**Regulations on virtual currency may adversely affect our game operations revenues.**

We have provided Weibo Credit as an online virtual currency for users to purchase in-game virtual items or other types of fee-based services on our platform. The Notice on the Strengthening of Administration on Online Game Virtual Currency, jointly issued by the Ministry of Culture and the Ministry of Commerce in 2009, broadly defined virtual currency as a type of virtual exchange instrument issued by internet game operation enterprises, purchased directly or indirectly by the game users by exchanging legal currency at a certain exchange rate, saved outside the game programs, stored in servers provided by the internet game operation enterprises in electronic record format and represented by specific numeric units. Virtual currency is used to exchange internet game services provided by the issuing enterprise for a designated extent and time, and is represented by several forms, such as online prepaid game cards, prepaid amounts or internet game points, and does not include game props obtained from playing online games. In 2009, the Ministry of Culture further promulgated the Filing Guidelines on Online Game Virtual Currency Issuing Enterprises and Online Game Virtual Currency Trading Enterprises, which specifically defines “issuing enterprise” and “trading enterprise” and stipulates that a single enterprise may not operate both types of business. Although we believe we do not offer online game virtual currency trading services, we cannot assure you that the PRC regulatory authorities will not take a view contrary to ours, in which case we may be subject to fines or even required by the PRC regulators to change our practices related to Weibo Credit, which consequently will have an adverse effect on our game-related revenues.

**Adverse changes in economic and political policies of the PRC government could have a material and adverse effect on overall economic growth in China, which could materially and adversely affect our business.**

Substantially all of our operations are conducted in China and substantially all of our revenues are sourced from China. Accordingly, our results of operations, financial condition and prospects are influenced by economic, political and legal developments in China. Economic reforms begun in the late 1970s have resulted in significant economic growth. However, any economic reform policies or measures in China may from time to time be modified or revised. China’s economy differs from the economies of most developed countries in many respects, including the extent of the government involvement, level of development, growth rate, control of foreign exchange and allocation of resources. The PRC government exercises significant control over China’s economic growth through strategically allocating resources, controlling the payment of foreign currency-denominated obligations, setting monetary policy and providing preferential treatment to particular industries or companies. While the PRC economy has experienced significant growth in the past 30 years, growth has been uneven across different regions and between economic sectors, and that growth may not continue, as evidenced by the slowing of the growth of the Chinese economy since 2012. Any adverse changes in economic conditions in China, in the policies of the Chinese government or in the laws and regulations in China could have a material adverse effect on the overall economic growth of China. Such developments could adversely affect our business and operating results, lead to reduction in demand for our products and services and adversely affect our competitive position.

**The slowdown of new smartphone shipment in China may lead to the slowdown of growth rate of our new users, which could materially and adversely affect our business.**

The annual growth rate of smartphone shipment in China dropped significantly in 2015, as compared to the last several years. Weibo’s user growth rate is highly dependent on the growth of new users from Weibo app, and pre-installation of Weibo app on new smartphones is an important source of new Weibo users. A continuing slowdown of new smartphone shipment in China may adversely impact the growth rate of our new users. If this trend continues, our business and operating results may be materially and adversely affected.

**Table of Contents**

**Uncertainties in the interpretation and enforcement of PRC laws and regulations could limit the legal protections available to you and us.**

The PRC legal system is a civil law system based on written statutes. Unlike the common law system, prior court decisions may be cited for reference but have limited precedential value.

In 1979, the PRC government began to promulgate a comprehensive system of laws and regulations governing economic matters in general. The overall effect of legislation over the past three decades has significantly enhanced the protections afforded to various forms of foreign investments in China. However, China has not developed a fully integrated legal system, and recently enacted laws and regulations may not sufficiently cover all aspects of economic activities in China. In particular, the interpretation and enforcement of these laws and regulations involve uncertainties. Since PRC administrative and court authorities have significant discretion in interpreting and implementing statutory and contractual terms, it may be difficult to evaluate the outcome of administrative and court proceedings and the level of legal protection available to you and us.

Furthermore, the PRC legal system is based in part on government policies and internal rules, some of which are not published on a timely basis or at all, and which may have a retroactive effect. As a result, we may not be aware of our violation of any of these policies and rules until sometime after the violation. Such uncertainties, including uncertainty over the scope and effect of our contractual, property (including intellectual property) and procedural rights, and any failure to respond to changes in the regulatory environment in China could materially and adversely affect our business and impede our ability to continue our operations.

**We may be adversely affected by the complexity, uncertainties and changes in PRC licensing and regulation of internet businesses.**

The PRC government extensively regulates the internet industry, including the licensing and permit requirements pertaining to companies in this industry. Internet-related laws and regulations in China are relatively new and evolving, and their interpretation and enforcement involve significant uncertainty. As a result, it may be difficult to determine what actions or omissions may be deemed to be violations of applicable laws and regulations in certain circumstances.

Weimeng holds an Internet Content Provision License and an Online Culture Operating Permit that are necessary for operating our current business in China. Weimeng also holds an inter-regional Value-Added Telecommunications Services Operating License for provision of value-added telecommunication services nationwide. However, we cannot assure you that we have obtained all the permits or licenses required for conducting our
business in China or will be able to maintain our existing licenses or obtain any new licenses if required by any new laws or regulations. Weimeng is currently in the process of applying for an internet publishing permit. See “Item 4.B. Information on the Company—Business Overview—Regulation—Regulations on Online Game Operations and Cultural Products.” In addition, companies engaging in internet broadcasting activities must first obtain an audio/video program transmission license. See “Item 4.B. Information on the Company—Business Overview—Regulation—Regulations on Broadcasting Audio/Video Programs through the Internet” for more details. Currently, all the audio/video programs posted on our website are delivered through third-party websites. Weimeng is not qualified to obtain the internet audio/video program transmission license under the current legal regime as it is not a wholly state-owned or state-controlled company and it was not operating prior to the issuance of the Rules for the Administration of Internet Audio and Video Program Services, commonly known as Circular 56. Weimeng plans to apply for an internet audio/video program transmission license when feasible to do so. Further, we may need to apply for an internet news publication license. See “Item 4.B. Information on the Company—Business Overview—Regulation—Regulations on Internet News Dissemination.” If we fail to obtain such licenses or any additional licenses required by new laws and regulations in a timely manner or at all, we could be subject to liabilities, penalties and operational disruption.

Foreign investment in online game operation is prohibited under PRC law. We currently provide our online game services through Weimeng and its subsidiaries. However, certain contracts relating to our online game services were entered into between our PRC subsidiary, Weimeng and the game developers, under which our PRC subsidiary, together with Weimeng, provides certain technical services through our website. Under these agreements, our PRC subsidiary, a foreign-invested enterprise, may be deemed to be providing value-added telecommunication services without the necessary licenses. If so, we may be subject to sanctions, including payment of delinquent taxes and fines, which may significantly disrupt our operations and materially and adversely affect our business, results of operations and financial condition.

We may transfer funds to our PRC subsidiary or finance our PRC subsidiary by means of shareholder loans or capital contributions. Any loans from us to our PRC subsidiary, which is a foreign-invested enterprise, cannot exceed statutory limits based on the difference between the registered capital and the investment amount of such subsidiary, and shall be registered with the State Administration for Foreign Exchange, or SAFE, or its local counterparts. Any capital contributions we make to our PRC subsidiary shall be approved by the Ministry of Commerce or its local counterparts. We may not be able to obtain these government registrations or approvals on a timely basis, if at all. If we fail to receive such registrations or approvals, our ability to provide loans or capital contributions to our PRC subsidiary in a timely manner may be negatively affected, which could materially and adversely affect our liquidity and our ability to fund and expand our business.

On March 30, 2015, SAFE issued the Circular on Reform of the Administrative Rules of the Payment and Settlement of Foreign Exchange Capital of Foreign-Invested Enterprises, or SAFE Circular 19, which became effective on June 1, 2015. SAFE Circular 19 adopts a concept of “discretionary conversion,” which is defined as the conversion of a foreign-invested enterprise’s foreign currency registered capital in accordance with the enterprise’s actual business needs. No review of the purpose of the funds is required at the time of conversion under SAFE Circular 19. However, use of any RMB funds converted from its registered capital shall be based on true transactions. In addition, equity investments using converted registered capital are no longer prohibited under SAFE Circular 19. Nevertheless, foreign-invested enterprise like our PRC subsidiary is still not allowed to extend intercompany loans to Weimeng.

SAFE issued the Circular on Reforming and Regulating Policies on the Control over Foreign Exchange Settlement of Capital Accounts, or SAFE Circular 16, on June 9, 2016, which became effective on the same day. Pursuant to SAFE Circular 16, enterprises registered in the PRC may also convert their foreign debts from foreign currency to RMB on self-discretionary basis. SAFE Circular 16 provides an integrated standard for conversion of foreign exchange under capital account items (including but not limited to foreign currency capital and foreign debts) on self-discretionary basis which applies to all enterprises registered in the PRC. SAFE Circular 16 reiterates the principle that RMB converted from foreign currency-denominated capital of a company may not be directly or indirectly used for purposes beyond its business scope or prohibited by PRC laws or regulations, while such converted RMB shall not be provided as loans to its non-affiliated entities, or used for construction and purchase of non-self-used real estate (excluding real estate enterprises) or unless otherwise expressly provided in law, directly or indirectly used in securities investment or other financial management excluding the bank capital preservation products. As SAFE Circular 16 is newly issued and SAFE has not provided detailed guidelines with respect to its interpretation or implementation, it is uncertain how these rules will be interpreted and implemented.
We believe that neither our company nor our Hong Kong subsidiary is a PRC resident enterprise because neither our company nor our Hong Kong subsidiary meets all of the conditions enumerated. For example, board and shareholders’ resolutions of our company and our Hong Kong subsidiary are adopted in Hong Kong and the minutes and related files are kept in Hong Kong. However, if the PRC tax authorities were to disagree with our position, our company and/or our Hong Kong subsidiary may be subject to PRC enterprise income tax reporting obligations and to a 25% enterprise income tax on our global income. Under the implementation rules of the Enterprise Income Tax Law, “de facto management body” is defined as the organizational body which effectively manages and controls the production and business operation, personnel, accounting, properties and other aspects of operations of an enterprise.

Pursuant to the Notice Regarding the Determination of Chinese-Controlled Offshore Incorporated Enterprises as PRC Tax Resident Enterprises on the Basis of De Facto Management Bodies, issued by the State Administration of Taxation in 2009, a foreign enterprise controlled by PRC enterprises or PRC enterprise groups is considered a PRC resident enterprise if all of the following conditions are met: (i) the senior management and core management departments in charge of daily operations are located mainly within the PRC; (ii) financial and human resources decisions are subject to determination or approval by persons or bodies in the PRC; (iii) major assets, accounting books, company seals and minutes and files of board and shareholders’ meetings are located or kept within the PRC; and (iv) at least half of the enterprise’s directors with voting rights or senior management reside within the PRC. Although the notice states that these standards only apply to offshore enterprises that are controlled by PRC enterprises or PRC enterprise groups, such standards may reflect the general view of the State Administration of Taxation in determining the tax residence of foreign enterprises.

Any limitation on the ability of our PRC subsidiary to make payments to us, or the tax implications of making payments to us, could have a material adverse effect on our ability to conduct our business or our financial condition.

We are a holding company, and we rely principally on dividends and other distributions from our PRC subsidiary for our cash needs, including the funds necessary to pay dividends to our shareholders or service any debt we may incur. Current PRC regulations permit our PRC subsidiary to pay dividends only out of its accumulated profits, if any, determined in accordance with PRC accounting standards and regulations. In addition, our PRC subsidiary is required to set aside at least 10% of its after tax profits each year, if any, to fund certain statutory reserve funds until the aggregate amount of such reserve funds reaches 50% of its registered capital. Apart from these reserves, our PRC subsidiary may allocate a discretionary portion of its after-tax profits to staff welfare and bonus funds at its discretion. These reserves and funds are not distributable as cash dividends. Furthermore, if our PRC subsidiary incurs debt, the debt instruments may restrict its ability to pay dividends or make other payments to us. We cannot assure you that our PRC subsidiary will generate sufficient earnings and cash flows in the near future to pay dividends or otherwise distribute sufficient funds to enable us to meet our obligations, pay interest and expenses or declare dividends.

Distributions made by PRC companies to their offshore parents are generally subject to a 10% withholding tax under the Enterprise Income Tax Law. Pursuant to the Enterprise Income Tax Law and the Arrangement between the Mainland of China and the Hong Kong Special Administrative Region for
the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with respect to Taxes on Income, the witholding tax rate on dividends paid by our PRC subsidiary to our Hong Kong subsidiary would generally be reduced to 5%, provided that our Hong Kong subsidiary is the beneficial owner of the PRC sourced income. Our PRC subsidiary has not obtained approval for a withholding tax rate of 5% from the local tax authority and does not plan to obtain such approval in the near future as we have not achieved profitability. However, the Notice on How to Understand and Determine the Beneficial Owners in a Tax Agreement, also known as Circular 601, promulgated by the State Administration of Taxation in 2009, provides guidance for determining whether a resident of a contracting state is the "beneficial owner" of an item of income under China’s tax treaties and similar arrangements. According to Circular 601, a beneficial owner generally must be engaged in substantive business activities. An agent or conduit company will not be regarded as a beneficial owner and, therefore, will not qualify for treaty benefits. For this purpose, a conduit company is a company that is set up for the purpose of avoiding or reducing taxes or transferring or accumulating profits. Although our PRC subsidiary is wholly owned by our Hong Kong subsidiary, we will not be able to enjoy the 5% withholding tax rate with respect to any dividends or distributions made by our PRC subsidiary to its parent company in Hong Kong if our Hong Kong subsidiary is regarded as a "conduit company."

In addition, if Weibo HK were deemed to be a PRC resident enterprise, then dividends payable by Weibo HK to Weibo Corporation may become subject to 10% PRC dividend withholding tax. Under such circumstances, it is not clear whether dividends payable by Weibo Technology to Weibo Corporation would still be subject to PRC dividend withholding tax and whether such tax, if imposed, would be imposed at a rate of 5% or 10%.

Discontinuation of preferential tax treatment or imposition of any additional taxes could adversely affect our financial condition and results of operations.

The Enterprise Income Tax Law and its implementing rules have adopted a uniform statutory enterprise income tax rate of 25% to all enterprises in China. The Enterprise Income Tax Law and its implementing rules also permit qualified "software enterprises" to enjoy a two-year income tax exemption starting from the first profit making year, followed by a reduced tax rate of 12.5% for the subsequent three years. Weibo Technology, our PRC subsidiary, was qualified as a "software enterprise" on December 19, 2011, the qualification of which was renewed on December 3, 2013. Accordingly, Weibo Technology is eligible for the relevant preferential tax treatment upon filing with the relevant tax authorities. Its qualification as a "software enterprise" is subject to annual evaluation and a three-year review by the relevant authorities in China. If Weibo Technology fails to maintain its "software enterprise" qualification, its applicable corporate income tax rate would increase to 25%, which could have an adverse effect on our financial condition and results of operations.

Furthermore, certain enterprises may still benefit from a preferential tax rate of 15% under the Enterprise Income Tax Law and its implementing rules if they qualify as a "High and New Technology Enterprise" subject to certain general factors described in the Enterprise Income Tax Law and the related regulations. Weibo Technology is also qualified as a High and New Technology Enterprise and is entitled to a preferential tax rate from October 30, 2014 to October 29, 2017. Its qualification as a "High and New Technology Enterprise" is subject to annual evaluation and a three-year review by the relevant authorities in China. If Weibo Technology fails to maintain its "High and New Technology Enterprise" qualification, its applicable corporate income tax rate would increase to 25%, which could have an adverse effect on our financial condition and results of operations.

Our financial condition and results of operations could be materially and adversely affected if recent value added tax reforms in the PRC become unfavorable to our PRC subsidiary or VIE.

In 2012, China introduced a value added tax, or VAT, to replace the previous 5% business tax. Our PRC subsidiary and Weimeng have been subject to VAT at a base rate of 6% since September 1, 2012. Weibo Interactive, Weimeng’s subsidiary, has been subject to VAT at a base rate of 6% since July 1, 2013. On March 23, 2016, the Ministry of Finance and the State Administration of Taxation jointly issued the Notice on Comprehensive Implementation of the Pilot Program for Imposition of Value-Added Tax to Replace Business Tax, or the Notice. Pursuant to the Notice, the VAT reform was implemented comprehensively across the country and extended to the construction, real estate, financial and consumer services industries starting from May 1, 2016. The rules related to VAT are still evolving and the timing of the promulgation of the final tax rules or related interpretation is uncertain. Our financial condition and results of operations could be materially and adversely affected if the interpretation and enforcement of these tax rules become materially unfavorable to our PRC subsidiary and Weimeng.
Under SAFE regulations, PRC residents who participate in an employee stock ownership plan or stock option plan in an overseas publicly listed company are required to register with SAFE or its local branch and complete certain other procedures. Participants of a stock incentive plan who are PRC residents must retain a qualified PRC agent, which could be a PRC subsidiary of such overseas publicly listed company, to conduct the SAFE registration and other procedures with respect to the stock incentive plan on behalf of these participants. Such participants must also retain an overseas entrusted institution to handle matters in connection with their exercise or sale of stock options. In addition, the PRC agent is required to amend the SAFE registration with respect to the stock incentive plan if there is any material change to the stock incentive plan, the PRC agent or the overseas entrusted institution or other material changes.

We and our PRC resident employees who participate in our share incentive plans have been subject to these regulations since our company became publicly listed in the United States. If we or our PRC resident employees who participate in our share incentive plans fail to comply with these regulations in the future, or we or our PRC resident employees who participate in our share incentive plans and their local employers may be subject to fines and legal sanctions. See “Item 4.B. Information on the Company—Business Overview—Regulation—Regulations on Employee Stock Options Plans.”

**Fluctuation in the value of the RMB may have a material adverse effect on the value of your investment.**

The value of the RMB against the U.S. dollar and other currencies is affected by changes in China’s political and economic conditions and China’s foreign exchange policies, among other things. On July 21, 2005, the PRC government changed its decades-old policy of pegging the value of the RMB to the U.S. dollar, and the RMB appreciated more than 20% against the U.S. dollar over the following three years. Between July 2008 and June 2010, this appreciation halted and the exchange rate between the RMB and the U.S. dollar remained within a narrow band. Since June 2010, the RMB has fluctuated against the U.S. dollar, at times significantly and unpredictably, and in recent years the RMB has depreciated significantly against the U.S. dollar. Since October 1, 2016, the RMB has joined the International Monetary Fund (IMF)’s basket of currencies that make up the Special Drawing Right (SDR), along with the U.S. dollar, the Euro, the Japanese yen and the British pound. In the fourth quarter of 2016, the RMB has depreciated significantly in the backdrop of a surging U.S. dollar and persistent capital outflows of China. With the development of the foreign exchange market and progress towards interest rate liberalization and RMB internationalization, the PRC government may in the future announce further changes to the exchange rate system and there is no guarantee that the RMB will not appreciate or depreciate significantly in value against the U.S. dollar in the future. It is difficult to predict how market forces or PRC or U.S. government policy may impact the exchange rate between the RMB and the U.S. dollar in the future.

Our revenues and costs are mostly denominated in RMB, and a significant portion of our financial assets are also denominated in RMB, whereas our reporting currency is the U.S. dollar. Any significant appreciation of the RMB may materially and adversely affect our revenues, earnings and financial position as reported in U.S. dollars. To the extent that we need to convert U.S. dollars we received from offerings or debt financing into RMB for our operations, appreciation of the RMB against the U.S. dollar would have an adverse effect on the RMB amount we would receive from the conversion. Conversely, if we decide to convert our RMB into U.S. dollars for the purpose of making payments for dividends on our ordinary shares or ADSs or for other business purposes, appreciation of the U.S. dollar against the RMB would have a negative effect on the U.S. dollar amount available to us.

Table of Contents

PRC laws and regulations establish more complex procedures for some acquisitions of Chinese companies by foreign investors, which could make it more difficult for us to pursue growth through acquisitions in China.

A number of PRC laws and regulations, including the Regulations on Mergers and Acquisitions of Domestic Enterprises by Foreign Investors adopted by six PRC regulatory agencies in 2006, or the M&A Rules, the Anti-monopoly Law, and the Rules of Ministry of Commerce on Implementation of Security Review System of Mergers and Acquisitions of Domestic Enterprises by Foreign Investors promulgated by the Ministry of Commerce in August 2011, or the Security Review Rules, have established procedures and requirements that are expected to make merger and acquisition activities in China by foreign investors more time consuming and complex. These include requirements in some instances that the Ministry of Commerce be notified in advance of any change of control transaction in which a foreign investor takes control of a PRC domestic enterprise, or that the approval from the Ministry of Commerce be obtained in circumstances where overseas companies established or controlled by PRC enterprises or residents acquire affiliated domestic companies. PRC laws and regulations also require certain merger and acquisition transactions to be subject to merger control review or security review.

The Security Review Rules were formulated to implement the Notice of the General Office of the State Council on Establishing the Security Review System for Mergers and Acquisitions of Domestic Enterprises by Foreign Investors, also known as Circular 6, which was promulgated in 2011. Under these rules, a security review is required for mergers and acquisitions by foreign investors having “national defense and security” concerns and mergers and acquisitions by which foreign investors may acquire the “de facto control” of domestic enterprises have “national security” concerns. In addition, when deciding whether a specific merger or acquisition of a domestic enterprise by foreign investors is subject to the security review, the Ministry of Commerce will look into the substance and actual impact of the transaction. The Security Review Rules further prohibit foreign investors from bypassing the security review requirement by structuring transactions through proxies, trusts, indirect investments, leases, loans, control through contractual arrangements or offshore transactions.

There is no requirement for foreign investors in those mergers and acquisitions transactions already completed prior to the promulgation of Circular 6 to submit such transactions to the Ministry of Commerce for security review. As we have already obtained the “de facto control” over our affiliated PRC entities prior to the effectiveness of these rules, we do not believe we are required to submit our existing contractual arrangements to the Ministry of Commerce for security review.

However, as these rules are relatively new and there is a lack of clear statutory interpretation on the implementation of the same, there is no assurance that the Ministry of Commerce will not apply these national security review-related rules to the acquisition of equity interest in our PRC subsidiary. If we are found to be in violation of the Security Review Rules and other PRC laws and regulations with respect to the merger and acquisition activities in China, or fail to obtain any of the required approvals, the relevant regulatory authorities would have broad discretion in dealing with such violation, including levying fines, confiscating our income, revoking our PRC subsidiary’s business or operating licenses, requiring us to restructure or unwind the relevant ownership structure or operations. Any of these actions could cause significant disruption to our business operations and may materially and adversely affect our business, financial condition and results of operations. Further, if the business of any target company that we plan to acquire falls into the ambit of security review, we may not be able to successfully acquire such company either by equity or asset acquisition, capital contribution or through any contractual
The heightened scrutiny over acquisition transactions by the PRC tax authorities may have a negative impact on our business operations, our acquisition or restructuring strategy or the value of your investment in us.

The State Administration of Taxation has issued several rules and notices to tighten the scrutiny over acquisition transactions in recent years, including the Notice on Strengthening Administration of Enterprise Income Tax for Share Transfers by Non-PRC Resident Enterprises issued in December 2009, or SAT Circular 698, and the Notice on Certain Corporate Income Tax Matters Related to Indirect Transfer of Properties by Non-PRC Resident Enterprises issued in February 2015, or SAT Circular 7. Pursuant to these rules and notices, except for a few circumstances falling into the scope of the safe harbor provided by SAT Circular 7, such as open market trading of stocks in public companies listed overseas, if a non-PRC resident enterprise indirectly transfers PRC taxable properties (i.e. properties of an establishment or a place in the PRC, real estate properties in the PRC or equity investments in a PRC tax resident enterprise) by disposing of equity interest or other similar rights in an overseas holding company, without a reasonable commercial purpose and resulting in the avoidance of PRC enterprise income tax, such indirect transfer should be deemed as a direct transfer of PRC taxable properties and gains derived from such indirect transfer may be subject to the PRC withholding tax at a rate of up to 10%. SAT Circular 7 sets out several factors to be taken into consideration by tax authorities in determining whether an indirect transfer has a reasonable commercial purpose, such as whether the main value of equity interest in an overseas holding company is derived directly or indirectly from PRC taxable properties. An indirect transfer satisfying all the following criteria will be deemed to lack reasonable commercial purpose and be taxable under PRC law without considering other factors set out by SAT Circular 7: (i) 75% or more of the equity value of the intermediary enterprise being transferred is derived directly or indirectly from the PRC taxable properties; (ii) at any time during the one-year period before the indirect transfer, 90% or more of the asset value of the intermediary enterprise (excluding cash) is comprised directly or indirectly of investments in the PRC, or 90% or more of its income is derived directly or indirectly from the PRC; (iii) the functions performed and risks assumed by the intermediary enterprise and any of its subsidiaries that directly or indirectly hold the PRC taxable properties are limited and are insufficient to prove their economic substance; and (iv) the foreign tax payable on the gain derived from the indirect transfer of the PRC taxable properties is lower than the potential PRC income tax on the direct transfer of such assets. SAT Circular 7 also introduces an interest regime by providing that where a transferee fails to file and pay tax on time, and where a withholding agent fails to withhold the tax, interest will be charged on a daily basis. If the transferee has provided the required documents and information or has filed and paid the tax within 30 days from the date that the share transfer contract or agreement is signed, then interest shall be calculated based on the benchmark interest rate; otherwise, the benchmark interest rate plus 5% will apply. Further, SAT Circular 7 replaces the compulsory reporting requirement in SAT Circular 698 with a voluntary reporting regime, and the criteria set forth in Circular 698 for indirect transfer reporting have been abolished. Both the foreign transferee and the transferee, and the PRC tax resident enterprise whose equity interests are being transferred may voluntarily report the transfer by submitting the documents required in SAT Circular 7.

We face certain risks relating to the real properties that we lease.

We lease office space for our operations in China. Any defects in lessors’ title to the leased properties may disrupt our use of our offices, which may in turn adversely affect our business operations. For example, certain buildings and the underlying land are not allowed to be used for industrial or commercial purposes without relevant authorities’ approval, and the lease of such buildings to companies like us may subject the lessor to pay premium fees to the PRC government. We cannot assure you that the lessor has obtained all or any of approvals from the relevant governmental authorities. In addition, some of our lessors have not provided us with documentation evidencing their title to the relevant leased properties. We cannot assure you that title to these properties we currently lease will not be challenged. In addition, we have not registered any of our lease agreements with relevant PRC governmental authorities as required by PRC law, and although failure to do so does not in itself invalidate the leases, we may not be able to defend these leases against bona fide third parties.
As of December 31, 2016, we had approximately $393.6 million in cash and cash equivalent, bank deposits and short term investments, such as time deposits, with large domestic banks in China. Our remaining cash, cash equivalents and short-term investments were held by financial institutions in the United States and Hong Kong. The terms of these deposits are, in general, up to twelve months. Historically, deposits in Chinese banks were viewed as secure due to the state policy on protecting depositors’ interests. However, the new Bankruptcy Law that came into effect in 2007 contains an article expressly stating that the State Council may promulgate implementation measures for the bankruptcy of Chinese banks based on the Bankruptcy Law, so the law contemplates the possibility that a Chinese bank may go bankrupt. In addition, foreign banks have been gradually permitted to operate in China since China’s accession to the World Trade Organization and have become strong competitors of Chinese banks in many respects, which may have increased the risk of bankruptcy or illiquidity for Chinese banks, including those in which we have deposits. In the event of bankruptcy or illiquidity of any one of the banks which holds our deposits, we are unlikely to claim our deposits back in full since we are unlikely to be classified as a secured creditor based on PRC laws.

On May 1, 2015, China’s new Deposit Insurance Regulation came into effect, pursuant to which banking financial institutions, such as commercial banks, established in China will be required to purchase deposit insurance for deposits in RMB and in foreign currency. Under this regulation, depositors will be fully indemnified for their deposits and interests in an aggregate amount up to a limit of RMB500,000. Deposits or interests over such limit will only be covered by the bank’s liquidation assets. Therefore, although this requirement to purchase deposit insurance may help, to a certain extent, prevent Chinese banks from going bankrupt, it would not be effective in providing effective protection for our accounts, as our aggregate deposits are much higher than the compensation limit.

Our auditor, like other independent registered public accounting firms operating in China, is not permitted to be subject to inspection by Public Company Accounting Oversight Board, and consequently investors may be deprived of the benefits of such inspection.

Our auditor, the independent registered public accounting firm that issued the audit reports included elsewhere in this annual report, as an auditor of companies that are traded publicly in the United States and a firm registered with the Public Company Accounting Oversight Board (United States), or PCAOB, is required by the laws of the United States to undergo regular inspections by the PCAOB to assess its compliance with the laws of the United States and applicable professional standards. Our auditor is located in, and organized under the laws of the PRC, which is a jurisdiction where the PCAOB, notwithstanding the requirements of U.S. law, is currently unable to conduct inspections without the approval of the Chinese authorities. In May 2013, PCAOB announced that it had entered into a Memorandum of Understanding on Enforcement Cooperation, or the MOU, with the China Securities Regulatory Commission, or the CSRC, and the PRC Ministry of Finance, or the MOF, which establishes a cooperative framework between the parties for the production and exchange of audit documents relevant to investigations undertaken by PCAOB, the CSRC or the MOF in the United States and the PRC, respectively. PCAOB continues to be in discussions with the CSRC and the PRC Ministry of Finance to permit joint inspections in the PRC of audit firms that are registered with PCAOB and audit Chinese companies that trade on U.S. exchanges.

Proceedings instituted by the SEC against certain PRC-based accounting firms, including our independent registered public accounting firm, could result in financial statements being determined to not be in compliance with the requirements of the Securities Exchange Act of 1934, as amended, or the Exchange Act.

In December 2012, the SEC instituted administrative proceedings against the Big Four PRC-based accounting firms, including our independent registered public accounting firm, alleging that these firms had violated U.S. securities laws and the SEC’s rules and regulations thereunder by failing to provide the SEC the firms’ audit work papers with respect to certain PRC-based companies that are publicly traded in the United States.

On January 22, 2014, the administrative law judge presiding over the matter rendered an initial decision that each of the firms had violated the SEC’s rules of practice by failing to produce audit papers and other documents to the SEC. The initial decision censured each of the firms and barred them from practicing before the SEC for a period of six months.

On February 6, 2015, the four China-based accounting firms each agreed to a censure and to pay a fine to the SEC to settle the dispute and avoid suspension of their ability to practice before the SEC and audit U.S.-listed companies. The settlement required the firms to follow detailed procedures and to seek to provide the SEC with access to Chinese firms’ audit documents via the CSRC. If future document productions fail to meet specified criteria, the SEC retains authority to impose a variety of additional remedial measures on the firms depending on the nature of the failure. While we cannot predict if the SEC will further review the four China-based accounting firms’ compliance with specified criteria or if the results of such a review would result in the SEC imposing penalties such as suspensions or restarting the administrative proceedings, if the accounting firms are subject to additional remedial measures, our ability to file our financial statements in compliance with SEC requirements could be impacted. A determination that we have not timely filed financial statements in compliance with SEC requirements could ultimately lead to the delisting of our ADSs from NASDAQ or the termination of the registration of our ADSs under the Securities Exchange Act of 1934, or both, which would substantially reduce or effectively terminate the trading of our ADSs in the United States.

Risks Relating to Our ADSs

The trading price for our ADSs may fluctuate significantly.

The trading prices of our ADSs have fluctuated since we first listed our ADSs. Since our ADSs became listed on the NASDAQ Global Select Market on April 17, 2014, the trading price of our ADSs has ranged from US$8.78 to US$58.79 per ADS, and the last reported trading price on April 26, 2017 was US$54.99 per ADS. The prices for our ADSs may continue to fluctuate because of broad market and industry factors, like the performance and fluctuation of the market prices of other companies with business operations located mainly in China that have listed their securities in the United States. A number of Chinese companies have listed or are in the process of listing their securities on U.S. stock markets. The securities of some of these companies have
experience significant volatility, including price declines in connection with their initial public offerings. The trading performances of these Chinese companies’ securities after their offerings may affect the attitudes of investors toward Chinese companies listed in the United States in general and consequently may impact the trading performance of our ADSs, regardless of our actual operating performance.

In addition to market and industry factors, the price and trading volume for our ADSs may be highly volatile for factors specific to our own operations, including the following:

**Table of Contents**

- variations in our revenues, earnings, cash flow and data related to our active user base or user engagement;
- announcements of new investments, acquisitions, strategic partnerships or joint ventures;
- announcements of new services and expansions by us or our competitors;
- changes in financial estimates by securities analysts;
- detrimental adverse publicity about us or SINA;
- additions or departures of key personnel;
- release of lock-up or other transfer restrictions on our outstanding equity securities or sales of additional equity securities; and
- potential litigation or regulatory investigations.

Any of these factors may result in large and sudden changes in the volume and price at which our ADSs will trade.

In January 2014, CNNIC released a report in Chinese stating that the number of microblog users in China had declined by 9.2% from 2012 to 2013. Because weibo is the Chinese word for “microblog” and Chinese characters do not distinguish between proper nouns (“Weibo” meaning Weibo Corporation) and common nouns (“weibo” meaning microblog), various media sources, including a number of prominent international media, reported that the number of our users had declined by 9.2% from 2012 to 2013. The share price of our parent company SINA fell substantially in the weeks following the CNNIC report. Media reports about our company in the future, whether due to this kind of misunderstanding or for any other reason, could have a material adverse effect on the trading price of our ADSs.

In the past, shareholders of public companies have often brought securities class action suits against those companies following periods of instability in the market price of their securities. If we were involved in a class action suit, it could divert a significant amount of our management’s attention and other resources from our business and operations and require us to incur significant expenses to defend the suit, which could harm our results of operations. Any such class action suit, whether or not successful, could harm our reputation and restrict our ability to raise capital in the future. In addition, if a claim is successfully made against us, we may be required to pay significant damages, which could have a material adverse effect on our financial condition and results of operations.

**If securities or industry analysts do not publish research or reports about our business, or if they adversely change their recommendations regarding our ADSs, the market price for our ADSs and trading volume could decline.**

The trading market for our ADSs will be influenced by research or reports that industry or securities analysts publish about our business. If one or more analysts who cover us downgrade our ADSs, the market price for our ADSs would likely decline. If one or more of these analysts cease to cover us or fail to regularly publish reports on us, we could lose visibility in the financial markets, which in turn could cause the market price or trading volume for our ADSs to decline.

**The sale or availability for sale of substantial amounts of our ADSs could adversely affect their market price.**

Sales of substantial amounts of our ADSs in the public market, or the perception that these sales could occur, could adversely affect the market price of our ADSs and could materially impair our ability to raise capital through equity offerings in the future. We cannot predict what effect, if any, market sales of securities held by our significant shareholders or any other shareholder or the availability of these securities for future sale will have on the market price of our ADSs.
Due to the disparate voting powers attached to these two classes of ordinary shares, SINA owned approximately 49.8% of our total issued and outstanding ordinary shares and 74.9% of the voting power of our outstanding shares as of March 31, 2017. Therefore, SINA will have decisive influence over matters requiring shareholders’ approval, including election of directors and significant corporate transactions, such as a merger or sale of our company. This concentrated control will limit your ability to influence corporate matters and could discourage others from pursuing any potential merger, takeover or other change of control transactions that holders of Class A ordinary shares and ADSs may view as beneficial.

Because we do not expect to pay dividends in the foreseeable future, you must rely on price appreciation of our ADSs for return on your investment.

We currently intend to retain most, if not all, of our available funds and any future earnings to fund the development and growth of our business. As a result, we do not expect to pay any cash dividends in the foreseeable future. Therefore, you should not rely on an investment in our ADSs as a source for any future dividend income.

Our board of directors has complete discretion as to whether to distribute dividends, subject to Cayman Islands law. In addition, our shareholders may by ordinary resolution declare dividends, but no dividend may exceed the amount recommended by our directors. Under Cayman Islands law, our company may pay dividends only out of either profit or share premium, provided that in no circumstances may a dividend be paid if this would result in our company being unable to pay its debts as they fall due in the ordinary course of business. Even if our board of directors decides to declare and pay dividends, the timing, amount and form of future dividends, if any, will depend on, among other things, our future results of operations and cash flow, our capital requirements and surplus, the amount of distributions, if any, received by us from our subsidiary, our financial condition, contractual restrictions and other factors deemed relevant by our board of directors. Accordingly, the return on your investment in our ADSs will likely depend entirely upon any future price appreciation of our ADSs. There is no guarantee that our ADSs will appreciate in value in the future or even maintain the price at which you purchased the ADSs. You may not realize a return on your investment in our ADSs and you may even lose your entire investment in our ADSs.

You may be subject to PRC income tax on dividends from us or on any gain realized on the transfer of our ADSs.

Under the Enterprise Income Tax Law and its implementation rules, subject to any applicable tax treaty or similar arrangement between the PRC and your jurisdiction of residence that provides for a different income tax arrangement, PRC withholding tax at the rate of 10% is normally applicable to dividends from PRC sources payable to investors that are non-PRC resident enterprises, which do not have an establishment or place of business in the PRC, or which have such establishment or place of business if the relevant income is not effectively connected with the establishment or place of business. Any gain realized on the transfer of ADSs or shares by such non-PRC resident enterprise investors is also subject to 10% PRC income tax if such gain is regarded as income derived from sources within the PRC, unless a tax treaty or similar arrangement otherwise provides. Under the PRC Individual Income Tax Law and its implementation rules, dividends from sources within the PRC paid to foreign individual investors who are not PRC residents are generally subject to a PRC withholding tax at a rate of 20% and gains from PRC sources realized by such investors on the transfer of American depositary shares or shares are generally subject to 20% PRC income tax, in each case, subject to any reduction or exemption set forth in applicable tax treaties and similar arrangements and PRC laws. Although substantially all of our business operations are in China, it is unclear whether dividends we pay with respect to our ADSs, or the gain realized from the transfer of our ADSs, would be treated as income derived from sources within the PRC and as a result be subject to PRC income tax if we were considered a PRC resident enterprise, as described above. If PRC income tax were imposed on gains realized through the transfer of our ADSs or on dividends paid to our non-PRC resident investors, the value of your investment in our ADSs may be materially and adversely affected. Furthermore, our ADS holders whose jurisdictions of residence have tax treaties or similar arrangements with China may not qualify for benefits under such tax treaties or arrangements.

We may be classified as a passive foreign investment company under U.S. federal income tax law, which could result in adverse consequences to U.S. Holders of our ADS or Class A ordinary shares.

Depending upon the value of our assets, which is determined based, in part, on the market value of our ADSs and Class A ordinary shares, and the nature of our assets and income over time, we could be classified as a passive foreign investment company ("PFIC") for U.S. federal income tax purposes. We will be classified as a PFIC for any taxable year if either (i) 75% or more of our gross income for the taxable year is passive income or (ii) 50% or more of the value of our assets (determined on the basis of a quarterly average) is attributable to assets that produce or are held for the production of passive income. Based on our income and assets, and the value of our ADSs and Class A ordinary shares, we do not believe that we were a PFIC for our taxable year ended December 31, 2016 and do not expect to be a PFIC for our current taxable year. While we do not anticipate becoming a PFIC for the current taxable year, fluctuations in the market price of our ADSs or Class A ordinary shares may cause us to become a PFIC for the current or any subsequent taxable year.

Although the law in this regard is not entirely clear, we treat Weimeng as being owned by us for U.S. federal income tax purposes because we control its management decisions and we are entitled to substantially all of its economic benefits, and, as a result, we consolidate its results of operations in our consolidated U.S. GAAP financial statements. If it were determined, however, that we are not the owner of Weimeng for U.S. federal income tax purposes, we would likely be treated as a PFIC for our current taxable year and any subsequent taxable year. Because of the uncertainties in the application of the relevant rules and PFIC status is a factual determination made annually after the close of each taxable year on the basis of the composition of our income and the value of our active versus passive assets, there can be no assurance that we will not be a PFIC for the current or any future taxable year. The overall level of our passive assets will be affected by how, and how quickly, we spend our liquid assets and cash. Under circumstances where we determine not to deploy significant amounts of cash for active purposes, our risk of becoming classified as a PFIC may substantially increase.

If we are or become classified as a PFIC, a U.S. Holder (as defined in “Item 10.E. Additional Information—Taxation—United States Federal Income Tax Considerations—General”) may be subject to reporting requirements and may incur significantly increased U.S. federal income tax on gain recognized on the sale or other disposition of our ADSs or Class A ordinary shares to the extent such gain or distribution is treated as an “excess distribution” under the U.S. federal income tax rules. Further, if we were a PFIC for any year during which a U.S. Holder held our ADSs or Class A ordinary shares, we would generally continue to be treated as a PFIC for all succeeding years during which such U.S. Holder held our ADSs or Class A ordinary shares. You are urged to consult your tax advisor concerning the U.S. federal income tax consequences of acquiring, holding, and disposing of ADSs or Class A ordinary shares if we are or become classified as a PFIC. For more information see “Item 10.E. Additional Information—Taxation—United States Federal Income Tax Considerations—General”.

Our memorandum and articles of association contain anti-takeover provisions that could have a material adverse effect on the rights of holders of our ordinary shares and ADSs.

Our memorandum and articles of association contain provisions to limit the ability of others to acquire control of our company or cause us to engage in change-of-control transactions. These provisions could have the effect of depriving our shareholders of an opportunity to sell their shares at a premium over prevailing market prices by discouraging third parties from seeking to obtain control of our company in a tender offer or similar transaction. For example, our board of directors has the authority, without further action by our shareholders, to issue preferred shares in one or more series and to fix their designations, powers, preferences, privileges, and relative participating, optional or special rights and the qualifications, limitations or restrictions, including dividend rights, conversion rights, voting rights, terms of redemption and liquidation preferences, any or all of which may be greater than the rights associated with our ordinary shares, in the form of ADS or otherwise. Preferred shares could be issued quickly with terms calculated to delay or prevent a change in control of our company or make removal of management more difficult. If our board of directors decides to issue preferred shares, the price of our ADSs may fall and the voting and other rights of the holders of our ordinary shares and ADSs may be materially and adversely affected.

Table of Contents

You may face difficulties in protecting your interests, and your ability to protect your rights through U.S. courts may be limited, because we are incorporated under Cayman Islands law.

We are an exempted company incorporated under the laws of the Cayman Islands. Our corporate affairs are governed by our memorandum and articles of association, the Companies Law of the Cayman Islands (2016 Revision) and the common law of the Cayman Islands. The rights of shareholders to take action against the directors, actions by minority shareholders and the fiduciary responsibilities of our directors to us under Cayman Islands law are to a large extent governed by the common law of the Cayman Islands. The common law of the Cayman Islands is derived in part from comparatively limited judicial precedent in the Cayman Islands as well as from the common law of England, the decisions of whose courts are of persuasive authority, but are not binding, on a court in the Cayman Islands. The rights of our shareholders and the fiduciary responsibilities of our directors under Cayman Islands law are not as clearly established as they would be under statutes or judicial precedent in some jurisdictions in the United States. In particular, the Cayman Islands has a less developed body of securities laws than the United States. Some U.S. states, such as Delaware, have more fully developed and judicially interpreted bodies of corporate law than the Cayman Islands. In addition, Cayman Islands companies may not have standing to initiate a shareholder derivative action in a federal court of the United States.

The Cayman Islands courts are also unlikely:

· to recognize or enforce against us judgments of courts of the United States based on certain civil liability provisions of U.S. securities laws; and

· to impose liabilities against us, in original actions brought in the Cayman Islands, based on certain civil liability provisions of U.S. securities laws that are penal in nature.

There is no statutory recognition in the Cayman Islands of judgments obtained in the United States, although the courts of the Cayman Islands will in certain circumstances recognize and enforce a non-penal judgment of a foreign court of competent jurisdiction without retrial on the merits.

As a result of all of the above, our public shareholders may have more difficulty in protecting their interests in the face of actions taken by management, members of the board of directors or controlling shareholders than they would as public shareholders of a company incorporated in the United States.

Certain judgments obtained against us by our shareholders may not be enforceable.

We are a Cayman Islands company and all of our assets are located outside of the United States. Substantially all of our current operations are conducted in China. In addition, a majority of our current directors and officers are nationals and residents of countries other than the United States. Substantially all of the assets of these persons are located outside the United States. As a result, it may be difficult or impossible for you to bring an action against us or against these individuals in the United States in the event that you believe that your rights have been infringed under the U.S. federal securities laws or otherwise. Even if you are successful in bringing an action of this kind, the laws of the Cayman Islands and of China may render you unable to enforce a judgment against our assets or the assets of our directors and officers.

Table of Contents

We are a foreign private issuer within the meaning of the rules under the Exchange Act, and as such we are exempt from certain provisions applicable to United States domestic public companies.

Because we are a foreign private issuer under the Exchange Act, we are exempt from certain provisions of the securities rules and regulations in the United States that are applicable to U.S. domestic issuers, including:

· the rules under the Exchange Act requiring the filing of quarterly reports on Form 10-Q or current reports on Form 8-K with the SEC;

· the sections of the Exchange Act regulating the solicitation of proxies, consents, or authorizations in respect of a security registered under the Exchange Act;

· the sections of the Exchange Act requiring insiders to file public reports of their stock ownership and trading activities and liability for insiders who profit from trades made in a short period of time; and
We are required to file an annual report on Form 20-F within four months of the end of each fiscal year. In addition, we intend to publish our results on a quarterly basis through press releases, distributed pursuant to the rules and regulations of NASDAQ. Press releases relating to financial results and material events will also be furnished to the SEC on Form 6-K. However, the information we are required to file with or furnish to the SEC will be less extensive and less timely compared to that required to be filed with the SEC by U.S. domestic issuers.

In addition, we are permitted by NASDAQ Stock Market Rules to elect to rely, and have elected to rely, on certain exemptions from corporate governance requirements:

- that the board of directors be comprised of a majority of independent directors under NASDAQ Rule 5605(b)(1); and
- the requirement that an audit committee be comprised of at least three members under NASDAQ Rule 5605(c)(2)(A).

As a result, you may not be afforded the same protections or information, which would be made available to you, were you investing in a U.S. domestic issuer.

The voting rights of holders of ADSs are limited by the terms of the deposit agreement, and you may not be able to exercise your right to direct how the ordinary shares represented by your ADSs are voted.

As a holder of our ADSs, you will only be able to exercise the voting rights with respect to the underlying ordinary shares in accordance with the provisions of the deposit agreement. Under the deposit agreement, you must vote by giving voting instructions to the depositary. Upon receipt of your voting instructions, the depositary will vote the underlying ordinary shares in accordance with these instructions. You will not be able to directly exercise your right to vote with respect to the underlying shares unless you withdraw the shares. Under our amended and restated memorandum and articles of association that became effective immediately upon completion of our initial public offering, the minimum notice period required for convening a general meeting is 14 days. When a general meeting is convened, you may not receive sufficient advance notice to withdraw the shares underlying your ADSs to allow you to vote with respect to any specific matter. If we ask for your instructions, the depositary will notify you of the upcoming vote and will arrange to deliver our voting materials to you. We cannot assure you that you will receive the voting materials in time to ensure that you can instruct the depositary to vote the shares underlying your ADSs. In addition, the depositary and its agents are not responsible for failing to carry out voting instructions or for their manner of carrying out your voting instructions. This means that you may not be able to exercise your right to vote and you may have no legal remedy if the shares underlying your ADSs are not voted as you requested.

You may experience dilution of your holdings due to inability to participate in rights offerings.

We may, from time to time, distribute rights to our shareholders, including rights to acquire securities. Under the deposit agreement, the depositary will not distribute rights to holders of ADSs unless the distribution and sale of rights and the securities to which these rights relate are either exempt from
agencies, charities and other organizations, making it a microcosm of Chinese society. For many people in China, Weibo allows them to be heard publicly and

follow any other user and add comments to a feed while reposting. The simple, asymmetric and distributed nature of Weibo allows an original feed to become
distribution. Any user can create and post a feed and attach multimedia or long-form content. User relationships on Weibo may be asymmetric; any user can

You may be subject to limitations on transfer of your ADSs.

Your ADSs are transferable on the books of the depositary. However, the depositary may close its books at any time or from time to time when it
deems expedient in connection with the performance of its duties. The depositary may close its books from time to time for a number of reasons, including in
connection with corporate events such as a rights offering, during which time the depositary needs to maintain an exact number of ADS holders on its books
for a specified period. The depositary may also close its books in emergencies, and on weekends and public holidays. The depositary may refuse to deliver, transfer or register transfers of our ADSs generally when our share register or the books of the depositary are closed, or at any time if we or the depositary
thinks it is advisable to do so because of any requirement of law or of any government or governmental body, or under any provision of the deposit
agreement, or for any other reason.

Item 4. Information on the Company

A. History and Development of the Company

SINA, our parent, launched Weibo in August 2009, originally as a microblogging service. In 2010, SINA incorporated a subsidiary, T.CN Corporation, in the Cayman Islands to hold the assets associated with the Weibo business. In 2011, Weibo was upgraded with social networking features and improved open platform architecture to support internally developed and third-party developer applications on our platform. In 2012, T.CN Corporation was renamed Weibo Corporation. In April 2013, Alibaba Group invested $585.8 million through its wholly owned subsidiary, Ali WB, in our ordinary and
preferred shares representing approximately 18% of Weibo Corporation’s then total outstanding shares on a fully diluted basis.

In April 2014, our company completed the initial public offering and has been listed on the NASDAQ Global Selected Market since then. Our
company was incorporated under the laws of the Cayman Islands and is headquartered in Beijing, China. With offices throughout mainland China and Hong
Kong, our principal place of operations is located at QIHAO Plaza, No.8 Xinyuan S. Road, Chaoyang District, Beijing 100027, People’s Republic of China.
Our telephone number is +86 10 6061-8000.

Weibo Corporation holds 100% of the equity of Weibo Hong Kong Limited, or Weibo HK, which in turn holds 100% of the equity in Weibo Internet
Technology (China) Co., Ltd., or Weibo Technology, our wholly owned subsidiary in China.

We are a holding company, and we conduct our business in China through Weibo Technology and Weimeng. See “Item 4.C. Information on the
Company—Organizational Structure” and “Item 3.D. Key Information—Risk Factors—Risks Relating to Our Corporate Structure.” We rely principally on dividends and other distributions from Weibo Technology for our cash needs, including the funds necessary to pay dividends to our shareholders or service any debt we may incur. Weimeng holds an Internet Content Provision License and other permits that are necessary for operating our business in China. In
2010, we gained control and became the primary beneficiary of Weimeng through a series of contractual arrangements between Weibo Technology, Weimeng and Weimeng’s shareholders.

In December 2013, Weimeng acquired from SINA the entire equity interest in Beijing Weibo Interactive Internet Technology Co., Ltd., or Weibo
Interactive, a PRC company engaged in the online game business, for a consideration of $10.1 million.

In June 2015, we acquired from SINA the entire equity interest in Weibo Funds, which engage in the investment of start-up high-tech companies, for a consideration of $22.0 million.

B. Business Overview

Overview

Weibo is a leading social media platform for people to create, distribute and discover Chinese-language content. It provides an unprecedented and
simple way for people and organizations to publicly express themselves in real time, interact with others on a massive global platform and stay connected
with the world.
exposed to the rich ideas, cultures and experiences of the broader world. Media outlets use Weibo as a source of news and as a distribution channel for their headline news. Government agencies and officials use Weibo as an official communication channel for disseminating timely information and gauging public opinion to improve public services. Charities use Weibo to make the world a better place by launching charitable projects, seeking donations and volunteers and leveraging the celebrities and organizations on Weibo to amplify their social influence.

In addition to users, Weibo’s ecosystem includes customers and platform partners:

- **Customers.** We enable our advertising and marketing customers to promote their brands, products and services to our users. We offer a wide range of advertising and marketing solutions to customers ranging from large companies to SMEs to individuals, including social display ads, native ads and event-based marketing offerings. Our performance-based native ads allow customers to reach a targeted audience based on the social interest graph, or SIG, of their users. In addition, our customers can benefit from the potentially viral effect of their promoted feeds generated from the public and distributed nature of our platform, commonly known as “earned media.”

- **Platform Partners.** We have attracted a large number of platform partners, including MCNs, media outlets, organizations with media rights and app developers. Our platform partners contribute a vast amount of content to Weibo, broadly distribute Weibo content across their properties and integrate products and applications with our platform, enriching the experience of our users while increasing our monetization opportunities.

While we distinguish among users, customers and platform partners in classifying our products and analyzing our revenues, the same person or organization may simultaneously be included in two or more of the categories.

Designed with a “mobile first” philosophy, Weibo displays content in a simple information feed format and offers native ads that conform to the information flow on our platform. To support the mobile format, we have developed a social interest graph, or SIG, recommendation engine that makes it easier for our users to discover content and allows advertisers to promote more relevant advertisements to our users. With the high information-density of Chinese characters and users’ ability to personalize content information flow, Weibo is particularly suited for mobile use, and we have seen significant mobile adoption. Approximately 90% of our MAUs in December 2016 accessed Weibo from mobile devices at least once during the month, and mobile revenues accounted for 67% of our advertising and marketing revenues in 2016.

We began monetization on our platform in 2012, and we have since experienced rapid revenue growth. Our revenues increased from $334.2 million in 2014 to $477.9 million in 2015 and further to $655.8 million in 2016, representing a CAGR of 40.1%. We generate revenues primarily from customers who purchase advertising and marketing services, and, to a lesser extent, from value-added revenues, such as VIP membership, data licensing and game service. In 2016, revenues generated from advertising and marketing services accounted for 87% of our revenues. Due to our limited operating history and evolving monetization model, comparisons of our results of operations from period to period may not be meaningful.

Table of Contents

Products and Services

Our product categories include those for users, advertising and marketing customers and platform partners.

**Products for Users**

Our product development approach is centered on building simple and useful tools to enable our users to access Weibo to create, distribute and discover content and interact with others on our platform in real time. We employ a “mobile first” philosophy and have designed our platform around the capabilities of mobile devices. We introduced the first generation of Weibo mobile app in the first quarter of 2010. Our platform is compatible with all major mobile operating systems, including Android, iOS, Symbian, Windows and Blackberry, and is accessible through mobile apps, mobile websites, personal computer apps and personal computer websites. Our users range from ordinary people to celebrities, businesses, government agencies and other organizations.

**Self-Expression Products.** We offer the following products to enable our users to express themselves on our platform:

- **Feed.** Weibo enables users to express and share their ideas, opinions and stories in the form of text and multimedia content. A feed is usually limited to 140 Chinese characters, but Chinese characters are more information-dense than the letters of the alphabet and can convey more meaning in the same space. Furthermore, feeds on Weibo often include rich, descriptive and vivid content, such as photos, music, short videos, live streaming and long-form articles, while still fitting onto the screens of mobile devices.

- **Individual Page.** Each user has a Page that displays the user’s profile, feeds and album. Basic information about a user, including username, introduction, education, location, liked feeds, accounts followed, follower accounts and Weibo account number, is available on the user’s Page. Users with verified authentic identity information will have either a red or orange “V” mark on their profile picture. Users can personalize their Pages by selecting and changing their cover photo and profile picture at any time.

- **Enterprise Page.** Businesses and other organizations with verified identities can apply for enterprise accounts, which entitle them to enterprise services through the download of Page apps on our platform. Page apps enable organizations to customize their Weibo Pages and to perform marketing events, promotion activities, ad campaigns and payment processing on Weibo. For example, an e-commerce merchant can install Page apps to facilitate purchase activities through Weibo or offer “red envelop,” lucky money, drawings to build a follower base.

**Social Products.** We offer the following mechanisms to promote social interaction between users on our platform:

- **Follow.** Users can establish relationships with other users by electing to follow them. Feeds that are posted or reposted by a user will automatically appear in the information feed of the user’s follower. Relationships may be asymmetrical. The user being followed does not need to approve the follower’s decision to follow them, although a user can choose to limit access to certain feeds or to blacklist a certain follower.

- **Repost, Comment, Favorite, Like.** By clicking on the Repost button, users can repost feeds from other users. When a feed is reposted, the original author is able to virally reach and influence users beyond that author’s own circle of followers, leveraging the network of the followers of the
Table of Contents

- @Mention. Users can view their history of interactions with other users by going to the @Mention Page, which allows users to access all the feeds in which they are mentioned by other users. In addition, users can see a list of comments from other users on their own feeds, as well as the Likes on their feeds.

- Messenger. Users can send private messages in the form of text or voice recordings and can attach photos, locations and group contact cards. In addition, users can also use messengers to hand out “red envelopes.”, lucky money, and receive payments from other users.

- Group Chat. Group Chat enables users to organize and participate in conversations based on common interest. For example, fans of a celebrity can establish chat rooms to share the latest gossips and tidbits, and the celebrity himself may choose to “drop in” to increase the livelihood of his fan base. In addition, users who are viewing the same live streaming session can simultaneously participate in a group chat as well.

- Story. Users can continuously share photos and short videos, viewable by fans for up to 24 hours in a slideshow format. Fans may leave comments in stories for others to view.

Discovery Products. We offer the following products to help users discover content on our platform:

- Information Feed. Weibo’s relationship-based information feed (follow model) resides on the user’s home page. Each user’s relationship-based information feed displays a regularly updated flow of feeds posted by that user and other users who he or she has opted to follow. Since Weibo allows users to follow other users without establishing a reciprocal relationship, users are able to personalize whom to follow based on their interests. In other words, users can as easily follow celebrities and strangers as they follow friends and acquaintances. To improve user experience, the relationship-based information feed has evolved from a chronological timeline to one with multiple dimensions, including content relevancy, content quality, user interest, user engagement, user relationships and timeliness of information. Users can also customize their information feed by classifying followed accounts into different groups, e.g. friends, co-workers, e-commerce, finance, celebrities and live streaming, and view feeds from each group separately. Weibo also offers many other types of information feed. For example, video information feed, which appears after a user finishes watching a short video and a timeline of related videos are recommended; profile information feed, which can be found on a user’s individual page and shows all of the feeds shared by the user; and interest-based information feeds, which are timelines of feeds recommended by Weibo based on different interest-based themes. Hot Weibo timelines is an example of interested-based information feed that can be found in the discovery zone.

- Search. Our search function allows users to search our large content pool for users, feeds, videos, articles, pictures, etc. based on keyword (hashtagged), topic or recent popular trending.

- Object Page. We work with companies with large online content libraries of videos, songs, mobile applications, books and points of interest (such as restaurants, hotels and movie theaters) and create Weibo Pages for their objects, known as Object Pages. Users can visit these Object Pages to find rich content on these objects and interact with other users of similar interest. For example, users can stream songs, watch movie trailers, read book excerpts and download apps from the respective Object Pages. With Weibo location-based services, users can locate popular points of interest, find information about them, such as show times for movie theaters and menus for restaurants, access coupons, post comments, and see reviews shared by other users. Some Object Pages also offer the sale of movie tickets and books and app downloads.

- Trends. Trends are lists of hot topics on Weibo. A user can start a topic discussion by adding hashtags (#) around a word or phrase in a feed. The key word or phrase then becomes searchable with a single click. Top trends are listed in the discovery zone. Users may view feeds under each trending topic and participate in the discussion.

- Discovery Zone. The discovery zone shows a host of content and services based on topical interest, such as local information feeds based on the user’s current location, including game services, movie ticket purchases, online music streaming, online trading of stocks, influencers’ e-commerce top picks and live streaming, as well as interest-based information feeds, including movies, music, the NBA, auto and food. The discovery zone also displays the latest trending hot topics and hot Weibo feeds.

Table of Contents

Notifications. Users can choose to be notified of Weibo account activities through SMS or push notification on their device.

Games Services. We offer third-party online games, including role playing games, card games, strategy games and real life simulation games. Most games on Weibo are offered for free and certain games allow users to purchase virtual items. Weibo receives part of the revenues from such purchases through arrangements with the game developers.

VIP Membership. Weibo VIP membership offers our users certain services and functions that are not available to regular users. With these additional functions, VIP members can follow more users, have more ways to personalize their Pages, can send voice feeds, enjoy more cloud storage, receive additional options to manage information flow and followers, receive SMS notification of Weibo account activity and have access to premium games. VIP membership is available through monthly or annual subscriptions.

Weibo Apps. We have developed a suite of mobile apps to further enrich the service offerings of Weibo. For example, Weibo Headlines aggregates news and information from Weibo and other online sources based on an article’s popularity and enables users to comment, like and share to their followers on
Weibo. Another example is Weibo Weather (Tianqitong), a leading weather app in China that features weather condition, particle matter index (PMI) and other information, such as scenic photos from cities that users select to follow.

**Products for Advertising and Marketing Customers**

We seek to provide advertising and marketing solutions to enable our customers to promote their brands and conduct effective marketing activities. We provide our customers with analytical tools to enable them to track and improve the effectiveness of their marketing campaigns on our platform. Our advertising and marketing customers include key accounts, Alibaba/e-commerce merchants, SMEs and individuals that seek a full spectrum of online advertising and marketing services ranging from brand awareness to interest generation, sales conversion and loyalty marketing.

**Social Display Ads.** Social display ads appear on a user’s home information feeds and other information feeds. When users click on a social ad, they may be redirected to the advertiser’s Weibo Page for further engagement.

**Promoted Marketing.** Our promoted marketing offerings include the following:

- **Promoted Feeds.** Promoted feeds appear in the user’s information feed alongside organic feeds. We encourage our customers to produce feeds that have relevant information value similar to that of the users’ organic feeds. Customers may use our SIG recommendation engine to better target their audience and improve the relevancy of the ad to the users. As with other feeds, users can Repost, Comment on and Like promoted feeds, amplifying the visibility and reach of the original promoted feed and generating earned media to our customers. We offer promoted feeds tailored to different customer segments such as:
  - FST is a customizable and self-service marketing solution under a bidding system. Customers are able to target users based on gender, age, geographic location, interests and device type. They can also target users by their social interaction on our platform. For example, they may target all of the followers of a given user. Customers can place FST ads either through our authorized distributors, who have expertise in social marketing, or directly by themselves using our self-service advertising system;
  - Fans Headline is a promoted service that guarantees a certain feed from the customer will appear at the top of the information feeds of the customer’s followers;
  - Weibo Express is a promoted service offered to key accounts for them to reach and engage with a broad range of Weibo users; and

**Table of Contents**

- **Weibo Select** is a highly customizable version of promoted feeds. We work directly with the customer or the customer’s ad agency to define the parameters of the targeted marketing. For example, in addition to targeting users based on demographics and social relationships, customers can target users who have engaged with feeds using a specific keyword during a specified time period.

- **Promoted Accounts.** Promoted accounts appear either in a column next to the information feed on PC or directly in the information feed on both PC and mobile devices. Promoted accounts are labeled but otherwise appear in the same format as other accounts that we recommend to our users. Promoted accounts provide customers a way to grow their followers, with whom they can then drive engagement using their Weibo Pages.

- **Promoted Trends.** Promoted trends, which are labeled as “promoted,” appear at the top of the list of trending topics. When a user clicks on a promoted trend, he will be redirected to the sponsor’s landing page.

We provide our advertising and marketing customers with analytical tools to enable them to track and improve the effectiveness of their campaigns on our platform.

**Products for Platform Partners**

We seek to provide our platform partners with tools and APIs that they can use to share their content to our platform, distribute Weibo content across their properties and enhance their websites and applications with Weibo content, and to build social apps on Weibo or integrate their products with Weibo. Our platform partners include traditional and online media outlets, developers of games and other applications, MCNs and organizations with media rights. Products offered for our platform partners include:

**Weibo Connect.** The following products allow our platform partners to link their websites and mobile apps to our platform, enabling their users to share content to Weibo:

- **Single Sign-on Registration.** Users can register for access to our platform partners’ websites and apps with their Weibo accounts instead of creating new accounts online. This feature eliminates the need for users to register and create a new log-in identity for each website or app they visit, making it easier to explore new websites and apps requiring log-in.

- **Social Plugins.** Social plugins are a set of embedded widgets, such as Share, Like, Comment and Follow, that allow users to access the functionality of Weibo from third-party websites and mobile apps. By installing Weibo social plugins on their websites or mobile apps, our partners enable their users to share content to Weibo, which may direct traffic of interested Weibo users back to their properties.

- **Multimedia Cards.** Multimedia cards allow our mobile app partners to enable their users to share multimedia content, such as photos, songs and short videos, in a feed to Weibo. Content shared on multimedia cards is tagged and can be discovered by users who search for the tagged keywords.

**Weibo Service.** Our open application programming interfaces allow third-party developers to build apps to serve individual and organization users.
Enterprise Application Programming Interfaces. We offer enterprise services to businesses and other organizations through enterprise application programming interfaces. For example, our enhanced messaging application programming interfaces facilitate more convenient interaction between users and their followers. Using the application programming interfaces, third-party developers enable organizations to send private bulk messages to followers who have opted in to such subscriptions. For example, many followers of the China Earthquake Networks Center have subscribed for earthquake news alerts. With this subscription function, the China Earthquake Networks Center is able to send timely earthquake news through Weibo’s messenger to all of its subscribers at once. We also provide data application programming interfaces to third-party developers for them to provide data analytics services to brands and businesses.

Weibo Wallet. Weibo wallet enables our users to conduct interest generation activities on Weibo, such as handing out “red envelopes” and coupons to other users to build a bigger and more active fan base, and drive purchase conversion. Weibo wallet also enables users to purchase different types of products and services on Weibo, including those offered by us, such as marketing services and VIP membership, and those offered by our platform partners, such as e-commerce merchandises, financial products and virtual gifts.

Competition

Major Chinese internet companies, including Tencent, Baidu and NetEase, as well as new players in China, who provide online media, including content aggregation and distribution services, compete directly with us for user traffic and user engagement, content, talent and marketing resources. As a media platform in nature, we also compete with offline media companies for audiences and content.

In addition, as a social media featuring social networking services and messenger features, we are subject to intense competition from providers of similar services as well as potentially new types of online services. These services include (i) messengers and other social apps and sites, such as Weixin/WeChat, QQ Mobile, Qzone Mobile, Yixin, Laiwang, Douhan, Baidu Post and Momo; (ii) news apps and sites, such as those operated by other major internet companies, including Tencent, Baidu, NetEase, Sohu, Phoenix New Media and Bytedance; and (iii) multi-media (photo, short video, live streaming, etc.) apps, such as Momo, Kuaiushou, Inke, YY, Youku Toudou, iQiyi, Tencent Video, Nice, Paipai and Meipai.

We also compete with both offline and online games for the time and money of gamers. We have begun to offer social commerce solutions to our customers that enable them to conduct e-commerce on our platform. Consequently, our offerings compete with e-commerce companies and online verticals that enable merchants to conduct e-commerce, including location-based services and online-to-offline services. In addition to direct competition, we face indirect competition from companies that sponsor or maintain high traffic volume websites or provide an initial point of entry for internet users, including but not limited to providers of search services, web browser and navigation pages, such as Baidu, UC Web and Qihoo360. We may also face increasing competition from global social media, social networking services and messengers, such as Snapchat, Instagram, Facebook, Youtube, WhatsApp, Twitter, Line, Kakao Talk and Snow. Some of our competitors may have substantially more cash, traffic, technical and other resources than we do. See “Item 3.D. Key Information—Risk Factors—Risks Relating to Our Business—If we are unable to compete effectively for user traffic or user engagement, our business and operating results may be materially and adversely affected.”

We also face significant competition for advertising and marketing spending. A substantial majority of our revenues is generated from the sale of advertising and marketing services. We compete against online and mobile businesses that offer such services, including Tencent, Baidu, Youku Tudou, Bytedance, Momo, Sohu, NetEase and Phoenix New Media. We also compete with internet companies that offer online-to-offline (O2O), purchase solutions and other performance-based advertising services and digital media tailored to industries including fast moving consumer goods, IT, automobile, entertainment and travel, such as Autohome, Bitauto, Meituan/Diaoping, Ctrip and Focus Media. We also compete against traditional media outlets, such as television, radio and print, for advertising and marketing spending.

Some of our larger competitors have substantially broader product or service offerings and leverage their relationships based on other products or services to gain a larger share of advertising and marketing budgets. We believe that our ability to compete effectively for advertising and marketing spending depends upon many factors, including the size, composition and engagement of our user base, our ad targeting capabilities, market acceptance of our advertising and marketing services, our marketing and selling efforts, the return our customers receive from our advertising and marketing services and the strength and reputation of our brands. See “Item 3.D. Key Information—Risk Factors—Risks Relating to Our Business—If we are unable to compete effectively for advertising and marketing spending, our business and operating results may be materially and adversely affected.”
Unified Platform. We have developed a unified, open platform that allows our users, customers and platform partners to access a vast amount of content on Weibo from mobile devices, personal computers and other internet-enabled devices in real time. Our platform adopts service-oriented architecture that allows easy up-scaling and frequent upgrading of our products. Our platform is built on technologies that can process and analyze bulk data generated by millions of users instantaneously.

Scalable Distributed Storage. Our proprietary model optimizes and facilitates efficient data storage by dividing data into different levels. This distributed storage model allows us to efficiently manage billions of pieces of data while storing data on ordinary servers that are easily scalable. In addition, our proprietary cloud platform and multimedia data content delivery network (CDN) access acceleration technology allow us to store the massive volume of multimedia data generated, viewed or shared on our platform every day. Our geographically distributed architecture enables fast access for users across the country.

Social Interest Graph Recommendation Engine. We have developed a comprehensive database of our users’ social interest graphs as a result of the activities taking place on our platform. We create a SIG for each user account based on user actions such as Post, Repost, Comment, Like and Follow, social relationships, and demographic data such as age, gender and geography. Our SIG recommendation engine allows us and our customers to push content to Weibo users that they are more likely to find interesting and relevant. We are continually refining our recommendation engine to improve the relevance of information we push to users to increase user stickiness. In addition, we believe that advertisements can gain greater relevance from social context and become part of the user experience rather than an interruption of it.

Sales and Marketing

We maintain our own sales operations team. We transact business with key account customers primarily through third-party advertising agencies and with SMEs primarily through our own distribution network.

Due to the expertise required to carry out an effective online marketing campaign, key accounts usually hire advertising agencies to handle their internet brand campaigns. These advertising agencies provide a broad spectrum of services, including designing ad campaigns based on an analysis of the customer’s needs, crafting ads in various formats and providing analytical tracking.

Our distribution network for SME customers includes local distributors throughout China. Our distributors provide numerous services, including identifying customers, collecting payments, assisting customers in setting up their accounts with us, and engaging in other marketing and educational services aimed at acquiring customers. We have relied on distributors for several reasons. Our SME customer base in China is geographically diverse and fragmented, located in different regions in China. Moreover, SMEs are generally less experienced with online advertising and marketing as compared to large companies and, therefore, benefit from the support provided by distributors. Distributors serve as an efficient channel for us to reach SME customers throughout China and collect payments from them. We require distributors to staff dedicated customer service representatives for our SME customers. We provide periodic training programs to our distributors to maintain the service quality of our distributors and strengthen our relationships with them. In addition, we also offer marketing services through our self-service platform on Weibo.

Table of Contents

SINA acts as our agent in servicing our advertising and marketing clients. We have signed an agreement with SINA relating to these sales and marketing services. See “Item 7.B. Major Shareholders and Related Party Transactions—Related Party Transactions—Our Relationship with SINA—Sales and Marketing Services Agreement.” We will continue to offer integrated solutions to customers with both SINA’s and our advertising and marketing solutions. We believe that our advertising and marketing solutions are complementary to SINA’s.

We believe that our position as a leading social media in China has given us widespread name recognition. We focus on continually improving the quality of our products and services to strengthen our brand, as we believe satisfied users and customers are more likely to recommend our products and services to others. While word of mouth has helped us, we also make selective use of advertising, promotions and special events to promote Weibo awareness and usage.

Intellectual Property

We rely on a combination of patent, copyright, trademark and trade secret laws and restrictions on disclosure to protect our intellectual property rights. We have registered 21 patent and applied for an additional 160 patents with the PRC State Intellectual Property Office. We have registered 84 software copyrights with the PRC National Copyright Administration. We have also registered domain names, including weibo.com, weibo.cn and weibo.com.cn. We have obtained an exclusive, perpetual, worldwide and royalty-free license from SINA to use its “新浪微博” “weibo” and “微博” trademarks.

Despite our efforts to protect our proprietary rights, unauthorized parties may attempt to copy or otherwise obtain and use our technology. Monitoring unauthorized use of our technology is difficult and costly, and we cannot be certain that the steps we have taken will prevent misappropriation of our technology, particularly in foreign countries where the laws may not protect our proprietary rights as fully as in the United States. From time to time, we may have to resort to litigation to enforce our intellectual property rights, which could result in substantial costs and diversion of our resources.

In addition, third parties may initiate litigation against us alleging infringement of their proprietary rights or declaring their non-infringement of our intellectual property rights. In the event of a successful claim of infringement and our failure or inability to develop non-infringing technology or license the infringed or similar technology on a timely basis, our business could be harmed. In addition, even if we are able to license the infringed or similar technology, license fees could be substantial and may adversely affect our results of operations. See “Item 3.D. Key Information—Risk Factors—Risks Relating to Our Business—We may not be able to adequately protect our intellectual property, which could cause us to be less competitive” and “—We may be subject to intellectual property infringement claims or other allegations by third parties for information or content displayed on, retrieved from or linked to our platform, or distributed to our users, which may materially and adversely affect our business, financial condition and prospects.”

Seasonality

Weibo has experienced seasonality in its online advertising business. Historically, advertising spending tends to be the lowest in the first quarter of each calendar year due to long holidays around the Lunar New Year. Past performance may not be indicative of future trends, as the mix of advertising industry sectors, which may have different seasonality factors, may shift from quarter to quarter.
Regulation

The following description of PRC laws and regulations is based upon the opinion of TransAsia Lawyers, our PRC counsel. For a description of legal risks relating to our ownership structure and business, see “Item 3.D. Key Information—Risk Factors.”

Regulations on Microblogs

The Rules on the Administration of Microblog Development, issued by the Beijing Municipal Government in 2011, stipulate that users who post publicly on microblogs are required to disclose their real identity to the microblogging service provider, though they may still use pen names on their accounts. Microblogging service providers are required to verify the identities of their users. In addition, microblogging service providers based in Beijing were required to verify the identities of all of their users by March 16, 2012, including existing users who post publicly on their websites.

In order to comply with these rules, we have added additional clauses into the agreements between the users of our microblog service and us requesting our microblog users to register using their real names.

Regulations on Advertisements

The PRC government regulates advertising, including online advertising, principally through the State Administration for Industry and Commerce. Since 2005, the State Administration for Industry and Commerce has exempted most enterprises (other than radio stations, television stations, newspapers and magazines, non-corporate entities and entities specified in other regulations) that engage in advertising business from the requirement of holding an operating license for advertising in addition to a relevant business license. We conduct our online advertising business through Weimeng, which holds a business license that covers online advertising in its scope of business.

Advertisers, advertising operators and advertising distributors are required by PRC advertising laws and regulations to ensure that the content of the advertisements they produce or distribute are true and in full compliance with applicable laws and regulations. In addition, where a special government review is required for certain categories of advertisements before publishing, advertisers, advertising operators and advertising distributors are obligated to confirm that such review has been duly performed and that the relevant approval has been obtained. Violations of these regulations may result in penalties, including fines, confiscation of advertising income, orders to cease dissemination of the advertisements and orders to publish an advertisement correcting the misleading information. For serious violations, the State Administration for Industry and Commerce or its local branches may order the violator to terminate its advertising operations or even revoke its business license. Furthermore, advertisers, advertising operators or advertising distributors may be subject to civil liabilities if they infringe on the legal rights and interests of third parties.

On April 24, 2015 the Standing Committee of the National People’s Congress issued the PRC Advertising Law or the Advertising Law, which came into effect on September 1, 2015. The Advertising Law applies to all advertising activities conducted via the internet. The Advertising Law requires that users must be able to close online pop-up ads with one click. Moreover, internet service providers are obligated to cease publishing any advertisements that they know or should know are illegal. Violation of these regulations may result in penalties, including fines, confiscation of the advertising incomes, termination of advertising operations and even suspension of the provider’s business license.

On July 8, 2016, the State Administration for Industry and Commerce issued the Interim Measures for the Administration of Internet Advertising, or the Interim Measures, which became effective on September 1, 2016. The Interim Measures clarify that “Internet Advertisements” means commercial advertisements that promote commodities or services directly or indirectly via Internet media such as websites, webpages and Internet application programs in the form of texts, pictures, audio, video or other forms. The Interim Measures also impose a number of new requirements on Internet advertisers. For example, the Interim Measures state that paid search advertisements should be clearly distinguished from ordinary search results. In addition, consistent with the Advertising Law, the Interim Measures require that advertisements published on Internet pages in the form of pop-ups or other similar forms shall be clearly marked with a “Close” button to ensure “one click to close.” The measures also prohibit unfair competition in internet advertisement publishing, including (i) providing or using any programs or hardware to interrupt or filter any legally operated advertisements of other persons; and (ii) using network pathways, network equipment or applications to disrupt the normal data transmission of advertisements, alter or block legally operated advertisements of other persons or load advertisements without authorization. Violation of these regulations may result in fines of up to RMB30,000, with any punishments administrated by the Administrative Authority for Industry and Commerce in the place where the advertisement publisher is located.

Regulations on Value-Added Telecommunications Services

The Telecommunications Regulations, promulgated by the State Council in 2000, and were subsequently revised in 2014 and 2016 respectively, draw a distinction between “basic telecommunications services” and “value-added telecommunication services.” Internet content provision services is a subcategory of value-added telecommunications services. On December 25, 2015, the MIIT published the Classification Catalogue of Telecommunications Services (the 2015 Catalogue), which took effect on March 1, 2016. The first catalogue was published in September 2000 and was subsequently amended in 2001 and 2003 respectively. Under the 2015 Catalogue, the “value-added telecommunication services” was further classified into two sub-categories and 10...
The State Council issued the Measures on Internet Information Services concurrently with the Telecommunications Regulations in 2000 to regulate internet content provision services, which was subsequently amended on January 9, 2011. According to these measures, commercial internet content provision service operators must obtain an Internet Content Provision License from the relevant government authorities before engaging in any commercial internet content provision operations within the PRC. These measures further stipulate that entities providing internet content provision services regarding news, publishing, education, medicine, health, pharmaceuticals and medical equipment must procure the approval of the national government authorities responsible for such areas prior to applying for an operating license from the relevant government authorities.

The Administrative Measures on Telecommunications Business Operating Licenses, promulgated by the MIIT in 2001 and revised in 2009, set forth the types of licenses required to operate value-added telecommunications services and the qualifications and procedures for obtaining such licenses. For example, an information service operator providing value-added services in multiple provinces is required to obtain an inter-regional license, whereas an information services operator providing the same services in one province is required to obtain a local license.

To comply with these PRC laws and regulations, Weimeng holds an Internet Content Provision License issued by the Beijing Telecommunications Administration. In addition, Weimeng also holds an inter-regional Value-Added Telecommunications Services Operating License for provision of value-added telecommunication services nationwide.

**Restrictions on Foreign Ownership in Value-Added Telecommunications Services**

According to the Provisions on Administration of Foreign Invested Telecommunications Enterprises, promulgated by the State Council in 2001 and amended in 2008 and 2016, respectively, the ultimate foreign equity ownership in a value-added telecommunications service provider must not exceed 50%. Moreover, for a foreign investor to acquire any equity interest in a value-added telecommunications business in China, it must demonstrate a good track record and experience in operating value-added telecommunications services. Foreign investors that meet these requirements must obtain approvals from the MIIT and the Ministry of Commerce or their authorized local branches. Due to the limitation of foreign investment in value-added telecommunications services companies that provide internet information services, we would be prohibited from acquiring any equity interest in Weimeng. In addition, we believe that our contractual arrangements with Weimeng and its individual shareholders provide us with sufficient and effective control over Weimeng. Accordingly, we currently do not plan to acquire any equity interest in Weimeng.

The Notice of the MIIT on Intensifying the Administration of Foreign Investment in Value-added Telecommunications Services, issued in 2006, prohibits domestic telecommunications services providers from leasing, transferring or selling telecommunications business operating licenses to any foreign investor in any form, or providing any resources, sites or facilities to any foreign investor for their illegal operation of a telecommunications business in China. Either the holder of a value-added telecommunications business operating license or its shareholders must legally own the domain names and trademarks used by such license holder in providing value-added telecommunications services. The notice further requires each license holder to have the necessary facilities, including servers, for its approved business operations and to maintain such facilities in the regions covered by its license. In addition, all value-added telecommunications service providers are required to maintain network and internet security in accordance with the standards set forth in the relevant PRC regulations. If a license holder fails to comply with the requirements in the notice and cure such non-compliance, the MIIT or its local counterparts have the discretion to take measures against such license holders, including revoking their value-added telecommunications business operating licenses.

**Table of Contents**

To comply with these PRC regulations, we operate our platform through Weimeng. Weimeng is currently owned by four individuals, Z. Cao, W. Zheng, Y. Liu, and W. Wang, all of whom are PRC citizens. Weimeng holds an Internet Content Provision License and a Bulletin Board Service Permit. Weimeng owns the domain names related to its operations and our platform (weibo.com, weibo.cn, and weibo.com.cn), while the trademarks relating to our operations are held by Weibo Technology and SINA's subsidiaries. Due to the fact that trademarks owned by SINA's subsidiaries contain SINA's Chinese name or logo, such trademarks cannot be transferred to us. However, each of SINA's subsidiaries has granted an exclusive license to Weimeng for its use of such trademarks. If the relevant PRC government authorities determine in the future that the current ownership of our trademarks do not comply with the relevant regulations and the trademarks relating to our operations must be held by Weimeng, we may need to transfer these trademarks to Weimeng, which could severely disrupt our business.

If, despite these precautions, the PRC government determines that we do not comply with applicable laws and regulations, it can revoke our business and operating licenses, require us to discontinue or restrict our operations, restrict our right to collect revenues, block our platform, require us to restructure our operations, including possibly the establishment or restructuring of a foreign-invested telecommunications enterprise, re-application for the necessary licenses, or relocation of our businesses, staff and assets, impose additional conditions or requirements with which we may not be able to comply, or take other regulatory or enforcement actions against us. See "Item 3.D. Key Information—Risk Factors—Risks Relating to Our Corporate Structure—If the PRC government finds that the agreements that establish the structure for operating our businesses in China do not comply with PRC regulations on foreign investment in internet and other related businesses, or if these regulations or their interpretation change in the future, we could be subject to severe penalties or be forced to relinquish our interests in those operations."

**Regulations on Internet Content Services**

National security considerations are an important factor in the regulation of internet content in China. The National People’s Congress has enacted laws with respect to maintaining the security of internet operations and internet content. According to these laws, as well as the Administrative Measures on Internet Information Services, violators may be subject to penalties, including criminal sanctions, for internet content that:

- opposes the fundamental principles stated in the PRC Constitution;
- compromises national security, divulges state secrets, subverts state power or damages national unity;
- harms the dignity or interests of the state;
The Decision Regarding the Safeguarding of Internet Security, enacted by the Standing Committee of the National People’s Congress and amended in 2009, makes it unlawful to: (i) gain improper entry into a computer or system of strategic importance; (ii) disseminate politically disruptive information; (iii) leak state secrets; (iv) spread false commercial information; or (v) infringe intellectual property rights.

The Provisions on Technological Measures for Internet Security Protection, promulgated by the Ministry of Public Security in 2005, require all internet content provision operators to keep records of certain information about their users (including user registration information, log-in and log-out times, IP addresses, content and time of posts by users) for at least 60 days and submit the above information as required by laws and regulations. Internet content provision operators must regularly update information security systems for their websites with local public security authorities, and must also report any instances of public dissemination of prohibited content. If an internet content provision operator violates these measures, the PRC government may revoke its Internet Content Provision License and shut down its websites.

In addition, the State Secrecy Bureau has issued provisions authorizing the blocking of access to any website it deems to be leaking state secrets or failing to comply with the relevant legislation regarding the protection of state secrets.

On July 1, 2015, the Standing Committee of the National People’s Congress issued the National Security Law, which came into effect on the same day. The National Security Law provides that the state shall safeguard the sovereignty, security and cyber security development interests of the state, and that the state shall establish a national security review and supervision system to review, among other things, foreign investment, key technologies, internet and information technology products and services, and other important activities that are likely to impact the national security of China.
On November 7, 2016, the Standing Committee of the National People’s Congress issued the Cyber Security Law, which will come into effect on June 1, 2017. This is the first Chinese law that focuses exclusively on cyber security. The Cyber Security Law provides that network operators must set up internal security management systems that meet the requirements of a classified protection system for cyber security, including appointing dedicated cyber security personnel, taking technical measures to prevent computer viruses, network attacks and intrusions, taking technical measures to monitor and record network operation status and cyber security incidents, and taking data security measures such as data classification, backups and encryption. The Cyber Security Law also imposes a relatively vague but broad obligation to provide technical support and assistance to the public and state security authorities in connection with criminal investigations or for reasons of national security. The Cyber Security Law also requires network operators that provide network access or domain name registration services, landline or mobile phone network access, or that provide users with information publication or instant messaging services, to require users to provide a real identity when they sign up. The Cyber Security Law sets high requirements for the operational security of facilities deemed to be part of the PRC’s “key information infrastructure.” These requirements include data localization, i.e., storing personal information and important business data in China, and national security review requirements for any network products or services that may have an impact on national security. Among other factors, “key information infrastructure” is defined as critical information infrastructure, that will, in the event of destruction, loss of function or data leak, result in serious damage to national security, the national economy and people’s livelihoods, or the public interest. Specific reference is made to key sectors such as public communication and information services, energy, transportation, water-resources, finance, public services and e-government. A prior draft of the Cyber Security Law included reference to any networks with a large number of users, but this language was deleted in the final version of the law.

Because Weimeng is an internet content provision operator, we are subject to laws and regulations relating to information security. To comply with these laws and regulations, Weimeng has completed the mandatory security filing procedures with local public security authorities. We regularly update our information security and content-filtering systems based on any newly issued content restrictions, and maintain records of user information as required by relevant laws and regulations. We have also taken measures to delete or remove links to content that, to our knowledge, contains information that violates PRC laws and regulations.

If, despite the precautions, we fail to identify and prevent illegal or inappropriate content from being displayed on or through our platform, we may be subject to liability. In addition, these laws and regulations are subject to interpretation by the relevant authorities, and it may not be possible to determine in all cases what content could result in liability. To the extent that PRC regulatory authorities find any content displayed on or through our platform objectionable, they may require us to limit or eliminate the dissemination or availability of such content or impose penalties, including the revocation of our operating licenses or the suspension or shutdown of our online operations. In addition, the costs of compliance with these regulations may increase as the volume of content and users on our website increase. See “Item 3.D. Key Information—Risk Factors—Risks Relating to Doing Business in China—Regulation and censorship of information disseminated over the internet in China may adversely affect our business and subject us to liability for information displayed on our platform.”

**Regulations on Internet Privacy**

In recent years, PRC government authorities have enacted legislation on internet use to protect personal information from any unauthorized disclosure. PRC law does not prohibit internet content provision operators from collecting and analyzing personal information from their users. However, the Administrative Measures on Internet Information Services prohibit an internet content provision operator from insulting or slandering a third party or infringing the lawful rights and interests of a third party. Pursuant to the Administrative Measures on Internet Electronic Messenger Services, internet content provision operators that provide electronic messenger services must keep users’ personal information confidential and must not disclose such personal information to any third party without the users’ consent unless required by law. The regulations further authorize the relevant telecommunications authorities to order internet content provision operators to rectify any unauthorized disclosure. Internet content provision operators are subject to legal liability if the unauthorized disclosure results in damages or losses to users. The PRC government, however, has the power and authority to order internet content provision operators to turn over personal information if an internet user posts any prohibited content or engages in illegal activities on the internet.

**Table of Contents**

The Several Provisions on Regulating the Market Order of Internet Information Services, promulgated by the MIIT and effective in 2012, stipulate that internet content provision operators must not, without user consent, collect user personal information, which is defined as user information that can be used alone or in combination with other information to identify the user, and may not provide any such information to third parties without prior user consent. Internet content provision operators may only collect user personal information necessary to provide their services and must expressly inform the users of the method, content and purpose of the collection and processing of such user personal information. In addition, an internet content provision operator may only use such user personal information for the stated purposes under the internet content provision operator’s scope of service. Internet content provision operators are also required to ensure the proper security of user personal information, and take immediate remedial measures if user personal information is suspected to have been disclosed. If the consequences of any such disclosure are expected to be serious, ICP operators must immediately report the incident to the telecommunications regulatory authority and cooperate with the authorities in their investigations.

On December 28, 2012, the Standing Committee of the National People’s Congress issued the Decision on Strengthening the Protection of Online Information. Most requirements under the decision that are relevant to internet content provision operators are consistent with the requirements already established under the MIIT provisions mentioned above, though often more strict and broad. Under the decision, if an internet content provision operator wishes to collect or use personal electronic information, it must do so in a legal and appropriate manner, and may do so only if it is necessary for the services it provides. It must disclose the purpose, method and scope of any such collection or use, and must seek consent from the relevant individuals. Internet content provision operators are also required to publish their policies relating to information collection and use, must keep such information strictly confidential, and must take technological and other measures to ensure the safety of such information. Internet content provision operators are further prohibited from divulging, distorting or destroying of any such personal electronic information, or selling or proving such information to other parties. The decision also requires that internet content provision operators providing information publishing services must collect from users their personal identification information, for registration. In very broad terms, the decision provides that violators may face warnings, fines, confiscation of illegal gains, license revocations, filing cancellations and website closures.

On July 16, 2013, the MIIT issued the Order for the Protection of Telecommunication and Internet User Personal Information. Most requirements under the order that are relevant to internet content provision operators are consistent with pre-existing requirements but the requirements under the order are often more stringent and have a wider scope. If an internet content provision operator wishes to collect or use personal information, it may do so only if such collection is necessary for the services it provides. Further, it must disclose to its users the purpose, method and scope of any such collection or use, and must obtain consent from its users whose information is being collected or used. Internet content provision operators are also required to establish and publish their
within China. Entities engaged in developing and operating domestic online games products should register with the Ministry of Culture.

Sino-foreign cooperative joint ventures and wholly foreign-owned enterprises cannot engage in providing web publishing services.

Any online game shall obtain approval from SAPPRFT before it is launched online. Further, Sino-foreign equity joint ventures, processed and which are made available to the public through information networks, including written works, pictures, maps, games, cartoons, audio/video reading materials and others. Any online game shall obtain approval from SAPPRFT before it is launched online. Further, Sino-foreign equity joint ventures, Sino-foreign cooperative joint ventures and wholly foreign-owned enterprises cannot engage in providing web publishing services.

On November 7, 2016, the Standing Committee of the National People’s Congress issued the Cyber Security Law, which will come into effect on June 1, 2017. The Cyber security Law imposes certain data protection obligations on network operators, including that network operators may not disclose, tamper with, or damage users’ personal information that they have collected, and are obligated to delete unlawfully collected information and to amend incorrect information. Moreover, internet operators may not provide users’ personal information to others without consent. Exempted from these rules is information irreversibly processed to preclude identification of specific individuals. Also, the Cyber security Law imposes breach notification requirements that will apply to breaches involving personal information.

Regulations on Online Game Operations and Cultural Products

Online Cultural Products

The Provisional Regulations for the Administration of Online Culture, issued by the Ministry of Culture in 2003 and further revised in 2004 and 2011, apply to entities engaging in activities related to “internet cultural products,” which include cultural products that are produced specifically for internet use, such as online music and entertainment, online games, online plays, online performances, online works of art and Web animation, and other online cultural products that through technical means, produce or reproduce music, entertainment, games, plays and other art works for internet dissemination. According to these Regulations, commercial entities are required to apply to the relevant local branch of the Ministry of Culture for an Online Culture Operating Permit if they engage in the production, duplication, importation, release or broadcasting of internet cultural products; the dissemination of online cultural products on the internet or the transmission of such products via internet or mobile phone networks to user terminals, such as computers, phones, television sets and gaming consoles, or internet surfing service sites such as internet cafes; or the holding or exhibition of contests related to internet cultural products.

The Administrative Measures for Content Self-review by Internet Culture Business Entities, which were issued by the Ministry of Culture on August 1, 2013, and took effect on December 1, 2013, require internet culture business entities to review the content of products and services before providing them to the public. The content management system of an internet culture business entity is required to specify the responsibilities, standards and processes for content review as well as accountability measures, and is required be filed with the local provincial branch of the Ministry of Culture.

Internet Publication

The Rules for the Administration of Electronic Publications, which were issued by the General Administration of Press and Publication in 2008 and further amended in 2015, regulate the production, publishing and importation of electronic publications in the PRC and outline a licensing system for business operations involving electronic publishing. Under these rules and other regulations issued by the General Administration of Press and Publication, online games are classified as a type of electronic production and publishing of online games is required to be done by licensed electronic publishing entities with standard publication codes. If a PRC company is contractually authorized to publish foreign electronic publications, it must obtain the approval of, and register the copyright license contract with, the State Administration for Press, Publication, Radio, Film and Television, which was formed when the General Administration of Press and Publication was combined with the State Administration for Radio, Film and Television in March 2013.

The Administrative Provisions on Online Publishing Services, or the Provisions, which are jointly issued by the MIIT and the State General Administration of Press, Publication, Radio, Film and Television in 2016, and takes effect on March 10, 2016. The Provisions define “online publishing services” as providing online publications to the public through information networks. Any online publishing services provided in the territory of the PRC is subject to the Provisions. The Provisions requires any internet publishing services provider to obtain an online publishing service license to engage in online publishing services. Under the Provisions, online publications refers to digital works which have publishing features such as having been edited, produced or processed and which are made available to the public through information networks, including written works, pictures, maps, games, cartoons, audio/video reading materials and others. Any online game shall obtain approval from SAPPRFT before it is launched online. Further, Sino-foreign equity joint ventures, Sino-foreign cooperative joint ventures and wholly foreign-owned enterprises cannot engage in providing web publishing services.
The Circular of the Ministry of Culture on Improving and Strengthening the Examination of Content of Online Games, issued by the Ministry of Culture in 2009, strictly prohibits offensive promotion and advertisement of online games, games propagating eroticism and gambling and violence, and requires game operators to obtain prior approval from the Ministry of Culture before operating any online games.

The Notice Regarding the Consistent Implementation of the “Stipulations on ‘Three Provisions’ of the State Council and the Relevant Interpretations of the State Commission Office for Public Sector Reform and the Further Strengthening of the Administration of Pre-examination and Approval of Internet Games and the Examination and Approval of Imported Internet Games”, also known as Circular 13, was jointly published by the General Administration of Press and Publication, the National Copyright Administration and the National Office of Combating Pornography and Illegal Publications in 2009. Circular 13 expressly states that foreign investors are not permitted to participate in the operation of online games via wholly owned, equity joint venture or cooperative joint venture investments in China, and from controlling and participating in such businesses directly or indirectly through contractual or technical support arrangements. In addition, according to Circular 13, the approval of the General Administration of Press and Publication is required for publishing any imported online games. Although Circular 13 was issued several years ago, it is not yet clear what impact, if any, it will have on the operation of online games in China.

The Interim Measures for Administration of Online Games, promulgated by the Ministry of Culture in 2010, reiterate that any online games operator should obtain an Online Culture Operating Permit to engage in online game services. In addition, the content of any imported online games should be examined and approved by the Ministry of Culture before they are operated within China, and any domestic online game must be registered with the Ministry of Culture within 30 days after its launch.

As a result of the various regulations described above, commercial entities are required to apply to the relevant local branch of the Ministry of Culture for an Online Culture Operating Permit to provide online games services.

Virtual Currency

The Notice on the Reinforcement of the Administration of Internet Cafes and Online Games, jointly issued by the Ministry of Culture, the People’s Bank of China and other government authorities in 2007, directs the People’s Bank of China to strengthen the administration of virtual currency in online games to avoid any adverse impact on the real economic and financial systems. This notice provides that the total amount of virtual currency issued by online game operators and the amount purchased by individual users should be strictly limited, with a strict and clear division between virtual transactions and real e-commerce transactions. This notice also provides that virtual currency should only be used to purchase virtual items.

The Notice on the Strengthening of Administration on Online Game Virtual Currency, jointly issued by the Ministry of Culture and the Ministry of Commerce in 2009, broadly defined virtual currency as a type of virtual exchange instrument issued by internet game operation enterprises, purchased directly or indirectly by the game user by exchanging legal currency at a certain exchange rate, saved outside the game programs, stored in servers provided by the internet game operation enterprises in electronic record format and represented by specific numeric units. Virtual currency is used to exchange internet game services provided by the issuing enterprise for a designated extent and time, and is represented by several forms, such as online prepaid game cards, prepaid amounts or internet game points, and does not include game props obtained from playing online games. In 2009, the Ministry of Culture further promulgated the Filing Guidelines on Online Game Virtual Currency Issuing Enterprises and Online Game Virtual Currency Trading Enterprises, which specifically defines “issuing enterprise” and “trading enterprise” and stipulates that a single enterprise may not operate both types of business.

Table of Contents

Protection of Minors

In 2007, the General Administration of Press and Publication and several other governmental authorities issued a circular requiring the implementation of an “anti-fatigue system” and a real-name registration system by all PRC online game operators, in an effort to curb addictive online game play behaviors of minors. Under the anti-fatigue system, three hours or less of continuous play by minors is considered to be “healthy,” three to five hours to be “fatiguing,” and five hours or more to be “unhealthy.” Game operators are required to reduce the value of in-game benefits to a game player by half if the game player has reached “fatiguing” level, and to zero in the case of “unhealthy” level.

The Notice on Initializing the Verification of Real-name Registration for Anti-Fatigue System on Internet Games, issued by the General Administration of Press and Publication, the MIIT, the Ministry of Education and five other governmental authorities in 2011, imposes stringent penalties on online game operators that do not implement the required anti-fatigue and real-name registration measures properly and effectively. Its main focus is to prevent minors from using an adult ID to play internet games. The operation of an online game may be terminated if the operator is found to be in violation of this notice.

The Implementation of Online Game Monitoring System of the Guardians of Minors, a circular jointly issued by the Ministry of Culture, the MIIT and six other central government authorities in 2011, aimed to provide specific protective measures to monitor the online game activities of minors and curb addictive online game play behavior by minors. Under this circular, online game operators are required to adopt various measures to maintain a system to communicate with the parents or other guardians of minors playing online games and online game operators are required to monitor the online game activities of minors, and must suspend the account of a minor if so requested by the minor’s parents or guardians. The monitoring system was formally implemented on March 1, 2011.

The Work Plan for the Integrated Prevention of Minors’ Online Game Addiction, jointly issued by the General Administration of Press and Publication, the Ministry of Education, the Ministry of Culture, the MIIT and 11 other PRC government authorities on February 5, 2013, implemented integrated measures by different authorities to prevent minors from becoming addicted to online games. Under the work plan, the current relevant regulations regarding online games will be further clarified and additional implementation rules will be issued, and as a result, online game operators will be required to implement additional measures to protect minors.

Weimeng currently holds an Online Culture Operating Permit with a business scope encompassing the “issuance of virtual currency” and the “operation of game products” issued by the Ministry of Culture in July 2011, which is valid through December 31, 2017. Weimeng is in the process of applying for an internet publishing permit. We have adopted our own anti-fatigue and real name registration systems.
On December 20, 2007, the State Administration for Radio, Film and Television and the MIIT jointly issued the Rules for the Administration of Internet Audio and Video Program Services, commonly known as Circular 56, which came into effect as of January 31, 2008 and was later amended in 2015. Circular 56 reiterates the requirement set forth in the earlier rules that online audio/video service providers must obtain an internet audio/video program transmission license from the State Administration for Radio, Film and Television. Furthermore, Circular 56 requires all online audio/video service providers to be either wholly state-owned or state-controlled companies. According to relevant official answers to press questions published on the website of State Administration for Radio, Film and Television on February 3, 2008, officials from the State Administration for Radio, Film and Television and the MIIT clarified that online audio/video service providers that already had been operating lawfully prior to the issuance of Circular 56 may re-register and continue to operate without becoming state-owned or controlled, provided that such providers have not engaged in any unlawful activities. This exemption will not be granted to online audio/video service providers established after Circular 56 was issued. These policies have been reflected in the Application Procedure for Audio/Video Program Transmission License. Failure to obtain the internet audio/video program transmission license may subject an online audio/video service provider to various penalties, including fines of up to RMB30,000, seizure of related equipment and servers used primarily for such activities and even suspension of its online audio/video services.

Table of Contents

On December 16, 2016, the State Administration of Press, Publication, Radio, Film and Television of the PRC (SAPPRFT) issued the Rules for the Administration of Video and Audio Programs on Weibo, WeChat and other Social Media Platforms, or Circular 196. Circular 196 requires that any organizations that provide online streaming through social media platforms such as Weibo or WeChat should obtain an internet audio/video program transmission license. For organizations and individuals that do not hold license, the hosting social networking platform shall be responsible for supervising the content of the posted programs, and the scope of the programs must not exceed the scope stated on the platform’s audio/video program transmission license. Similarly, film and TV dramas broadcasted through social media are required to obtain a license for public airing, and social media platforms are not allowed to repost user-generated video or audio programs featuring political news.

Regulations on Producing Audio/Video Programs

On July 19, 2004, the SARFT promulgated the Administrative Measures on the Production and Operation of Radio and Television Programs, effective as of August 20, 2004 and amended in 2015. These Measures provide that anyone who wishes to produce or operate radio or television programs must first obtain an operating permit. Applicants for this permit must meet several criteria, including having a minimum registered capital of RMB30.0 million. Weimeng holds a permit for radio and television program production and operation, with a permitted scope encompassing production of animated programs, features programs and television entertainment programs, which is valid until February 2019.

Regulations on Online Music

On November 20, 2006, the Ministry of Culture issued Several Suggestions of the Ministry of Culture on the Development and Administration of Internet Music, which became effective immediately upon its issuance. These suggestions, among other things, reiterate the requirement for an internet culture business permit to carry out any business relating to internet music products. In addition, foreign investors are prohibited from operating internet culture businesses. However, the laws and regulations on internet music products are still evolving, and there have not been any provisions stipulating whether or how music videos will be regulated by these suggestions.

On August 18, 2009, the Ministry of Culture promulgated the Notice on Strengthening and Improving the Content Review of Online Music. According to this notice, only “internet culture operating entities” approved by the Ministry of Culture may engage in the production, release, dissemination (including providing direct links to music products) and importation of online music products. The content of online music shall be reviewed by or filed with the Ministry of Culture. Internet culture operating entities should establish a strict self-monitoring system of online music content and set up a special department in charge of such monitoring. Weimeng has obtained an Online Culture Operating Permit, the scope of which covers online music operations.

Regulations on Internet News Dissemination

The Administrative Regulations for Internet News Information Services were jointly promulgated by the State Council Information Office and the MIIT in 2005. These regulations stipulate that general websites established by non-news organizations may publish news released by certain official news agencies if such websites satisfy the requirements set forth in the these regulations but may not publish news items produced by themselves or other news sources. These regulations also require the general websites of non-news organizations to obtain permit and approval from the State Council Information Office at both the provincial and national level before they commence providing news dissemination services. On January 11, 2016, a revised draft of the Administrative Regulations for Internet News Information Services was published by the State Internet Information Office, or the SIIO, to solicit public comments.

On April 28, 2015, the SIIO issued the Provisions on the Questioning Procedures for Internet News Service Providers, or the Provisions. The Provisions provide the SIIO and its local branches with a formal procedure for bringing in key personnel from internet news service providers for questioning as well as giving oral warnings, identifying problems and ordering rectifications in certain circumstances specified in the Provisions such as the failure to deal with illegitimate information in a timely fashion and when circumstances are severe. If the SIIO or its local branches orders an internet news service provider to rectify a problem through the questioning procedures and it fails to do so, then the internet new service provider may be subject to administrative action including a written warning, fine, temporary suspension of operations or the revocation of licenses. Internet news service providers are also subject to enhanced penalties for several violations under the questioning procedures. Additionally, the SIIO and its local branches may publicize information related to the questioning procedures that it conducted against internet news service providers under the Provisions. The Provisions took effect on June 1, 2015.

Weimeng currently provides a platform for our users to post news, current topics and social events and has not obtained an internet news publication license. However, if the relevant government authorities determine that the services provided by Weimeng are internet news dissemination services and an
internet news publication license for such services is needed, we may need to apply for the relevant approval and license, which Weimeng may not successfully obtain in a timely manner or at all.

**Regulations on Human Resources Services**

The principal regulation governing ownership of human resources services companies in China is the Interim Regulations on the Administration of China-Foreign Equity Joint Ventures as Human Resources Agencies, jointly promulgated by the Ministry of Personnel (which has been reorganized into the PRC Ministry of Human Resources and Social Security), the Ministry of Commerce and the State Administration for Industry and Commerce in September 2003, and amended in May 2005 and April 2015. Under this regulation, the percentage of foreign ownership of a foreign-invested human resources services company cannot be less than 25% or more than 49%, unless the foreign investor is from Hong Kong or Macao, in which case foreign ownership is permitted to be up to 70%.

On November 16, 2007, the PRC Ministry of Personnel, the Ministry of Commerce and the State Administration for Industry and Commerce jointly promulgated the supplementary provisions of the Interim Regulations on the Administration of China-Foreign Equity Joint Ventures as Human Resources Agencies. Pursuant to these supplementary provisions, investors from Hong Kong or Macao would be permitted to own 100% of a foreign-invested human resources agency.

Human resources services companies in China are mainly regulated by the Ministry of Human Resources and Social Security. The principal regulation applicable to human resources services companies is the Regulations on the Administration of Human Resource Markets, jointly promulgated by the Ministry of Personnel and the State Administration for Industry and Commerce on September 11, 2001 and amended on March 22, 2005. Under this regulation, any entity providing human resource services in China must obtain a human resources services license from the local Administration of Personnel.

Weimeng obtained a human resources services license on July 28, 2014, which is valid through July 27, 2017.

**Regulations on Intellectual Property Rights**

China has adopted legislation governing intellectual property rights, including trademarks, patents and copyrights. China is a signatory to the major international conventions on intellectual property rights and became a member of the Agreement on Trade Related Aspects of Intellectual Property Rights upon its accession to the World Trade Organization in December 2001.

*Patent*. The Patent Law was adopted in 1984 and amended in 1992, 2000 and 2008. The purpose of the Patent Law is to protect lawful interests of patent holders, encourage invention, foster applications of invention, enhance innovative capabilities and promote the development of science and technology. To be patentable, invention or utility models must meet three conditions: novelty, inventiveness and practical applicability. Patents cannot be granted for scientific discoveries, rules and methods for intellectual activities, methods used to diagnose or treat diseases, animal and plant breeds, substances obtained by means of nuclear transformation or a design which has major marking effect on the patterns or colors of graphic print products or a combination of both patterns and colors. The Patent Office under the State Intellectual Property Office is responsible for receiving, examining and approving patent applications. A patent is valid for a term of twenty years in the case of an invention and a term of ten years in the case of utility models and designs. A third-party user must obtain consent or a proper license from the patent owner to use the patent. Otherwise, the use constitutes an infringement of patent rights.

---

**Table of Contents**

- We have registered 21 patents and applied for 160 patents with the State Intellectual Property Office as of March 31, 2017.

*Copyright*. The Copyright Law was adopted in 1990 and amended in 2001 and 2010. The amended Copyright Law extends copyright protection to internet activities, products disseminated over the internet and software products. In addition, there is a voluntary registration system administered by the China Copyright Protection Center. The amended Copyright Law also requires registration of a copyright pledge.

According to the Copyright Law, an infringer will be subject to various civil liabilities, which include stopping the infringement, eliminating the damages, apologizing to the copyright owners and compensating the losses of copyright owners. The Copyright Law further provides that the infringer must compensate the actual loss suffered by the copyright owner. If the actual loss of the copyright owner is difficult to calculate, the illegal income received by the infringer as a result of the infringement will be deemed as the actual loss or if such illegal income is also difficult to calculate, the court can decide the amount of the actual loss up to RMB500,000.

To address the problem of copyright infringement related to the content posted or transmitted over the internet, the National Copyright Administration and the MIIT jointly promulgated the Measures for Administrative Protection of Copyright Related to the Internet in 2005.

The Protection of the Right of Communication through Information Networks was promulgated by the State Council in 2006 and amended in 2013. Under this regulation, with respect to any information storage space, search or link services provided by an internet service provider, if the legitimate right owner believes that the works, performance or audio or video recordings pertaining to that service infringe his or her rights of communication, the right owner may give the internet service provider a written notice containing the relevant information along with preliminary materials proving that an infringement has occurred, and requesting that the internet service provider delete, or disconnect the links to, such works or recordings. The right owner will be responsible for the truthfulness of the content of the notice. Upon receipt of the notice, the internet service provider must delete or disconnect the links to the infringing content immediately and forward the notice to the user that provided the infringing works or recordings. If the written notice cannot be sent to the user due to the unknown IP address, the contents of the notice shall be publicized via information networks. If the user believes that the subject works or recordings have not infringed others’ rights, the user may submit to the internet service provider a written explanation with preliminary materials proving that an infringement has not occurred, and requesting that the internet service provider delete, or disconnect the links to, such works or recordings. The internet service provider should then immediately restore the deleted or disconnected content and forward the user’s written statement to the right owner.

Under the Torts Liability Law, which became effective in 2010, both internet users and internet service providers may be liable for the wrongful acts of users who infringe the lawful rights of other parties. If an internet user utilizes internet services to commit a tortious act, the party whose rights are infringed may request the internet service provider to take measures, such as removing or blocking the content, or disabling the links thereto, to prevent or stop the infringement. If the internet service provider does not take necessary measures after receiving such notice, it shall be jointly liable for any further damages suffered by the rights holder. Furthermore, if an internet service provider fails to take necessary measures when it knows that an internet user utilizes
Infringement of Information Networking Transmission Rights, which took effect as of January 1, 2013. This document provides more detailed guidance as to the circumstances in which the provision by network users or network service providers of other’s works, performances, and audio or video products without permission from the rights owner constitutes infringement of information network transmission rights. This document provides that internet service providers will be jointly liable if they assist in infringing activities or fail to remove infringing content from their websites once they know of the infringement or receive notice from the rights holder. This document also provides that where a network service provider obtains economic advantage directly from the works, performances, and sound or visual recordings provided by the network service provider, it must pay close attention to infringement of network information transmission rights by network users.
Under the 2008 Foreign Currency Administration Rules, if documents certifying the purposes of the conversion of RMB into foreign currency are submitted to the relevant foreign exchange conversion bank, the RMB will be convertible for current account items, including the distribution of dividends, interest and royalties payments, and trade and service-related foreign exchange transactions. Conversion of RMB for capital account items, such as direct investment, loans, securities investment and repatriation of investment, however, is subject to the approval of SAFE or its local counterparts.

Under the 1996 Administration Rules of the Settlement, Sale and Payment of Foreign Exchange, foreign-invested enterprises may only buy, sell and/or remit foreign currencies at banks authorized to conduct foreign exchange business after providing valid commercial documents and, in the case of capital account item transactions, obtaining approval from SAFE or its local counterparts. Capital investments by PRC entities outside of China, after obtaining the required approvals from the relevant approval authorities, such as the Ministry of Commerce and the National Development and Reform Commission or their local counterparts, are also required to register with SAFE or its local counterparts.

SAFE promulgated a circular on November 19, 2010, or Circular No. 59, which tightens the examination on the authenticity of settlement of net proceeds from an offering and requires that the settlement of net proceeds shall be in accordance with the description in its prospectus. On March 30, 2015, the SAFE issued the Circular on Reform of the Administrative Rules of the Payment and Settlement of Foreign Exchange Capital of Foreign-Invested Enterprises, or SAFE Circular 19, which became effective on June 1, 2015. Pursuant to SAFE Circular 19, foreign-invested enterprises may either continue to follow the current payment-based foreign currency settlement system or elect to follow the "conversion-at-will" regime of foreign currency settlement. Where a foreign-invested enterprise follows the conversion-at-will regime of foreign currency settlement, it may convert part or all of the amount of the foreign currency in its capital account into Renminbi at any time. The converted Renminbi will be kept in a designated account labeled as settled but pending payment, and if the foreign-invested enterprise needs to make payment from such designated account, it still needs to go through the review process with its bank and provide necessary supporting documents. SAFE Circular 19, therefore, has substantially lifted the restrictions on the usage by a foreign-invested enterprise of its RMB registered capital converted from foreign currencies. According to SAFE Circular 19, such Renminbi capital may be used at the discretion of the foreign-invested enterprise and the SAFE will eliminate the prior approval requirement and only examine the authenticity of the declared usage afterwards. Nevertheless, foreign-invested enterprises like our PRC subsidiary are still not allowed to extend intercompany loans to our PRC consolidated entities. In addition, as Circular 19 was promulgated recently, there remain substantial uncertainties with respect to the interpretation and implementation of this circular by relevant authorities.

In utilizing the proceeds we received from our offerings or debt financings, as an offshore holding company with a PRC subsidiary, we may (i) make additional capital contributions to our PRC subsidiary, (ii) establish new PRC subsidiaries and make capital contributions to these new PRC subsidiaries, (iii) make loans to our PRC subsidiaries, or (iv) acquire offshore entities with business operations in China in offshore transactions. However, most of these uses are subject to PRC regulations and/or approvals. For example, loans by us to our PRC subsidiaries, which are foreign-invested enterprises, to finance their activities cannot exceed statutory limits and must be registered with SAFE or its local branches.
employees may face sanctions imposed by the PRC foreign exchange authority or any other PRC government authorities, including restrictions on foreign currency conversions and additional capital contributions to our PRC subsidiary.

In addition, the State Administration of Taxation has issued circulars concerning employee share options. Under these circulars, our employees working in China who exercise share options will be subject to PRC individual income taxes. Our PRC subsidiary has obligations to file documents related to employee share options with the relevant tax authorities and withhold individual income taxes of employees who exercise their share options.

See “Item 3.D. Key Information—Risk Factors—Risks Relating to Doing Business in China—Failure to comply with PRC regulations regarding the registration requirements for stock ownership plans or stock option plans may subject PRC plan participants or us to fines and other legal or administrative sanctions.”

Table of Contents

Labor Laws and Social Insurance

Pursuant to the PRC Labor Law and the PRC Labor Contract Law, employers must execute written labor contracts with full-time employees. All employers must compensate their employees with wages equal to at least the local minimum wage standards. All employers are required to establish a system for labor safety and sanitation, strictly abide by state rules and standards and provide employees with workplace safety training. Violations of the PRC Labor Contract Law and the PRC Labor Law may result in the imposition of fines and other administrative liabilities. Criminal liability may arise for serious violations.

In addition, employers in China are obliged to provide employees with welfare schemes covering pension insurance, unemployment insurance, maternity insurance, work-related injury insurance, medical insurance and housing funds.

To comply with these laws and regulations, we have caused all of our full-time employees to enter into labor contracts and provide our employees with the proper welfare and employment benefits. If we are made subject to severe penalties or incur significant liabilities in connection with labor disputes or investigations, our business and results of operations may be adversely affected.

Regulations on Concentration in Merger and Acquisition Transactions

The M&A Rules established procedures and requirements that could make merger and acquisition activities by foreign investors more time-consuming and complex. The M&A Rules require, among other things, that the Ministry of Commerce be notified in advance of any change-of-control transaction in which a foreign investor will take control of a PRC domestic enterprise or a foreign company with substantial PRC operations, if certain thresholds under the Provisions on Thresholds for Prior Notification of Concentrations of Undertakings issued by the State Council on August 3, 2008 are triggered.

Complying with these requirements could affect our ability to expand our business or maintain our market share. See “Item 3.D. Key Information—Risk Factors—Risks Relating to Doing Business in China—PRC laws and regulations establish more complex procedures for some acquisitions of Chinese companies by foreign investors, which could make it more difficult for us to pursue growth through acquisitions in China.”

C. Organizational Structure

Weibo is the parent company of our group and conducts business operations in China through wholly owned and partially owned subsidiaries and Weimeng. The following diagram illustrates our corporate structure, including our major subsidiaries and consolidated VIE and VIE’s subsidiary, as of the date of this annual report:
Equity interest.

Contractual arrangements including loan agreements, share transfer agreements, loan repayment agreements, agreements on authorization to exercise shareholder’s voting power, share pledge agreements, exclusive technical services agreement, exclusive sales agency agreement and trademark license agreement.

1. The shareholders of Weimeng are four non-executive PRC employees of our company or SINA, Y. Liu, W. Wang, W. Zheng and Z. Cao, holding 30%, 30%, 20% and 20% of Weimeng’s equity interest, respectively. The nominee shareholders of Weimeng have immaterial stake in our company.

Contractual Arrangements with Weimeng and Its Shareholders.

The capital investments in Weimeng were funded through Weibo Technology and recorded as interest-free loans to the shareholders of Weimeng. As of December 31, 2016, the total amount of interest-free loans to the shareholders of Weimeng was RMB55 million ($7.9 million). Under various contractual agreements, the shareholders of Weimeng are required to transfer their ownership in Weimeng to our wholly owned subsidiary in China, Weibo Technology, when permitted by PRC laws and regulations, or to our designees at any time for the amount of the outstanding loans, and all voting rights of Weimeng are assigned to Weibo Technology. Weibo Technology has the power to appoint all directors and senior management personnel of Weimeng. Through Weibo Technology, we have also entered into an exclusive technical services agreement and other service agreements with Weimeng, under which Weibo Technology provides technical services and other services to Weimeng in exchange for substantially all of its economic benefits. In addition, the shareholders of Weimeng have pledged their shares in Weimeng as collateral for repayment of loans and payment of fees on technical and other services due to us.

Table of Contents

The following is a summary of the VIE agreements with Weimeng:

Loan Agreements. Weibo Technology has granted interest-free loans to the shareholders of Weimeng with the sole purpose of providing funds necessary for those shareholders to make capital injections to Weimeng. The term of the loans is 10 years and Weibo Technology has the right, at its own discretion, to shorten or extend the term of the loans if necessary. In our consolidated financial statements, these loans are eliminated with the capital of Weimeng during consolidation.

Share Transfer Agreements. Each shareholder of Weimeng has granted Weibo Technology an option to purchase his shares in Weimeng at a purchase price equal to the amount of capital injection. Weibo Technology may exercise such option at any time until it has acquired all shares of Weimeng, subject to applicable PRC laws. The options will be effective until the earlier of (i) Weibo Technology and the shareholders of Weimeng have fully performed their obligations under these agreements, and (ii) Weibo Technology and the shareholders of Weimeng agree in writing to terminate these agreements.

Loan Repayment Agreements. Each shareholder of Weimeng has agreed with Weibo Technology that the interest-free loans under the loan agreements shall only be repaid through share transfers. Once the share transfers are completed, the purchase price for the share transfer will be set off against the loan repayment. These agreements will be effective until the earlier of (i) Weibo Technology and the shareholders of Weimeng have fully performed their obligations under these agreements, and (ii) Weibo Technology and the shareholders of Weimeng agree in writing to terminate these agreements.

Agreement on Authorization to Exercise Shareholder’s Voting Power. Each shareholder of Weimeng has authorized Weibo Technology to exercise all his voting power as a shareholder of the applicable VIE on all matters requiring shareholders’ approval under PRC laws and regulations and the articles of association of Weimeng, including without limitation appointment of directors, transfer, mortgage or dispose of Weimeng’s assets, transfer of any equity interest in Weimeng, and merger, split, dissolution and liquidation of Weimeng. The authorizations are irrevocable and will not expire until Weimeng dissolves. Modification, supplement or adjustment of the terms may only be made with the consent from Weibo Technology.

Factors,” that could cause actual results to differ materially from those in the forward-looking statements. Actual results could differ materially from those projected in the forward-looking statements. We caution you that our business statements included in this document are based on information available to us on the date hereof, and we undertake no obligation to update any such statements included in this document.

Signified by the words “expect,” “anticipate,” “intend,” “believe,” the negative of such terms or other comparable terminology. All forward-looking statements are made on the basis of information and assumptions which, although believed to be reasonable, are inherently subject to significant uncertainty and risk, and are made as of the date hereof.

Weibo through mobile devices at least once during the month. December 2015, and 176 million MAUs and 81 million average DAUs in December 2014. Approximately 90% of our MAUs in December 2016 accessed scale. In December 2016, we had 313 million MAUs and 139 million average DAUs, increasing from 236 million MAUs and 106 million average DAUs in

Exclusive Technical Services Agreement, Exclusive Sales Agency Agreement and Trademark License Agreement. Weimeng has entered into an exclusive technical services agreement, an exclusive sales agency agreement and a trademark license agreement with Weibo Technology. Under the exclusive technical services agreement, Weibo Technology is engaged to provide technical services for Weimeng’s online advertising and other related businesses. Under the exclusive sales agency agreement, Weimeng has granted Weibo Technology the exclusive right to distribute, sell and provide agency services for all the products and services provided by Weimeng. Due to its control over Weimeng, Weibo Technology has the right to determine the service fee to be charged to Weimeng under these agreements by considering, among other things, the technical complexity of the services, the actual cost that may be incurred for providing such services, the operations of Weimeng, applicable tax rates, planned capital expenditure and business strategies. These agreements can only be prematurely terminated by Weibo Technology, and will not expire until Weimeng dissolves. Under the trademark license agreement, Weibo Technology has granted Weimeng trademark licenses to use the trademarks held by Weibo Technology in specific areas, and Weimeng is obligated to pay license fees to Weibo Technology. The term of this agreement is one year and is automatically renewed provided there is no objection from Weibo Technology. In the years ended December 31, 2014, 2015 and 2016, the total amount of service fees that Weibo Technology received from Weimeng under these service agreements and trademark license agreement was $187.8 million, $232.4 million and $335.6 million, respectively, which were based on the actual cost incurred from providing the services and the cash position and operations of Weimeng.

D.

Property, Plant and Equipment

Our headquarters and our principal product development facilities are located in Beijing. As of December 31, 2016, we have leased approximately 26,000 square meters of office space in multiple cities, including Beijing, Tianjin, Shanghai, Hangzhou, Xi’an and Chengdu. These leases vary in duration from one to five and a half years. In addition, SINA allocates rental expenses to us for some of its office space where SINA employees devote part of their time to providing services to us or where SINA shares certain office space with us for our employees to use.

The servers that support our products and services are primarily maintained at China Telecom and China Unicom branches in cities across China, including Beijing, Shanghai, Guangzhou and Tianjin, as well as servers located at various internet data centers in Taipei, Taiwan, Santa Clara, California and Hong Kong. We share the use of domestic servers with SINA under a transitional services agreement. Maintenance and repair are the responsibility of SINA employees for the time being, and these services are also governed by the transitional services agreement. See “Item 7.B. Major Shareholders and Related Party Transactions—Related Party Transactions—Our Relationship with SINA—Transitional Services Agreement.”

Operating and Financial Review and Prospects

This report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act, as amended including, without limitation, statements regarding our expectations, beliefs, intentions or future strategies that are signified by the words “expect,” “anticipate,” “intend,” “believe,” the negative of such terms or other comparable terminology. All forward-looking statements included in this document are based on information available to us on the date hereof, and we undertake no obligation to update any such forward-looking statements. Actual results could differ materially from those projected in the forward-looking statements. We caution you that our business and repetitive financial performance are subject to substantial risks and uncertainties, including the factors identified in “Item 3.D. Key Information—Risk Factors,” that could cause actual results to differ materially from those in the forward-looking statements.

A. Operating Results

Overview

As a leading social media for people to create, share and discover Chinese-language content, Weibo combines the means of public self-expression in real time with a powerful platform for social interaction, content creation and distribution. Since our inception in August 2009, we have achieved significant scale. In December 2016, we had 313 million MAUs and 139 million average DAUs, increasing from 236 million MAUs and 106 million average DAUs in December 2015, and 176 million MAUs and 81 million average DAUs in December 2014. Approximately 90% of our MAUs in December 2016 accessed Weibo through mobile devices at least once during the month.
Weibo offers a wide range of advertising and marketing solutions to our customers, ranging from key accounts, which are mostly large brand advertisers, to small medium-sized enterprises, or SMEs, enabling them to promote their brands, products and services to our users. Advertising and marketing services contribute to the majority of our revenues, including the sale of social display ads and promoted feeds. We have developed and are continuously refining our social interest graph, or SIG, recommendation engine, which enables our customers to perform people marketing and target audiences based on user demographics, social relationships and interests to achieve greater relevance, engagement and marketing effectiveness on Weibo.

The value we create for our users and customers is enhanced by our platform partners, which include media outlets and other organization with media rights, MCNs, which are talent agencies for influencers, and app developers. Our platform partners contribute a vast amount of content to Weibo, broadly distribute Weibo content across their properties, and develop products and applications on our platform, enriching the experience of our users while increasing Weibo’s monetization opportunities. We have revenue-sharing arrangements with some of our platform partners, such as game developers.

Weibo began monetization in 2012 primarily through the sale of advertising and marketing services and, to a lesser extent, through VIP membership, data licensing, game services and other value-added services. We place great emphasis on product innovation and our steady stream of new ad product introductions has led to rapid revenue growth. We have since experienced rapid revenue growth. Our revenues reached $334.2 million, $477.9 million and $655.8 million in 2014, 2015 and 2016, respectively. We incurred a net loss of $65.3 million in 2014, a net income of $34.7 million in 2015, and a net income of $108.0 million in 2016.

**Major Factors Affecting Our Results of Operations**

Major factors affecting our results of operations include the following:

**Popularity of Social Media.** We have benefited from the growth in popularity of social media in China. However, social media is relatively new, especially in China, and our results of operations will be affected by the extent to which social media continues to grow in popularity and becomes further integrated into people’s everyday lives.

**User Growth.** Our revenues are ultimately affected by the scale of our user base, and the strategies we pursue to achieve user growth may affect our costs and expenses and results of operations. We have experienced rapid user growth since our inception in 2009. In general, the proportion of internet users in the more economically developed tier 1 and tier 2 cities in China who use Weibo is higher than in other parts of China. The term “tier 1 cities” comprises the four cities of Beijing, Shanghai, Guangzhou and Shenzhen, while “tier 2 cities” is commonly understood to include up to two dozen other large cities, mostly in the more developed coastal regions of China. Residents of tier 1 cities are early adopters of new technology and are influential in setting market trends. This is also true for residents of tier 2 cities, compared to residents of lower-tier cities and the rest of the country. Our ability to grow our active user base will depend in part on the success of our strategies to attract additional users from lower-tier cities and towns in China while maintaining or growing our user base in tier 1 and tier 2 cities.

Our top priority currently is to grow user scale and user engagement especially on mobile and video, and we may not see these efforts translate into revenues and profits in the short term. Our monetization model is relatively new and evolving. Therefore, we are unable to gauge the period-to-period growth of our revenues based on any particular user traffic metric. Furthermore, our ability to monetize our user traffic depends to a large degree on how well the demographic profile and social interests of our users fit the audience profile that our advertising and marketing customers hope to reach at any given time. Our user growth rate may decrease as the size of our user base increases to an even larger scale and as we become more penetrated in China. Due to the media nature of our platform, the growth of our users may not be linear.

**User Engagement.** Changes in user engagement could affect our results of operations, especially since we began adding monetization features to our social platform. We need to motivate our users to engage actively on our platform to secure an abundant supply of user generated content, to entice content creators to share even more content, and to ensure that we have a broad audience for our advertising and marketing services. Video, particularly in the form of short video and streaming on mobile, is becoming increasingly popular in China and has become an important way for our users to engage and interact on Weibo. Our ability to provide an easy-to-use infrastructure for our users to create and share video as well as consume video, especially in a cost-effective manner, will largely impact our user experience.

**Table of Contents**

We plan to continue to enhance Weibo’s user experience and engagement by improving our product features, offering new products, expanding our content offerings through collaboration with platform partners, developing and integrating with applications and continuing to refine Weibo’s SIG recommendation engine to improve content relevancy and ad targeting capabilities.

**Competition.** We face significant competition both for the time and attention of Chinese internet users and for the advertising and marketing spending of companies that market to Chinese consumers. Social media is relatively new as a means of advertising and we compete for advertising and marketing budgets with a wide variety of traditional and new media, including other social platforms and internet companies. We must compete effectively for users and for advertising and marketing customers in order to grow our platform and increase our revenues. We intend to continue to invest in product development, technology infrastructure, content aggregation and sales and marketing capabilities to address the competition we face.

**Monetization.** We have a short history of monetizing our platform and we are still exploring the most effective ways of monetization without adversely affecting user experience. Furthermore, social media is still in the early stages of gaining acceptance as an effective means for advertising and marketing in China. We monitor user engagement and adjust our pricing strategies to optimize the value of our platform for our users and our advertising and marketing customers. We plan to increase the monetization of our platform by growing our user base, managing ad inventory more effectively, improving the targeting capabilities of our advertising and marketing offerings, developing new ad products, formats and capabilities, increasing mobile monetization and expanding our platform partners network. We also plan to further diversify our monetization through growing other services.

We started monetization in 2012 by selling PC-based social display ads, and we have been exploring various ways of monetization since then. For example, in 2013, we introduced promoted feeds to SMEs, which are ads appearing in the information feed, and in 2014, we launched self-service ad, which allows customers to purchase our marketing services directly on Weibo. In 2015, Weibo Showcase ad went live, which allows a user to view an e-commerce merchandise from participating e-commerce sites, such as Taobao and Jumei, on Weibo, add the merchandise to one’s shopping cart and seamlessly navigate
to the buy page of the participating e-commerce sites. In 2016, we upgraded our ad system to allow SMEs to purchase brand ads and key accounts to purchase promoted feeds, as well as introduced video ads.

In 2016, we witnessed strong mobile traffic growth and approximately 67% of our advertising and marketing revenues came from mobile. In December 2016, approximately 90% of our MAU accessed Weibo through a mobile device at least once during the month. We expect the proportion of mobile traffic to either maintain at current level or further rise, and we endeavor to monetize this increasing traffic. Our ability to further grow our mobile traffic and adopt mobile-tailored advertising and marketing solutions will have great impact on our future revenues and operating results. With the consumption of video content becoming increasingly popular in China, we expect video-format ads to become a major driver of our revenue growth, which will be predicated on both our users and customers accepting video ads, particularly on mobile devices.

**Products and Services Innovation.** Social media is an innovative and fast-changing field, and we must develop innovative products and services that meet the disparate needs of users, advertising and marketing customers and platform partners and roll them out on a timely basis while controlling our product development expenses. We plan to continue to make significant investments in product development and refining the capabilities of Weibo’s SIG recommendation engine, and we may invest in or acquire businesses or assets to enhance our products, services and technical capabilities.

**Investment in Technology Infrastructure.** Our technology infrastructure is critical to providing users, customers and platform partners access to our platform, particularly during major events when activities on our platform increase substantially. We must continue to upgrade and expand our technology infrastructure to keep pace with the growth of our business and to ensure that technical difficulties do not detract from user experience or deter new users, customers or platform partners from accessing our platform. As 4G and Wi-Fi become more widely available in China, we expect our users to share and consume more content in rich media format, such as photo, video and audio, which will require more infrastructure capacity, and costs to support, than text feeds. To increase our capabilities to meet technology infrastructure demands, especially those arising from major media events and increasing video usage, we work with third-party service providers to procure bandwidth and other infrastructure services. Our ability to derive greater cost efficiency from infrastructure demands will depend on factors including our ability to negotiate a lower unit price with third-party vendors over time and the mix of services provided by third-party vendors and SINA, our controlling shareholder.

---

**Table of Contents**

**Content Ecosystem.** Our success depends on our ability to provide users with interesting and useful content, which in turn depends on the content contributed by our users. Content creators, especially influencers, contribute content to Weibo to grow their fan base and increase awareness of their brands. We provide content creators with the opportunity to monetize their social assets on Weibo through advertising, e-commerce, subscription, tipping and other means. If content creators do not see significant value from their social marketing activities on Weibo and find monetization on Weibo inadequate, we may have to subsidize them through direct content cost payout, which may have an adverse and material impact on our business, financial condition and operating results. Alternatively, content creators may choose to contribute less or no content to Weibo, which may cause our user base and user engagement to decline and our customers to view our products and services as less attractive for advertising and marketing purposes. If that were to occur, our customers would reduce their spending on our platform.

**Marketing and Brand Promotion.** Part of our growth strategy is to attract new users and increase user engagement in less developed lower-tier cities and towns. To execute this strategy, we plan to engage in a variety of marketing and brand promotion campaigns across China, which may cause our sales and marketing expenses to increase significantly in the near future.

**Investment in Talent.** Our employee headcount has increased significantly since our inception and we expect this trend to continue for the foreseeable future. There is heavy demand in China’s internet industry for talented technical, sales and marketing, management and other personnel with necessary experience and expertise. We must recruit, retain and motivate talented employees while controlling our personnel-related expenses, including stock-based compensation.

**Taxation**

We generate the majority of our operating income (loss) from our PRC operations and have recorded income tax provisions (benefits) for the periods presented. Income tax liability is calculated based on a separate return basis as if we had filed separate tax returns for all periods presented.

**Cayman Islands**

According to Maples and Calder (Hong Kong) LLP, our Cayman Islands counsel, the Cayman Islands currently levies no taxes on individuals or corporations based upon profits, income, gains or appreciation and there is no taxation in the nature of inheritance tax or estate duty. There are no other taxes likely to be material to us levied by the Government of the Cayman Islands except for stamp duties which may be applicable on instruments executed in, or after execution brought within, the jurisdiction of the Cayman Islands. The Cayman Islands is not a party to any double tax treaties that are applicable to any payments made to or by our company. There are no exchange control regulations or currency restrictions in the Cayman Islands.

**Hong Kong**

Our subsidiary incorporated in Hong Kong, Weibo HK, is subject to Hong Kong profit tax at a rate of 16.5%. Hong Kong does not impose a withholding tax on dividends.

---

**Table of Contents**

**China**

Weibo Technology, Weimeng and Weibo Interactive are incorporated in China and are subject to enterprise income tax on their taxable income in China at a standard rate of 25% if they are not eligible for any preferential tax treatment. Taxable income is based on the entity’s global income as determined under PRC tax laws and accounting standards. Weibo Technology is qualified as a software enterprise and is entitled to an exemption from the enterprise
Weibo Technology, Weimeng and Weibo Interactive are also subject to VAT and related surcharges at a combined rate of 6.7%. Weibo Technology and Weimeng have been subject to VAT since September 1, 2012, and Weibo Interactive since July 1, 2013. Previously, these entities had been subject to business tax and related surcharges at a combined rate of 5.6%. Our advertising and marketing revenues are also subject to cultural business construction fees at a rate of 3%.

Dividends paid by our subsidiary in China, Weibo Technology, to our intermediary holding company in Hong Kong, Weibo HK, will be subject to PRC withholding tax at a rate of 10% unless they qualify for a special exemption. If Weibo HK satisfies all the requirements under the Arrangement between the PRC and the Hong Kong Special Administrative Region on the Avoidance of Double Taxation and Prevention of Fiscal Evasion with respect to Taxes on Income and receives approval from the relevant tax authority, then dividends paid by Weibo Technology to Weibo HK will be subject to a withholding tax rate of 5% instead. See “Item 3.D. Key Information—Risk Factors—Risks Relating to Doing Business in China—Any limitation on the ability of our PRC subsidiary to make payments to us, or the tax implications of making payments to us, could have a material adverse effect on our ability to conduct our business or our financial condition.”

If our holding company in the Cayman Islands, Weibo Corporation, were deemed to be a “PRC resident enterprise” under the Enterprise Income Tax Law, it would be subject to enterprise income tax on its global income at a rate of 25%. See “Item 3.D. Key Information—Risk Factors—Risks Relating to Doing Business in China—We and/or our Hong Kong subsidiary may be classified as a ‘PRC resident enterprise’ for PRC enterprise income tax purposes. Such classification would likely result in unfavorable tax consequences to us and our non-PRC shareholders and have a material adverse effect on our results of operations and the value of your investment.”

If Weibo HK were deemed to be a “PRC resident enterprise” under the Enterprise Income Tax Law, then dividends payable by Weibo HK to Weibo Corporation may become subject to 10% PRC dividend withholding tax. Under such circumstances, it is not clear whether dividends payable by Weibo Technology to Weibo HK would still be subject to PRC dividend withholding tax and whether such tax, if imposed, would be imposed at a rate of 5% or 10%. See “Item 3.D. Key Information—Risk Factors—Risks Relating to Doing Business in China—Any limitation on the ability of our PRC subsidiary to make payments to us, or the tax implications of making payments to us, could have a material adverse effect on our ability to conduct our business or our financial condition.”

Inflation

In the past three years, inflation in China did not materially impact our results of operations. According to the National Bureau of Statistics of China, the consumer price index for December 2014, 2015 and 2016 increased 2.0%, 1.4% and 2.0%, respectively, year over year. Although we have not been materially affected by inflation in the past, we may be affected by inflation in the future if inflation rate in China increases.

Critical Accounting Policies, Judgments and Estimates

Our discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with U.S. GAAP, appearing elsewhere in this annual report on form 20-F. The preparation of these consolidated financial statements requires us to make estimates, judgments and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. We evaluate these estimates, judgments and assumptions on an ongoing basis.

Table of Contents

Our discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with U.S. GAAP, appearing elsewhere in this annual report on form 20-F. The preparation of these consolidated financial statements requires us to make estimates, judgments and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. We evaluate these estimates, judgments and assumptions on an ongoing basis.

78
are directly or indirectly generated through Weimeng and its subsidiaries. We have signed various agreements with Weimeng to allow the transfer of economic benefits from Weimeng to us. As a result of these contractual arrangements, we are considered the primary beneficiary of Weimeng and its subsidiaries, and consolidate their results of operations, assets and liabilities in our financial statements.

Our consolidated financial statements may not be reflective of our results of operations, financial position and cash flows had we been operating as a stand-alone company during those periods. Our historical results for any period presented are not necessarily indicative of the results to be expected for any future period. Although we believe that the assumptions underlying our consolidated financial statements and the allocations made to us are reasonable, our basis of presentation and allocation methodologies required significant assumptions, estimates and judgments. Using a different set of assumptions, estimates and judgments would have materially impacted our financial position and results of operations.

Commencing on January 1, 2016, in order to enhance comparability with industry peers, payables that have been invoiced or formally agreed with the suppliers were recorded as accounts payable. The relevant amounts in prior periods have been reclassified to accounts payable from accrued and other liabilities accordingly. Such reclassification amounted to $37.9 million as of December 31, 2015.

Use of Estimates

Conformity with U.S. GAAP requires the use of estimates and judgments that affect the reported amounts in the consolidated financial statements. These estimates form the basis for judgments we make about the carrying values of assets and liabilities, which are not readily available from other sources. GAAP requires making estimates and judgments in several areas, including, but not limited to, the basis of consolidation, revenue recognition, fair value accounting, income taxes, goodwill and other long-lived assets, allowances for doubtful accounts, stock-based compensation, and the estimated useful lives of assets. We base the estimates and judgments on historical information and on various other assumptions that we believe are reasonable under the circumstances. Actual results could differ materially from such estimates.

Revenue Recognition

Advertising and Marketing Revenues. Our advertising and marketing revenues are derived principally from online advertising and marketing, including social display ads and promoted marketing. Revenues are recognized only when the following criteria are met: (1) persuasive evidence of an arrangement exists; (2) the price is fixed or determinable; (3) the service is performed; and (4) collectability of the related fee is reasonably assured. The majority of our revenue transactions are based on standard business terms and conditions, which are recognized net of agency rebates. Advertising arrangements involving multiple deliverables are broken down into single-element arrangements based on their relative selling price for revenue recognition purposes. We have adopted the new revenue recognition policy on multiple-deliverable revenue arrangements, which requires the arrangement consideration to be allocated to all deliverables at the inception of the arrangement on the following basis: (a) vendor-specific objective evidence of the selling price, if it exists; otherwise, (b) third-party evidence of the selling price. If neither (a) nor (b) exists, then we must use (c) our best estimate of the selling price of the deliverable. Currently, we primarily use vendor-specific objective evidence to allocate the arrangement consideration if such selling price is available. For the deliverables that have not been sold separately, our best estimate of the selling price is used, which has taken into consideration the pricing of advertising areas of our platform with similar popularity and advertisements with similar format and quoted prices from competitors and other market conditions. We recognize revenues on the elements delivered and defer the recognition of revenues for the undelivered elements until the remaining obligations have been satisfied.

Other Revenues. We generate other service revenues principally from value-added services, including game-related services, VIP membership and data licensing. Revenues from these services are recognized over the periods in which the services are performed, provided that no significant obligations remain, collection of the receivables is reasonably assured and the amounts can be accurately estimated.

A majority of game-related revenues are generated generally from the purchase of virtual items by game players through our platform. We collect payments from the game players in connection with the sale of virtual currency, which will later be converted by the game players into in-game credits (game tokens) that can be used to purchase virtual items in online games. We remit certain predetermined percentages of the proceeds to the game developers when the virtual currency is converted into in-game credits.

We have determined that the game developers are the primary obligors for the game-related services given that the game developers are responsible for developing, maintaining and updating the online games and have reasonable latitude to establish the prices of virtual items for which in-game credits are used. We view the game developers to be our customers, and our primary responsibility is to promote the games of the third-party developers, provide virtual currency exchange services, maintain the platform for game players to easily access the games and offer customer support to resolve registration, log-in, currency exchange and other related issues. Accordingly, we record game-related revenues net of predetermined revenue-sharing with the game developers.

Virtual currencies in general are not refundable once they have been sold unless there are unused in-game credits at the time a game is discontinued. Sale of virtual currencies net of the game developer proceeds are recognized as revenues over the estimated consumption period of in-game virtual items, which is typically from a few days to one month after the purchase of in-game credits. Virtual currency sold for game-related services in excess of recognized revenues is recorded as deferred revenues.

Game-related revenues recognition involves management judgments, such as the determination of the principal in providing game-related services and estimating the consumption period of in-game credits. We assess the estimated consumption period periodically, taking into consideration the actual consumption information, types of virtual items offered in the game and user behavior patterns, including average recharge interval and estimated user relationship on the game. Using different assumptions to calculate the revenue recognition of game-related revenues may cause the results to be significantly different. Any adjustments arising from changes in the estimate would be applied prospectively on the basis that such changes are caused by new information indicating a change in the user behavior pattern.
VIP membership is a service package consisting of user certification and preferential benefits, such as daily priority listings and higher quota for following user accounts. Prepaid VIP membership fees are recorded as deferred revenue and recognized as revenue ratably over the contract period of the membership service.

We offer data licensing that allow our customers to access, search and analyze historical and real-time data on our platform. Data licensing arrangements are for a fixed period, typically one year, and such derived revenue is recognized ratably over the contract period.

**Stock-based compensation**

All stock-based awards to employees and directors, such as stock options and restricted share units ("RSUs"), are measured at the grant date based on the fair value of the awards. Stock-based compensation, net of forfeitures, is recognized as expenses on a straight-line basis over the requisite service period, which is the vesting period.

We use the Black-Scholes option pricing model to estimate the fair value of stock options. The determination of estimated fair value of stock-based payment awards on the grant date using an option pricing model is affected by the fair value of our ordinary shares as well as assumptions regarding a number of complex and subjective variables. These variables include the expected value volatility of us over the expected term of the awards, actual and projected employee stock option exercise behaviors, a risk-free interest rate and expected dividends, if any. Options granted generally vest over four years.

We recognize the estimated compensation cost of restricted share units based on the fair value of the corresponding ordinary shares on the date of the grant. We recognize the compensation cost, net of estimated forfeitures, over a vesting term of generally four years for service-based restricted share units. We also recognize the compensation cost of performance-based restricted share units, net of forfeitures, according to the probability of performance goal achievement at the end of each reporting period.

Forfeitures are estimated at the time of grant and revised in subsequent periods if actual forfeitures differ from those estimates. We use historical data to estimate pre-vesting option and record stock-based compensation expense only for those awards that are expected to vest.

**Taxation**

*Income Tax*. We use the asset and liability method of accounting for income taxes. Under this method, income tax expense is recognized for the amount of taxes payable or refundable for the current year. In addition, deferred tax assets and liabilities are recognized for the expected future tax consequences of temporary differences between the financial reporting and tax bases of assets and liabilities and for operating losses and tax credit carryforwards. Management is required to make assumptions, judgments and estimates to determine our current provision for income taxes and our deferred tax assets and liabilities and any valuation allowance to be recorded against a deferred tax asset. Our assumptions, judgments and estimates relative to the current provision for income tax take into account current tax laws, our interpretation of current tax laws and possible outcomes of current and future audits conducted by foreign and domestic tax authorities. Changes in tax law or our interpretation of tax laws and the resolution of current and future tax audits could significantly impact the income taxes recorded in our consolidated statements of comprehensive income (loss). Our assumptions, judgments and estimates related to the value of a deferred tax asset take into account predictions of the amount and category of future taxable income, such as income from operations. Actual operating results and the underlying amount and category of income in future years could render our current assumptions, judgments and estimates for recoverable net deferred taxes inaccurate. Any of the assumptions, judgments and estimates mentioned above could cause our actual income tax obligations to differ from our estimates and, thus, materially impact our financial position and results of operations. Income tax liability is calculated based on a separate return basis as if we had filed separate tax returns for all the periods presented.

*Uncertain Tax Positions*. To assess uncertain tax positions, we apply a more likely than not threshold and a two-step approach for the tax position measurement and financial statement recognition. Under the two-step approach, the first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates that it is more likely than not that the position will be sustained, including resolution of related appeals or litigation processes, if any. The second step is to measure the tax benefit as the largest amount that is more than 50% likely of being realized upon settlement.
Level 2 applies to assets or liabilities for which there are inputs other than quoted prices included within Level 1 that are observable for the asset or liability such as quoted prices for similar assets or liabilities in active markets; quoted prices for identical asset or liabilities in markets with insufficient volume or infrequent transactions (less active markets); or model-derived valuations in which significant inputs are observable or can be derived principally from, or corroborated by, observable market data.

Level 3 applies to asset or liabilities for which there are unobservable inputs to the valuation methodology that are significant to the measurement of the fair value of the assets or liabilities.

The carrying amount of cash and cash equivalents, short-term investments, accounts receivable due from third parties, accounts receivable due from Alibaba, accounts receivable due from other related parties, accounts payable, amount due from/to SINA, accrued and other liabilities approximates fair value because of their short-term nature.

Long-Term Investments

Long-term investments are comprised of investments in publicly traded and privately held companies. For equity investments over which we do not have significant influence, the cost method of accounting is used. For long-term investments in shares that are not common stock or in-substance common stock and that do not have readily determinable fair value, the cost method accounting is used. We use the equity method to account for ordinary-share-equivalent equity investments over which we have significant influence but do not own a majority equity interest or otherwise control.

Table of Contents

We monitor our investments accounted for under the cost method and equity method for other-than-temporary impairment by considering factors such as current economic and market conditions and the operating performance of the business, including current earnings trends, undiscounted cash flows, and other company-specific information, such as recent financing rounds. Determination of the fair value, particularly for investments in privately-held companies whose revenue model is unclear, requires significant judgment to determine appropriate estimates and assumptions. Changes in these estimates and assumptions could affect the calculation of the fair value of the investments and the determination of whether any identified impairment is other-than-temporary. If any impairment is considered other-than-temporary, we will write down the asset to its fair value and take the corresponding charge to the consolidated statements of comprehensive income (loss).

The investments in marketable securities are held as available for sale and are reported at fair value. The treatment of a decline in the fair value of an individual security is based on whether the decline is other-than-temporary. Significant judgment is required to assess whether the impairment is other-than-temporary. Our judgment of whether impairment is other-than-temporary is based on an assessment of factors including, but not limited to, our ability and intent to hold the individual security, severity of the impairment, expected duration of the impairment and forecasted recovery of fair value. Changes in the estimates and assumptions could affect our judgment of whether an identified impairment should be recorded as an unrealized loss in the equity section of our consolidated balance sheets or as a realized loss in the consolidated statements of comprehensive income (loss).

Long-Lived Assets

Goodwill

Goodwill represents the excess of the purchase price over the fair value of the identifiable assets and liabilities acquired as a result of our acquisitions of interests in our subsidiaries and consolidated VIE. We assess goodwill for impairment in accordance with ASC Subtopic 350-20 (“ASC 350-20”), Intangibles - Goodwill and Other: Goodwill, which requires that goodwill be tested for impairment at the reporting unit level at least annually and more frequently upon the occurrence of certain events, as defined by ASC 350-20. U.S. GAAP provides the option to apply the qualitative assessment first and then the quantitative assessment, if necessary, or to apply the quantitative assessment directly. The qualitative approach starts the goodwill impairment test by assessing qualitative factors, i.e., by taking into consideration of macroeconomics, overall financial performance, industry and market conditions and the share price of us, to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If so, the quantitative impairment test is to be performed; otherwise, no further testing is required. The quantitative impairment test consists of a comparison of the fair value of goodwill with its carrying value. For reporting units directly applying a quantitative assessment, the goodwill impairment test is quantitatively performed by comparing the fair values of those reporting units to their carrying amounts. We adopted the option to apply the qualitative approach to assess goodwill on the relevant reporting units. Application of a goodwill impairment test requires significant management judgment, including the identification of reporting units, assigning assets and liabilities to reporting units, assigning goodwill to reporting units, and determining the fair value of each reporting unit. The judgment in estimating the fair value of reporting units includes estimating future cash flows, determining appropriate discount rates and making other assumptions. Changes in these estimates and assumptions could materially affect the determination of fair value for each reporting unit.

Intangible assets other than goodwill

Intangible assets arising from acquisitions are recognized at fair value upon acquisition and amortized on a straight-line basis over their estimated useful lives, generally from two to five years. Long-lived assets and certain identifiable intangible assets other than goodwill to be held and used are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. Determination of recoverability is based on an estimate of undiscounted future cash flows resulting from the use of the asset and its eventual disposition. Measurement of any impairment loss for long-lived assets and certain identifiable intangible assets that management expects to hold or use is based on the amount by which the carrying value exceeds the fair value of the asset. Judgment is used in estimating future cash flows, determining appropriate discount rates and making other assumptions. Changes in these estimates and assumptions could materially affect the determination of the asset’s fair value.
In May 2014, the Financial Accounting Standards Board (“FASB”) issued, ASU 2014-09, “Revenue from Contracts with Customers (Topic 606).” The guidance substantially converges final standards on revenue recognition between the FASB and the International Accounting Standards Board providing a framework on addressing revenue recognition issues and, upon its effective date, replaces almost all existing revenue recognition guidance, including industry-specific guidance, in current U.S. generally accepted accounting principles. In April 2015, the FASB proposed a one-year delay in the effective date and companies will be allowed to early adopt as of the original effective date. We plan to adopt the new revenue guidance beginning in the first quarter of fiscal year 2018 and are currently evaluating the impact this new guidance will have on our consolidated financial statements.

In January 2016, the FASB issued updated guidance on financial instruments, ASU No. 2016-01, which intends to improve the recognition and measurement of financial instruments. This guidance will be effective beginning the first quarter of fiscal year 2018. We are currently evaluating the impact this new guidance will have on our consolidated financial statements.

In February 2016, the FASB issued a new standard on leases, ASU No. 2016-02, which requires that a lessee recognize the assets and liabilities that arise from operating leases. A lessee should recognize a liability to make lease payments (the lease liability) and a right-of-use representing its right to use the underlying asset for the lease term in the statements of financial position. For leases with a term of 12 months or less, a lessee is permitted to make an accounting policy election by class of underlying asset not to recognize lease assets and lease liabilities. In transition, lessors are required to recognize and measure leases at the beginning of the earliest period presented using a modified retrospective approach. This standard will be effective beginning the first quarter of fiscal year 2019. We are currently evaluating the impact that this new standard will have on our consolidated financial statements.

In March 2016, the FASB issued a new standard on stock compensation, ASU No. 2016-09, which simplifies several aspects of the accounting for share-based payment transactions, including income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. The standard will be effective for us beginning the first quarter of fiscal year 2017. We do not expect the standard to have material impact on our consolidated financial statements.

In August 2016, the FASB issued ASU No. 2016-15, which clarifies and includes specific guidance to address diversity in how certain cash receipts and cash payments are presented and classified in the statement of cash flows. The amendments will be effective beginning the first quarter of fiscal year 2018. Early adoption of the amendments is permitted. The amendments in this ASU should be applied using a retrospective transition method to each period presented. We will adopt the amendments in the fiscal year of 2018 and do not expect the standard to have a material impact on our consolidated financial statements.

In January 2017, the FASB issued ASU No. 2017-01, which clarifies the definition of a business with the objective of adding guidance to assist entities with evaluating whether transactions should be accounted for as acquisitions or disposals of assets or businesses. The amendments will be effective beginning the first quarter of fiscal year 2018. Early adoption is permitted. The amendments should be applied prospectively or on or after the effective date. No disclosures are required at transition. We are currently evaluating the impact this new guidance will have on our consolidated financial statements.

In January 2017, the FASB issued ASU No. 2017-04, which simplifies the subsequent measurement of goodwill by eliminating Step 2 from the goodwill impairment test. Under the amendments, an entity should perform its annual, or interim, goodwill impairment test by comparing the fair value of a reporting unit with its carrying value, which eliminates the current requirement to calculate a goodwill impairment charge by comparing the implied fair value of goodwill with its carrying amount. The amendments will be effective beginning the first quarter of fiscal year 2020. Early adoption is permitted for interim or annual goodwill impairment tests performed on testing dates after January 1, 2017. The amendments should be applied on a prospective basis. We are currently evaluating the impact this new guidance will have on our consolidated financial statements.

In February 2017, the FASB issued ASU No. 2017-05, which clarifies the scope of guidance on nonfinancial asset derecognition (ASC 610-20) as well as the accounting for partial sales of nonfinancial assets. The amendments will be effective beginning the first quarter of fiscal year 2018. Early adoption is permitted along with the early adoption of the new revenue standard (ASC 606). The amendments should be applied on a full or modified retrospective basis. We currently anticipate adopting the new standard effective January 1, 2018, and are currently evaluating the impact this new standard will have on our consolidated financial statements.

84

Table of Contents

Results of Operations

The following table sets forth a summary of our consolidated results of operations for the periods presented. This information should be read together with our consolidated financial statements and related notes included elsewhere in this annual report on Form 20-F. Due to our limited operating history, period-to-period comparisons discussed below may not be meaningful and are not indicative of our future trends. See “Item 3.D. Key Information—Risk Factors—Risks Relating to Our Business—We have a limited operating history in a new and unproven market, which makes it difficult to evaluate our future prospects.”

2. Included interest expenses on amount due to SINA of $2.8 million, $nil and $nil for the years ended December 31, 2014, 2015 and 2016, respectively.

3. Each ADS represents one Class A ordinary share.

Revenues

We generate revenues primarily from advertising and marketing services, including social display ads, and promoted marketing. We also generate revenues from value-added services, including game-related services, VIP membership and data licensing.

2016 Compared to 2015

Our revenues increased by 37% from $477.9 million in 2015 to $655.8 million in 2016.

- Advertising and marketing revenues. Advertising and marketing revenues increased by 42% from $402.4 million in 2015 to $571.0 million in 2016. Revenue from key accounts grew by 98% from $103.5 million in 2015 to $205.2 million in 2016, largely attributed to the increase in Weibo’s brand influence, the expansion of advertising inventory, new and upgraded ad products, the increase in user growth and user engagement, as well as the coverage of the Rio 2016 Olympics. Revenue from SMEs grew by 98% from $155.2 million in 2015 to $307.9 million in 2016, primarily attributed to the increase in the number of SME customers, up 63% year over year to 2.5 million in 2016, the expansion of advertising inventory, new and upgraded ad products and increase in user growth and user engagement. Revenue generated from Alibaba was $57.9 million, or 9% of our total revenues, compared to $143.7 million in 2015, resulting from the expiration of the strategic collaboration agreement with Alibaba in January 2016. In 2016, mobile advertising revenue accounted for approximately 67% of our total advertising and marketing revenues, compared to 63% in 2015 due to the growth of both mobile users as well as advertiser preferences. Mobile MAUs in December 2016 increased by 43% year over year to 282 million. We expect our mobile advertising revenues to continue to increase in absolute amount and as a percentage of our total advertising and marketing revenues in 2017.

- Other revenues. Other revenues increased by 12% from $75.5 million in 2015 to $84.8 million in 2016. The increase was primarily attributed to the revenue growth of our VIP membership, which increased by 90% year over year from $17.6 million in 2015 to $33.3 million in 2016. Revenues from game-related services decreased by 30% from $44.3 million in 2015 to $30.9 million in 2016. The decline in game service revenue was mainly attributed to the unsatisfactory performance of licensed games, particularly on PC terminals.

2015 Compared to 2014

Our revenues increased by 43% from $334.2 million in 2014 to $477.9 million in 2015.
Advertising and marketing revenues. Advertising and marketing revenues increased by 52% from $264.8 million in 2014 to $402.4 million in 2015. Revenues from key accounts grew by 8% from $95.7 million in 2014 to $103.5 million in 2015, mostly attributed to Weibo + TV and Big Day ad campaigns, as well as the increase in user growth and user engagement. Ad revenue from Alibaba in 2015 was $143.7 million, up 34% year over year, and accounted for 30% of our total revenues. Revenues from SMEs grew by 153% from $61.5 million in 2014 to $155.2 million in 2015, mainly attributed to the growth in the number of SME customers, which increased by 211% to 1.5 million in 2015, as well as the launch of self-service marketing service system in the fourth quarter of 2014. The growth of our advertising and marketing revenues was also attributed to the shift in demand from PC ads to mobile ads. In 2015, mobile ad revenue accounted for approximately 63% of our total advertising and marketing revenue, compared to approximately 44% in 2014. Mobile MAUs increased by 39% from 141 million in December 2014 to 196 million in December 2015.

Costs and Expenses

Our costs and expenses consist of cost of revenues, sales and marketing, product development and general and administrative expenses, including costs and expenses allocated from SINA during the presented periods. Cost of revenues consists mainly of costs associated with the maintenance of our platform, such as bandwidth and other infrastructure costs, as well as personnel-related expenses, stock-based compensation, content licensing fees and turnover taxes levied on our revenues. Sales and marketing expenses consist primarily of marketing and promotional expenses, personnel-related expenses, including commissions, outside services fees and stock-based compensation. Product development expenses consist primarily of personnel-related expenses, stock-based compensation, outside services fees and infrastructure cost incurred for new product development, product enhancements and back-end systems. General and administrative expenses consist primarily of personnel-related expenses, stock-based compensation and bad debt allowance.

2016 Compared to 2015

Our costs and expenses increased by 17% from $440.4 million in 2015 to $514.8 million in 2016.

Cost of Revenues. Cost of revenues increased by 21% from $142.0 million in 2015 to $171.2 million in 2016. The increase was primarily due to an increase of $16.2 million in turnover taxes associated with higher revenues, an increase of $7.5 million in infrastructure-related costs resulting from traffic growth as well as greater consumption of video content, and an increase of $2.5 million in content licensing fees primarily related to game services. We expect our cost of revenues to increase in absolute amount in the foreseeable future.

Sales and Marketing. Our sales and marketing expenses increased by 18% from $126.1 million in 2015 to $148.3 million in 2016. The increase resulted from an increase of $11.2 million in personnel-related expenses, primarily due to higher commissions arising from higher revenue achievements, an increase of $11.0 million in marketing and promotional expenses, and an increase of $2.1 million in stock-based compensation, partially offset by a decrease of $2.4 million in outside services. We expect our sales and marketing expenses to increase in absolute amount in the foreseeable future.

Product Development. Our product development expenses increased by 7% from $143.4 million in 2015 to $154.1 million in 2016. The increase was primarily due to an increase of $6.3 million in personnel-related expenses arising from a larger development team as well as higher salaries, an increase of $4.9 million in stock-based compensation, and an increase of $2.6 million in outside services, partially offset by a decrease of $3.1 million in infrastructure cost and a decrease of $1.5 million in rental expenditure. We expect our product development expenses to increase in absolute amount in the foreseeable future.

General and Administrative. Our general and administrative expenses increased by 42% from $28.9 million in 2015 to $41.2 million in 2016, primarily due to an increase of $8.0 million in bad debt expense, arising from higher revenues as well as customer-specific reserves, and an increase of $2.1 million in stock-based compensation. We expect our general and administrative expenses to increase in absolute amount in the foreseeable future.

2015 Compared to 2014

Our costs and expenses increased by 24% from $356.3 million in 2014 to $440.4 million in 2015.
Product Development. Our product development expenses increased by 14% from $125.8 million in 2014 to $143.4 million in 2015. The increase was primarily due to an increase of $11.4 million in personnel-related expenses as we expanded our development team to support new product development, product enhancement and SIG recommendation engine improvement efforts, and an increase of $5.8 million in stock-based compensation, partially offset by a decrease of $1.4 million in outside services fees. We expect our product development expenses in absolute amount to increase in the foreseeable future.

General and Administrative. Our general and administrative expenses increased by 9% from $26.5 million in 2014 to $28.9 million in 2015, primarily due to an increase of $4.7 million in stock-based compensation, which was offset by a decline of $2.4 million in bad debt expense as we collected long-past-due customer receivables in 2015. We expect our general and administrative expenses in absolute amount to increase in the foreseeable future.

Investment Related Impairment

We perform impairment assessments of our investments and determine if an investment is other-than-temporarily impaired due to changes in quoted market price or other impairment indicators. We recorded $2.5 million, $8.0 million and $40.2 million in impairment charges in 2014, 2015 and 2016, respectively, as the investments were not performing to expectation or they became incapable of making repayment. The investment impairment in 2016 included a $19.0 million write-off on an online-to-offline business and a $10.5 million write-off on an employment-oriented social company.

Interest and Other Income, Net

2016 Compared to 2015

We had a net interest and other income of $8.8 million in 2016, compared to $6.3 million in 2015. The increase was mainly due to an increase of $2.0 million in interest income arising from a higher balance of cash, cash equivalents and short-term investments.

2015 Compared to 2014

We had a net interest and other income of $6.3 million in 2015, compared to $6.8 million in 2014. The decrease was resulted from a decrease of $3.3 million in interest income and currency exchange gain, partially offset by a decrease of $2.8 million in interest expense. The decrease in interest income was due to a lower balance of cash, cash equivalents and short-term investments subsequent to our investments in 2015, and the decline in interest expense was due to our settlement of the amount due to SINA in 2014 and having no interest-bearing loans thereafter.

Change in Fair Value of Investor Option Liability

We recorded a non-cash loss of $47.0 million in the change in fair value of investor option liability in 2014, primarily due to an increase in the fair value of the investor option liability from the beginning of the year to the initial public offering date on April 17, 2014. The increase in fair value of the investor option liability resulted from an increase in fair value of our ordinary shares, arising from factors including our partnership with Alipay to offer a payment solution to our users and the full exercise of Ali WB’s option in April 2014.

Table of Contents

Consequently, we did not record any change in fair value of investor option liability in 2015 or 2016.

Provision of Income Taxes

The following table sets forth reconciliation between the statutory EIT rate and the effective tax rate for China operations:

<table>
<thead>
<tr>
<th>For the Year Ended December 31,</th>
<th>2014</th>
<th>2015</th>
<th>2016</th>
</tr>
</thead>
<tbody>
<tr>
<td>(in $ thousands, except percentage)</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Deferred tax expenses (benefits)</td>
<td>866</td>
<td>(977)</td>
<td>(4,630)</td>
</tr>
<tr>
<td>Current income tax expenses</td>
<td>262</td>
<td>3,568</td>
<td>8,946</td>
</tr>
<tr>
<td>Income tax expenses applicable to China operations</td>
<td>1,128</td>
<td>2,591</td>
<td>4,316</td>
</tr>
<tr>
<td>Income (loss) from China operation</td>
<td>(10,267)</td>
<td>64,796</td>
<td>170,173</td>
</tr>
<tr>
<td>Effective tax rate for China operations</td>
<td>(11.0)%</td>
<td>4.0%</td>
<td>2.5%</td>
</tr>
</tbody>
</table>

We recorded income taxes of $1.1 million, $2.6 million, and $4.3 million in 2014, 2015, and 2016, respectively. The increase in income taxes was in line with our revenue growth. The provision for income taxes in 2014, 2015 and 2016 differs from the amounts computed by applying the statutory EIT rate primarily due to the utilization of the net operating loss of Weimeng, as it was in a profitable position in 2014, and the tax exemption of the WFOE, Weibo Technology, as a qualified software enterprise in 2015 and 2016. In 2015 and 2016, Weibo Technology was tax exempted for $15.7 million and $50.4 million.

B. Liquidity and Capital Resources

Cash Flows and Working Capital

The following table sets forth the movements of our cash and cash equivalents for the periods presented:

</tbody>
</table>
As of December 31, 2014, 2015 and 2016, our total cash, cash equivalents and short-term investments were $451.3 million, $335.9 million and $396.0 million, respectively. Our principal sources of liquidity have been cash from operations, the initial public offering in 2014 and employee options exercised.

The increase in our cash, cash equivalents and short-term investments as of December 31, 2016 compared to that of December 31, 2015, was primarily due to $236.2 million cash provided by operating activities, partially offset by a net equity investment of $142.9 million, including a $120 million follow-on investment in Yixia Technology Co Ltd., a developer of video apps. Of the $396.0 million in cash, cash equivalents and short-term investments as of December 31, 2016, our affiliated entities within China held $355.1 million, including $57.5 million held by our VIE and VIE’s subsidiaries. The remaining cash balance was held by our entities outside China.

The decline in our cash, cash equivalents and short-term investments as of December 31, 2015 compared to that of December 31, 2014 was primarily due to equity investments of $268.8 million, including a $142 million investment in Didi/Kuaidi Taxi and the acquisition of the Weibo Funds for $22.0 million. During 2015, cash generated from operating activities was $182.0 million. Of the $335.9 million in cash, cash equivalents and short-term investments as of December 31, 2015, our affiliated entities within China held $172.8 million, of which $129.2 million was held by our VIE and VIE’s subsidiaries. The remaining balance was held by our entities outside China.

We believe that our existing cash, cash equivalents and short-term investments balance as of December 31, 2016 is sufficient to fund our operating activities, capital expenditures and other obligations for at least the next twelve months. However, we may decide to enhance our liquidity position or increase our cash reserve for future expansions and acquisitions through additional capital and/or finance funding. The issuance and sale of additional equity would result in further dilution to our shareholders. The incurrence of indebtedness would result in increased fixed obligations and could result in operating covenants that would restrict our operations. We cannot assure you that financing will be available in amounts or on terms acceptable to us, if at all.

In utilizing the cash that we hold offshore, we may (i) make additional capital contributions to our PRC subsidiary, (ii) establish new PRC subsidiaries and make capital contributions to these new PRC subsidiaries, (iii) make loans to our PRC subsidiaries, or (iv) acquire offshore entities with business operations in China in offshore transactions. However, most of these uses are subject to PRC regulations and/or approvals. For example, loans by us to our PRC subsidiaries, which are foreign-invested enterprise, to finance their activities cannot exceed statutory limits and must be registered with SAFE or its local branches. See “Item 4.B. Information on the Company—Business Overview—Regulation—Regulations on Foreign Exchange.”

Substantially all of our future revenues are likely to continue to be in the form of RMB. Under existing PRC foreign exchange regulations, payments of current account items, including profit distributions, interest payments and trade and service-related foreign exchange transactions, can be made in foreign currencies without prior SAFE approval as long as certain routine procedural requirements are fulfilled. Therefore, our PRC subsidiary is allowed to pay dividends in foreign currencies to us without prior SAFE approval by following certain routine procedural requirements. However, approval from or registration with competent government authorities is required where the RMB is to be converted into foreign currency and remitted out of China to pay capital expenses such as the repayment of loans denominated in foreign currencies. The PRC government may at its discretion restrict access to foreign currencies for current account transactions in the future. See “Item 3.D. Key Information—Risk Factors—Risks Relating to Doing Business in China—Restrictions on the remittance of RMB into and out of China and governmental control of currency conversion may limit our ability to pay dividends and other obligations, and affect the value of your investment.”

**Operating Activities**

Net cash provided by operating activities in 2016 was $236.2 million. The difference between net cash provided by operating activities and our net income of $105.7 million in 2016 was primarily due to an increase of $68.1 million in accrued and other liabilities, a non-cash charge of $40.2 million in investment related impairment, $36.9 million in stock-based compensation, a decrease of $29.8 million in accounts receivable due from Alibaba, $14.0 million in depreciation and amortization, and an increase of $9.5 million in deferred revenues, partially offset by an increase of $33.1 million in accounts receivable due from third parties, an increase of $30.8 million in amount due from SINA and an increase of $19.5 million in prepaid expenses and other current assets. The increase in accrued and other liabilities included larger unpaid payroll and bonus amounts due to employees, increased payable for marketing and promotional expenses, increased payable for sales rebate, increased payable for turnover taxes, and increased cash deposits in Weibo wallet by users. Depreciation and amortization were primarily related to the servers, computers and other office equipment that we have purchased for conducting our business. The increase in accounts receivable was in line with our revenue growth.

Net cash provided by operating activities in 2015 was $182.0 million. The difference between net cash provided by operating activities and our net income of $34.2 million in 2015 was primarily due to an increase of $46.3 million in accrued and other liabilities, $26.4 million in stock-based compensation, $21.0 million in depreciation and amortization, an increase of $17.8 million in deferred revenues, an increase of $16.1 million in accounts payable, an increase of $12.5 million in amount due to SINA, a decrease of $10.7 million in accounts receivable due from Alibaba and a non-cash charge of $8.0 million in investment related impairment, partially offset by an increase of $15.3 million in accounts receivable due from related parties. The increase in accrued and other liabilities primarily arising from the increased amounts due to employees payroll and bonus payable and increased payable for marketing expenses and sales rebates. Depreciation and amortization were primarily related to the servers, computers and other office equipment that we have purchased for conducting our business.
Net cash used in operating activities in 2014 was $19.4 million. The difference between net cash used in operating activities and net loss of $65.5 million in 2014 was primarily due to $47.0 million in non-cash increase in fair value of investor option liability, an increase of $23.1 million in depreciation and amortization, $22.4 million in accrual and other liabilities, $13.8 million in stock-based compensation, $12.8 million in accounts payable, and an increase of $8.2 million in amount due to SINA, partially offset by a decrease of $4.7 million in interest payable on amount due to SINA, an increase of $43.4 million in accounts receivable due from Alibaba, an increase of $12.3 million in prepaid expenses and other current assets, an increase of $16.6 million in accounts receivable due from other related parties and an increase of $14.9 million in accounts receivable due from third parties. The increase in accrued and other liabilities primarily arising from the increased amounts due to employees payroll and bonus payable and increased payable for marketing expenses and sales rebates. Depreciation and amortization were primarily related to the servers, computers and other office equipment that we have purchased for conducting our business. The increases in accounts receivable and in prepaid expenses and other current assets were in line with our revenue growth.

**Investing Activities**

Net cash used in investing activities in 2016 was $96.7 million. This was primarily due to the purchase of short-term investments of $314.4 million, investment and prepayment in long-term investments of $155.1 million, and purchases of property and equipment of $13.3 million, partially offset by the maturity of short-term investments of $373.8 million and $12.2 million in cash received from the disposal of and refund from long-term investments.

Net cash used in investing activities in 2015 was $228.3 million. This was primarily due to the purchase of short-term investments of $149.4 million, investment and prepayment in long-term investments of $268.8 million, $22.0 million cash paid for acquisition of the Weibo Funds and purchases of property and equipment of $10.9 million, partially offset by the maturity of short-term investments of $216.6 million and $6.1 million in cash received from the sale of long-term investments.

Net cash provided by investing activities in 2014 was $13.9 million. This was primarily due to the maturity of short-term investments of $321.2 million, partially offset by the purchase of short-term investments of $230.2 million, investment and prepayment in long-term investments of $54.4 million, purchases of property and equipment of $14.7 million, and cash paid for business acquisition, net of cash acquired of $9.6 million.

**Financing Activities**

Net cash provided by financing activities in 2016 was $3.0 million. This consisted of proceeds from the exercise of employee stock options of $4.2 million, partially offset by payment to minority shareholders of $1.1 million.

Net cash provided by financing activities in 2015 was $5.0 million. This consisted of proceeds from the exercise of employee stock options of $7.8 million, partially offset by payment of loan from SINA of $2.9 million.

Net cash provided by financing activities in 2014 was $43.7 million. This primarily consisted of a net proceeds of $306.5 million received from our initial public offering, funding of $15.8 million from SINA, partially offset by repayment of $269.0 million in principle loans to SINA, our payments for ordinary shares and repurchased vested options of $6.9 million associated with Alibaba transaction in 2013 and payment of offering expenses of $5.5 million.

The loans from SINA were presented as financing activities in our consolidated statements of cash flows, while cash payment for billings from SINA of costs and expenses allocated was presented under operating activities.
E. **Off-Balance Sheet Arrangements**

We have not entered into any financial guarantees or other commitments to guarantee the payment obligations of any unconsolidated third parties. In addition, we have not entered into any derivative contracts that are indexed to our shares and classified as shareholders’ equity, or that are not reflected in our consolidated financial statements. Furthermore, we do not have any retained or contingent interest in assets transferred to an unconsolidated entity that serves as credit, liquidity or market risk support to such entity. Moreover, we do not have any variable interest in any unconsolidated entity that provides financing, liquidity, market risk or credit support to us or engages in leasing, hedging or product development services with us.

F. **Tabular Disclosure of Contractual Obligations**

The following table sets forth our contractual obligations as of December 31, 2016:

<table>

G. **Safe Harbor**

This annual report on Form 20-F contains forward-looking statements that relate to future events, including our future operating results and conditions, our prospects and our future financial performance and condition, all of which are largely based on our current expectations and projections. The forward-looking statements are contained principally in the sections entitled “Item 3.D. Key Information—Risk Factors,” “Item 4. Information on the Company” and “Item 5. Operating and Financial Review and Prospects.” These statements are made under the “safe harbor” provisions of the U.S. Private Securities Litigation Reform Act of 1995. You can identify these forward-looking statements by terminology such as “may,” “will,” “expect,” “anticipate,” “future,” “intend,” “plan,” “believe,” “estimate,” “is/are likely to” or other similar expressions. Forward-looking statements involve inherent risks and uncertainties. You should not place undue reliance on these forward-looking statements.

The forward-looking statements made in this annual report on Form 20-F relate only to events or information as of the date on which the statements are made in this annual report on Form 20-F. Except as required by law, we undertake no obligation to update or revise publicly any forward-looking statements, whether as a result of new information, future events or otherwise, after the date on which the statements are made or to reflect the occurrence of unanticipated events. You should read this annual report on Form 20-F completely and with the understanding that our actual future results may be materially different from what we expect.

Item 6. **Directors, Senior Management and Employees**

A. **Directors and Senior Management**

The following table provides information with respect to our directors and executive officers as of the date of this annual report. There are no family relationships among any of the directors or executive officers of our company.

Charles Chao has served as our Chairman of the board of directors since our inception. He has served as the Chairman of the board of directors of our parent, SINA, since August 2012, and has been SINA’s Chief Executive Officer since May 2006. He served as SINA’s President from September 2005 to February 2013, Chief Financial Officer from February 2001 to May 2006, Co-Chief Operating Officer from July 2004 to September 2005. He also served as SINA’s Executive Vice President from April 2002 to June 2003 and Vice President, Finance from September 1999 to January 2001. Prior to joining SINA, Mr. Chao served as an audit manager at PricewaterhouseCoopers, LLP. Prior to that, Mr. Chao was a news correspondent at Shanghai Media Group. Mr. Chao is currently a director of Leju Holdings Ltd., an NYSE-listed company providing online-to-offline (O2O) real estate services in China, and a director of NetDragon Weibo Inc., an HKSE-listed company providing technology for online gaming. Mr. Chao holds a B.A. in Journalism from Fudan University in Shanghai, China, an M.A. in Journalism from the University of Oklahoma and a Master of Professional Accounting degree from the University of Texas at Austin.
Table of Contents

Hong Du has served as our director since January 2014. Since February 2013, Ms. Du has served as SINA’s Co-President and Chief Operating Officer. Ms. Du joined SINA in November 1999 and worked in Business Development until April 2004. From May 2004 to January 2005, Ms. Du served as Deputy General Manager of 1Pai.com, a joint venture between SINA and Yahoo! Ms. Du rejoined SINA in January 2005 and served as the General Manager of Sales Strategy from January 2005 to March 2005, General Manager of Sales from April 2005 to August 2005, Vice President of Sales from September 2005 to February 2007, Senior Vice President of Sales and Marketing from February 2007 to February 2008, and Chief Operating Officer from February 2008 to February 2013. Ms. Du holds a B.S. in Applied Chemistry from Harbin Institute of Technology and an M.S. in management information systems from San Francisco State University.

Daniel Yong Zhang has served as our director since May 2014. Mr. Zhang has been Chief Executive Officer of Alibaba Group Holding Limited, a leading online and mobile commerce company listed on the NYSE, since May 2015, and has served as Alibaba’s director since September 2014. After joining Alibaba group in August 2007, Mr. Zhang served multiple senior management roles within the group. He served as Chief Operating Officer from September 2013 to May 2015, as President of Tmall.com from June 2011 to September 2013, and as Chief Financial Officer of Taobao Marketplace from August 2007 to June 2011 while concurrently served as General Manager of Tmall.com starting in April 2008 to June 2011. Prior to joining Alibaba, Mr. Zhang served as Chief Financial Officer of Shanda Interactive Entertainment Limited, an online game developer and operator then listed on NASDAQ, from August 2005 to August 2007. From 2002 to 2005, he was a senior manager of PricewaterhouseCoopers’ Audit and Business Advisory Division in Shanghai. Mr. Zhang is Chairman of the Board of Intime Retail Group and a director of Haier Electronics Group, both listed on the Hong Kong Stock Exchange. He is also a member of the WEF International Business Council and serves on the board of directors of the Consumer Goods Forum. Mr. Zhang received a bachelor’s degree in finance from Shanghai University of Finance and Economics. He is a member of the Chinese Institute of Certified Public Accountants.

Pehong Chen has served as our independent director since January 2016. Before that he served as a director of SINA between March 1999 and December 2015. Mr. Chen has been the Chief Executive Officer, President and Chairman of the board of BroadVision Inc., a software applications company, since May 1993. Prior to founding BroadVision, Mr. Chen was Vice President of Multimedia Technology at Sybase, Inc., an enterprise software company, from 1992 to 1993. From 1989 to 1992, Mr. Chen founded and was President of Gain Technology, a multimedia software tools company, which was acquired by Sybase. He currently also serves at the board of director of Asian Art Museum. Mr. Chen received a B.S. in Computer Science from National Taiwan University, an M.S. in Computer Science from Indiana University and a Ph.D. in Computer Science from the University of California at Berkeley.

Frank Kui Tang has served as our independent director since April 2014. Mr. Tang is one of the founders of FountainVest Partners, a private equity fund dedicated to China, and has served as its Chief Executive Officer since 2008. Before founding FountainVest Partners, Mr. Tang was a Senior Managing Director at Temasek Holdings and the head of its China investments from 2005 to 2007. Prior to that, Mr. Tang was a Managing Director at Goldman Sachs where he worked from 1994 to 2005. Mr. Tang holds an M.B.A. degree from Columbia University.

Gaofei Wang has served as our Chief Executive Officer since February 2014. Since our inception, Mr. Wang has had various product and business development roles at Weibo and was promoted to General Manager in December 2012. Mr. Wang joined in August 2000 and worked in the product development department until early 2004 when he transferred to the SINA Mobile division. He served as General Manager of SINA Mobile from November 2006 to November 2012. Mr. Wang holds a B.S. degree in Computer Science from Peking University and an EMBA degree from Guanghua School of Management of Peking University.

Herman Yu has served as our Chief Financial Officer since March 2015. Previously, Mr. Yu worked at SINA, as Chief Financial Officer from August 2007 to March 2015, as Acting Chief Financial Officer from May 2006 to August 2007 and as Vice President & Corporate Controller from September 2004 to May 2006. Prior to joining SINA, Mr. Yu worked at Adobe Systems from January 1999 to September 2004, in the roles of Chief Auditor and Corporate Marketing Controller. Mr. Yu, a California Certified Public Accountant, began his career with Arthur Andersen and served in various finance and accounting management roles at Cadence Design Systems and VeriFone. He is currently a director of 58.com Inc., an online classified listing company listed on the New York Stock Exchange, ZTO Express Inc., an express delivery company listed on the New York Stock Exchange, and Tian Ge Interactive Holdings Limited, a live, social video platform company listed on the Hong Kong Stock Exchange. Mr. Yu holds a B.A. in Economics from the University of California and an M.A. in Accountancy from the University of Southern California.

Yajuan Wang has served as our Vice President, Sales since December 2004. From May 2012 to February 2014, Ms. Wang held the position of Vice President, Business Operations at SINA. Prior to joining SINA, Ms. Wang worked at Baidu as Director of Business Operations from November 2008 to April 2012. Previously, Ms. Wang worked at Microsoft (China) as Customer/Partner Experience Manager from May 2003 to July 2004 and at China Hewlett-Packard from 1993 to 2002, mainly responsible for Customer Service Delivery. Ms. Wang holds a B.A. in Information Science and an EMBA degree from Peking University.

Conflict of Interest

Two directors of our company are also executive officers of SINA and another director of our company is an executive officer of Alibaba. These relationships could create, or appear to create, conflicts of interest when these persons are faced with decisions with potentially different implications for SINA/Alibaba and us. If we have any conflicts of interest with SINA or Alibaba, we may not resolve such conflicts on favorable terms for us because of their significant ownership interest in us and the overlapping director and officer positions at both companies.

Mr. Daniel Yong Zhang was appointed as a director of our company pursuant to the Shareholders Agreement by Ali WB, SINA and us.

B. Compensation

For the year ended December 31, 2016, we paid an aggregate of approximately $1.5 million in cash and benefits to our executive officers, and we did not pay any cash compensation to our non-executive directors. For share incentive grants to our officers and directors, see “—Share Incentive Plans.” We
have not set aside or accrued any amount to provide pension, retirement or other similar benefits to our executive officers and directors.

Our PRC subsidiaries and Weimeng are required by law to make contributions equal to certain percentages of each employee’s salary for his or her pension insurance, medical insurance, unemployment insurance and other statutory benefits and a housing provident fund.

Employment Agreements

We have entered into employment agreements with our senior executive officers. Pursuant to these agreements, we will be entitled to terminate a senior executive officer’s employment for cause at any time without remuneration for certain acts of the officer, such as being convicted of any criminal conduct, any act of gross or willful misconduct or any serious, willful, grossly negligent or persistent breach of any employment agreement provision, or engaging in any conduct which may make the continued employment of such officer detrimental to our company. In connection with the employment agreement, each senior executive officer has entered into an intellectual property ownership and confidentiality agreement and agreed to hold all information, know-how and records in any way connected with the products of our company, including, without limitation, all software and computer formulae, designs, specifications, drawings, data, manuals and instructions and all customer and supplier lists, sales and financial information, business plans and forecasts, all technical solutions and the trade secrets of our company, in strict confidence perpetually. Each officer has also agreed that we shall own all the intellectual property developed by such officer during his or her employment.

Table of Contents

Share Incentive Plans

2010 Share Incentive Plan

We adopted our 2010 Share Incentive Plan, or the 2010 Plan, in August 2010 to link the personal interests of our employees, directors and consultants to the success of our business. The maximum aggregate number of shares which may be issued under the 2010 Plan is 35,000,000 ordinary shares. The following paragraphs summarize the terms of the 2010 Plan.

Types of Awards. The 2010 Plan permits the awards of options, share appreciation rights, restricted shares and restricted share units.

Plan Administration. A committee consisting of at least two individuals determined by our board acts as the plan administrator. The plan administrator will determine the participants who are to receive awards, the number of awards to be granted, and the terms and conditions of each award grant. The plan administrator can amend outstanding awards and interpret the terms of the 2010 Plan and any award agreement.

Award Agreement. Options to purchase ordinary shares granted under the 2010 Plan are evidenced by an award agreement that sets forth the terms and conditions for each grant.

Exercise Price. The exercise price of an option or a share appreciation right will be determined by the plan administrator. In certain circumstances, such as a recapitalization, a spin-off, reorganization, merger, separation and split-up, the plan administrator may adjust the exercise price of outstanding options and share appreciation rights.

Eligibility. We may grant awards to our employees, directors or consultants or employees, directors or consultants of our affiliates.

Term of the Awards. The term of each option or share appreciation right granted under the 2010 Plan shall not exceed ten years from date of the grant.

Vesting Schedule. In general, the plan administrator determines the vesting schedule, which is set forth in the award agreement.

Acceleration of Awards upon Change in Control. The plan administrator may determine, at the time of grant or thereafter, that an award shall become vested and exercisable, in full or in part, in the event that a change in control of our company occurs.

Transfer Restrictions. Awards may not be transferred in any manner by the recipient other than by will or the laws of descent and distribution, except as otherwise provided by the plan administrator.

Termination. The plan shall terminate on August 15, 2020 provided that our board may terminate the plan at any time and for any reason.

2014 Share Incentive Plan

We adopted our 2014 Share Incentive Plan, or the 2014 Plan, in March 2014. Ordinary shares reserved but unissued under the 2010 Plan have been transferred to the 2014 Plan. Since the adoption of the 2014 Plan, we have not issued and will not issue any share incentive awards under the 2010 Plan. The maximum aggregate number of shares which may be issued pursuant to all awards under the 2014 Plan is 5,647,872, the sum initially reserved under the 2014 Plan, plus the amount equal to 10% of the total number of our ordinary shares on an as-converted and fully diluted basis as of December 31, 2014. As of December 31, 2016, no option was granted and 5,566,601 restricted share units have been granted and are outstanding. The following paragraphs summarize the terms of the 2014 Plan.

Types of Awards. The 2014 Plan permits the awards of options, restricted shares and restricted share units.
**Award Agreement.** Options, restricted shares or restricted share units granted under the 2014 Plan are evidenced by an award agreement that sets forth the terms, conditions and limitations for each grant.

**Exercise Price and Purchase Price.** The exercise price in respect of any option shall be determined by the plan administrator and set forth in the award agreement which may be a fixed or variable price related to the fair market value of the shares. The exercise price per share subject to an option may be amended or adjusted in the absolute discretion of the plan administrator, the determination of which shall be final, binding and conclusive.

**Eligibility.** We may grant awards to our employees, consultants or directors, employees of our parent company and subsidiaries or consultants of our affiliates.

**Term of the Awards.** The 2014 Plan shall be valid and effective for a period of ten years from the date of effectiveness. The term of each option grant shall not exceed ten years from the date of the grant.

**Vesting Schedule.** In general, the plan administrator determines the vesting schedule, which is set forth in the award agreement with each award recipient.

**Transfer Restrictions.** Unless otherwise provided by applicable law and by the award agreement, awards under the 2014 Plan may not be transferred in any manner by the award holders and may be exercised only by such holders, subject to limited exceptions.

**Termination.** The plan administrator may at any time terminate the operation of the 2014 Plan.

The following table summarizes, as of March 31, 2017, the outstanding options and restricted share units that we granted to our directors, executive officers and other grantees in the aggregate under the 2010 Plan and the 2014 Plan:

**Table of Contents**

C. **Board Practices**

Our board of directors consists of five directors. A director is not required to hold any shares in our company to qualify to serve as a director. A director who to his knowledge is in any way, whether directly or indirectly, interested in a contract or arrangement or proposed contract or arrangement with our company is required to declare the nature of his interest at the meeting of our board at which the question of entering into the contract or arrangement is first considered, if he knows his interest then exists, or in any other case at the first meeting of our board after he knows that he is or has become so interested. Following such a declaration being made, subject to any separate requirement for audit committee approval under applicable law or the Listing Rules of the NASDAQ Stock Market, and unless disqualified by the chairman of the relevant board meeting, a director may vote in respect of any contract or proposed contract or arrangement in which such director is interested and may be counted in the quorum at such meeting. Our board of directors may exercise all our powers of the company to raise or borrow or to secure the payment of any sum or sums of money for the purposes of our company and to mortgage or charge our undertaking, property and assets (present and future) and uncalled capital or any part thereof.
Committees of the Board of Directors

We have established an audit committee and a compensation committee under the board of directors and adopted a charter for each of these committees. Each committee’s members and functions are described below.

Audit Committee. Our audit committee consists of Mr. Frank Kui Tang and Mr. Pehong Chen, and is chaired by Mr. Tang. Mr. Tang and Mr. Chen satisfy the “independence” requirements of Rule 5605(c)(2) of the Listing Rules of the NASDAQ Stock Market and meet the independence standards under Rule 10A-3 under the Exchange Act. We have determined that Mr. Tang qualifies as an “audit committee financial expert.” As a Cayman corporation, we are permitted to rely on the home country exemption under NASDAQ rules to reduce the size of our audit committee to two members. An audit committee of two independent directors would satisfy Rule 5605(c)(2). We have elected to follow home country practice in terms of the number of audit committee members. The audit committee oversees our accounting and financial reporting processes and the audits of the financial statements of our company. The audit committee is responsible for, among other things:

- selecting the independent registered public accounting firm and pre-approving all auditing and non-auditing services permitted to be performed by the independent registered public accounting firm;
- reviewing with the independent registered public accounting firm any audit problems or difficulties and management’s response;
- reviewing and approving all proposed related party transactions, as defined in Item 404 of Regulation S-K under the Securities Act;
- discussing the annual audited financial statements with management and the independent registered public accounting firm;
- reviewing major issues as to the adequacy of our internal controls and any special audit steps adopted in light of material control deficiencies;
- annually reviewing and reassessing the adequacy of our audit committee charter;
- meeting separately and periodically with management and the independent registered public accounting firm; and
- reporting regularly to the board.

Table of Contents

Compensation Committee. Our compensation committee consists of Mr. Pehong Chen and Mr. Frank Kui Tang, and is chaired by Mr. Chen. Mr. Chen and Mr. Tang satisfy the “independence” requirements of Rule 5605(c)(2) of the Listing Rules of the NASDAQ Stock Market. The compensation committee assists the board in reviewing and approving the compensation structure, including all forms of compensation, relating to our directors and executive officers. Our chief executive officer may not be present at any committee meeting during which his compensation is deliberated. The compensation committee is responsible for, among other things:

- reviewing the total compensation package for our executive officers and making recommendations to the board with respect to it;
- approving and overseeing the total compensation package for our executives other than the three most senior executives;
- reviewing the compensation of our directors and making recommendations to the board with respect to it; and
- periodically reviewing and approving any long-term incentive compensation or equity plans, programs or similar arrangements, annual bonuses, and employee pension and welfare benefit plans.

Duties of Directors

Under Cayman Islands law, our directors owe to us fiduciary duties, including a duty of loyalty, a duty to act honestly, and a duty to act in what they consider in good faith to be in our best interests. Our directors also have a duty to exercise the skill they actually possess and such care and diligence that a reasonably prudent person would exercise in comparable circumstances. In fulfilling their duty of care to us, our directors must ensure compliance with our memorandum and articles of association. A shareholder may have the right to seek damages in our name if a duty owed by our directors is breached. In limited exceptional circumstances, we may be permitted to rely on the home country exemption under NASDAQ rules to reduce the size of our audit committee to two members. An audit committee of two independent directors would satisfy Rule 5605(c)(2). We have elected to follow home country practice in terms of the number of audit committee members. The audit committee oversees our accounting and financial reporting processes and the audits of the financial statements of our company. The audit committee is responsible for, among other things:

- selecting the independent registered public accounting firm and pre-approving all auditing and non-auditing services permitted to be performed by the independent registered public accounting firm;
- reviewing with the independent registered public accounting firm any audit problems or difficulties and management’s response;
- reviewing and approving all proposed related party transactions, as defined in Item 404 of Regulation S-K under the Securities Act;
- discussing the annual audited financial statements with management and the independent registered public accounting firm;
- reviewing major issues as to the adequacy of our internal controls and any special audit steps adopted in light of material control deficiencies;
- annually reviewing and reassessing the adequacy of our audit committee charter;
- meeting separately and periodically with management and the independent registered public accounting firm; and
- reporting regularly to the board.

Terms of Directors and Executive Officers

Our officers are elected by and serve at the discretion of the board. Our directors may be appointed by the board or by the shareholders through ordinary resolutions. Any director appointed by the board to fill a vacancy or as a new addition to the board shall hold office only until our next annual general meeting and shall then be eligible for re-election at that meeting. After the completion of our initial public offering, at each annual general meeting of our company, one-third of our directors for the time being, or, if their number is not three or a multiple of three, then the number nearest to, but not less than, one-third, shall retire from office by rotation. The directors to retire in every year shall be those who have been longest in office since their last election but as between persons who became directors on the same day those to retire shall be determined by lot, unless they otherwise agree between themselves. A retiring director shall retain office until the close of the meeting at which he retires, and shall be eligible for re-election at the annual general meeting. A director may be removed at any time before the expiration of his period of office by an ordinary resolution of our shareholders. A director will be removed from office by notice in writing served upon him signed by not less than three-
fourths in number (or, if that is not a round number, the nearest lower round number) of our directors (including himself) then in office. In addition, Ali WB
has obtained certain board representation rights. See “Item 7.B. Major Shareholders and Related Party Transactions—Related Party Transactions—Our
Relationship with Alibaba.”

Table of Contents

D. Employees

We had 2,915, 2,895 and 3,062 employees, respectively as of December 31, 2014, 2015 and 2016. Our employees are mainly based in Beijing,
Shanghai, Chengdu, Guangzhou and Hangzhou. The following table sets forth the numbers of our employees categorized by function as of December 31,
2016:

<table>
<thead>
<tr>
<th>Function</th>
<th>Number of Employees</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
<tr>
<td>General administration and human resources</td>
<td>80</td>
</tr>
<tr>
<td>Total</td>
<td>3,062</td>
</tr>
</tbody>
</table>

The employee numbers in this “Item 6.D. Directors, Senior Management and Employees—Employees” section do not include employees of SINA
who spend part of their time working for our business and who have part of their staff-related expenses allocated to us.

As required by laws and regulations in China, we participate in various employee social security plans that are organized by municipal and
provincial governments, including housing, pension, medical insurance and unemployment insurance. We are required under Chinese law to make
contributions to employee benefit plans at specified percentages of the salaries, bonuses and certain allowances of our employees, up to a maximum amount
specified by the local government from time to time.

We typically enter into standard confidentiality and employment agreements with our management and product development personnel. These
contracts include a standard non-compete covenant that prohibits the employee from competing with us, directly or indirectly, during his or her employment
and for one year after the termination of his or her employment, provided that we pay compensation equal to 50% of the employee’s salary during the
restriction period.

From time to time we employ independent contractors to support our production, engineering, marketing and sales departments. The number of
independent contractors employed during 2016 was not significant.

We believe that we maintain a good working relationship with our employees, and we have not experienced any labor disputes. None of our
employees are represented by labor unions.

E. Share Ownership

The following table sets forth information concerning the beneficial ownership of our ordinary shares as of March 31, 2017, by:

- each of our directors and executive officers; and
- each person known to us to beneficially own more than 5% of our ordinary shares.

Beneficial ownership is determined in accordance with the rules and regulations of the SEC. In computing the number of shares beneficially owned
by a person and the percentage ownership of that person, we have included shares that the person has the right to acquire within 60 days, including through
the exercise of any option, warrant, or other right or the conversion of any other security. These shares, however, are not included in the computation of the
percentage ownership of any other person.

The calculations in the table below is based on 218,638,236 ordinary shares issued and outstanding as of March 31, 2017, comprising of 109,717,130
Class A ordinary shares and 108,921,106 Class B ordinary shares.
Our Relationship with SINA

We are a controlled subsidiary of SINA. We have entered into agreements with SINA with respect to various ongoing relationships between us after our initial public offering. These agreements include a master transaction agreement, a transitional service agreement, a non-competition agreement and a sales and marketing services agreement. The following are summaries of these agreements and of an intellectual property license agreement that we entered into with SINA in April 2013.

**Master Transaction Agreement**

The master transaction agreement contains provisions relating to our carve-out from SINA. Pursuant to this agreement, we are responsible for all financial liabilities associated with the current and historical social media business and operations that have been conducted by or transferred to us, and SINA is responsible for financial liabilities associated with all of SINA’s other current and historical businesses and operations, in each case regardless of the time those liabilities arise. The master transaction agreement also contains indemnification provisions under which we and SINA indemnify each other with respect to breaches of the master transaction agreement or any related inter-company agreement.

In addition, we have agreed to indemnify SINA against liabilities arising from misstatements or omissions in our prospectus dated April 16, 2014 or the registration statement of which it forms a part. We also have agreed to indemnify SINA against the registration statement of which it is a part, except for misstatements or omissions relating to information that SINA provided to us specifically for respect to breaches of the master transaction agreement or any related inter-company agreement.

### Item 7. Major Shareholders and Related Party Transactions

#### A. Major Shareholders

Please refer to “Item 6.E. Directors, Senior Management and Employees—Share Ownership.”

---

**Table of Contents**

B. Related Party Transactions

SINA and Ali WB are currently the two largest shareholders of our company. Below are summaries of our relationship with these two shareholders.

Our Relationship with SINA

We are a controlled subsidiary of SINA. We have entered into agreements with SINA with respect to various ongoing relationships between us after our initial public offering. These agreements include a master transaction agreement, a transitional service agreement, a non-competition agreement and a sales and marketing services agreement. The following are summaries of these agreements and of an intellectual property license agreement that we entered into with SINA in April 2013.

**Master Transaction Agreement**

The master transaction agreement contains provisions relating to our carve-out from SINA. Pursuant to this agreement, we are responsible for all financial liabilities associated with the current and historical social media business and operations that have been conducted by or transferred to us, and SINA is responsible for financial liabilities associated with all of SINA’s other current and historical businesses and operations, in each case regardless of the time those liabilities arise. The master transaction agreement also contains indemnification provisions under which we and SINA indemnify each other with respect to breaches of the master transaction agreement or any related inter-company agreement.

In addition, we have agreed to indemnify SINA against liabilities arising from misstatements or omissions in our prospectus dated April 16, 2014 or the registration statement of which it is a part, except for misstatements or omissions relating to information that SINA provided to us specifically for inclusion in our prospectus dated April 16, 2014 or the registration statement of which it forms a part. We also have agreed to indemnify SINA against
liabilities arising from any misstatements or omissions in our subsequent SEC filings and from information we provide to SINA specifically for inclusion in SINA’s annual reports or other SEC filings following the completion of our initial public offering, but only to the extent that the information pertains to us or our business or to the extent SINA provides us prior written notice that the information will be included in its annual reports or other subsequent SEC filings and the liability does not result from the action or inaction of SINA. Similarly, SINA will indemnify us against liabilities arising from misstatements or omissions in its subsequent SEC filings or with respect to information that SINA provided to us specifically for inclusion in our prospectus dated April 16, 2014, the registration statement of which our prospectus dated April 16, 2014 forms a part, or our annual reports or other SEC filings following the completion of our initial public offering.

The master transaction agreement also contains a general release, under which the parties will release each other from any liabilities arising from events occurring on or before the initial filing date of the registration statement of which our prospectus dated April 16, 2014 forms a part, including in connection with the activities to implement of our initial public offering. The general release does not apply to liabilities allocated between the parties under the master transaction agreement or the other inter-company agreements.

Furthermore, under the master transaction agreement, we have agreed to use our reasonable best efforts to use the same independent certified public accounting firm selected by SINA and to maintain the same fiscal year as SINA until the first SINA fiscal year-end following the earlier of (1) the first date when SINA no longer owns at least 20% of the voting power of our then outstanding securities and (2) the first date when SINA ceases to be the largest beneficial owner of our then outstanding voting securities (without considering holdings by certain institutional investors). We refer to this earlier date as the control ending date. We also have agreed to use our reasonable best efforts to complete our audit and provide SINA with all financial and other information on a timely basis so that SINA may meet its deadlines for its filing of annual and quarterly financial statements.

Under the master transaction agreement, the parties also agree to cooperate in sharing information and data collected from each party’s business operation, including without limitation user information and data relating to user activities. The parties agree not to charge any fees for their cooperation provided under the agreement if they separately and explicitly agree otherwise.

The master transaction agreement will automatically terminate five years after the first date upon which SINA ceases to own in aggregate at least 20% of the voting power of our then outstanding securities, provided that the agreement on sharing information and data will terminate on the earlier of (1) the fifteenth anniversary of the commencement of the cooperation period or (2) five years after the first date upon which SINA ceases to own in aggregate at least 20% of the voting power of our then outstanding securities. This agreement can be terminated early or extended by mutual written consent of the parties. The termination of this agreement will not affect the validity and effectiveness of the transitional services agreement, the non-competition agreement and the sales and marketing services agreement.

102

Table of Contents

Transitional Services Agreement

Under the transitional services agreement, SINA agrees that, during the service period, as described below, SINA will provide us with various corporate support services, including but not limited to:

- administrative support;
- operational management support;
- legal support;
- technology support; and
- provision of office facilities.

SINA also may provide us with additional services that we and SINA may identify from time to time in the future.

The price to be paid for the services provided under the transitional service agreement will be the actual direct and indirect costs of providing such services. Direct costs include labor-related compensation and travel expenses and materials and supplies consumed in performing the services. Indirect costs include office occupancy, information technology supervision and other overhead costs of the department incurring the direct costs of providing the services.

The transitional service agreement provides that the performance of a service according to the agreement will not subject the provider of such service to any liability whatsoever except as directly caused by the gross negligence or willful misconduct of the service provider. Liability for gross negligence or willful misconduct is limited to the lower of the price paid for the particular service or the cost of the service’s recipient performing the service itself or hiring a third party to perform the service. Under the transitional services agreement, the service provider of each service is indemnified by the recipient against all third-party claims relating to provision of services or the recipient’s material breach of a third-party agreement, except where the claim is directly caused by the service provider’s gross negligence or willful misconduct.

The service period under the transitional services agreement commences on March 14, 2014 and will end on the expiration of five years thereafter. We may terminate the transitional services agreement with respect to either all or part of the services by giving 90-day prior written notice to SINA and paying a termination fee equal to the direct costs incurred by SINA in connection with its provision of services at the time of the early termination. SINA may terminate this agreement with respect to either all or part of the services by giving us a 90-day prior written notice if SINA ceases to own in aggregate at least 20% of the voting power of our then outstanding securities or ceases to be the largest beneficial owner of our then outstanding voting securities, without considering holdings of institutional investors that have acquired our securities in the ordinary course of their business and not with the purpose or the effect of changing or influencing control of our company.

Non-competition Agreement

Our non-competition agreement with SINA provides for a non-competition period beginning upon the completion of our initial public offering and ending on the later of (1) five years after the first date when SINA ceases to own in aggregate at least 20% of the voting power of our then outstanding securities or (2) five years after the first date when SINA ceases to own at least 20% of the voting power of our then outstanding securities following the completion of our initial public offering.
SINA has agreed not to compete with us during the non-competition period in the business that is of the same nature as the microblogging and social networking business operated by us as of the date of the agreement, except for owning non-controlling equity interest in any company competing with us. We have agreed not to compete with SINA during the non-competition period in the businesses currently conducted by SINA, as described in its periodic filings with the SEC, other than the microblogging and social networking business currently operated by us as of the date of the agreement, except for owning non-controlling equity interest in any company competing with SINA.

Sales and Marketing Services Agreement

Under our sales and marketing services agreement with SINA, we agree that SINA will be our sales and marketing agent within the service period commencing on the date of signing and ending on the earlier of (1) the fifteenth anniversary of the commencement of the service period or (2) five years after the first date upon which SINA ceases to own in aggregate at least 20% of the voting power of our then outstanding securities.

The fee to be reimbursed for the services provided under this agreement shall be the reasonably allocated direct and indirect costs of providing such services. Direct costs include labor-related compensation and travel expenses and materials and supplies consumed in performing the services. Indirect costs include office occupancy, information technology support and other overhead costs of the department incurring the direct costs of providing the service.

Intellectual Property License Agreement

The intellectual property license agreement was entered into by and between SINA and us as a part of Ali WB’s purchase of our ordinary and preferred shares in April 2013. Under the intellectual property license agreement, SINA grants us and our subsidiaries a perpetual, worldwide, royalty-free, fully paid-up, non-sublicensable, non-transferable, limited, exclusive license of trademarks, including “新浪微博,” “weibo” and “新浪微博,” and a non-exclusive license of certain other intellectual property owned by SINA to make, sell, offer to sell and distribute products, services and applications on a microblogging and social networking platform. We grant SINA and its affiliates a non-exclusive, perpetual, worldwide, non-sublicensable, non-transferable limited license of certain of our intellectual property to use, reproduce, modify, prepare derivative works of, perform, display or otherwise exploit such intellectual property. This agreement commenced on April 29, 2013 and will continue in effect unless terminated by SINA in case of our breach as provided in the agreement.

SINA’s Registration Rights

SINA has the same registration rights as those that have been granted to Ali WB. See below “Our Relationship with Alibaba—Registration Rights Agreement.”

Our Relationship with Alibaba

In April 2013, concurrently with forming a strategic alliance with several of our affiliated entities, Alibaba invested $585.8 million through Ali WB, its wholly owned subsidiary, to purchase our ordinary and preferred shares representing approximately 18% of our then total outstanding shares on a fully diluted basis. The following are summaries of our strategic alliance with Alibaba and major rights that Ali WB has as our shareholder.

Strategic Collaboration with Alibaba

In April 2013, we entered into a strategic collaboration agreement and a marketing cooperation agreement to form a strategic alliance between several of our affiliated entities, including Weibo Technology, Weimeng, and Beijing SINA Internet Information Service Co., Ltd., an affiliate of SINA, and several entities affiliated with Alibaba, including Alibaba (China) Co., Ltd., Taobao (China) Software Co., Ltd., Zhejiang Tmall.com Technology Co., Ltd. and Alibaba (China) Internet Technology Co., Ltd., to jointly explore social commerce and develop innovative marketing solutions to enable merchants on Alibaba e-commerce platforms to better connect and build relationships with Weibo users. Under these agreements, the parties agreed to cooperate on a non-exclusive basis in respect of user account sharing, data sharing, platform integration, product development, payment supporting for both personal computer and mobile businesses, marketing activities and other aspects of the parties’ businesses. The strategic collaboration has generated $49.1 million, $107.6 million and $137.4 million in advertising and marketing revenues in aggregate for us for the twelve months ended 2013, 2014 and 2015, respectively. The strategic collaboration agreement and marketing cooperation agreement expired in January 2016. However, Alibaba still remains as our largest customer, and we rely on them to enable us to offer e-commerce ad solutions to their merchants.

Table of Contents

Shareholders’ Agreement

Concurrently with Alibaba’s purchase of our ordinary and preferred shares in April 2013, we entered into a shareholders’ agreement with Ali WB and SINA which regulates our shareholders’ rights and obligations after Ali WB became our shareholder, which agreement was amended and restated in
March 2014. The following are summaries of certain rights that Ali WB is entitled to under the shareholders’ agreement which continue to be valid after the completion of our initial public offering.

**Ali WB’s Rights Relating to Share Incentive Plan.** Until the earlier of (1) April 21, 2019, the 5th anniversary of our initial public offering, and (2) certain investor exit event defined under the shareholders agreement, we are not permitted to revise our equity-based incentive plans, including our 2014 Share Inventive Plan to increase the number of securities issuable under such plans or adopt any new plan.

**Ali WB’s Right of First Offer.** Ali WB has the right of first offer if (1) SINA or any of its wholly owned subsidiaries desires to sell all or any portion of its ownership in our company, and (2) any management shareholder desires to sell all or any portion of our shares such shareholder holds to a third party other than up to 7,000,000 ordinary shares, or (2) any management shareholder desires to sell all or any portion of our shares such shareholder holds to a third party other than up to 20% of the ordinary shares held by such shareholder as of April 29, 2013.

**Ali WB’s Board Representation Rights.** After Ali WB exercised its option in full, it has the right to appoint a number of directors in proportion to the percentage of its ownership in our company. SINA and Ali WB have entered into a voting agreement to effect the board representation rights. See “—Voting Agreement.”

**Voting Agreement**

Pursuant to the voting agreement entered into by SINA and Ali WB on April 24, 2014, Ali WB has the right to appoint or nominate such number of directors as is proportional to the percentage of its ownership in our company on a fully diluted basis (such number of directors to be rounded down the closest integer). Nevertheless, the number of non-independent directors Ali WB is entitled to appoint or nominate shall be no fewer than one director but no greater than the number of directors appointed or nominated by SINA as long as Ali WB holds less our shares than SINA. Ali WB’s board representation rights will terminate in the event that more than 50% of its acquired shares, being the total shares of our company acquired by Ali WB in April 2013 and through the exercise of Ali WB’s option under the shareholders’ agreement, are transferred by Ali WB or its permitted transferees to one or more third parties or are no longer held by Alibaba directly, or indirectly through certain subsidiaries. Ali WB may assign its board representation rights to a qualified new investor to whom Ali WB transfers at least 50% of its acquired shares and who meets the requirements set forth in the shareholders agreement and the directors to be appointed by such new qualified investor must meet qualifications set forth in the voting agreement. In May 2014, Mr. Daniel Yong Zhang was appointed by Ali WB as a director of our company.

**Registration Rights Agreement**

We have entered into a registration rights agreement with SINA and Ali WB. Under the registration rights agreement, each of SINA and Ali WB has the right to require us to register the public sale of all the shares owned by them as well as the right to participate in registrations of shares by us or any of our other shareholders. SINA and Ali WB have customary rights under the registration rights agreement, such as no more than two (2) demand registration rights, unlimited piggyback registration rights, shelf registration rights and rights to request us to pay registration expenses and to bear indemnification liability.

**Table of Contents**

**Contractual Arrangements**

**Transactions with SINA**

During 2016, we recorded $39.3 million in revenues from SINA, we had costs and expenses allocated from SINA of $25.7 million and $20.3 million billed by SINA for other costs and expenses associated with Weibo business. In addition, we had amounts due from SINA of $18.6 million as of December 31, 2016.

During 2015, we recorded $22.1 million in revenues from SINA, we had costs and expenses allocated from SINA of $24.7 million and $29.4 million billed by SINA for other costs and expenses associated with Weibo business. We made repayment of $2.9 million for interest on amount due to SINA. We had amounts due to SINA of $12.2 million as of December 31, 2015. Additionally, we acquired from SINA a majority equity interest in the Weibo Funds for a consideration of approximately $22.0 million.

During 2014, we had deemed contribution from SINA of $61.2 million, costs and expenses allocated from SINA of $42.4 million and $15.1 million billed by SINA for other costs and expenses associated with Weibo business, interest expense on amount due to SINA of $2.8 million and repayment of $276.6 million for loan from SINA and relevant interests. We had amounts due to SINA of $24.3 million and accounts receivable due from SINA of $3.2 million as of December 31, 2014. The $61.2 million deemed contribution for the year ended December 31, 2014, represents the discount borne by SINA upon settlement of investor options.

Costs and expenses allocated from SINA represent services that were provided by various subsidiaries and VIEs of SINA. The service fees were incurred using an allocation methodology based on proportional utilization. See “—Our Relationship with SINA” and “Item 5.A Operating and Financial Review and Prospects—Operating Results—Critical Accounting Policies, Judgments and Estimates—Basis of Presentation and Consolidation.”

Prior to our initial public offering, amounts due to SINA were calculated based on actual spending incurred by SINA for the development and support of our business, adjusted by amounts repaid to SINA by us at each period end. The consolidated statements of comprehensive income (loss) reflected a charge for interest on amount due to SINA, at prevailing market interest rates by reference to the three-month time deposit rate of the People’s Bank of China, which ranged from 2.55% to 3.05%. The loans are repayable upon demand, but there is an understanding between us and SINA that the loans will be repaid after the completion of our initial public offering. After our initial public offering, we repaid the interest-bearing loan and relevant interest expenses to SINA amounting to $276.6 million. The unsettled payables generated after our initial public offering are interest free and payable on demand.

**Transactions with Alibaba**
During 2016, we recorded $57.9 million in advertising and marketing services revenues from Alibaba. As of December 31, 2016, we had $24.3 million in accounts receivable due from Alibaba.

During 2015, we recorded $143.7 million in advertising and marketing services revenues from Alibaba. As of December 31, 2015, we had $54.1 million in accounts receivable due from Alibaba.

During 2014, we recorded $107.6 million in advertising and marketing services revenues from Alibaba. We also had a deemed contribution from Alibaba of $15.3 million, which represents the discount borne by Alibaba upon settlement of investor options. As of December 31, 2014, we had $64.7 million in accounts receivable due from Alibaba. See “—Our Relationship with Alibaba.”

Transactions with Other Related Parties

During 2016, we recorded $46.2 million in revenues from other related parties and we recorded $10.6 million in sales and marketing expenses for services received from other related parties. As of December 31, 2016, we had $30.1 million in accounts receivable due from other related parties and $9.3 million in accrued and other liabilities due to other related parties.

During 2015, we recorded $31.3 million in revenues from other related parties and we recorded $7.8 million in sales and marketing expenses for services received from other related parties. As of December 31, 2015, we had $33.9 million in accounts receivable due from other related parties and $8.0 million in accrued and other liabilities due to other related parties.

During 2014, we recorded $29.0 million in revenues from other related parties and we recorded $11.2 million in sales and marketing expenses for services received from other related parties. As of December 31, 2014, we had $15.4 million in accounts receivable due from other related parties and $5.8 million in accrued and other liabilities due to related parties.

Employment Agreements

Share Incentives

See “Item 6.B. Directors, Senior Management and Employees—Compensation—Share Incentive Plans.”

C. Interests of Experts and Counsel

Not applicable.

Item 8. Financial Information

A. Consolidated Statements and Other Financial Information

We have appended consolidated financial statements at the end of this annual report filed as part of this annual report on Form 20-F.

Legal Proceedings

From time to time, we are involved in legal proceedings, investigations and claims incidental to the conduct of our business. For many of such legal proceedings, we are currently unable to estimate the possible loss or a possible range of loss, if any, but we believe the likelihood of such legal proceedings individually and in the aggregate to cause a material impact on our financial position, result of operations and cash flows, when finally resolved, to be remote.

Dividend Policy

We have not previously declared or paid cash dividends and we have no plan to declare or pay any dividends in the near future on our shares or ADSs. We currently intend to retain most, if not all, of our available funds and any future earnings to operate and expand our business.

We are a holding company incorporated in the Cayman Islands. We rely principally on dividends from our PRC subsidiary for our cash requirements, including any payment of dividends to our shareholders. PRC regulations may restrict the ability of our PRC subsidiary to pay dividends to us. See “Item 3.D. Key Information—Risk Factors—Risks Relating to Doing Business in China—Any limitation on the ability of our PRC subsidiary to make payments to us, or the tax implications of making payments to us, could have a material adverse effect on our ability to conduct our business or our financial condition.”

Our board of directors has discretion as to whether to distribute dividends, subject to applicable laws. In addition, our shareholders may by ordinary resolution declare dividends, but no dividend may exceed the amount recommended by our directors. Under Cayman Islands law, our company may pay dividends only out of either profit or share premium, provided that in no circumstances may a dividend be paid if this would result in our company being unable to pay its debts as they fall due in the ordinary course of business. Even if our board of directors decides to pay dividends, the form, frequency and amount will depend upon our future operations and earnings, capital requirements and surplus, general financial condition, contractual restrictions and other factors that the board of directors may deem relevant. If we pay any dividends, our depositary, will distribute such dividends to our ADS holders to the same extent as holders of our ordinary shares, subject to the terms of the deposit agreement, including the fees and expenses payable thereunder. See “Item 12.D. Description of Securities Other than Equity Securities—American Depositary Shares.” Cash dividends on our ordinary shares, if any, will be paid in U.S. dollars.
B. **Significant Changes**

We have not experienced any significant changes since the date of our audited consolidated financial statements included in this annual report.

**Item 9. The Offer and Listing**

A. **Offer and Listing Details**

Our ordinary shares have been quoted on the NASDAQ Global Select Market system under the symbol “WB” since April 17, 2014. The following table sets forth the high and low trading prices of our ordinary shares for (1) each of the four quarters of the most recent full financial year and the subsequent period and (2) each of the most recent six months:

Our ADSs, each representing one of our Class A ordinary shares, have been quoted on the NASDAQ Global Select Market system under the symbol “WB” since April 17, 2014.

D. **Selling Shareholders**

Not applicable.

---

**Item 10. Additional Information**

A. **Share Capital**

Not applicable.

B. **Memorandum and Articles of Association**

We are a Cayman Islands exempted company and our affairs are governed by our memorandum and articles of association and the Companies Law (2016 Revision) of the Cayman Islands, referred to as the Companies Law below. The following are summaries of certain provisions of our memorandum and articles of association in effect as of the date of this annual report insofar as they relate to the material terms of our ordinary shares.
Registered Office and Objects

Our registered office in the Cayman Islands is located at the offices of Floor 4, Willow House, Cricket Square, P. O. Box 2804, Grand Cayman KY1-1112, Cayman Islands. The memorandum of association provides, inter alia, that the liability of the members of our company is limited to the amount from time to time unpaid on such member’s shares. The objects for which our company is established are unrestricted, and we shall have full power and authority to carry out any object not prohibited or limited by the Companies Law.

Board of Directors

Ordinary Shares

General

Based on the assumptions and qualifications in its opinion that is filed as an exhibit to the registration statement that includes our prospectus dated April 16, 2014, our Cayman Islands counsel, Maples and Calder (Hong Kong) LLP, has advised us that all of our outstanding ordinary shares are fully paid and non-assessable. Certificates representing the ordinary shares are issued in registered form. Our shareholders who are non-residents of the Cayman Islands may freely hold and vote their ordinary shares. Our company will issue only non-negotiable shares, and will not issue bearer or negotiable shares.

Register of Members

Under Cayman Islands law, we must keep a register of members and there should be entered therein:

· the names and addresses of the members, a statement of the shares held by each member, and of the amount paid or agreed to be considered as paid, on the shares of each member;
· the date on which the name of any person was entered on the register as a member; and
· the date on which any person ceased to be a member.

Under Cayman Islands law, the register of members of our company is prima facie evidence of the matters set out therein (i.e. the register of members will raise a presumption of fact on the matters referred to above unless rebutted) and a member registered in the register of members is deemed as a matter of Cayman Islands law to have legal title to the shares as set against its name in the register of members. Upon the completion of our initial public offering, the register of members was updated to record and give effect to the issue of shares by us to the Depositary (or its nominee) as the depositary, and the shareholders recorded in the register of members are deemed to have legal title to the shares set against their name.

Dividends

The holders of our ordinary shares are entitled to such dividends as may be declared by our board of directors or shareholders in general meeting (provided always no dividend may exceed the amount recommended by our directors, and provided further that dividends may be declared and paid only out of funds legally available therefor, namely out of either profit or our share premium account, and provided further that a dividend may not be paid if this would result in our company being unable to pay its debts as they fall due in the ordinary course of business).

Classes of Ordinary Shares

Our ordinary shares are divided into Class A ordinary shares and Class B ordinary shares. Except for conversion rights and voting rights, the Class A ordinary shares and Class B ordinary shares shall carry equal rights and rank pari passu with one another, including but not limited to the rights to dividends and other capital distributions.

Each Class B ordinary share is convertible into one Class A ordinary share at any time by the holder thereof. In addition, (i) each Class B ordinary share shall automatically and immediately be converted into one Class A ordinary share if at any time Sina Corporation and its Affiliates (as defined in our memorandum and articles of association) in the aggregate hold less than five percent (5%) of the issued Class B ordinary shares in our company, and no Class B ordinary shares shall be issued by our company thereafter, and (ii) upon any sale, transfer, assignment or disposition of Class B ordinary shares by a holder thereof to any person or entity which is not an Affiliate (as defined in our memorandum and articles of association) of such holder, such Class B ordinary shares shall be automatically and immediately converted into an equal number of Class A ordinary shares. Class A ordinary shares are not convertible into Class B ordinary shares under any circumstances.

Voting Rights

Holders of ordinary shares have the right to receive notice of, attend, speak and vote at general meetings of our company. Holders of Class A ordinary shares and Class B ordinary shares shall, at all times, vote together as one class on all matters submitted to a vote by the members at any such general meeting. Each Class A ordinary share shall be entitled to one vote on all matters subject to the vote at general meetings of our company, and each Class B ordinary share shall be entitled to three votes on all matters subject to the vote at general meetings of our company. Voting at any meeting of
shareholders is by show of hands unless a poll is demanded. A poll may be demanded by the chairman of such meeting or any one shareholder present in person or by proxy.

Maples and Calder (Hong Kong) LLP, our counsel as to Cayman Islands law, has advised that such voting structure is in compliance with current Cayman Islands law as in general terms, a company and its shareholders are free to provide in the articles of association for such rights as they consider appropriate, subject to such rights not being contrary to any provision of the Companies Law and not inconsistent with common law. Maples and Calder (Hong Kong) LLP has confirmed that the inclusion in our memorandum and articles of association of provisions giving weighted voting rights to specific shareholders generally or on specific resolutions is not prohibited by the Companies Law. Further, weighted voting provisions have been held to be valid as a matter of English common law and therefore it is expected that such would be upheld by a Cayman Islands court.

### Table of Contents

An ordinary resolution to be passed by the shareholders requires the affirmative vote of a simple majority of the votes attached to the ordinary shares cast by those shareholders who are present in person or by proxy at a general meeting, while a special resolution requires the affirmative vote of no less than two-thirds of the votes attached to the ordinary shares cast by those shareholders who are present in person or by proxy at a general meeting. Both ordinary resolutions and special resolutions may also be passed by a unanimous written resolution signed by all the shareholders of our company, as permitted by the Companies Law and our memorandum and articles of association. A special resolution will be required for important matters such as a change of name or making changes to our memorandum and articles of association.

#### Transfer of Ordinary Shares

Any of our shareholders may transfer all or any of his or her ordinary shares by an instrument of transfer in the usual or common form or any other form approved by our board of directors.

However, our board of directors may, in its absolute discretion, decline to register any transfer of any ordinary share which is not fully paid up or on which our company has a lien. Our board of directors may also decline to register any transfer of any ordinary share unless:

- the instrument of transfer is lodged with us, accompanied by the certificate for the ordinary shares to which it relates and such other evidence as our board of directors may reasonably require to show the right of the transferor to make the transfer;
- the instrument of transfer is in respect of only one class of shares;
- the instrument of transfer is properly stamped, if required;
- the ordinary shares transferred are free of any lien in favor of us;
- any fee related to the transfer has been paid to us; and
- in the case of a transfer to joint holders, the transfer is not to more than four joint holders.

If our directors refuse to register a transfer they are required, within two months after the date on which the instrument of transfer was lodged, to send to each of the transferor and the transferee notice of such refusal.

#### Liquidation

On a return of capital on winding up or otherwise (other than on conversion, redemption or purchase of ordinary shares), assets available for distribution among the holders of ordinary shares will be distributed among the holders of the ordinary shares on a pro rata basis. If our assets available for distribution are insufficient to repay all of the paid-up capital, the assets will be distributed so that the losses are borne by our shareholders proportionately. We are a “limited liability” company registered under the Companies Law, and under the Companies Law, the liability of our members is limited to the amount, if any, unpaid on the shares respectively held by them. Our memorandum of association contains a declaration that the liability of our members is so limited.

#### Calls on Ordinary Shares and Forfeiture of Ordinary shares

Our board of directors may from time to time make calls upon shareholders for any amounts unpaid on their ordinary shares. The ordinary shares that have been called upon and remain unpaid are subject to forfeiture.

#### Redemption, Repurchase and Surrender of Ordinary Shares

We may issue shares on terms that such shares are subject to redemption, at our option or at the option of the holders thereof, on such terms and in such manner as may be determined, before the issue of such shares, by our board of directors or by a special resolution of our shareholders. Our company may also repurchase any of our shares provided that the manner and terms of such purchase have been approved by our board of directors or are otherwise authorized by our memorandum and articles of association. Under the Companies Law, the redemption or repurchase of any share may be paid out of our company’s profits or out of the proceeds of a fresh issue of shares made for the purpose of such redemption or repurchase, or out of capital (including share premium account and capital redemption reserve) if our company can, immediately following such payment, pay its debts as they fall due in the ordinary course of business. In addition, under the Companies Law no such share may be redeemed or repurchased (a) unless it is fully paid up, (b) if such redemption or repurchase would result in there being no shares outstanding, or (c) if the company has commenced liquidation. In addition, our company may accept the surrender of any fully paid share for no consideration.
Variations of Rights of Shares

If at any time, our share capital is divided into different classes of shares, all or any of the special rights attached to any class of shares may be varied with the consent in writing of the holders of two-thirds in nominal value of the issued shares of that class or with the sanction of a special resolution passed at a general meeting of the holders of shares of that class. The rights conferred upon the holders of the shares of any class issued with preferred or other rights will not, unless otherwise expressly provided by the terms of issue of the shares of that class, be deemed to be varied by the creation or issue of further shares ranking pari passu with such existing class of shares.

General Meetings of Shareholders and Shareholder Proposals

As a Cayman Islands exempted company, we are not obliged by the Companies Law to call shareholders’ annual general meetings. Our memorandum and articles of association provide that we shall in each year hold a general meeting as our annual general meeting in which case we shall specify the meeting as such in the notices calling it, and the annual general meeting shall be held at such time and place as may be determined by our directors.

Shareholders’ annual general meetings and any other general meetings of our shareholders may be convened by a majority of our board of directors. Advance notice of at least fourteen calendar days is required for the convening of our annual general shareholders’ meeting and any other general meeting of our shareholders. A quorum required for a general meeting of shareholders consists of at least one shareholder present or by proxy, representing not less than one-third of the total voting power of their outstanding shares in our company.

Cayman Islands law provides shareholders with only limited rights to requisition a general meeting, and does not provide shareholders with any right to put any proposal before a general meeting. However, these rights may be provided in a company’s articles of association. Our memorandum and articles of association allow any two or more shareholders holding shares representing in aggregate not less than one-third of the total voting rights in the paid up capital of our company, to requisition an extraordinary general meeting of the shareholders, in which case our directors are obliged to call such meeting and to put the resolutions so requisitioned to a vote at such meeting; however, our memorandum and articles of association do not provide our shareholders with any right to put any proposals before annual general meetings or extraordinary general meetings not called by such shareholders.

Election and Removal of Directors

Unless otherwise determined by our company in general meeting, our articles provide that our board will consist of not less than two directors. There are no provisions relating to retirement of directors upon reaching any age limit.

The directors have the power to appoint any person as a director either to fill a casual vacancy on the board or as an addition to the existing board. Any director so appointed shall hold office only until the next following annual general meeting of our company and shall then be eligible for re-election at that meeting. At each annual general meeting, one-third of the directors for the time being, or, if their number is not three or a multiple of three, then the number nearest to, but not less than, one-third, shall retire from office by rotation. The directors to retire in every year shall be those who have been longest in office since their last election but as between persons who became directors on the same day those to retire shall (unless they otherwise agree between themselves) be determined by lot. A retiring director shall retain office until the close of the meeting at which he retires, and shall be eligible for re-election thereat.

Proceedings of Board of Directors

Our memorandum and articles of association provide that our business is to be managed and conducted by our board of directors. The quorum necessary for board meetings may be fixed by the board and, unless so fixed at another number, will be a majority of the directors.

Our memorandum and articles of association provide that the board may from time to time at its discretion exercise all powers of our company to raise or borrow or to secure the payment of any sum or sums of money for the purposes of our company and to mortgage or charge its undertaking, property and assets (present and future) and uncalled capital of our company and issue debentures, bonds and other securities of our company, whether outright or as collateral security for any debt, liability or obligation of our company or of any third party.

Inspection of Books and Records

Holders of our ordinary shares have no general right under Cayman Islands law to inspect or obtain copies of our list of shareholders or our corporate records. However, we intend to provide our shareholders with annual audited financial statements.

Changes in Capital

Our shareholders may from time to time by ordinary resolution:

- increase our share capital by such sum, to be divided into shares of such amount, as the resolution shall prescribe;
consolidate and divide all or any of our share capital into shares of a larger amount than our existing shares;

sub-divide our existing shares, or any of them into shares of a smaller amount, provided that in the subdivision the proportion between the amount paid and the amount, if any, unpaid on each reduced share shall be the same as it was in case of the share from which the reduced share is derived; or

cancel any shares which, at the date of the passing of the resolution, have not been taken or agreed to be taken by any person and diminish the amount of our share capital by the amount of the shares so cancelled.

Our shareholders may by special resolution, subject to confirmation by the Grand Court of the Cayman Islands on an application by our company for an order confirming such reduction, reduce our share capital or any capital redemption reserve in any manner permitted by law.

**Exempted Company**

We are an exempted company with limited liability under the Companies Law of the Cayman Islands. The Companies Law in the Cayman Islands distinguishes between ordinary resident companies and exempted companies. Any company that is registered in the Cayman Islands but conducts business mainly outside of the Cayman Islands may apply to be registered as an exempted company. The requirements for an exempted company are essentially the same as for an ordinary company except for the exemptions and privileges listed below:

1. an exempted company does not have to file an annual return of its shareholders with the Registrar of Companies;
2. an exempted company’s register of members is not required to be open to inspection;
3. an exempted company does not have to hold an annual general meeting;
4. an exempted company may issue no par value, negotiable or bearer shares;
5. an exempted company may obtain an undertaking against the imposition of any future taxation (such undertakings are usually given for 20 years in the first instance);
6. an exempted company may register by way of continuation in another jurisdiction and be deregistered in the Cayman Islands;
7. an exempted company may register as a limited duration company; and
8. an exempted company may register as a segregated portfolio company.

“Limited liability” means that the liability of each shareholder is limited to the amount unpaid by the shareholder on that shareholder’s shares of the company (except in exceptional circumstances, such as involving fraud, the establishment of an agency relationship or an illegal or improper purpose or other circumstances in which a court may be prepared to pierce or lift the corporate veil). We are subject to reporting and other informational requirements of the Exchange Act, as applicable to foreign private issuers. Except as otherwise disclosed in this annual report, we currently intend to comply with the NASDAQ rules in lieu of following home country practice.

**Differences in Corporate Law**

The Companies Law is derived, to a large extent, from the older Companies Acts of England but does not follow recent United Kingdom statutory enactments, and accordingly there are significant differences between the Companies Law and the current Companies Act of England. In addition, the Companies Law differs from laws applicable to United States corporations and their shareholders. Set forth below is a summary of the significant differences between the provisions of the Companies Law applicable to us and the laws applicable to companies incorporated in the United States and their shareholders.

**Mergers and Similar Arrangements**

The Companies Law permits mergers and consolidations between Cayman Islands companies and between Cayman Islands companies and non-Cayman Islands companies. For these purposes, (a) “merger” means the merging of two or more constituent companies and the vesting of their undertaking, property and liabilities in one of such companies as the surviving company and (b) a “consolidation” means the combination of two or more constituent companies into a combined company and the vesting of the undertaking, property and liabilities of such companies to the consolidated company. In order to effect such a merger or consolidation, the directors of each constituent company must approve a written plan of merger or consolidation, which must then be authorized by (a) a special resolution of the shareholders of each constituent company, and (b) such other authorization, if any, as may be specified in such constituent company’s articles of association. The written plan of merger or consolidation must be filed with the Registrar of Companies together with a declaration as to the solvency of the consolidated or surviving company, a list of the assets and liabilities of each constituent company and an undertaking that a copy of the certificate of merger or consolidation will be given to the members and creditors of each constituent company and that notification of the merger or consolidation will be published in the Cayman Islands Gazette. Dissenting shareholders have the right to be paid the fair value of their shares (which, if not agreed between the parties, will be determined by the Cayman Islands court) if they follow the required procedures, subject to certain exceptions. Court approval is not required for a merger or consolidation which is effected in compliance with these statutory procedures.
In addition, there are statutory provisions that facilitate the reconstruction and amalgamation of companies, provided that the arrangement is approved by a majority in number of each class of shareholders or creditors (representing 75% by value) with whom the arrangement is to be made and who must, in addition, represent three-fourths in value of each such class of shareholders or creditors, as the case may be, that are present and voting either in person or by proxy at a meeting, or meetings, convened for that purpose. The convening of the meetings and subsequently the arrangement must be sanctioned by the Grand Court of the Cayman Islands. While a dissenting shareholder has the right to express to the court the view that the transaction ought not to be approved, the court can be expected to approve the arrangement if it determines that:

- the statutory provisions as to the required majority vote have been met;
- the shareholders have been fairly represented at the meeting in question and the statutory majority are acting bona fide without coercion of the minority to promote interests adverse to those of the class;
- the arrangement is such that may be reasonably approved by an intelligent and honest man of that class acting in respect of his interest; and
- the arrangement is not one that would more properly be sanctioned under some other provision of the Companies Law.

When a takeover offer is made and accepted by holders of 90% of the shares affected within four months, the offeror may, within a two-month period commencing on the expiration of such four month period, require the holders of the remaining shares to transfer such shares on the terms of the offer. An objection can be made to the Grand Court of the Cayman Islands but this is unlikely to succeed in the case of an offer which has been so approved unless there is evidence of fraud, bad faith or collusion.

If an arrangement and reconstruction is thus approved, the dissenting shareholder would have no rights comparable to appraisal rights, which would otherwise ordinarily be available to dissenting shareholders of Delaware corporations, providing rights to receive payment in cash for the judicially determined value of the shares.

**Shareholders’ Suits**

In principle, we will normally be the proper plaintiff and as a general rule a derivative action may not be brought by a minority shareholder. However, based on English authorities, which would in all likelihood be of persuasive authority in the Cayman Islands, the Cayman Islands court can be expected to apply and follow the common law principles (namely the rule in Foss v. Harbottle and the exceptions thereto) which permit a minority shareholder to commence a class action against, or derivative actions in the name of, a company to challenge the following:

- an act which is illegal or ultra vires;
- an act which, although not ultra vires, could only be effected duly if authorized by a special or qualified majority vote that has not been obtained; and
- an act which constitutes a fraud on the minority where the wrongdoers are themselves in control of the company.

**Indemnification of Directors and Executive Officers and Limitation of Liability**

Cayman Islands law does not limit the extent to which a company’s articles of association may provide for indemnification of officers and directors, except to the extent any such provision may be held by the Cayman Islands courts to be contrary to public policy, such as to provide indemnification against civil fraud or the consequences of committing a crime. Our memorandum and articles of association provide that our directors and officers shall be indemnified out of the assets and profits of our company from and against all actions, costs, charges, losses, damages and expenses which they shall or may incur or sustain by or by reason of any act done, concurred in or omitted in or about the execution of their duty, or supposed duty, in their respective offices or trusts, provided that this indemnity shall not extend to any matter in respect of any fraud or dishonesty which may attach to any of said persons. This standard of conduct is generally the same as permitted under the Delaware General Corporation Law for a Delaware corporation. In addition, we have entered into indemnification agreements with our directors and senior executive officers that provide such persons with additional indemnification beyond that provided in our memorandum and articles of association.
As a matter of Cayman Islands law, a director of a Cayman Islands company is in the position of a fiduciary with respect to the company and therefore he owes the following duties to the company — a duty to act in good faith in the best interests of the company, a duty not to make a personal profit based on his or her position as director (unless the company permits him to do so), a duty not to put himself in a position where the interests of the company conflict with his or her personal interest or his or her duty to a third party and a duty to exercise powers for the purpose for which such powers were intended. A director of a Cayman Islands company owes to the company a duty to act with skill and care. It was previously considered that a director need not exhibit in the performance of his or her duties a greater degree of skill than may reasonably be expected from a person of his or her knowledge and experience. However, English and Commonwealth courts have moved towards an objective standard with regard to the required skill and care and these authorities are likely to be followed in the Cayman Islands.

**Shareholder Proposals**

Under the Delaware General Corporation Law, a shareholder has the right to put any proposal before the annual meeting of shareholders, provided it complies with the notice provisions in the governing documents. The Delaware General Corporation Law does not provide shareholders an express right to put any proposal before the annual meeting of shareholders, but in keeping with common law, Delaware corporations generally afford shareholders an opportunity to make proposals and nominations provided that they comply with the notice provisions in the certificate of incorporation or bylaws. A special meeting may be called by the board of directors or any other person authorized to do so in the governing documents, but shareholders may be precluded from calling special meetings.

**Cumulative Voting**

Under the Delaware General Corporation Law, cumulative voting for elections of directors is not permitted unless the corporation’s certificate of incorporation specifically provides for it. Cumulative voting potentially facilitates the representation of minority shareholders on a board of directors since it permits the minority shareholder to cast all the votes to which the shareholder is entitled on a single director, which increases the shareholder’s voting power with respect to electing such director. Cayman Islands law does not prohibit cumulative voting, but our articles of association do not provide for cumulative voting. As a result, our shareholders are not afforded any less protections or rights on this issue than shareholders of a Delaware corporation.

**Removal of Directors**

Under the Delaware General Corporation Law, a director of a corporation with a classified board may be removed only for cause with the approval of a majority of the outstanding shares entitled to vote, unless the certificate of incorporation provides otherwise. Under our memorandum and articles of association, directors may be removed by ordinary resolution of our shareholders.

**Transactions with Interested Shareholders**

The Delaware General Corporation Law contains a business combination statute applicable to Delaware public corporations whereby, unless the corporation has specifically elected not to be governed by such statute by amendment to its certificate of incorporation or bylaws that is approved by its shareholders, it is prohibited from engaging in certain business combinations with an “interested shareholder” for three years following the date that such person becomes an interested shareholder. An interested shareholder generally is a person or a group who or which owns or owned 15% or more of the target’s outstanding voting stock or who or which is an affiliate or associate of the corporation and owned 15% or more of the corporation’s outstanding voting stock within the past three years. This has the effect of limiting the ability of a potential acquirer to make a two-tiered bid for the target in which all shareholders would not be treated equally. The statute does not apply if, among other things, prior to the date on which such shareholder becomes an interested shareholder, the board of directors approves either the business combination or the transaction which resulted in the person becoming an interested shareholder. This encourages any potential acquirer of a Delaware corporation to negotiate the terms of any acquisition transaction with the target’s board of directors.

Cayman Islands law has no comparable statute. As a result, we cannot avail ourselves of the types of protections afforded by the Delaware business combination statute. However, although Cayman Islands law does not regulate transactions between a company and its significant shareholders, it does provide that such transactions must be entered into bona fide in the best interests of the company and for a proper corporate purpose and not with the effect of constituting a fraud on the minority shareholders.

---

**Table of Contents**

- Dissolution; Winding Up

---

**Dissolution; Winding Up**
Under the Delaware General Corporation Law, unless the board of directors approves the proposal to dissolve, dissolution must be approved by shareholders holding 100% of the total voting power of the corporation. Only if the dissolution is initiated by the board of directors may it be approved by a simple majority of the corporation’s outstanding shares. Delaware law allows a Delaware corporation to include in its certificate of incorporation a supermajority voting requirement in connection with dissolutions initiated by the board. Under Cayman Islands law, a company may be wound up by either an order of the courts of the Cayman Islands or by a special resolution of its members or, if the company is unable to pay its debts as they fall due, by an ordinary resolution of its members. The court has authority to order winding up in a number of specified circumstances including where it is, in the opinion of the court, just and equitable to do so.

Variation of Rights of Shares

Under the Delaware General Corporation Law, a corporation may vary the rights of a class of shares with the approval of a majority of the outstanding shares of such class, unless the certificate of incorporation provides otherwise. Under Cayman Islands law and our articles of association, if our share capital is divided into more than one class of shares, we may vary the rights attached to any class only with the written consent of the holders of two-thirds in nominal value of the issued shares of that class or with the sanction of a special resolution passed at a general meeting of the holders of shares of that class.

Amendment of Governing Documents

Under the Delaware General Corporation Law, a corporation’s certificate of incorporation may be amended only if adopted and declared advisable by the board of directors and approved by a majority of the outstanding shares entitled to vote and by the bylaws may be amended with the approval of a majority of the outstanding shares entitled to vote and may, if so provided in the certificate of incorporation, also be amended by the board of directors. Under the Companies Law, our memorandum and articles of association may only be amended by special resolution of our shareholders.

Rights of Non-Resident or Foreign Shareholders

There are no limitations imposed by our memorandum and articles of association on the rights of non-resident or foreign shareholders to hold or exercise voting rights on our shares. In addition, there are no provisions in our memorandum and articles of association governing the ownership threshold above which shareholder ownership must be disclosed.

Directors’ Power to Issue Shares

Under our memorandum and articles of association, our board of directors is empowered to issue or allot shares or grant options and warrants with or without preferred, deferred, qualified or other special rights or restrictions.

C. Material Contracts

We have not entered into any material contracts for the two years immediately preceding the date of this annual report other than in the ordinary course of business and other than those described elsewhere in this annual report on Form 20-F.

D. Exchange Controls

See “Item 4.B. Information on the Company—Business Overview—Regulation—Regulations on Foreign Exchange.” and “Item 3.D. Key Information—Risk Factors—Risks Relating to Doing Business in China—We may be subject to penalties, including restriction on our ability to inject capital into our PRC subsidiary and our PRC subsidiary’s ability to distribute profits to us, if our PRC resident shareholders beneficial owners fail to comply with relevant PRC foreign exchange rules.”

Table of Contents

E. Taxation

The following summary of material Cayman Islands, PRC and U.S. federal income tax consequences of an investment in our ADSs or Class A ordinary shares is based upon laws and relevant interpretations thereof in effect as of the date of this annual report, all of which are subject to change. This summary does not deal with all possible tax consequences relating to an investment in our ADSs or Class A ordinary shares, such as the tax consequences under state, local and other tax laws.

Cayman Islands Taxation

The Cayman Islands currently levies no taxes on individuals or corporations based upon profits, income, gains or appreciation and there is no taxation in the nature of inheritance tax or estate duty. There are no other taxes likely to be material to us levied by the government of the Cayman Islands except for stamp duties which may be applicable on instruments executed in, or brought within, the jurisdiction of the Cayman Islands. The Cayman Islands is not party to any double tax treaties which are applicable to any payments made by or to our company. There are no exchange control regulations or currency restrictions in the Cayman Islands.

People’s Republic of China Taxation

Although we are incorporated in the Cayman Islands, we may be treated as a PRC resident enterprise for PRC tax purposes under the Enterprise Income Tax Law. The Enterprise Income Tax Law provides that an enterprise established under the laws of a foreign country or region but whose “de facto management body” is located in the PRC is treated as a PRC resident enterprise for PRC tax purposes and consequently subject to the PRC income tax at the rate of 25% on its global income. The implementing rules of the Enterprise Income Tax Law merely define the location of the “de facto management body” as the place where the “organizational body which effectively manages and controls the production and business operation, personnel, accounting, properties and other aspects of operations of an enterprise” is located. Based on a review of surrounding facts and circumstances, we do not believe that Weibo Corporation or Weibo HK should be considered a PRC resident enterprise for PRC tax purposes. However, there is limited guidance and implementation history of the
In addition, if Weibo Corporation is a PRC resident enterprise, PRC income tax at the rate of 10% will generally be applicable to interest and dividends payable by us to investors that are “non-resident enterprises” of the PRC, if such investors do not have an establishment or place of business in the PRC, or if they have such establishment or place of business in the PRC but the relevant income is not effectively connected with such establishment or place of business, to the extent such interest or dividends have their sources within the PRC. Such 10% tax rate could be reduced by applicable tax treaties or similar arrangements between China and the jurisdiction of the investor. For example, for investors in Hong Kong, the tax rate is reduced to 7% for interest payments and 5% for dividends.

Furthermore, any gain realized on the transfer of our ADSs or Class A ordinary shares by such investors would also be subject to PRC income tax at 10% if such gain is regarded as income derived from sources within the PRC.

As most of our operations are located within the PRC, interest and dividends payable by us to you, as well as any gain you may realize from the sale of our ADSs or Class A ordinary shares, may be deemed to be derived from sources within China. As a result, if we are treated as a “resident enterprise” for PRC tax purposes, such interest, dividends and gain may be subject to PRC tax. Any such tax may materially and adversely affect the value of your investment in our ADSs and Class A ordinary shares.

United States Federal Income Tax Considerations

The following discussion is a summary of U.S. federal income tax considerations relating to the ownership and disposition of our ADSs or Class A ordinary shares by U.S. Holders (as defined below) that will hold our ADSs or Class A ordinary shares as “capital assets” (generally, property held for investment) under the U.S. Internal Revenue Code of 1986, as amended (the “Code”). This discussion is based upon applicable provisions of the Code, Treasury regulations promulgated thereunder, pertinent judicial decisions and interpretive rulings of the Internal Revenue Service (the “IRS”), all of which are subject to change, possibly with retroactive effect. This discussion does not address all aspects of U.S. federal income taxation that may be relevant to particular investors in light of their individual investment circumstances, including investors subject to special tax rules (for example, certain financial institutions, insurance companies, broker-dealers, pension plans, regulated investment companies, real estate investment trusts, cooperatives, tax-exempt organizations (including private foundations), holders who are not U.S. Holders, holders who own (directly, indirectly, or constructively) 10% or more of our voting stock, investors that will hold their ADSs or Class A ordinary shares as part of a straddle, hedge, conversion, constructive sale, or other integrated transaction for U.S. federal income tax purposes, investors that are traders in securities that have elected the mark-to-market method of accounting, investors that have a functional currency other than the U.S. dollar, or certain former citizens or long-term residents of the United States), all of whom may be subject to tax rules that differ significantly from those discussed below.

Table of Contents

In addition, this discussion does not address any non-U.S., state, local or any U.S. federal estate, gift, alternative minimum tax or Medicare contribution tax considerations. You are urged to consult your tax advisor regarding the U.S. federal, state, local, and non-U.S. income and other tax considerations of acquiring, holding, and disposing of our ADSs or Class A ordinary shares.

General

The discussion below of U.S. federal income tax consequences to “U.S. Holders” will apply to you if you are a beneficial owner of our ADSs or Class A ordinary shares and you are, for U.S. federal income tax purposes, (i) an individual who is a citizen or resident of the United States, (ii) a corporation, or other entity treated as a corporation for U.S. federal income tax purposes, created in, or organized under the law of the United States, any state thereof or the District of Columbia, (iii) an estate the income of which is includible in gross income for U.S. federal income tax purposes regardless of its source, or (iv) a trust (A) the administration of which is subject to the primary supervision of a U.S. court and which has one or more U.S. persons who have the authority to control all substantial decisions of the trust or (B) that has otherwise validly elected to be treated as a U.S. person under the Code.

If you are a partner in a partnership or other entity treated as a partnership for U.S. federal income tax purposes that holds our ADSs or Class A ordinary shares, your tax treatment will generally depend on your status and the activities of the partnership. A partner in a partnership holding our ADSs or Class A ordinary shares should consult its tax advisor regarding the tax consequences of acquiring, holding, and disposing of our ADSs or Class A ordinary shares.

The discussion below assumes that the representations contained in the deposit agreement are true and that the obligations in the deposit agreement and any related agreement have been and will be complied with in accordance with the terms. If you hold ADSs, you should be treated as the holder of the underlying ordinary shares represented by those ADSs for U.S. federal income tax purposes.

Passive Foreign Investment Company Considerations

A non-U.S. corporation, such as our company, will be classified as a PFIC for U.S. federal income tax purposes for any taxable year, if either (i) 75% or more of its gross income for such year consists of certain types of “passive” income or (ii) 50% or more of the value of its assets (determined on the basis of a quarterly average) during such year produce or are held for the production of passive income. Passive income generally includes dividends, interest, royalties, rents, annuities, net gains from the sale or exchange of property producing such income and net foreign currency gains. For this purpose, cash is categorized as a passive asset and the company’s unbooked intangibles associated with active business activity are taken into account as a non-passive asset. We will be treated as owning our proportionate share of the assets and earning our proportionate share of the income of any other corporation in which we own, directly or indirectly, more than 25% (by value) of the stock.

Although the law in this regard not entirely clear, we treat Weimeng as being owned by us for U.S. federal income tax purposes because we control its management decisions and we are entitled to substantially all of its economic benefits, and, as a result, we consolidate its results of operations in our consolidated U.S. GAAP financial statements. If it were determined, however, that we are not the owner of Weimeng for U.S. federal income tax purposes, we would likely be treated as a PFIC for our current taxable year and any subsequent taxable year.
Assuming we are the owner of Weimeng for U.S. federal income tax purposes, based on our income and assets, and the value of our ADSs and Class A ordinary shares, we do not believe that we were a PFIC for our taxable year ended December 31, 2016 and do not expect to be a PFIC for our current taxable year. While we do not anticipate becoming a PFIC, changes in the nature of our income or assets or the value of our ADSs and Class A ordinary shares may cause us to become a PFIC for the current or any subsequent taxable year. Under circumstances where revenues from activities that produce passive income significantly increase relative to our revenues from activities that produce non-passive income, or where we determine not to deploy significant amounts of cash for working capital or other purposes, our risk of becoming classified as a PFIC may substantially increase.

If we are classified as a PFIC for any taxable year during which a U.S. Holder holds our ADSs or Class A ordinary shares, the PFIC tax rules discussed below under “—Passive Foreign Investment Company Rules” generally will apply to such U.S. Holder for such taxable year and, unless the U.S. Holder makes certain elections, will apply in future years even if we cease to be a PFIC. The discussion below under “—Dividends” and “—Sale or Other Disposition of ADSs or Class A Ordinary Shares” assumes that we will not be classified as a PFIC for U.S. federal income tax purposes.

**Dividends**

Any cash distributions (including the amount of any PRC tax withheld if we are deemed to be a PRC resident enterprise under PRC tax law) paid on our ADSs or Class A ordinary shares out of our current or accumulated earnings and profits, as determined under U.S. federal income tax principles, will generally be includible in your gross income as dividend income on the day actually or constructively received by you, in the case of Class A ordinary shares, or by the depository, in the case of ADSs. Because we do not intend to determine our earnings and profits on the basis of U.S. federal income tax principles, any distribution paid will generally be treated as dividend income for U.S. federal income tax purposes. Dividends received on our ADSs or Class A ordinary shares will not be eligible for the dividends received deduction allowed to corporations under the Code.

A non-corporate recipient will be subject to tax at the lower capital gain tax rate applicable to “qualified dividend income,” provided that certain conditions are satisfied, including that (1) our ADSs are readily tradable on an established securities market in the United States, or, in the event that we are deemed to be a PRC resident enterprise under the PRC tax law, we are eligible for the benefit of the United States-PRC income tax treaty (the “Treaty”), (2) we are neither a PFIC nor treated as such with respect to a U.S. Holder (as discussed below) for the taxable year in which the dividend was paid and the preceding taxable year, and (3) certain holding period requirements are met.

In the event that we are deemed to be a PRC resident enterprise under PRC tax law, you may be subject to PRC withholding taxes on dividends paid on our ADSs or Class A ordinary shares. If we are deemed to be a PRC resident enterprise, we may, however, be eligible for the benefits of the Treaty. If we are eligible for such benefits, dividends we pay on our Class A ordinary shares, regardless of whether such shares are represented by our ADSs, would be eligible for the reduced rates of taxation applicable to qualified dividend income, as discussed above.

For U.S. foreign tax credit purposes, dividends will generally be treated as income from foreign sources and will generally constitute passive category income. Depending on your particular circumstances, you may be eligible, subject to a number of complex limitations, to claim a foreign tax credit in respect of any foreign withholding taxes imposed on dividends received on our ADSs or Class A ordinary shares. If you do not elect to claim a foreign tax credit for foreign tax withheld, you are permitted instead to claim a deduction, for U.S. federal income tax purposes, for the foreign tax withheld, but only for a year in which you elect to do so for all creditable foreign income taxes. The rules governing the foreign tax credit are complex. You are urged to consult your tax advisor regarding the availability of the foreign tax credit under your particular circumstances.

**Sale or Other Disposition of ADSs or Class A Ordinary Shares**

You will generally recognize capital gain or loss upon the sale or other disposition of our ADSs or Class A ordinary shares in an amount equal to the difference, if any, between the amount realized upon the disposition and your adjusted tax basis in such ADSs or Class A ordinary shares. Any capital gain or loss will be long-term capital gain or loss if you have held the ADSs or Class A ordinary shares for more than one year and will generally be U.S.-source gain or loss for U.S. foreign tax credit purposes. In the event that we are deemed to be a PRC resident enterprise under PRC tax law, and gain from the disposition of the ADSs or Class A ordinary shares would be subject to tax in the PRC, such gain may be treated as PRC-source gain for U.S. foreign tax credit purposes under the Treaty. The deductibility of a capital loss may be subject to limitations. You are urged to consult your tax advisor regarding the tax consequences if a foreign tax is imposed on a disposition of our ADSs or Class A ordinary shares, including the availability of the foreign tax credit under your particular circumstances.
practicable after we electronically file such material with, or furnish it to, the SEC. We may from time to time provide important disclosures to investors by

your annual PFIC filing requirements, if any.

amounts included in your income under a mark-to-market election, as well as gain on the actual sale or other disposition of the ADSs, will be treated as ordinary income. Ordinary loss treatment will also apply to the deductible portion of any mark-to-market loss on the ADSs, as well as to any loss realized on the actual sale or disposition of the Class A ordinary shares, to the extent that the amount of such loss does not exceed the net mark-to-market gains previously included for such ADSs. Your basis in the ADSs will be adjusted to reflect any such gain or loss amounts. If you make a mark-to-market election, tax rules that apply to distributions by corporations which are not PFICs would apply to distributions by us (except that the lower applicable capital gains rate would not apply).

The mark-to-market election is available only for “marketable stock” which is stock that is traded in other than de minimis quantities on at least 15 days during each calendar quarter (“regularly traded”) on a qualified exchange or other market, as defined in applicable Treasury regulations. Our ADSs are listed on the NASDAQ Global Select Market, which is a qualified exchange for these purposes, and, consequently, assuming that the ADSs are regularly traded, if you are a holder of ADSs, it is expected that the mark-to-market election would be available to you if we are or become a PFIC. However, a mark-
to-market election may not be made with respect to our ordinary shares as they are not marketable stock.

Item 11. Quantitative and Qualitative Disclosures About Market Risk

Market Risks

Foreign Exchange Risk

The value of the RMB against the U.S. dollar and other currencies is affected by changes in China’s political and economic conditions and China’s foreign exchange policies, among other things. On July 21, 2005, the PRC government changed its decades-old policy of pegging the value of the RMB to the U.S. dollar, and the RMB appreciated more than 20% against the U.S. dollar over the following three years. Between July 2008 and June 2010, this appreciation halted and the exchange rate between the RMB and the U.S. dollar remained within a narrow band. Since June 2010, the RMB has fluctuated against the U.S. dollar, at times significantly and unpredictably, and in recent years the RMB has depreciated significantly against the U.S. dollar. Since October 1, 2016, the RMB has joined the International Monetary Fund (IMF)’s basket of currencies that make up the Special Drawing Right (SDR), along with the U.S. dollar, the Euro, the Japanese yen and the British pound. In the fourth quarter of 2016, the RMB has depreciated significantly in the backdrop of a surging U.S. dollar and persistent capital outflows of China. With the development of the foreign exchange market and progress towards interest rate liberalization and RMB internationalization, the PRC government may in the future announce further changes to the exchange rate system and there is no guarantee that the RMB will not appreciate or depreciate significantly in value against the U.S. dollar in the future. It is difficult to predict how market forces or PRC or U.S. government policy may impact the exchange rate between the RMB and the U.S. dollar in the future. To date, we have not entered into any hedging transactions in an effort to reduce our exposure to foreign currency exchange risk.

Our revenues and costs are mostly denominated in RMB, and a significant portion of our financial assets are also denominated in RMB, whereas our reporting currency is the U.S. dollar. Any significant depreciation of the RMB may materially and adversely affect our revenues, earnings and financial position as reported in U.S. dollars. To the extent that we need to convert U.S. dollars we received from our initial public offering into RMB for our operations, appreciation of the RMB against the U.S. dollar would have an adverse effect on the RMB amount we would receive from the conversion. Conversely, if we decide to convert our RMB into U.S. dollars for the purpose of making payments for dividends on our ordinary shares or ADSs or for other business purposes, appreciation of the U.S. dollar against the RMB would have a negative effect on the U.S. dollar amount available to us.

Interest Rate Risk

Our exposure to interest rate risk primarily relates to the interest income generated by excess cash, which is mostly held in interest-bearing bank deposits. Interest-earning instruments carry a degree of interest rate risk. We have not been exposed to material risks due to changes in interest rates, and we have not used any derivative financial instruments to manage our interest risk exposure. However, our future interest income may fall short of expectations due to changes in market interest rates.

Item 12. Description of Securities Other than Equity Securities

A. Debt Securities

Not applicable.

B. Warrants and Rights

Not applicable.

C. Other Securities

Not applicable.

D. American Depositary Shares
The depositary may charge each person to whom ADSs are issued, including, without limitation, issuances against deposits of shares, issuances in respect of share distributions, rights and other distributions, issuances pursuant to a stock dividend or stock split declared by us or issuances pursuant to a merger, exchange of securities or any other transaction or event affecting the ADSs or deposited securities, and each person surrendering ADSs for withdrawal of deposited securities or whose ADRs are cancelled or reduced for any other reason, US$5.00 for each 100 ADSs (or any portion thereof) issued, delivered, reduced, cancelled or surrendered, as the case may be. The depositary may sell (by public or private sale) sufficient securities and property received in respect of a share distribution, rights and/or other distribution prior to such deposit to pay such charge.

The following additional charges shall be incurred by the ADR holders, by any party depositing or withdrawing shares or by any party surrendering ADSs or to whom ADSs are issued (including, without limitation, issuance pursuant to a stock dividend or stock split declared by us or an exchange of stock regarding the ADSs or the deposited securities or a distribution of ADSs), whichever is applicable:

- a fee of US$1.50 per ADR for transfers of certificated or direct registration ADRs;
- a fee of up to US$0.05 per ADR for any cash distribution made pursuant to the deposit agreement;
- a fee of up to US$0.05 per ADS per calendar year (or portion thereof) for services performed by the depositary in administering the ADRs (which fee may be charged on a periodic basis during each calendar year and shall be assessed against holders of ADRs as of the record date or record dates set by the depositary during each calendar year and shall be payable in the manner described in the next succeeding provision);
- a fee for the reimbursement of such fees, charges and expenses as are incurred by the depositary and/or any of its agents (including, without limitation, the custodian and expenses incurred on behalf of holders in connection with compliance with foreign exchange control regulations or any law or regulation relating to foreign investment) in connection with the servicing of the shares or other deposited securities, the sale of securities (including, without limitation, deposited securities), the delivery of deposited securities or otherwise in connection with the depositary’s or its custodian’s compliance with applicable law, rule or regulation (which fees and charges shall be assessed on a proportionate basis against holders as of the record date or dates set by the depositary and shall be payable at the sole discretion of the depositary by billing such holders or by deducting such charge from one or more cash dividends or other cash distributions);

**Table of Contents**

- a fee for the distribution of securities (or the sale of securities in connection with a distribution), such fee being in an amount equal to the US$0.05 per ADS issuance fee for the execution and delivery of ADSs which would have been charged as a result of the deposit of such securities (treating all such securities as if they were shares) but which securities or the net cash proceeds from the sale thereof are instead distributed by the depositary to those holders entitled thereto;
- stock transfer or other taxes and other governmental charges;
- cable, telex and facsimile transmission and delivery charges incurred at your request in connection with the deposit or delivery of shares;
- transfer or registration fees for the registration of transfer of deposited securities on any applicable register in connection with the deposit or withdrawal of deposited securities;
- the fees, expenses and other charges charged by JPMorgan Chase Bank, N.A. and/or its agent (which may be a division, branch or affiliate) in connection with the conversion of foreign currency into U.S. dollars; and
- fees of any division, branch or affiliate of the depositary utilized by the depositary to direct, manage and/or execute any public and/or private sale of securities under the deposit agreement.

JPMorgan Chase Bank, N.A. and/or its agent may act as principal for such conversion of foreign currency. We will pay all other charges and expenses of the depositary and any agent of the depositary (except the custodian) pursuant to agreements from time to time between us and the depositary. The charges described above may be amended from time to time by agreement between us and the depositary.

The depositary collects its fees for issuance and cancellation of ADSs directly from investors depositing shares or surrendering ADSs for the purpose of withdrawal or from intermediaries acting for them. The depositary collects fees for making distributions to investors by deducting those fees from the amounts distributed or by selling a portion of distributable property to pay the fees. The depositary may collect its annual fee for depositary services by deduction from cash distributions, or by directly billing investors, or by charging the book-entry system accounts of participants acting for them. The depositary will generally set off the amounts owing from distributions made to holders of ADSs. If, however, no distribution exists and payment owing is not timely received by the depositary, the depositary may refuse to provide any further services to holders that have not paid those fees and expenses owing until such fees and expenses have been paid. At the discretion of the depositary, all fees and charges owing under the deposit agreement are due in advance and/or when declared owing by the depositary.

The fees and charges you may be required to pay may vary over time and may be changed by us and by the depositary. You will receive prior notice of any increase in any such fees and charges.

**Fees and Other Payments Made by the Depositary to Us**

The depositary has agreed to reimburse us for certain expenses we incur that are related to establishment and maintenance of the ADR program upon such terms and conditions as we and the depositary may agree from time to time. The depositary may make available to us a set amount or a portion of the depositary fees charged in respect of the ADR program or otherwise upon such terms and conditions as we and the depositary may agree from time to time. In 2016, we received reimbursement of $201,447 from the depositary for our expenses incurred in connection with the establishment and maintenance of the ADS program.
Item 13. Defaults, Dividend Arrearages and Delinquencies
None.

Table of Contents

Item 14. Material Modifications to the Rights of Security Holders and Use of Proceeds

Material Modifications to the Rights of Security Holders

See “Item 10.B. Additional Information—Memorandum and Articles of Association—Ordinary Shares” for a description of the rights of securities holders, which remain unchanged.

Use of Proceeds

The following “Use of Proceeds” information relates to (i) the registration statement on Form F-1, as amended (File Number: 333-194589) in relation to our initial public offering of 16,800,000 ADSs representing 16,800,000 of our Class A ordinary shares, and the underwriters’ full exercise of their option to purchase from us an additional 2,520,000 ADSs representing 2,520,000 Class A ordinary shares, at an initial offering price of $17.00 per ADS and (ii) our issuance of 2,923,478 Class A ordinary shares to Ali WB in the concurrent private placement, at an exercise price of $14.45 per share, which represents a 15% discount to the initial public offering price. Our initial public offering closed on April 23, 2014. Goldman Sachs (Asia) L.L.C. and Credit Suisse Securities (USA) LLC. were the representatives of the underwriters for our initial public offering.

As a result of our initial public offering and the concurrent private placement, we raised an aggregate of approximately $306.5 million in net proceeds, after deducting the underwriting discounts and commissions. For the period from April 16, 2014, the date that the F-1 Registration Statement was declared effective by the SEC, to the date of this annual report, we used net proceeds from our initial public offering and concurrent private placement to repay the $276.6 million loan amount due to SINA.

Item 15. Controls and Procedures

Disclosure Controls and Procedures

We carried out an evaluation, under the supervision and with the participation of management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Exchange Act Rule 13a-15(e)) as of the end of the period covered by this annual report on Form 20-F. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our company’s disclosure controls and procedures are effective.

Management’s Annual Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rules 13a-15(f) under the Securities Exchange Act of 1934, as amended). Our management evaluated the effectiveness of our internal control over financial reporting based on criteria established in the framework in Internal Control-Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this evaluation, our management has concluded that our internal control over financial reporting was effective as of December 31, 2016.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. In addition, projections of any evaluation of effectiveness of our internal control over financial reporting to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies and procedures may deteriorate.

Attestation Report of the Independent Registered Public Accounting Firm

PricewaterhouseCoopers Zhong Tian LLP has audited the effectiveness of our internal control over financial reporting as of December 31, 2016 as stated in its report, which appears on page F-2 of this annual report.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934, as amended) during the year ended December 31, 2016 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Item 16A. Audit Committee Financial Expert

Our board of directors has determined that Mr. Frank Kui Tang, an independent director (under the standards set forth in NASDAQ Listing Rule 5605(a)(2) and Rule 10A-3 under the Exchange Act) and member of our audit committee, is an audit committee financial expert.
Item 16B. Code of Ethics

We have adopted a Code of Business Conduct and Ethics which applies to our directors, officers and employees, including our principal executive officer, principal financial officer and principal accounting officer. We have posted the code on our corporate website at ir.weibo.com.

Item 16C. Principal Accountant Fees and Services

The following table sets forth the aggregate fees billed by PricewaterhouseCoopers Zhong Tian LLP and its affiliates, our independent auditor and principal accountant for the years ended December 31, 2015 and 2016:

<table>
<thead>
<tr>
<th>Service Description</th>
<th>2015</th>
<th>2016</th>
</tr>
</thead>
<tbody>
<tr>
<td>Audit Fees(1)</td>
<td>1,425,357</td>
<td>1,809,454</td>
</tr>
<tr>
<td>Audit Related Fees(2)</td>
<td>37,568</td>
<td>37,656</td>
</tr>
<tr>
<td>All Other Fees</td>
<td>—</td>
<td>—</td>
</tr>
</tbody>
</table>

(1) “Audit fees” means the aggregate fees billed in each of the fiscal years listed for professional services rendered by our principal auditors for the audit of our annual financial statements and assistance with and review of documents filed with the SEC. In 2015 and 2016, the audit refers to financial audit.

(2) “Audit-related fees” means fees billed in each of the fiscal years listed for rendering review work on the extensible business reporting language (“XBRL”) and other audit-related services.

The policy of the Audit Committee is to pre-approve all audit and non-audit services provided by PricewaterhouseCoopers Zhong Tian LLP, including audit services, audit-related services, tax services and other services as described above, other than those for de minimis services which are approved by the audit committee prior to the completion of the audit. After receiving submissions from the management, the audit committee review and, in its sole discretion, pre-approve all audit and non-audit services. Pre-approval will be made by the audit committee or by one or more members of the audit committee as shall be designated by the audit committee or the chairperson of the audit committee. The person(s) granting such pre-approval shall report it to the audit committee at the next scheduled meeting.

Item 16D. Exemptions from the Listing Standards for Audit Committees

Not applicable.

Item 16E. Purchases of Equity Securities by the Issuer and Affiliated Purchasers

None.

Item 16F. Change in Registrant’s Certifying Accountant

None.

Table of Contents

Item 16G. Corporate Governance

Because SINA owns more than 50% of the total voting power of our ordinary shares, we are a “controlled company” under the NASDAQ Stock Market Marketplace Rules, or the NASDAQ Rules. We intend to rely on certain exemptions that are available to controlled companies from NASDAQ corporate governance requirements, including the requirements:

· that our director nominees must be selected or recommended solely by independent directors; and

· that we have a corporate governance and nominating committee that is composed entirely of independent directors with a written charter addressing the committee’s purpose and responsibilities.

In addition, as a foreign private issuer whose securities are listed on the NASDAQ Global Select Market, we are permitted to follow certain home country corporate governance practices in lieu of the requirements of the NASDAQ Rules pursuant to NASDAQ Rule 5615(a)(3), which provides for such exemption to compliance with the NASDAQ Rule 5600 Series. We intend to rely on the exemption available to foreign private issuers for the requirements:

· that the board of directors be comprised of a majority of independent directors under NASDAQ Rule 5605(b)(1); and

· that an audit committee be comprised of at least three members under NASDAQ Rule 5605(c)(2)(A).

We are not required to and will not voluntarily meet these requirements. As a result of our use of the “controlled company” and “foreign private issuer” exemptions, our investors will not have the same protection afforded to shareholders of companies that are subject to all of NASDAQ’s corporate governance requirements.

Item 16H. Mine Safety Disclosure

Not applicable.

PART III

Item 17. Financial Statements
We have elected to provide financial statements pursuant to Item 18.

**Item 18. Financial Statements**

The consolidated financial statements of Weibo Corporation and its subsidiaries are included at the end of this annual report.

disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

F-7
Weibo Corporation (“Weibo” or the “Company”) is a leading social media for people to create, share and discover Chinese-language content. It provides an unprecedented and simple way for people and organizations to publicly express themselves in real time, interact with others on a massive global platform and stay connected with the world. As a microcosm of the Chinese society and a cultural phenomenon in China, Weibo allows people to be heard publicly and exposed to the rich ideas, cultures and experiences of the broader world. Media outlets use Weibo as a source of news and a distribution channel for their headline news. Government agencies and officials use Weibo as an official communication channel for disseminating information timely and gauging public opinion to improve public services. Charities use Weibo to make the world a better place by launching charitable projects, seeking donations and volunteers and leveraging celebrities and organizations on Weibo to amplify their impact to society. Weibo generates its revenues mostly from advertising and marketing services, as well as from other services, including game-related services, VIP membership and data licensing.

Incorporated in the Cayman Islands, Weibo Corporation is a controlled subsidiary of Sina Corporation (the “Parent” or “SINA”). In April 2014, the Company completed an initial public offering (the “IPO”) with the new issuance of 19,320,000 Class A ordinary shares and received $306.5 million in net proceeds. Immediately prior to the completion of the IPO, all the ordinary shares held by SINA was converted into an equal number of the Class B ordinary shares, all the ordinary shares held by other shareholders was converted into an equal number of the Class A ordinary shares, and all of its outstanding preferred shares were automatically converted into 30,046,154 Class A ordinary shares. The call option held by a subsidiary of Alibaba Group was exercised to purchase 29,990,778 Class A ordinary shares from SINA and the Company. Each Class A ordinary share is entitled to one vote per share and each Class B ordinary share is entitled to three votes per share. Each Class B ordinary share can be converted into one Class A ordinary share at any time, while Class A ordinary shares cannot be converted into Class B ordinary shares.

Reorganization

The Weibo business was founded by SINA, its parent, in 2009. Prior to the establishment of the Company, the operation of Weibo business was carried out by various subsidiaries and variable interest entities (“VIE”) of SINA (the “Predecessor Operations”). After its establishment, the Company gradually completed the reorganization steps as described below (the “Reorganization”).

Establishment of Weibo Corporation. Weibo Corporation, an exempted company with limited liability, is the holding company for the Weibo business. Weibo HK is a wholly owned subsidiary of Weibo, and Weibo Technology, a wholly foreign-owned enterprise (“the WFOE”), is a subsidiary of Weibo HK. The Company’s VIE and VIE’s subsidiaries are controlled by the WFOE through a series of contractual agreements. Weibo Corporation, its subsidiaries, VIE and VIE’s subsidiaries together are referred to as “the Group.”

The following sets forth the Company’s major subsidiaries, VIE and VIE’s subsidiary:

Table of Contents

Transfer of assets and liabilities relating to the Weibo business to the Group. According to the Company’s Shareholder Agreement dated April 29, 2013, the Group shall be liable for a loan payable to SINA for assets and liabilities incurred by SINA for the development of the Weibo business. The interest on the loan to SINA is calculated based on actual spending incurred by SINA for the development of Weibo business at each period end. The interest was calculated at prevailing market interest rates by reference to the three-month time deposit rate of The People’s Bank of China, which ranged from 2.55% to 3.05%. The loans are repayable upon demand. There is no written loan agreement signed between SINA and Weibo. In 2014 after the IPO, the Group paid $276.6 million to SINA to settle the loan and the related interest expenses with SINA. The unsettled payables generated after the IPO are interest free and payable on demand. The interest expenses incurred was $2.8 million, nil and nil for the years ended December 31, 2014, 2015 and 2016, respectively.

Transfer of Equity Interest in Weibo Funds. SINA held a 55% and 85% equity interest in two limited liability partnerships, (“Weibo Funds”), since 2011 and 2013, respectively, and had control over the operations and assets of the Weibo Funds, which engage in the investment of high-tech startups related to the Weibo business. On June 30, 2015, SINA transferred its equity interest in the Weibo Funds to the Group for a consideration of $22.0 million, and the Group accounted for such transaction as a business combination between entities under common control (Note 6). The Group’s consolidated financial statements presented for prior periods have been retrospectively adjusted to reflect the transfer from the first day SINA took control.

The amounts recognized in the Group’s consolidated financial statements reflect the assets, liabilities, and net equity of the Weibo Funds at SINA’s historical carrying value. A consideration of $22.0 million payable to SINA was recognized when the transfer became legally effective in June 2015.

Intellectual Property License Agreement. The intellectual property license agreement was entered into by and between SINA and the Company in April 2013. Under this agreement, SINA granted the Company and its subsidiaries a perpetual, worldwide, royalty-free, fully paid-up, non-sublicensable, non-transferable, limited, exclusive license of certain trademarks and a non-exclusive license of certain other intellectual property owned by SINA to make, sell, offer to sell and distribute products, services and applications on a microblogging and social networking platform. The Company granted SINA and its affiliates a non-exclusive, perpetual, worldwide, non-sublicensable, non-transferable limited license of certain of the Company’s intellectual property to use, reproduce, modify, prepare derivative works of, perform, display or otherwise exploit such intellectual property. This agreement commenced on April 29, 2013 and will continue to be in effect unless terminated by SINA should the Company breach the terms as provided in the agreement.
Basis of Presentation for the Reorganization. Since the Group and the Predecessor Operations are under common control, the accompanying consolidated financial statements include the assets, liabilities, revenue, expenses and cash flows that were directly attributable to the Predecessor Operations for all periods presented. The assets and liabilities have been stated at historical carrying amounts. In addition, the accompanying consolidated financial statements have been prepared as if the current corporate structure, including the transfer of Weibo Funds in June 2015, had been in existence throughout the periods presented.

Only those assets and liabilities that are specifically identifiable to Weibo business are included in the Group’s consolidated balance sheets. Accounts receivable amounts directly related to Weibo but for which SINA will receive payments and remit payments to the Group are included in the amount due from SINA. Liabilities directly related to Weibo but for which SINA will make payments and receive reimbursements from the Group are included in the amount due to SINA. The Group was liable for a payable to SINA for assets and liabilities incurred by SINA for the development of the Weibo business and presented as amount due to SINA in the consolidated balance sheets. Loan from SINA is presented under cash flow from financing activities in the consolidated statements of cash flows, whereas cash payment for billings from SINA for costs and expenses allocated is presented under operating activities. The Group’s statements of comprehensive income (loss) consists all the related costs and expenses of the Weibo business, including allocation to the cost of revenues, sales and marketing expenses, product development expenses, and general and administrative expenses, which are incurred by SINA but related to the Weibo business. These allocations were based on proportional cost allocation by considering proportion of the revenues, infrastructure usage metrics and labor usage metrics, among other things, attributable to the Group and are made on a basis considered reasonable by management. Income tax liability is calculated based on a separate return basis as if the Group had filed a separate tax return.

Total cost and expenses allocated from SINA were as follows:

However, while the expenses allocated to the Group for these items are not necessarily indicative of the expenses that would have been incurred if the Group had been a separate and independent entity, the Company does not believe that there is any significant difference between the nature and amount of these allocated expenses and the expenses that would have been incurred if the Group had been a separate and stand-alone entity.

Table of Contents

Consolidation

The consolidated financial statements include the accounts of the Company, its wholly-owned subsidiaries, VIE, of which the Company is the primary beneficiary, VIE’s subsidiaries, and the Weibo Funds, which were purchased from SINA in June 2015. In accordance with ASC Subtopic 805-50, the transfer of the Weibo Funds was accounted for as a business combination between entities under common control. The consolidated financial statements of the Group presented for prior periods were retrospectively adjusted to reflect the transfer on a consolidated basis from the first day SINA took control of the Weibo Funds.

To comply with PRC laws and regulations, the Group provides a substantial amount of its services in China via the VIE, which holds critical operating licenses that enable the Group to do business in China. Most of the Group’s revenues, costs and net income (loss) in China were generated directly or indirectly through the VIE or the Predecessor Operations. The Company, through its subsidiary, has signed various agreements with the VIE to allow the transfer of economic benefits from the VIE to the Company. The Group has determined that it is the primary beneficiary of the VIE through Weibo Technology’s contractual arrangements with the VIE. Accordingly, the Company has consolidated the VIE’s results of operations and assets and liabilities in the Group’s financial statements pursuant to the United States Generally Accepted Accounting Principles (“US GAAP”) for all the periods presented.

Shareholders of the VIE are certain nominee shareholders of the Company or SINA. The capital for their investments in the VIE is funded by the Company and recorded as interest-free loans to these individuals. These loans were eliminated with the capital of the VIE during consolidation. Each shareholder of the VIE has agreed to transfer his equity interest in the VIE to Weibo Technology when permitted by PRC laws and regulations or to designees of the Company at any time for the amount of loans outstanding. All voting rights of the VIE, including without limitation the right to appoint all directors of the VIE, have been assigned to Weibo Technology. Weibo Technology has also entered into exclusive technical service agreements with the VIE under which Weibo Technology provides technical and other services to the VIE in exchange for substantially all net income of the VIE. In addition, the shareholders of the VIE have pledged their shares in the VIE as collateral for the non-payment of loans or for the technical and other services fees due to Weibo Technology. As of December 31, 2015 and 2016, the total amount of interest-free loans to the VIE’s shareholders was $10.0 million and $9.4 million, respectively and the aggregate accumulated loss of the VIE and VIE’s subsidiaries was $32.8 million and $54.5 million, respectively, which were included in the Group’s consolidated financial statements.

Table of Contents

The following table sets forth the assets, liabilities, results of operations and cash flows of the VIE and VIE’s subsidiaries taken as a whole, including the Predecessor Operations, which are included in the Group’s consolidated balance sheets and statements of comprehensive income (loss):

<table>

Under the contractual arrangements with the VIE, the Company has the power to direct activities of the VIE through Weibo Technology and can have assets transferred freely out of the VIE without restrictions. Therefore, the Company considers that there is no asset of the VIE that can only be used to settle obligations of the VIE and VIE’s subsidiaries, except for the registered capital and non-distributable reserve funds of the VIE and VIE’s subsidiaries, amounting to $51.9 million and $56.2 million as of December 31, 2015 and 2016, respectively. Since the VIE is incorporated as limited liability company under the PRC Company Law, creditors of the VIE do not have recourse to the general credit of the Company. There is currently no contractual arrangement that would require the Company to provide additional financial support to the VIE. As the Company is conducting certain businesses mainly through the VIE, the Company may provide such support on a discretionary basis in the future, which could expose the Company to a loss. The total amount of costs and expenses allocated from SINA to the VIE was $16.1 million, $8.4 million and $12.3 million for the years ended December 31, 2014, 2015 and 2016, respectively. Since the VIE is a wholly owned subsidiary of SINA, creditors of the VIE do not have recourse to the general credit of the Company. There is currently no contractual arrangement that would require the Company to provide additional financial support to the VIE. As the Company is conducting certain businesses mainly through the VIE, the Company may provide such support on a discretionary basis in the future, which could expose the Company to a loss. The total amount of costs and expenses allocated from SINA to the VIE was $16.1 million, $8.4 million and $12.3 million for the years ended December 31, 2014, 2015 and 2016, respectively.

Unrecognized revenue-producing assets held by the VIE include the Internet Content Provision License, the Online Culture Operating Permit, and the domain names of Weibo.com, Weibo.cn and Weibo.com.cn. Recognized revenue-producing assets held by the VIE include customer lists relating to game-related services, game platform technology and a non-compete agreement, which were acquired mostly through acquisitions. Unrecognized revenue-producing assets, including customer lists relating to advertising and marketing services, game-related services, VIP membership and data licensing, as well as trademarks, are also held by Weibo Technology.

Table of Contents

The following is a summary of the VIE agreements:

Loan Agreements. The Company’s wholly owned subsidiary Weibo Technology has granted interest-free loans to each shareholder of the VIE with the sole purpose of providing funds necessary for capital injection into the VIE. The terms of the loans are for 10 years, and Weibo Technology has the right to, at its own discretion, shorten or extend the terms of the loans, if necessary. These loans were eliminated with the capital of the VIE during consolidation.

Share Transfer Agreements. Each shareholder of the VIE has granted Weibo Technology an option to purchase his shares in the VIE at a purchase price equal to the amount of the capital injection. Weibo Technology may exercise such option at any time until it has acquired all of the shares of the VIE, subject to applicable PRC laws. The option will be effective until the earlier of (i) the shareholders of the VIE and Weibo Technology have fully performed their obligations under this agreement, and (ii) the respective shareholders of the VIE and Weibo Technology agree to terminate the share transfer agreement in writing.

Loan Repayment Agreements. Each shareholder of the VIE has agreed with Weibo Technology that the interest-free loans under the loan agreements shall only be repaid through share transfer. Once the share transfers are completed, the purchase price for the share transfer will be set off against the loan repayment.

Agreements on Authorization to Exercise Shareholder’s Voting Power. Each shareholder of the VIE has authorized Weibo Technology to exercise all his voting power as a shareholder of the VIE on all matters requiring shareholders’ approval under PRC laws and regulations and the articles of association of

F-11
the VIE, including without limitation to the appointment of directors, transfer, mortgage or dispose of the VIE’s assets, transfer of any equity interest in the VIE, and merger, split, dissolution and liquidation of the VIE. The authorizations are irrevocable and will not expire until the VIE dissolves.

Share Pledge Agreements. Each shareholder of the VIE has pledged all of his shares in the VIE and all other rights relevant to the share rights to Weibo Technology, as a collateral security for his obligations to pay off all debts to Weibo Technology, under the loan agreement and for the payment obligations of the VIE under the trademark license agreement and the technical services agreement. In the event of default of any payment obligations, Weibo Technology will be entitled to certain rights, including transferring the pledged shares to itself and disposing the pledged shares through sale or auction. During the term of each agreement, Weibo Technology is entitled to receive all dividends and distributions paid on the pledged shares. The pledges will be effective until the earlier of (i) the VIE and the shareholders of the VIE have fully performed their obligations under the above-referred agreements, and (ii) Weibo Technology unilaterally consents to terminate the respective share pledge agreement.

Exclusive Technical Services Agreement, Exclusive Sales Agency Agreement and Trademark License Agreement. The VIE has entered into an exclusive technical services agreement, an exclusive sales agency agreement and a trademark license agreement with Weibo Technology. Under the exclusive technical services agreement, Weibo Technology is engaged to provide technical services for the VIE’s online advertising and other related businesses. Under the exclusive sales agency agreement, the VIE has granted Weibo Technology the exclusive right to distribute, sell and provide agency services for all the products and services provided by the VIE. The term of the technical service agreement and the sales agency agreement will not expire until the VIE dissolves.

Table of Contents

Due to its control over the VIE, Weibo Technology has the right to determine the service fee to be charged to the VIE under these agreements. By considering, among other things, the technical complexity of the service, the actual cost that may be incurred for providing such service, the operations of the VIE, applicable tax rates, planned capital expenditure and business strategies. Weibo Technology charged an amount of $187.8 million, $232.4 million and $335.6 million in service fees from the VIE under these agreements for the years ended December 31, 2014, 2015 and 2016, respectively, which was determined based on the actual cost incurred for providing such service and the cash position and operation of the VIE.

Under the trademark license agreement, Weibo Technology has granted the VIE trademark licenses to use its trademarks for specific areas, and the VIE is obligated to pay license fees to Weibo Technology. The term of the agreement is for one year and is automatically renewed provided that there is no objection from Weibo Technology.

The Company believes that the contractual arrangements among its subsidiary, VIE and VIE’s shareholders are in compliance with the current PRC laws and legally enforceable. However, uncertainties in the interpretation and enforcement of the PRC laws, regulations and policies could limit the Company’s ability to enforce these contractual arrangements. As a result, the Company may be unable to consolidate the VIE and VIE’s subsidiaries in the consolidated financial statements. The Company’s ability to control the VIE also depends on the authorization by the shareholders of the VIE to exercise voting rights on all matters requiring shareholder approval in the VIE. The Company believes that the agreements on authorization to exercise shareholder’s voting power are legally enforceable. In addition, if the legal structure and contractual arrangements with the VIE were found to be in violation of any future PRC laws and regulations, the Company may be subject to fines or other actions. The Company believes the possibility that it will no longer be able to control and consolidate the VIE will occur as a result of the aforementioned risks and uncertainties are remote.

Use of estimates

Advertising and marketing revenues

Advertising and marketing revenues are derived principally from online advertising, including social display ads and promoted marketing. Social display ad arrangements allow customers to place advertisements on particular areas of the Group’s platform in particular formats and over particular periods of time, which is typically no more than three months. The Group enters into cost per mille ("CPM"), or cost per thousand impressions, advertising arrangements with the customers, under which the Group recognizes revenues based on the number of times that the advertisement has been displayed. The
Promoted marketing arrangements are primarily priced based on CPM or cost per engagement (“CPE”). An engagement may include when a user clicks on a link, becomes a follower of the marketing customer account, shares the promoted feed or marks the feed as a favorite. Under the CPM model, customers are obligated to pay when the advertisement is displayed, while under the CPE model, customers are obligated to pay based on the number of engagements with the promoted feed.

Revenues are recognized only when the following criteria have been met: (1) persuasive evidence of an arrangement exists; (2) the price is fixed or determinable; (3) the service is performed; and (4) collectability of the related fee is reasonably assured. The majority of the Group’s revenue transactions are based on standard business terms and conditions, which are recognized net of agency rebates. Advertising arrangements involving multiple deliverables are broken down into single-element arrangements based on their relative selling price for revenue recognition purposes. For multiple-deliverable revenue arrangements, it is required that the arrangement consideration be allocated to all deliverables at the inception of the arrangement on the following basis: (a) vendor-specific objective evidence (VSOE) of selling price, if it exists, otherwise, (b) third-party evidence (TPE) of the selling price. If neither (a) nor (b) exists, then use (c) management’s best estimate of the selling price of the deliverable. The Group primarily uses VSOE to allocate the arrangement consideration if such selling price is available. For the deliverables that have not been sold separately, the best estimate of the selling price (BESP) is used, which has taken into consideration of the pricing of advertising areas of the Group’s platform with similar popularity and advertising with similar format and quoted prices from competitors and other market conditions. Revenues recognized with reference to BESP were immaterial for all periods presented.

Revenues from barter transactions are recognized during the period in which the advertisements are displayed on the Group’s properties. Barter transactions in which physical goods or services (other than advertising services) are received in exchange for advertising services are recorded based on the fair values of the goods or services received. Revenues from barter transactions were immaterial for all periods presented.

Other revenues

The Group generates other revenues principally from fee-based services, including game-related services, VIP membership and data licensing. Revenues from these services are recognized over the periods in which the services are performed, provided that no significant obligations remain, collection of the receivable is reasonably assured and the amounts can be accurately estimated.

Table of Contents

Game-related services. Game-related service revenues are mostly generated from the sale of virtual items from games operated by the Group. The Group collects payments from the game players in connection with the sale of virtual currency, which are converted into in-game credits (game tokens) that can be used to purchase virtual items in the third-party developed games. The Group remits certain predetermined percentages of the proceeds to the game developers when the virtual currency is converted into in-game credits.

The Group has determined that the game developers are the primary obligors for the game-related service given that the game developers are responsible for developing, maintaining and updating the game related services and have reasonable latitude to establish the prices of virtual items for which in-game credits are used. The Group views the game developers to be its customers, and the Group’s primary responsibility is to promote the games of the developers, provide virtual currency exchange service, maintain the platform for game players to easily access the games and offer customer support to resolve registration, log-in, currency exchange and other related issues. Accordingly, the Group records game-related revenue, net of predetermined revenue sharing with the game developers.

Virtual currencies in general are not refundable once they have been sold unless there are unused in-game credits at the time a game is discontinued. Sale of virtual currencies net of the game developer proceeds are recognized as revenues over the estimated consumption period of in-game virtual items, which is typically from a few days to one month after the purchase of in-game credits.

VIP membership. VIP membership is a service package consisting of user certification and preferential benefits, such as daily priority listings and higher quota for following user accounts. Prepaid VIP membership fees are recorded as deferred revenue and recognized as revenue ratably over the contract period of the membership service.

Data licensing. The Group began to offer data licensing arrangements that allow its customers to access, search and analyze historical and real-time data on its platform. The data licensing arrangement is for a fixed period, typically one year, and such revenue is recognized ratably over the contract period.

Cost of revenues

Cost of revenues consists mainly of costs associated with the maintenance of platform, which primarily include bandwidth and other infrastructure costs, labor cost and turnover taxes levied on the revenues, part of which were allocated from SINA (see Note 1 Reorganization). The Group presents taxes assessed by a governmental authority that are both imposed on and concurrent with a specific revenue-producing transaction on a gross basis in the financial statements. The Group is subject to 6.7% Value-Added Tax (“VAT”) and surcharges for its revenues and an additional 3% cultural business construction fees for its advertising and marketing revenues. The total amount of such taxes on its advertising and marketing revenues for the years ended December 31, 2014, 2015 and 2016 were $23.2 million, $35.3 million and $49.9 million, respectively.

Sales and Marketing Expenses

Sales and marketing expenses consist mainly of online and offline advertising and promotional expenses, salary, benefits and commission expenses, and facility expenses. Advertising and promotional expenses generally represent the expenses of promotions of corporate image and product marketing. The Group expenses all advertising and promotional expenses as incurred and classifies these expenses under sales and marketing expenses. For the years ended December 31, 2014, 2015 and 2016, the advertising and promotional expenses were $71.0 million, $81.2 million and $92.2 million, respectively.

Product development expenses
Product development expenses consist mainly of payroll-related expenses and infrastructure costs incurred for enhancement to and maintenance of the Group’s platform, as well as costs associated with new product development and product enhancements, part of which were allocated from SINA (see Note 1 Reorganization). The Group expenses all costs incurred for the planning and post implementation phases of development and costs associated with repair or maintenance of the existing site or the development of platform content. Since inception, the amount of costs qualifying for capitalization has been immaterial and, as a result, all product development costs have been expensed as incurred.

Stock-based compensation

All stock-based awards to employees and directors, such as stock options and restricted share units (“RSUs”), are measured at the grant date based on the fair value of the awards. Stock-based compensation, net of forfeitures, is recognized as expenses on a straight-line basis over the requisite service period, which is the vesting period.

The Group uses the Black-Scholes option pricing model to estimate the fair value of stock options. The determination of estimated fair value of stock-based payment awards on the grant date using an option pricing model is affected by the fair value of the Company’s ordinary shares as well as assumptions regarding a number of complex and subjective variables. These variables include the expected value volatility of the Company over the expected term of the awards, actual and projected employee stock option exercise behaviors, a risk-free interest rate and expected dividends, if any. Options granted generally vest over four years.

Table of Contents

The Group recognizes the estimated compensation cost of restricted share units based on the fair value of its ordinary shares on the date of the grant. The Group recognizes the compensation cost, net of estimated forfeitures, over a vesting term of generally four years for service-based restricted share units. The Group also recognizes the compensation cost of performance-based restricted share units, net of estimated forfeitures, according to the probability of performance goal achievement at the end of each reporting period.

Forfeitures are estimated at the time of grant and revised in subsequent periods if actual forfeitures differ from those estimates. The Group uses historical data to estimate pre-vesting option and records stock-based compensation expense only for those awards that are expected to vest. See Note 7 Stock-based Compensation for further discussion on stock-based compensation.

Taxation

Income taxes

Income taxes are accounted for using the asset and liability approach. Under this approach, income tax expense is recognized for the amount of taxes payable or refundable for the current year. In addition, deferred tax assets and liabilities are recognized for expected future tax consequences of temporary differences between the financial reporting and tax bases of assets and liabilities, and for operating losses and tax credit carry forwards. The Group records a valuation allowance to reduce deferred tax assets to an amount for which realization is more likely than not. Income tax liability is calculated based on a separate return basis as if the Group had filed separate tax returns before the Reorganization.

Uncertain tax positions. To assess uncertain tax positions, the Group applies a more likely than not threshold and a two-step approach for the tax position measurement and financial statement recognition. Under the two-step approach, the first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates that it is more likely than not that the position will be sustained, including resolution of related appeals or litigation processes, if any. The second step is to measure the tax benefit as the largest amount that is more than 50% likely of being realized upon settlement.

Operating leases

The Group leases office space under operating lease agreements with initial lease terms ranging from one to five and a half years. Rental expense is recognized from the date of initial possession of the leased property on a straight-line basis over the term of the lease, part of which were allocated from SINA (see Note 1 Reorganization). Certain lease agreements contain rent holidays, which are recognized on a straight-line basis over the lease term. Lease renewal periods are considered on a lease-by-lease basis and are generally not included in the initial lease terms. The allocated rental expenses from SINA for the years ended December 31, 2014, 2015 and 2016, were $4.0 million, $3.5 million and $3.9 million, respectively.

Cash equivalents

The Group considers all highly liquid investments with original maturities of three months or less as cash equivalents. Cash equivalents are comprised of investments in time deposits stated at cost plus accrued interest.

Accounts receivable and allowances for doubtful accounts

Accounts receivable are recorded and carried at the original invoiced amount less an allowance for any potential uncollectible amounts. The Group maintains an allowance for doubtful accounts which reflects its best estimate of amounts that will not be collected. The Group determines the allowance for doubtful accounts based on a historical, rolling average, bad debt rate in the prior period and other factors, such as credit-worthiness of the customers and the age of the receivable balances. The Group also provides specific provisions for bad debts when facts and circumstances indicate that the receivable is unlikely to be collected. If the financial condition of the Group’s customers were to deteriorate, resulting in an impairment of their ability to make payments, more bad debt allowances may be required.

Fair value measurements

Financial instruments
All financial assets and liabilities are recognized or disclosed at fair value in the consolidated financial statements on a recurring basis. Accounting guidance defines fair value as the price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When determining the fair value measurements for assets and liabilities required or permitted to be recorded at fair value, the Group considers the principal or most advantageous market in which it would transact and it considers assumptions that market participants would use when pricing the asset or liability.

F-16

Table of Contents

Accounting guidance establishes a fair value hierarchy that requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. A financial instrument’s categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement. Accounting guidance establishes three levels of inputs that may be used to measure fair value:

- Level 1 applies to assets or liabilities for which there are quoted prices in active markets for identical assets or liabilities.
- Level 2 applies to assets or liabilities for which there are inputs other than quoted prices included within Level 1 that are observable for the asset or liability such as quoted prices for similar assets or liabilities in active markets; quoted prices for identical asset or liabilities in markets with insufficient volume or infrequent transactions (less active markets); or model-derived valuations in which significant inputs are observable or can be derived principally from, or corroborated by, observable market data.
- Level 3 applies to asset or liabilities for which there are unobservable inputs to the valuation methodology that are significant to the measurement of the fair value of the assets or liabilities.

The carrying amount of cash and cash equivalents, short-term investments, accounts receivable due from third parties, accounts receivable due from Alibaba, accounts receivable due from other related parties, amount due from/to SINA, accounts payable, accrued and other liabilities approximates fair value because of their short-term nature. See Note 15 Financial Instruments for additional information.

Long-term investments

Long-term investments are comprised of investments in publicly traded and privately held companies. For long-term investments over which the Group does not have significant influence, the cost method of accounting is used. For long-term investments in shares that are not common stock or in-substance common stock and that do not have readily determinable fair value, the cost method accounting is used. The Group uses the equity method to account for ordinary-share-equivalent equity investments over which it has significant influence but does not own a majority equity interest or otherwise control.

The Group monitors its investments accounted for under the cost method and equity method for other-than-temporary impairment by considering factors such as current economic and market conditions and the operating performance of the business, including current earnings trends, undiscounted cash flows, and other company-specific information, such as recent financing rounds. Determination of the fair value, particularly for investments in privately-held companies whose revenue model is unclear, requires significant judgment to determine appropriate estimates and assumptions. Changes in these estimates and assumptions could affect the calculation of the fair value of the investments and the determination of whether any identified impairment is other-than-temporary. If any impairment is considered other-than-temporary, the Group will write down the asset to its fair value and take the corresponding charge to the consolidated statements of comprehensive income (loss). The Group recorded a impairment charge of $2.5 million, $6.6 million and $31.6 million to the carrying value of long-term investments accounted for under the cost method and equity method for the years ended December 31, 2014, 2015 and 2016, respectively.

The Group invests in marketable equity securities to meet business objectives and intends to hold the securities for more than a year from the balance sheet date. These marketable securities are reported at fair value, classified and accounted for as available-for-sale (“AFS”) securities under long-term investments. The treatment of a decline in the fair value of an individual security is based on whether the decline is other-than-temporary. The Group assesses its available-for-sale securities for other-than-temporary impairment by considering factors including, but not limited to, its ability and intent to hold the individual security, severity of the impairment, expected duration of the impairment and forecasted recovery of fair value. Investments classified as available-for-sale securities are reported at fair value with unrealized gains or losses, if any, recorded in accumulated other comprehensive loss in shareholders’ equity. If the Group determines a decline in fair value is other-than-temporary, the cost basis of the individual security is written down to fair value as a new cost basis and the amount of unrealized loss recorded in accumulated other comprehensive loss will be reclassified to net income (loss) in the consolidated statements of comprehensive income (loss). The fair value of the investment would then become the new cost basis of the investment and is not adjusted for subsequent recoveries in fair value. The Group recorded an impairment charge of nil, nil and $4.8 million to AFS securities for the years ended December 31, 2014, 2015 and 2016, respectively.

Business combination

Business combinations are recorded using the purchase method of accounting, and the cost of an acquisition is measured as the aggregate of the fair values at the date of exchange of the assets given, liabilities incurred, and equity instruments issued as well as the contingent considerations and all contractual contingencies as of the acquisition date. The costs directly attributable to the acquisition are expensed as incurred. Identifiable assets, liabilities and contingent liabilities acquired or assumed are measured separately at their fair value as of the acquisition date, irrespective of the extent of any non-controlling interests. The excess of the (i) the total of consideration paid, fair value of the non-controlling interests and acquisition date fair value of any previously held equity interest in the subsidiary acquired over (ii) the fair value of the identifiable net assets of the subsidiary acquired is recorded as goodwill. If the consideration of acquisition is less than the fair value of the net assets of the subsidiary acquired, the difference is recognized directly in the consolidated statements of comprehensive income (loss).

F-17

Table of Contents

Long-lived assets

Level 1 applies to assets or liabilities for which there are quoted prices in active markets for identical assets or liabilities.

Level 2 applies to assets or liabilities for which there are inputs other than quoted prices included within Level 1 that are observable for the asset or liability such as quoted prices for similar assets or liabilities in active markets; quoted prices for identical asset or liabilities in markets with insufficient volume or infrequent transactions (less active markets); or model-derived valuations in which significant inputs are observable or can be derived principally from, or corroborated by, observable market data.

Level 3 applies to asset or liabilities for which there are unobservable inputs to the valuation methodology that are significant to the measurement of the fair value of the assets or liabilities.

The carrying amount of cash and cash equivalents, short-term investments, accounts receivable due from third parties, accounts receivable due from Alibaba, accounts receivable due from other related parties, amount due from/to SINA, accounts payable, accrued and other liabilities approximates fair value because of their short-term nature. See Note 15 Financial Instruments for additional information.

Long-term investments

Long-term investments are comprised of investments in publicly traded and privately held companies. For long-term investments over which the Group does not have significant influence, the cost method of accounting is used. For long-term investments in shares that are not common stock or in-substance common stock and that do not have readily determinable fair value, the cost method accounting is used. The Group uses the equity method to account for ordinary-share-equivalent equity investments over which it has significant influence but does not own a majority equity interest or otherwise control.

The Group monitors its investments accounted for under the cost method and equity method for other-than-temporary impairment by considering factors such as current economic and market conditions and the operating performance of the business, including current earnings trends, undiscounted cash flows, and other company-specific information, such as recent financing rounds. Determination of the fair value, particularly for investments in privately-held companies whose revenue model is unclear, requires significant judgment to determine appropriate estimates and assumptions. Changes in these estimates and assumptions could affect the calculation of the fair value of the investments and the determination of whether any identified impairment is other-than-temporary. If any impairment is considered other-than-temporary, the Group will write down the asset to its fair value and take the corresponding charge to the consolidated statements of comprehensive income (loss). The Group recorded an impairment charge of $2.5 million, $6.6 million and $31.6 million to the carrying value of long-term investments accounted for under the cost method and equity method for the years ended December 31, 2014, 2015 and 2016, respectively.

The Group invests in marketable equity securities to meet business objectives and intends to hold the securities for more than a year from the balance sheet date. These marketable securities are reported at fair value, classified and accounted for as available-for-sale (“AFS”) securities under long-term investments. The treatment of a decline in the fair value of an individual security is based on whether the decline is other-than-temporary. The Group assesses its available-for-sale securities for other-than-temporary impairment by considering factors including, but not limited to, its ability and intent to hold the individual security, severity of the impairment, expected duration of the impairment and forecasted recovery of fair value. Investments classified as available-for-sale securities are reported at fair value with unrealized gains or losses, if any, recorded in accumulated other comprehensive loss in shareholders’ equity. If the Group determines a decline in fair value is other-than-temporary, the cost basis of the individual security is written down to fair value as a new cost basis and the amount of unrealized loss recorded in accumulated other comprehensive loss will be reclassified to net income (loss) in the consolidated statements of comprehensive income (loss). The fair value of the investment would then become the new cost basis of the investment and is not adjusted for subsequent recoveries in fair value. The Group recorded an impairment charge of nil, nil and $4.8 million to AFS securities for the years ended December 31, 2014, 2015 and 2016, respectively.

Business combination

Business combinations are recorded using the purchase method of accounting, and the cost of an acquisition is measured as the aggregate of the fair values at the date of exchange of the assets given, liabilities incurred, and equity instruments issued as well as the contingent considerations and all contractual contingencies as of the acquisition date. The costs directly attributable to the acquisition are expensed as incurred. Identifiable assets, liabilities and contingent liabilities acquired or assumed are measured separately at their fair value as of the acquisition date, irrespective of the extent of any non-controlling interests. The excess of the (i) the total of consideration paid, fair value of the non-controlling interests and acquisition date fair value of any previously held equity interest in the subsidiary acquired over (ii) the fair value of the identifiable net assets of the subsidiary acquired is recorded as goodwill. If the consideration of acquisition is less than the fair value of the net assets of the subsidiary acquired, the difference is recognized directly in the consolidated statements of comprehensive income (loss).
Property and equipment are stated at cost less accumulated depreciation, amortization and impairment, if any. Depreciation is computed using the straight-line method over the estimated useful lives of the assets, generally from three to four years for computers and equipment and five years for furniture and fixtures. Leasehold improvements are amortized over the shorter of the estimated useful lives of the assets or the remaining lease term. Depreciation expenses were $21.8 million, $19.5 million and $13.3 million for the years ended December 31, 2014, 2015 and 2016, respectively.

Goodwill

Goodwill represents the excess of the purchase price over the fair value of the identifiable assets and liabilities acquired as a result of the Group’s acquisitions of interests in its subsidiaries and consolidated VIE. The Group assesses goodwill for impairment in accordance with ASC Subtopic 350-20 (“ASC 350-20”), Intangibles - Goodwill and Other: Goodwill, which requires that goodwill be tested for impairment at the reporting unit level at least annually and more frequently upon the occurrence of certain events, as defined by ASC 350-20. US GAAP provides the option to apply the qualitative assessment first and then the quantitative assessment, if necessary, or to apply the quantitative assessment directly. The qualitative approach starts the goodwill impairment test by assessing qualitative factors, which by taking into consideration of macroeconomics, overall financial performance, industry and market conditions and the share price of the Group, to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If so, the quantitative impairment test is performed; otherwise, no further testing is required. The quantitative impairment test consists of a comparison of the fair value of goodwill with its carrying value. For reporting units directly applying a quantitative assessment, the goodwill impairment test is quantitatively performed by comparing the fair values of those reporting units to their carrying amounts. The Group adopted the option to apply the qualitative approach to assess its goodwill on the relevant reporting units. Application of a goodwill impairment test requires significant management judgment, including the identification of reporting units, assigning assets and liabilities to reporting units, assigning goodwill to reporting units, and determining the fair value of each reporting unit. Judgment in estimating the fair value of reporting units includes estimating future cash flows, determining appropriate discount rates and making other assumptions. Changes in these estimates and assumptions could materially affect the determination of fair value for each reporting unit.

Intangible assets other than goodwill

Intangible assets arising from acquisitions are recognized at fair value upon acquisition and amortized on a straight-line basis over their estimated useful lives, generally from two to five years. Long-lived assets and certain identifiable intangible assets other than goodwill to be held and used are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. Determination of recoverability is based on an estimate of undiscounted future cash flows resulting from the use of the asset and its eventual disposition. Measurement of any impairment loss for long-lived assets and certain identifiable intangible assets that management expects to hold or use is based on the amount by which the carrying value exceeds the fair value of the asset. Judgment is used in estimating future cash flows, determining appropriate discount rates and making other assumptions. Changes in these estimates and assumptions could materially affect the determination of the asset’s fair value.

Foreign currency

The Company’s reporting currency and functional currency are the U.S. dollar. The Group’s operations in China and in international regions use their respective currencies as their functional currencies. The financial statements of these subsidiaries are translated into U.S. dollars using period-end rates of exchange for assets and liabilities and average rates of exchange in the period for revenues, costs and expenses. Translation gains and losses are recorded in accumulated other comprehensive income or loss as a component of shareholders’ equity. Translation gains or losses are not released to net income (loss) unless the associated net investment has been sold, liquidated, or substantially liquidated.

Foreign currency transactions denominated in currencies other than the functional currency are translated into the functional currency using the exchange rate prevailing on the transactions dates. Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency using the applicable exchange rates at the balance sheet dates. Net gains and losses resulting from foreign exchange transactions are included in interest and other income, net.

Foreign currency translation adjustments included in the Group’s consolidated statements of comprehensive income (loss) for the years ended December 31, 2014, 2015 and 2016 were loss of $1.5 million, $7.9 million and $18.9 million, respectively. Net foreign currency transaction gains or losses arise from transacting in a currency other than the functional currency of the entity and the amounts recorded were immaterial for each of the periods presented.
Net Income (loss) per share

Basic net income (loss) per share is computed using the weighted average number of ordinary shares outstanding during the period. Options and RSUs are not considered outstanding in computation of basic earnings per share. Diluted net income (loss) per share is computed using the weighted average number of ordinary shares and potential ordinary shares outstanding during the period under treasury stock method. Potential ordinary shares include options to purchase ordinary shares and RSUs, unless they were anti-dilutive. The computation of diluted net income (loss) per share does not assume conversion, exercise, or contingent issuance of securities that would have an anti-dilutive effect (i.e. an increase in earnings per share amounts or a decrease in loss per share amounts) on net income (loss) per share. The Group uses the two-class method to calculate net income (loss) per share as both classes share the same rights in dividends. Therefore, basic and diluted earnings per share are the same for both classes of ordinary shares.

Segment reporting

In accordance with ASC 280, Segment Reporting, the Group’s chief operating decision maker (“CODM”), the Chief Executive Officer, reviews the consolidated results when making decisions about allocating resources and assessing performance of the Group as a whole. The Group currently operates and manages its business in two principal business segments globally—advertising and marketing services and other services. Information regarding the business segments provided to the Group’s CODM is at the revenue level and the Group currently does not allocate operating costs or assets to its segments, as its CODM does not use such information to allocate resources or evaluate the performance of the operating segments. As the Group’s long-lived assets are substantially all located in the PRC and substantially the Group’s revenues are derived from within the PRC, no geographical information is presented.
In January 2016, the FASB issued updated guidance on financial instruments, ASU No. 2016-01, which intends to improve the recognition and measurement of financial instruments. This guidance will be effective beginning the first quarter of fiscal year 2018. The Group is currently evaluating the impact this new guidance will have on its consolidated financial statements.

In February 2016, the FASB issued a new standard on leases, ASU No. 2016-02, which requires that a lessee recognize the assets and liabilities that arise from operating leases. A lessee should recognize a liability to make lease payments (the lease liability) and a right-of-use representing its right to use the underlying asset for the lease term in the statements of financial position. For leases with a term of 12 months or less, a lessee is permitted to make an accounting policy election by class of underlying asset not to recognize lease assets and lease liabilities. In transition, lessees are required to recognize and measure leases at the beginning of the earliest period presented using a modified retrospective approach. This standard will be effective for the Group beginning the first quarter of fiscal year 2019. The Group is currently evaluating the impact that this new standard will have on its consolidated financial statements.

In March 2016, the FASB issued a new standard on stock compensation, ASU No. 2016-09, which simplifies several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. The standard will be effective for the Group beginning the first quarter of fiscal year 2017. The Group does not expect a significant impact on its consolidated financial statements from the new standard.

In August 2016, the FASB issued ASU No. 2016-15, which clarifies and includes specific guidance to address diversity in how certain cash receipts and cash payments are presented and classified in the statement of cash flows. The amendments will be effective beginning the first quarter of fiscal year 2018. Early adoption of the amendments is permitted. The amendments in this ASU should be applied using a retrospective transition method to each period presented. The Group will adopt the amendments in the fiscal year of 2018 and does not expect a significant impact on its consolidated financial statements from the new standard.

In January 2017, the FASB issued ASU No. 2017-01, which clarifies the definition of a business with the objective of adding guidance to assist entities with evaluating whether transactions should be accounted for as acquisitions or disposals of assets or businesses. The amendments will be effective beginning the first quarter of fiscal year 2018. Early adoption is permitted. The amendments should be applied prospectively on or after the effective date. No disclosures are required at transition. The Group is currently evaluating the impact this new standard will have on its consolidated financial statements.

In January 2017, the FASB issued ASU No. 2017-04, which simplifies the subsequent measurement of goodwill by eliminating Step 2 from the goodwill impairment test. Under the amendments, an entity should perform its annual, or interim, goodwill impairment test by comparing the fair value of a reporting unit with its carrying value, which eliminates the current requirement to calculate a goodwill impairment charge by comparing the implied fair value of goodwill with its carrying amount. The amendments will be effective beginning the first quarter of fiscal year 2020. Early adoption is permitted for interim or annual goodwill impairment tests performed on testing dates after January 1, 2017. The amendments should be applied on a prospective basis. The Group is currently evaluating the impact this new standard will have on its consolidated financial statements.

In February 2017, the FASB issued ASU No. 2017-05, which clarifies the scope of guidance on nonfinancial asset derecognition (ASC 610-20) as well as the accounting for partial sales of nonfinancial assets. The amendments will be effective beginning the first quarter of fiscal year 2018. Early adoption is permitted but must also early adopt the new revenue standard (ASC 606). The amendments should be applied on a full or modified retrospective basis. The Group currently anticipates adopting the new standard effective January 1, 2018, and is currently evaluating the impact this new standard will have on its consolidated financial statements.

### Table of Contents

3. **Investment by Alibaba**

On April 29, 2013 (“Transaction Date”), Alibaba Group Holding Limited (“Alibaba”) through its wholly owned subsidiary invested $585.8 million to purchase equity shares of the Company, representing an ownership interest of 18% on a fully diluted basis. The Company also granted an option to Alibaba to enable it to purchase additional equity shares and increase its ownership in Weibo up to 30% on a fully-diluted basis. The call option was to expire immediately upon the earlier of the consummation of (i) any sale of shares by Alibaba of more than 25%, determined in the aggregate with all prior sales, of the acquired shares and (ii) the full exercise of the call option. Alibaba had the right to exercise the option, in whole or in part, at any time, commencing on the Transaction Date and ending on the consummation of a qualified IPO of Weibo. The exercise price of the option was equal to the lower of (i) an amount that represents a 15% discount to the IPO offering price per ordinary share in a qualified IPO offering and (ii) a price per ordinary share that implies an equity valuation (exclusive of the purchase price to be paid by Alibaba for these ordinary shares) of $5.5 billion for the Company on a fully diluted basis.

In accordance with ASC Subtopic 815-10, the option was deemed legally detachable and separately exercisable from the preferred and ordinary shares and, thus, accounted for as a freestanding instrument. As the strike price of the call option may be adjusted by the occurrence of a qualified IPO of Weibo, if any, it is not considered indexed to Weibo’s own stock. Accordingly, the call option was recorded as an investor option liability and for the year ended December 31, 2014, $47.0 million of losses was recognized based on a subsequent change in fair value in the Group’s consolidated statements of comprehensive income (loss).

Alibaba fully exercised its option to increase its ownership in the Company to 30% on a fully diluted basis upon the IPO and acquired 29,990,778 Class A ordinary shares, which consists of (i) 21,067,300 shares acquired from SINA at a price that represents a 15% discount to the IPO price of the Company, (ii) 2,923,478 shares acquired from the Company at a price that represents a 15% discount to the IPO price through a concurrent private placement and (iii) 6,000,000 shares purchased from the Company at the IPO price. As part of a series of the transaction, the Company repurchased 2,923,478 ordinary shares from SINA with the US$42.2 million proceeds from the issuance of ordinary shares to Alibaba in the concurrent private placement. Among the acquired shares by Alibaba, 23,990,778 shares were purchased from SINA at a price representing 15% discount to its IPO price and 6,000,000 shares were purchased from the Company in the public offering at the IPO price. The discount of US$ 61.2 million borne by SINA on behalf of Weibo were considered as a deemed contribution from the shareholder. As Alibaba’s decision to waive the discount for the newly issued 6,000,000 Class A ordinary shares was motivated by its position as principle shareholder, the discount of US$15.3 million was also considered as a deemed contribution from the shareholder.
4. Cash, Cash Equivalents and Short-term Investments

Cash, cash equivalents and short-term investments consist of the following:

<table>
<thead>
<tr>
<th></th>
<th>As of December 31, 2015</th>
<th>2016</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Cash and cash equivalents:</strong></td>
<td></td>

</tbody>
</table>

As of December 31, 2015 and 2016, investments accounted for under the cost method were $281.7 and $390.3 million, respectively. Investments were accounted for under the cost method if the Group had no significant influence or if the underlying shares were not considered in substance ordinary shares and had no readily determinable fair value.

F-24
impairment charge of $4.8 million to net income, based on the severity and duration of the decline from the carrying value. As of December 31, 2015 and 2016, the fair value of the AFS investment was $12.8 million and $5.3 million, respectively.

The Group performs an impairment assessment on its investments and determines whether investment impairment, if any, is other-than-temporary based on changes in quoted market price or other impairment indicators. The Group recorded impairment charges of $2.5 million, $8.0 million, and $40.2 million on the carrying value of its long-term investments and prepayment for the years ended December 31, 2014, 2015 and 2016, respectively, as a result of the investments not performing to expectation or them becoming incapable of making repayment. The investment impairment in 2016 included a $19.0 million write-off on an online-to-offline business and a $10.5 million write-off on an employment-oriented social company.

Table of Contents

6. Acquisitions

In October 2014, the Group paid a consideration of $3.1 million to acquire an 84% equity interest in Shanghai Gametree Information Technology Co. Ltd., (“Gametree”), a game developer and began consolidating its financial results on October 1, 2014. The Group hired an independent valuation firm to assist management in valuing the equity interest acquired by the Group. Goodwill arising from this transaction primarily represents the expected synergies from combining the operations of game developer with the Group, which are complementary to each other. Total identifiable intangible assets acquired upon acquisition were the existing game technology amounting to $1.7 million, which have an estimated useful life of approximately 4.3 years. The acquired business is not material to the Group’s financial statements and, thus, a presentation of pro-forma financial information for the business combination is not required.

Consideration for the purchase was allocated on the acquisition date based on the fair value of the assets acquired and the liabilities assumed as follows:

<table>
<thead>
<tr>

</tbody>
</table>

On June 30, 2015, the Group acquired a 55% and 85% equity interest in two investment funds (“Weibo funds”) for a total cash consideration of $22.0 million from SINA. The Weibo funds engage in investing in high-tech startups related to the Weibo business. The Group engaged an independent valuation firm to assist management in its valuation of the purchase price allocation. Since Weibo and the Weibo Funds were controlled by SINA before and after the acquisition, the transaction was accounted for as a business combination between entities under common control. In accordance with ASC Subtopic 805-50, the Group’s consolidated financial statements included the acquired assets and liabilities of the Weibo Funds at their historical carrying amounts and were prepared as if the current corporate structure had been in place throughout the periods presented.

The following sets forth the changes in the Group’s goodwill by segment:

As of December 31, 2016, the Group performed a qualitative analysis on the goodwill arising from the acquisition taking into consideration the events and circumstances listed in ASC350 Intangibles—Goodwill and Other, including consideration of macroeconomic factors, industry and market conditions, share price of the Group, and overall financial performance, in addition to other entity-specific factors. Based on the analysis, the Group decided to perform a quantitative assessment of the business unit to which goodwill belonged as of December 31, 2016. The Group engaged an independent valuation firm to assist management in its assessment of goodwill impairment, which used the income approach along with assumptions on future growth rates and discount rate. Based on the valuation results, the fair value of the business unit was above its carrying amount as of December 31, 2016. Therefore, management concluded that there was no impairment of goodwill as of December 31, 2016.

As of December 31, 2016, the Group’s intangible assets totaled $1.1 million, mainly consisted of acquired game-related platform technology and a non-compete agreement. The amortization expense for the years ended December 31, 2014, 2015 and 2016 was $1.2 million, $1.5 million and $0.7 million, respectively. As of December 31, 2016, estimated amortization expenses for future periods are expected as follows:

<table>

7. Stock-Based Compensation

In August 2010, the Company adopted the 2010 Share Incentive Plan (the “2010 Plan”), which has a term of ten years and permits the grant of options, share appreciation rights, restricted shares and restricted share units of the Company to employees, directors and consultants of the Company and its affiliates. Under the plan, a total of 35 million ordinary shares were initially reserved for issuance. The maximum number of ordinary shares available for issuance will be reduced by one share for every one share issued pursuant to a share option or share appreciation right and by 1.75 share for every one share issued as restricted shares or pursuant to a restricted shares unit. In March 2014, the 2010 Plan was terminated and all remaining shares were forwarded to the 2014 Plan.

In March 2014, the Company adopted the 2014 Share Incentive Plan (the “2014 Plan”), which was funded by the remaining 4.6 million shares from the 2010 Plan plus an additional 1.0 million shares. On January 1, 2015, shares in the 2014 Plan, which have a term life of ten years, were allowed a one-time increase in the amount equal to 10% of the total number of Weibo shares issued and outstanding on a fully-diluted basis as of December 31, 2014. Each share in the 2014 Plan pool allows for a grant of a restricted share unit or option share. The Company intends to use such share incentive plan to attract and retain employee talent.

The following table sets forth the stock-based compensation included in each of the relevant accounts:

<table>
<thead>
<tr>
<th></th>
<th>Year Ended December 31,</th>

* In 2014, 3.0 million restricted share units and no options were granted under the 2014 Plan. In 2015, 4.9 million restricted share units and no options were granted under the 2014 Plan. In 2016, 1.9 million restricted share units and no options were granted under the 2014 Plan.
The total intrinsic value of options exercised for the years ended December 31, 2014, 2015 and 2016 was $65.7 million, $106.2 million and $129.3 million, respectively. The intrinsic value is calculated as the difference between the market value on the date of exercise and the exercise price of the shares. As reported by the NASDAQ Global Selected Market, the Company’s ending stock price as of December 31, 2014, 2015 and 2016 was $14.24, $19.50 and $40.60, respectively. Cash received from the exercise of stock option during the years ended December 31, 2014, 2015 and 2016 was $1.5 million, $7.8 million and $4.2 million, respectively.

As of December 31, 2015 and 2016, unrecognized compensation cost, related to non-vested stock options granted to the Group’s employees and directors was $3.9 million and $1.1 million, respectively. Total unrecognized compensation cost is expected to be recognized over a weighted-average period of 0.8 years and may be adjusted for future changes in estimated forfeitures.

As of December 31, 2016, unrecognized compensation cost, adjusted for estimated forfeitures and related to non-vested, service-based restricted share units granted to the Company’s employees and directors, was $76.8 million. This cost is expected to be recognized over a weighted-average period of 2.8 years. The total fair value based on the vesting date of the restricted share units vested was $2.7 million, $17.8 million and $33.5 million for the years ended December 31, 2014, 2015 and 2016, respectively.

* Weibo wallet enables users to conduct interest-generation activities on Weibo, such as handing out “red envelopes” and coupons to users and purchase different types of products and services on Weibo, including those offered by the Group, such as marketing services and VIP membership, and those offered by Weibo’s platform partners, such as e-commerce merchandises, financial products and virtual gifts. Amounts deposited by users primarily represent the receivables temporarily held in Weibo’s account on a third party online payment platform for Weibo wallet users. Amounts due to users represent the balances that are payable on demand to Weibo wallet users and therefore are reflected as current liability on the consolidated balance sheets.

** Include amounts due to third parties, employees, related parties and Weibo wallet users.

Table of Contents

9. Income Taxes

The Company is registered in the Cayman Islands and mainly operates in two taxable jurisdictions—the PRC and Hong Kong.

The Group’s income (loss) before income taxes is as follows:

<table>
<thead>
<tr>
<th></th>
<th>2014</th>
<th>2015</th>
<th>2016</th>
</tr>
</thead>
<tbody>
<tr>

<td>(11.0)%</td>
<td>4.0%</td>
<td>2.5%</td>
</tr>
</tbody>
</table>

The Company generated the majority of its operating income (loss) from PRC operations and has recorded income tax provision for the periods presented. Income tax liability is calculated based on a separate return basis, as if the Group had filed separate tax returns before the Reorganization. Stock-based compensation was recorded in the Company’s loss from non-China operations. Loss from non-China operations in 2014 included a loss of $47.0 million from the change in fair value of investor option liability and in 2016 included a loss of $23.8 million from investment impairments.

Cayman Islands

Under the current tax laws of the Cayman Islands, the Company is not subject to tax on income or capital gain. In addition, upon payments of dividends by the Company to its shareholders, no Cayman Islands withholding tax is required.

Hong Kong

Weibo HK is subject to taxes in Hong Kong at 16.5% for all the periods presented. As of December 31, 2016, the Company’s Hong Kong subsidiary had a net operating loss of $1.4 million, which can be carried forward indefinitely to offset future taxable income. Also as of December 31, 2016, deferred tax assets of Weibo HK consists mainly of net operating loss carried forward, for which a full valuation allowance was provided. Management believes it is more likely than not that these assets will not be realized in the future.

China

Effective January 1, 2008, the Enterprise Income Tax Law (the “EIT Law”) in China unifies the enterprise income tax rate for the entities incorporated in China at 25%, unless they are eligible for preferential tax treatment. On February 22, 2008, relevant governmental regulatory authorities released the qualification criteria, application procedures and assessment processes for “software enterprise,” which can enjoy an income tax exemption for two years beginning with its first profitable year and a 50% tax reduction, at a rate of 12.5% for the subsequent three years. The Group’s WFOE qualifies as a software enterprise and, thus, enjoyed an income tax exemption in 2015 and 2016, as the WFOE was profitable in both years.

The EIT Law also provides that an enterprise established under the laws of a foreign country or region but whose “de facto management body” is located in the PRC be treated as a resident enterprise for PRC tax purposes and consequently be subject to the PRC income tax at the rate of 25% for its global income. The Implementing Rules of the EIT Law merely define the location of the “de facto management body” as “the place where the exercising, in substance, of the overall management and control of the production and business operation, personnel, accounting, properties, etc., of a non-PRC company is located.” Based on a review of surrounding facts and circumstances, the Group does not believe that it is likely that its operations outside of the PRC be
considered a resident enterprise for PRC tax purposes. However, due to limited guidance and implementation history of the EIT Law, should Weibo be treated as a resident enterprise for PRC tax purposes, the Company will be subject to PRC tax on worldwide income at a uniform tax rate of 25% retroactive to January 1, 2008.

Table of Contents

The EIT Law also imposes a withholding income tax rate of 10% on dividends distributed by a WFOE to its immediate holding company outside of China, if such immediate holding company is considered as a non-resident enterprise without any establishment or place within China or if the received dividends have no connection with the establishment or place of such immediate holding company within China, unless such immediate holding company’s jurisdiction of incorporation has a tax treaty with China that provides for a different withholding arrangement. The Cayman Islands, where the Company incorporated, does not have such tax treaty with China. According to the arrangement between Mainland China and Hong Kong Special Administrative Region on the Avoidance of Double Taxation and Prevention of Fiscal Evasion in August 2006, dividends paid by a WFOE in China to its immediate holding company in Hong Kong will be subject to withholding tax at a rate of no more than 5% (if the foreign investor owns directly at least 25% of the shares of the WFOE). The State Administration of Taxation further promulgated Circular 601 on October 27, 2009, which provides that tax treaty benefits will be denied to “conduit” or shell companies without business substance and that a beneficial ownership analysis will be used based on a “substance-over-form” principle to determine whether or not to grant the tax treaty benefits.

The operations of the Group’s WFOE in China is invested and held by Weibo HK. If the Company is regarded as a non-resident enterprise and Weibo HK is regarded as a resident enterprise, then Weibo HK may be required to pay a 10% withholding tax on any dividends payable to the Company. If Weibo HK is regarded as a non-resident enterprise, then Weibo Technology may be required to pay a 5% withholding tax for any dividends payable to Weibo HK. However, it is still unclear at this stage whether Circular 601 applies to dividends from Weibo Technology paid to Weibo HK. If Weibo HK were not considered as “beneficial owners” of any dividends from Weibo Technology, the dividends payable to Weibo HK would be subject to a withholding tax of 10%. In accordance with accounting guidance, all undistributed earnings are presumed to be transferred to Weibo Corporation and are subject to the withholding taxes. The current policy approved by the Company’s board of directors allows the Group to distribute PRC earnings offshore only if the Group does not have to pay a dividend tax. As of December 31, 2016, the Group did not record any withholding tax for its PRC subsidiaries.

Composition of income tax expenses for China operations

The following table sets forth current and deferred portion of income tax expenses (benefits) of the Company’s China subsidiaries, VIE and VIE’s subsidiaries:

</tr>
</tbody>
</table>

Table of Contents

The provision for income taxes for the years ended December 31, 2014, 2015 and 2016 differs from the amounts computed by applying the statutory EIT rate primarily due to the utilization of the net operating loss of Weimeng, as it was in a profitable position in 2014, and the tax exemption of the WFOE, Weibo Technology, as a qualified software enterprise in 2015 and 2016. For the years ended December 31, 2015 and 2016, Weibo Technology was tax exempted for $15.7 million and $50.4 million, which resulted in an effect of $0.08 and $0.23, respectively, on basic net income per share.

Deferred tax assets and liabilities

The following table sets forth the significant components of deferred tax assets and liabilities for the Group:
Deferred tax liabilities:
- Acquired intangible assets: $477 - $274
- Depreciation: 295 - 362
- Others: 566 - 181

Total deferred tax liabilities: $1,338 - $817

Valuation allowance is provided against deferred tax assets when the Group determines that it is more likely than not that the deferred tax assets will not be utilized in the future. In making such determination, the Group considered factors including (i) future reversals of existing taxable temporary differences; (ii) future taxable income exclusive of reversing temporary differences and carry forwards; and (iii) tax planning strategies. The valuation allowance on deferred tax assets as of December 31, 2015 and 2016 was $44.7 million and $40.7 million, respectively. The change in valuation allowance was primarily due to bad debt expenses and investment impairment charges, as well as the expiration of net operating loss carry forward. Historically, deferred tax assets were valued using the statutory rate of 25%. As of December 31, 2015 and 2016, the Group had net operating loss carry forwards totaling $160.5 million and 129.3 million, respectively, for which full valuation allowance was provided. As of December 31, 2016, the net operating loss carry forwards will expire, if unused, in the year ending December 31, 2020 through December 31, 2021.

</tbody>
</table>

1. For the years ended December 31, 2014, 2015 and 2016, the Group billed $4.1 million, $22.1 million and $39.3 million, respectively, to third parties through SINA.

2. The $61.2 million in deemed contribution from SINA represents the discount borne by SINA upon the settlement of investor options in 2014 (see Note 3).

3. The $22.6 million relates to the amount paid by SINA for the Weibo Funds in 2014. (see Note1).

4. Costs and expenses allocated from SINA represented the charges for certain services provided by SINA’s affiliates and charged to the Company using actual cost allocation based on proportional utilization (see Note 1). In addition to the allocated costs and expenses, SINA also billed $15.1 million, $29.4 million, and $20.3 million for other costs and expenses associated with Weibo’s business in 2014, 2015, and 2016, respectively.

5. For the year ended December 31, 2014, the Company repaid approximately $276.6 million for a loan and related interests to SINA.

<table>

<td>$13,988</td>
</tr>
</tbody>
</table>

6. The $15.3 million represents the discount borne by Alibaba upon the settlement of investor options in 2014. (see Note 3)
On April 29, 2013, affiliated entities of SINA, including the Group’s subsidiary, entered into a strategic collaboration with affiliated entities of Alibaba to jointly explore social commerce and develop marketing solutions to enable merchants on Alibaba e-commerce platforms to better connect and build relationships with Weibo users. The strategic collaboration was entered into on a separate agreement from those relating to the investment in Weibo by Alibaba. For the years ended December 31, 2014 and 2015, the Group recorded advertising and marketing services revenue under the strategic collaboration with Alibaba amounting to $107.6 million and $137.4 million, respectively. The Group has continued to work with Alibaba in the area of social commerce and other areas after the expiration of the strategic collaboration agreement in January 2016. For the year ended December 31, 2016, the Group recorded $57.9 million in advertising and marketing services from Alibaba.

### Table of Contents

The following sets forth related party outstanding balance:

<table>
<thead>
<tr>
<th></th>
<th>As of December 31, 2015 (In thousands)</th>
<th>As of December 31, 2016 (In thousands)</th>

</tbody>
</table>

(7) The Group uses amount due from/to SINA to settle balances arising from cost and expenses allocated from SINA based on proportional utilization, other expenditures associated with the Weibo business paid by SINA and third-party customer and supplier balances settled through SINA.

For the years ended December 31, 2014, 2015 and 2016, advertising and marketing revenues generated from other related parties were $27.6 million, $29.2 million and $45.6 million, respectively, and other revenues from other related parties were $1.5 million, $2.1 million and $0.6 million, respectively. For the years ended December 31, 2014, 2015 and 2016, the Group received promotional services from other related parties amounting to approximately $11.2 million, $7.8 million and $10.6 million, respectively. As of December 31, 2015 and 2016, amount due from other related parties was $33.9 million and $30.1 million, respectively, and accrued and other liabilities due to other related parties were $8.0 million and $9.3 million, respectively.

### 11. Employee Benefit Plans

#### China Contribution Plan

The Company’s subsidiaries, VIE and VIE’s subsidiaries in China participate in a government-mandated, multi-employer, defined contribution plan, pursuant to which certain retirement, medical, housing and other welfare benefits are provided to employees. Chinese labor laws require the entities incorporated in China to pay to the local labor and welfare authorities a monthly contribution at a stated contribution rate based on the monthly basic compensation of qualified employees. The local labor bureau is responsible for meeting all retirement benefit obligations. The Group has no further commitments beyond its monthly contribution. For the years ended December 31, 2014, 2015 and 2016, the Group’s total contribution was $27.2 million, $29.7 million and $31.4 million, respectively.

### 12. Net Income (Loss) Per Share

Basic net income (loss) per share is computed using the weighted average number of the ordinary shares outstanding during the period. Options, RSUs and preferred shares are not considered outstanding in the computation of basic earnings per share (“EPS”). Diluted EPS is computed using the weighted average number of ordinary shares and potential ordinary shares outstanding during the period under the treasury stock method. For the year ended December 31, 2014, options to purchase ordinary shares and RSUs that were anti-dilutive and excluded from the calculation of diluted net loss per share were 17.8 million. For the years ended December 31, 2015 and 2016, options to purchase ordinary shares and RSUs of 9.8 million and 8.1 million, respectively, were recognized as dilutive factors and included in the calculation of diluted net income per share. For the years ended December 31, 2014, 2015 and 2016, the Group received promotional services from other related parties amounting to approximately $11.2 million, $7.8 million and $10.6 million, respectively. As of December 31, 2015 and 2016, amount due from other related parties was $33.9 million and $30.1 million, respectively, and accrued and other liabilities due to other related parties were $8.0 million and $9.3 million, respectively.

Diluted net income (loss) per share attributable to Weibo: $0.35, $0.16, $0.48

13. Segment Information

The Group currently operates and manages its business in two principal business segments globally—advertising and marketing services and other services. Information regarding the business segments provided to the Group’s chief operating decision makers (“CODM”), its Chief Executive Officer, is at the revenue level and the Group currently does not allocate operating costs or assets to its segments, as its CODM does not use such information to allocate resources or evaluate the performance of the operating segments. As substantially all of the Group’s revenues are derived from within the PRC and substantially all of the Group’s long-lived assets are located within the PRC, no geographical information is presented.

The following is a summary of the Group’s revenues:

<table>
<thead>
<tr>

<td>$570,982</td>
<td>$84,818</td>
<td>$655,800</td>
</tr>
</tbody>
</table>

14. Profit Appropriation and Restricted Net Assets

The Company’s subsidiaries, VIE and VIE’s subsidiaries in China are required to make appropriations to certain non-distributable reserve funds. In accordance with the laws applicable to China’s WFOE, its subsidiaries have to make appropriations from their after-tax profit (as determined under Generally Accepted Accounting Principles in the PRC (“PRC GAAP”) to non-distributable reserve funds including (i) general reserve fund, (ii) enterprise expansion fund and (iii) staff bonus and welfare fund. General reserve fund is at least 10% of the after-tax profits calculated in accordance with the PRC GAAP. Appropriation is not required if the reserve fund has reached 50% of the registered capital of the respective company. The appropriation of the other two reserve funds is at the Group’s discretion. At the same time, the Company’s VIE, in accordance with the China Company Laws, must make appropriations from their after-tax profit (as determined under the PRC GAAP) to non-distributable reserve funds including (i) statutory surplus fund, and (ii) discretionary surplus fund. Statutory surplus fund is at least 10% of the after-tax profits calculated in accordance with the PRC GAAP. Appropriation is not required if the reserve fund has reached 50% of the registered capital of the respective company.

General reserve fund and statutory surplus fund are restricted for set off against losses, expansion of production and operation or increase in registered capital of the respective company. These reserves are not transferable to the Company in the form of cash dividends, loans or advances. These reserves are therefore not available for distribution except in liquidation.

As of December 31, 2015 and 2016, the Group accrued approximately $7.1 million and $28.0 million in the reserve fund, as Weimeng and Weibo Technology were both profitable in 2015 and 2016.

Under the PRC laws and regulations, the subsidiaries, VIE and VIE’s subsidiaries incorporated in the PRC are restricted in their ability to transfer a portion of their net assets to the Group either in the form of dividends, loans or advances of the consolidated net assets. Even though the Group currently does not require any such dividends, loans or advances from the PRC subsidiaries and VIE for working capital and other funding purposes, the Group may in the future require additional cash resources from the PRC subsidiaries, VIE and VIE’s subsidiaries due to changes in business conditions, to fund future acquisitions and development, or merely declare and pay dividends to or distribution to its shareholders. Net assets subject to restriction for the Group amounted to $231.5 million, or 31% of the Group’s total consolidated net assets as of December 31, 2016.

15. Financial Instruments

Fair Value

The following table sets forth the financial instruments measured at fair value by level within the fair value hierarchy as of December 31, 2015 and 2016:

* Included in cash and cash equivalents and short-term investments on the Group’s consolidated balance sheets.

** Included in long-term investments on the Group’s consolidated balance sheets.

Recurring

The Group measures bank time deposits, available-for-sale securities and investor option liability at fair value on a recurring basis.

The fair value of the Group’s available-for-sale securities are determined based on the quoted market price (Level 1). The fair value of the Group’s bank time deposits are determined based on the quoted market price for similar products (Level 2). The investor option liability, which enables Alibaba to purchase additional ordinary shares and increase its ownership in Weibo up to 30% on a fully-diluted basis (see Note 1 Reorganization), is measured using significant unobservable inputs (Level 3) when determining its fair value.

The Group reviews its available-for-sale investments regularly to determine if an investment is other-than-temporarily impaired due to changes in quoted market price or other impairment indicators. For the years ended December 31, 2014, 2015 and 2016, impairment related to available-for-sale securities was nil, nil and $4.8 million, respectively (see Note 5 for further information).

Immediately prior to Alibaba’s exercise of the option, the fair value of investor option liability was $76.5 million. The option was fully exercised by Alibaba upon the Group’s IPO in April 2014. For the year ended December 31, 2014, a $47.0 million loss was recognized as subsequent change in fair value when marked to market in the Group’s consolidated statements of comprehensive income (loss).

Table of Contents

Non-recurring

The Group measures certain financial assets, including investments under the cost method and equity method, at fair value on a non-recurring basis only if an impairment charge is recognized.

The fair value of the Group’s privately held investments are determined using the income approach with unobservable inputs, such as the investee company’s historical financial results and assumptions about future growth rates, which require significant judgment to determine, and the market approach based on market participants’ price quote for the investment. As of December 31, 2015 and 2016, certain privately held investments under the cost method and equity method were measured using significant unobservable inputs (Level 3) and written down from their respective carrying value to a fair value of nil, with impairment charges incurred and recorded in earnings for the year then ended. The impairment charges related to these investments were $2.5 million, $8.0 million and $35.4 million for the years ended December 31, 2014, 2015 and 2016, respectively, (see Note 5 for further information). The fair value of the privately held investments was measured based on discounted cash flow with unobservable inputs including the discount curve of market interest rates, which ranged from 20% to 22%.

The Group’s non-financial assets, such as intangible assets, goodwill and fixed assets, are measured at fair value only if they were determined to be impaired. In accordance with the Group policy to perform an impairment assessment of its goodwill on an annual basis as of the balance sheet date or when facts and circumstances warrant a review, the Group performed an impairment assessment on its goodwill by reporting unit annually. The Group concluded that no write-down was warranted for the years ended December 31, 2014, 2015 and 2016, respectively.

16. Commitments and Contingencies

Operating lease commitments include the commitments under the lease agreements for the Group’s office premises. The Group leases its office facilities under non-cancelable operating leases with various expiration dates through 2018. For the year ended December 31, 2014, 2015 and 2016, lease expense was $14.9 million, $15.5 million and $14.4 million, respectively. Based on the current rental lease agreements, future minimum lease payments required as of December 31, 2016 was as follows:

<table>
<thead>
<tr>
<th>Operating lease commitments</th>
<th>Total</th>
<th>Less than One Year</th>
<th>One to Three Years</th>
<th>Three to Five Years</th>
<th>More than Five Years</th>
</tr>
</thead>
<tbody>
<tr>
<td>As of December 31, 2016:</td>
<td>$32,804</td>
<td>$7,217</td>
<td>$13,127</td>
<td>$12,460</td>
<td>—</td>
</tr>
</tbody>
</table>

Purchase commitments mainly include minimum commitments for internet connection and marketing activities.
There are uncertainties regarding the legal basis of the Group’s ability to operate an Internet business in China. Although China has implemented a wide range of market-oriented economic reforms, the telecommunication, information and media industries remain highly regulated. Not only are such restrictions currently in place, the existing regulations are unclear as to which specific segments of these industries companies with foreign investors, including us, may operate. Therefore, the Group may be required to limit the scope of its operations in China, and this could have a material adverse effect on its financial position, results of operations and cash flows.

There are no claims, lawsuits, investigations or proceedings, including unasserted claims that are probable to be assessed, that have in the recent past had, or to the Group’s knowledge, are reasonably possible to have, a material impact on the Group’s financial position results of operations or cash flow.

17. Subsequent Events

The Group has performed an evaluation of subsequent events through the date of this report, which is the date the financial statements were issued, with no other material events nor transactions needing recognition or disclosure found.

18. Additional Information—Condensed Financial Statements of Weibo Corporation

The condensed financial information of Weibo Corporation has been prepared in accordance with SEC Regulation S-X Rule 5-04 and Rule 12-04, using the same accounting policies as set out in the Group’s consolidated financial statements, except that the Company used the equity method to account for investment in its subsidiaries and VIE.

The operations of the Company, its subsidiaries and VIE were included in the consolidated financial statements, whereby the inter-company balances and transactions were eliminated upon consolidation. For the purpose of the Company’s stand-alone financial information, its investment in subsidiaries and VIE were reported using the equity method of accounting.

Relevant PRC statutory laws and regulations permit the payment of dividends by the Company’s PRC subsidiaries and VIE only out of their retained earnings, if any, as determined in accordance with PRC accounting standards and regulations. In addition, PRC laws and regulations require that annual appropriations of 10% of after-tax income should be set aside as a reserve prior to the payment of dividends. As a result of these PRC laws and regulations, the Company’s PRC subsidiaries and VIE are restricted in their ability to transfer a portion of their net assets to the Company, either in the form of dividends, loans or advances.

The footnote disclosures contain supplemental information relating to the operations of the Company and, as such, these statements should be read in conjunction with the notes to the consolidated financial statements of the Group. Certain information and footnote disclosures normally included in financial statements prepared in accordance with US GAAP have been condensed or omitted.

As of December 31, 2015 and 2016, there were no material contingencies, significant provisions for long-term obligations, or guarantees of the Group, except for those which have been separately disclosed in the consolidated financial statements, if any.

F-44
Loan Agreement

This agreement is signed and entered in by and between the following parties on [Execution Date] in Haidian District, Beijing.

Party A: [Name of Borrower] (hereinafter referred to as “the borrower”)
ID No.:

Party B: Weibo Internet Technology (China) Co., Ltd. (hereinafter referred to as “Weibo Technology”)
Address: Room 701, No. 10 Haidian North Second Street, Haidian District, Beijing

Whereas:

(1) The borrower intends to purchase [·]% of shares of Beijing Weimeng Technology Co., Ltd. (hereinafter referred to as “Weimeng”) and for that purpose wishes to borrow RMB[Amount of Loan] from Weibo Technology;

(2) Weibo Technology agrees to provide the said loan to the borrower in accordance with and subject to the terms and conditions under the agreement.

The following agreements have been reached by and between both parties based on the principles of equality and mutual benefits via friendly negotiation:

1. Amount of Loan

1.1 Weibo Technology agrees to provide a long-term loan in the amount of RMB[Amount of Loan] to the borrower subject to the terms and conditions under the agreement (hereinafter referred to as “long-term loan”).

2. Life of Loan

2.1 The life of the long-term loan prescribed under the agreement shall be 10 years from the date when this agreement is signed.

2.2 The borrower agrees that Weibo Technology shall have the right to, at its own discretion, shorten or extend the life of loan with reference to the real situation.

3. Use of Loan

3.1 The borrower shall use the long-term loan for purchasing [·]% of shares of Weimeng and any other application of this long-term loan shall obtain earlier written consent from Weibo Technology.

3.2 During the life of loan, the borrower shall neither transfer partial or all its shares of Weimeng to any third party nor set any security against such shares without prior approval given by Weibo Technology in written form.

4. Interest of Loan

4.1 The long-term loan under this agreement is interest-free loan and Weibo Technology shall not collect any other fees or charges from the borrower.

5. Satisfaction with Loan

5.1 Weibo Technology shall have the right to require from time to time the borrower to compensate for the long-term loan under this agreement without violating the laws and regulations of PR China in the method as Weibo Technology directs, including but not limited to, transfer of all or partial shares of Weimeng held by the borrower to Weibo Technology or any subject appointed by Weibo Technology.

6. Liability for Tax

6.1 Both parties shall on their own pay taxes and costs by laws respectively.

6.2 Save for taxes and costs of the borrower or Weibo Technology on their own expressly reserved by laws, Weibo Technology shall be liable for all other taxes and reasonable costs in connection with this long-term loan under this agreement.

7. Breach and Compensation

7.1 Any breach of any article of the agreement directly or indirectly or no commitment or commitment out of time insufficiently to the obligations of the agreement shall constitute breach of the contract. The party that observes the contract shall have the right to request the breaching party by written notice to make corrections to its breaching actions and avoid the bad result with sufficient, effective and timely measures taken, and to compensate for the losses of the non-breaching party due to its breaching actions.

7.2 After any breaching occurs, the non-breaching party, if holding that the breaching has resulted in impossibility or unfairness for the non-breaching party to perform the relevant obligations under this agreement with reasonable and objective discretion applied, shall have the power to discontinue its relevant obligations of this agreement with written notice sent to the non-breaching party until the breaching party stops its breach of the contract, take sufficient, effective and timely measures to avoid the bad results, and compensate for the losses of the non-breaching party due to its breaching actions.
7.3 The indemnification that the breaching party makes to the non-breaching party shall include any direct economic losses and any predictable indirect losses or excess expenses that occur to the non-breaching party due to violation of the contract by the breaching party, including but not limited to attorney fees, legal costs, arbitration fees, financial expenses, travel expenses and etc.

8. Effectiveness, Modification and Termination

8.1 This agreement shall be effective since it is signed by authorized representatives of the parties.

8.2 The parties may via negotiation modify or terminate this agreement in advance in written form at any time.

8.3 Any party shall have the right to terminate this agreement unilaterally in advance with written notice given if any of the following situations occurs to the other party:

8.3.1 Within 30 days since the written notice sent out by the non-breaching party, the breaching party still not modifies its breach of the contract, or takes sufficient, effective and timely measures to avoid the bad results, and compensate for the losses of the non-breaching party due to its breaching actions.

8.3.2 Such party is unable to continue to perform this agreement due to force majestre.

8.4 Earlier termination of this agreement shall not affect the generated rights and obligations by this agreement before such termination date.

9. Settlement of Disputes and Governing Laws

9.1 Parties shall settle any disputes over contents of this agreement or its execution via friendly negotiation; which if fails, they shall submit the disputes to China International Economic and Trade Arbitration Commission (CIETAC) for settlement. The arbitrament awarded shall be final and binding on both parties.

9.2 Laws and regulations of PRC shall be applied for conclusion, execution, interpretation and settlement of disputes concerning this agreement.

10. Miscellaneous

10.1 Either party’s failure to perform its rights in time under this agreement shall neither be deemed as waiver of such rights nor affect its execution of such rights in future.

10.2 If any article or clause of this agreement becomes invalid or unexecutable entirely or partially no matter what reasons, the remaining portions of this agreement shall be still effective and binding.

10.3 This agreement is made into one original with two copies, one for each party, both with equally legal effectiveness.

10.4 Matters not included in this agreement shall be determined by both parties via negotiation.

3. Effectiveness, Amendment and Termination

This Agreement is entered into on [Execution Date], by and between the following two parties:

**Party A:** [Name of Borrower] (hereinafter referred to as the “Borrower”) ID No.:

**Party B:** Weibo Internet Technology (China) Co., Ltd. (hereinafter referred to as “Weibo Technology”)

Address: Room 701, No. 10 Haidian North Second Street, Haidian District, Beijing

Borrower and Weibo Technology hereinafter each a “Party”, and collectively the “Parties”.

Whereas:

1. **Debt Set-off**

   1.1 In the event that the Borrower transfers a portion of the Subject Interest to a Transferee designated by Weibo Technology in accordance with the ETA, the portion of the debt owed by the Borrower to Weibo Technology under the Loan Agreement equivalent to the portion of the Purchase Price of such portion of the Subject Interest shall be offset against such Transferee’s obligation towards the Borrower for the payment of such portion of the Purchase Price of such portion of the Subject Interest. In other words, upon the consummation of the transfer from the Borrower to the Transferee of a portion of the Subject Interest, it shall be deemed that the Borrower has repaid a portion of the debt owed by the Borrower to Weibo Technology under the Loan Agreement equivalent to the portion of the Purchase Price of such portion of the Subject Interest. The amount of any such repayment shall be calculated at the following formula: \( X = \frac{T}{A-B} \times A \), where, \( X \) stands for the amount repaid by the Borrower; and \( T \) stands for the total amount of the debt owed by the Borrower to Weibo Technology; \( A \) stands for the amount of the Subject Interest that has been transferred to the Transferee; and \( B \) stands for the total amount of the Subject Interest.

   1.2 Upon the consummation of the transfer from the Borrower to the Transferee of the total amount of the Subject Interest, the debt owed by the Borrower to Weibo Technology under the Loan Agreement shall be offset against any and all the Transferee’s obligation for payment to the Borrower of the Purchase Price of the Subject Interest under the ETA. As a result, the Borrower shall not be required to perform its obligation to make repayment to Weibo Technology under the Loan Agreement and the Transferee shall not be required to perform its obligation to pay any Purchase Price to the Borrower under the ETA.

2. **Repayment of the Loan**

2.1 Weibo Technology may not request the Borrower to repay any debt owed by the Borrower to Weibo Technology under the Loan Agreement in any way other than through the set-off of such debt against the transfer of the Subject Interest as contemplated hereunder. Similarly, the Borrower may not request the Transferee to pay the Borrower any portion of the Purchase Price under the ETA in any way other than through the debt set-off as contemplated hereunder.

2.2 The Borrower shall transfer the Subject Interest to the Transferee in accordance with the ETA and satisfy all its debt owed to Weibo Technology under the Loan Agreement through the debt set-off as contemplated hereunder. Without prior written consent of Weibo Technology, the Borrower may not repay any debt owed by the Borrower to Weibo Technology under the Loan Agreement in any way other than through the set-off of such debt against the transfer of the Subject Interest as contemplated hereunder.

2.3 As from the date of effectiveness of this Agreement, the timing for the Borrower’s repayment of any portion of the Loan under the Loan Agreement shall be determined by Weibo Technology at its sole discretion. Weibo Technology shall have the right to request at any time the Borrower to repay Weibo Technology all or any portion of the Loan in the way contemplated hereunder.

2.4 In case of any discrepancy between any provision in the Loan Agreement and the preceding provision, the preceding provision shall prevail.

2.5 In the event that the Borrower is rendered unable to transfer to the Transferee any Subject Interest due to any law or regulation of the People’s Republic of China (the “PRC”) or any substantive obstacle encountered in the actual performance of this Agreement, the Parties shall, by adhering to the principal of equality, mutual benefit and good faith, determine through negotiations, a specific approach to repay the Loan that is closed to the intent of this Agreement.
3.1 This Agreement shall take effect upon being signed by both Parties and shall expire upon the complete performance by each Party of all its respective obligations hereunder.

3.2 After having reached agreement through negotiations, the Parties may at any time amend or prematurely terminate this Agreement by written agreement.

4. Default Liabilities

4.1 Any direct or indirect breach by either Party of any provision in this Agreement, or any failure of either Party to assume at all or to assume in time and in full any of its obligations under this Agreement shall constitute a default hereunder. In such case, the non-defaulting Party (the “Non-defaulting Party”) shall notify the defaulting Party (the “Defaulting Party”) in writing to cure its breach and take adequate, effective and timely measures to eliminate the effect of such breach and indemnify the Non-defaulting Party against any and all the losses caused by such breach.

4.2 Upon the occurrence of any breach which in the reasonable and objective judgment of the Non-defaulting Party has rendered it impossible or unfair for the Non-defaulting Party to perform its respective obligations hereunder, the Non-defaulting Party shall have the right to notify the Defaulting Party in writing that the Non-defaulting Party will suspend its performance of its respective obligations hereunder until the Defaulting Party has ceased such breach, taken adequate, effective and timely measures to eliminate the effect of such breach and indemnified the Non-defaulting Party against any and all the losses caused by such breach.

4.3 The losses of the Non-defaulting Party caused by the breach of the Defaulting Party that are indemnifiable by the Defaulting Party shall include the direct economic losses and any and all foreseeable indirect losses and incidental expenses, including without limitation, attorney fees, litigation and arbitration costs, financial expenses and travelling expenses.

5. Dispute Resolution

5.1 Any dispute between the Parties in relation to the interpretation or performance of any provision hereunder shall be resolved through amicable consultations between the Parties.

5.2 Any dispute fails to be so resolved through such consultations shall be referred to China International Economic and Trade Arbitration Commission for arbitration in accordance with its effective arbitration rules. The arbitration proceedings shall be conducted in Beijing in Chinese. The arbitral award shall be final and binding upon both Parties.

5.3 The conclusion, effectiveness, performance, interpretation and dispute resolution shall be governed by the laws of the PRC.

6. Miscellaneous

6.1 In case any prior mutual understanding or agreement between the Parties in respect of any relevant subject matter hereunder conflicts with this Agreement, this Agreement shall prevail.

6.2 Headings herein are inserted for ease of reference only and shall not affect the interpretation of any provision herein.

6.3 This Agreement shall be binding upon both Parties and their respective successors, heirs and permitted assigns.

6.4 In case any provision in this Agreement is or becomes invalid or unenforceable in whole or in part due to noncompliance with any law or governmental regulation or otherwise, the part of such provision affected thereby shall be deemed to have been deleted from this Agreement; provided, however, that such deletion shall not affect the legal force and effect of any other part of such provision or any other provision in this Agreement. In such case, the Parties shall negotiate for a new provision to replace such invalid or unenforceable provision.

6.5 Unless otherwise specified herein, any failure of either Party to exercise or any delay of either Party in the exercise of any of its rights, powers or privileges hereunder shall not be deemed as a waiver of the exercise of such right, power or privilege. Any single or partial exercise of any right, power or privilege shall not prejudice the exercise of any other right, power or privilege.

6.6 This Agreement shall be executed in two (2) counterparts with equal legal force and effect, with one (1) for each Party.

6.7 Any matter not covered hereunder shall be subject to further negotiations between the Parties.

Share Transfer Agreement

This agreement (this “Agreement”) is entered into by and between the following parties on [Execution Date] in Haidian District:

Party A: [Name of Borrower] (hereinafter referred to as “the borrower”)

ID Number:

Party B: Weibo Internet Technology (China) Co., Ltd.

Address: Room 701, No. 10 Haidian North Second Street, Haidian District, Beijing.

WHEREAS,

(1) Party A is a shareholder of Beijing Weimeng Technology Co., Ltd. (hereinafter referred to as “Weimeng”), who owns [•] % equity interests of Weimeng (“Subject Interest”);

(2) Party A agrees to transfer the Subject Interest to Party B and Party B agrees to acquire the Subject Interest in accordance with the terms and conditions of this Agreement.

NOW THEREFORE, the parties agree to the following:

1. Share Transfer

Party A agrees to transfer the Subject Interest to Party B and Party B agrees to acquire the Subject Interest in accordance with the terms and conditions of this Agreement.

If Party B is unable to directly acquire all or portion of the Subject Interest due to restrictions of the laws and regulations of the People’s Republic of China (“PRC”), Party A agrees to transfer the Subject Interest to any appropriate person designated by Party B, and the person designated by Party B shall be entitled to receive the Subject Interest in accordance with this Agreement.

2. Time of Transfer

The time for the transfer of the Subject Interest under this Agreement shall be determined at the sole discretion of Party B. Without violating the applicable PRC laws and regulations, Party B shall have the right to require Party A to transfer to Party B or any person designated by Party B all or portion of the Subject Interest at any time.

Party A must execute any document required for the transfer of the Subject Interest within three work days from the date on which Party B makes the request for the transfer, and cooperate with the assigns of the Subject Interest in any other legal formalities related to the transfer of the Subject Interest.

3. Transfer Formalities

After Party B notifies Party A of handling with the formalities in connection with the transfer of the Subject Interest, Party A shall procure Weimeng to go through the formalities with the competent telecommunication authority required for the approval of the transfer of the Subject Interest hereunder.

Party A shall ensure that, after obtaining the approvals described in the above Section 3.1, Weimeng shall timely conduct the formalities required for the registration of the transfer of the Subject Interest with the companies registry with which Weimeng registered, in accordance with the applicable laws and regulations.

Party A shall provide any and all necessary cooperation required for the approval and registration of the transfer of the Subject Interest, including, without limitation, any and all necessary legal documents related to the above formalities required by any competent governmental authority.

4. Transfer Price

The total price for the transfer of the Subject Interest under this Agreement shall be RMB[•].

In the case of transfer of portion of the Subject Interest, the parties agree to calculate the transfer price in accordance with the following formula:

\[ M_1 = M_2 \times \left( \frac{S_1}{S_2} \right) \]

in which \( M_1 \) represents the transfer price; \( M_2 \) represents the total price of the transfer of the Subject Interest (i.e., RMB[•]); \( S_1 \) represents the number of the Subject Interest actually transferred to Party B or the person designated by Party B, and \( S_2 \) represents the total number of the Subject Interest.

5. Consummation of the Transfer

The date on which Weimeng shall have completed the registration of the change of the shareholder with the competent administration of industry and commerce and the assigns shall have become the sole person legally holds the Subject Interest, shall be the closing date of the equity transfer hereunder.

Promptly from the closing date of the equity transfer hereunder, the assigns of the subject Interest shall replace Party A to become the shareholder of Weimeng and have the rights and assume the relevant obligations under PRC law and the articles of association of Weimeng, and Party A shall cease to have the rights and assume the obligations in connection with the Subject Interest that has been transferred to the assigns.
6. **Payment**

Party B shall pay the transfer price of the Subject Interest to Party A within one year following the closing date of the equity transfer.

The method of payment for the transfer of the Subject Interest shall be determined in the sole discretion of Party B.

7. **Special Provisions**

From the effective date of this Agreement, without prior written consent of Party B, Party A shall not:

7.0.1 transfer the Subject Interest to any person other than Party B and the person designated by Party B;

7.0.2 create or permit creation of any security interests on the Subject Interest.

From the effective date of this Agreement to the completion of the formalities in respect of the Subject Interest, Party A shall transfer to Party B all the voting rights enjoyed by it in its capacity as the shareholder under applicable law and the articles of association of Weimeng, which shall include, without limitation, the following rights:

7.1.1 to determine the operation policies and investment plans of Weimeng;

7.1.2 to elect and change the directors of Weimeng and determine the remuneration of the directors;

7.1.3 to elect and change the supervisor of Weimeng and determine the remuneration of the supervisor;

7.1.4 to review and approve the reports of the board of directors of Weimeng;

7.1.5 to review and approve the reports of the supervisor;

7.1.6 to review and approve the annual financial budget plans and final accounting plans of Weimeng;

7.1.7 to review and approve the profit distribution plans and loss make-up plans of Weimeng;

7.1.8 to make resolution on the increase or decrease of the registered capital of Weimeng;

7.1.9 to make resolution on the offering of corporate bonds of Weimeng;

7.1.10 to make resolution on the transfer of the capital contributed by the shareholders of Weimeng to any person other than a shareholder of Weimeng;

7.1.11 to make resolution on any merger, spin-off, change of corporate form of organization, dissolution and liquidation of Weimeng;

7.1.12 to make resolution on the scope of business of Weimeng;

7.1.13 to amend the articles of association of Weimeng;

7.1.14 to make determination on any change of the business or nature of the business of Weimeng;

7.1.15 to make determination on any borrowings from third parties or assumption of any liabilities in the name of Weimeng;

7.1.16 to make determination on the sale of any assets or rights of Weimeng to any third parties, including, without limitation, intellectual property rights;

7.1.17 to make determination on the creation of any security interests on any assets of Weimeng (including any tangible and intangible assets) for any purposes;

7.1.18 to transfer to any third party any agreement entered into by Weimeng; and

7.1.19 to determine any other rights that may materially affect any rights, obligations, assets or operation of Weimeng.

If Party A fails to transfer the Subject Interest in accordance with this Agreement, in any event, the amount of the liquidated damages payable by Party A to Party B shall not be less than 200% of the then book value of the Subject Interest.

8. **Representations, Warranties and Covenants**

Party A hereby represents, warrants and covenants to Party B that:

8.0.1 Party A has the power and authority to enter into this Agreement and perform its obligations under this Agreement.

8.0.2 Party A has duly performed its obligations to make capital contribution to Weimeng, and it has legal, complete and adequate ownership and power with respect to the Subject Interest hereunder.
8.0.3 Weimeng is a company with limited liability established and validly existing under the laws of PRC, and has obtained any and all approvals, authorizations, permits and consents required for the operation of its business; and Weimeng does not incur any event that may lead to any suspension or cancellation of such approvals, authorizations, permits, consents or any of its licenses.

8.0.4 The shareholders’ meeting of Weimeng has resolved to approve the transfer by Party A of the interests held by it in Weimeng to Party B, and the other shareholders have agreed in writing to waive their rights of first refusal to the Subject Interest.

8.0.5 Prior to the effectiveness of this Agreement, Party A does not establish or permit establishment of any security interest on the Subject Interest, and Party A will not establish or permit establishment of any security interest on the Subject Interest after the effectiveness of this Agreement without prior written consent of Party B;

8.0.6 There is, to the knowledge of Party A, not any event that has or may have any material adverse effect on the business operation of Weimeng; and

8.0.7 There is no pending or threatened litigation, arbitration or administrative proceedings against the Subject Interest and/or Party A.

Party B hereby represents, warrants and covenants to Party A that:

8.1.1 Party B is a company with limited liability duly established and validly existing, has the power and authority to enter into this Agreement and perform its obligations under this Agreement.

8.1.2 Party B has obtained any and all authorization and consents to execute and perform this Agreement.

8.2.3 The execution by Party B of this Agreement will not result in any violation by Party B of any term, condition or provision under any contract, agreement or document to which it is a party, or release of any obligation of any person under such contract, agreement or document, or give any person the right to terminate any of its obligations under such contract, agreement or document.

9. Default Liabilities

Any direct or indirect breach by either Party of any provision in this Agreement, or any failure of either Party to assume at all or to assume in time and in full any of its obligations under this Agreement shall constitute a default hereunder. In such case, the non-defaulting Party (the “Non-defaulting Party”) shall notify the defaulting Party (the “Defaulting Party”) in writing to cure its breach and take adequate, effective and timely measures to eliminate the effect of such breach and indemnify the Non-defaulting Party against any and all the losses caused by such breach.

Upon the occurrence of any breach which in the reasonable and objective judgment of the Non-defaulting Party has rendered it impossible or unfair for the Non-defaulting Party to perform its respective obligations hereunder, the Non-defaulting Party shall have the right to notify the Defaulting Party in writing that the Non-defaulting Party will suspend its performance of its respective obligations hereunder until the Defaulting Party has ceased such breach, taken adequate, effective and timely measures to eliminate the effect of such breach and indemnified the Non-defaulting Party against any and all the losses caused by such breach.

The losses of the Non-defaulting Party caused by the breach of the Defaulting Party that are indemnifiable by the Defaulting Party shall include the direct economic losses and any and all foreseeable indirect losses and incidental expenses, including without limitation, attorney fees, litigation and arbitration costs, financial expenses and travelling expenses. If there is any specific agreement with respect to the amount of liquidated damages hereunder, such agreement shall be followed.

10. Force Majeure

A “Force Majeure Event” means an event that is beyond the reasonable control of, or unforeseeable or even if foreseeable but unavoidable by both Parties, and would prevent, affect or delay the performance by either Party of its respective obligations hereunder, including without limitation, a governmental act, natural disaster, war, hacker attack or any other similar event.

The Party affected by a Force Majeure Event may suspend the performance of the obligation hereunder that is rendered unable to be performed due to the occurrence of such Force Majeure Event until the elimination of the effect of such Force Majeure Event, without any liabilities thereof; provided, however, that such Party shall try its best endeavors to overcome such Force Majeure Event and mitigate the adverse effect thereof.

The Party affected by a Force Majeure Event shall provide the other Party with legal certificate issued by a notary public office or any other appropriate authority located in the place where such event occurs to demonstrate the occurrence of such Force Majeure Event. Failure to provide such certificate shall entitle the other Party to bring a claim against the Party affected by such Force Majeure Event for the assumption of default liabilities.

11. Effectiveness, Amendment and Termination

This Agreement shall take effect on the date of execution and shall terminate upon the completion by both parties of their obligations hereunder.

The parties may amend in writing or early terminate this Agreement at any time upon agreement with each other.

12. Dispute Resolution

Any dispute between the Parties in relation to the interpretation or performance of any provision hereunder shall be resolved through amicable consultations between the Parties.
Any dispute fails to be so resolved through such consultations shall be referred to China International Economic and Trade Arbitration Commission (the “Commission”) for arbitration in accordance with its then effective arbitration rules. The arbitration proceedings shall be conducted in Beijing in Chinese. An arbitral award by the Commission shall be final and binding upon both Parties.

The conclusion, effectiveness, performance, interpretation and dispute resolution shall be governed by the laws of the PRC.

13. Miscellaneous

This Agreement shall be executed in two (2) counterparts with equal legal force and effect, with one (1) for each Party.

Headings herein are inserted for ease of reference only and shall not affect the interpretation of any provision herein.

The Parties may amend and supplement this Agreement by written agreements. Any amendment or supplement to this Agreement executed by and between the Parties shall constitute an integral part hereof and shall have the equal legal force herewith.

In case any provision in this Agreement is or becomes invalid or unenforceable in whole or in part due to noncompliance with any law or governmental regulation or otherwise, the part of such provision affected thereby shall be deemed to have been deleted from this Agreement; provided, however, that such deletion shall not affect the legal force and effect of any other part of such provision or any other provision in this Agreement. In such case, the Parties shall negotiate for a new provision to replace such invalid or unenforceable provision.

Unless otherwise specified herein, any failure of either Party to exercise or any delay of either Party in the exercise of any of its rights, powers or privileges hereunder shall not be deemed as a waiver of the exercise of such right, power or privilege. Any single or partial exercise of any right, power or privilege shall not prejudice the exercise of any other right, power or privilege.

This Agreement shall constitute the entire agreement between the Parties in respect of the subject matter of the cooperation project, and shall supersede any and all the prior or contemporaneous agreements, understandings and communications, oral or written, between the Parties in respect of the subject matter of the cooperation project. Except as expressly provided herein, there does not exist any express or implicit obligation or undertaking between the Parties.

This Agreement shall be binding on each party and its successors and permitted assigns.

Any matter not covered hereunder shall be subject to further negotiations between the Parties.

This AMENDED AND RESTATED SERIES E PREFERRED SHARE PURCHASE AGREEMENT (this “Agreement”) is made on November 15, 2016, by and among:

1) Yixia Tech Co Ltd. (the “Company”), an exempted limited liability company incorporated and existing under the Laws of the Cayman Islands;
2) WB Online Investment Limited (“Weibo” or the “Purchaser”);
3) The Persons listed on Schedule 1 Part A attached to this Agreement (each a “Founder Holdco” and together the “Founder Holdcos”);
4) The Persons listed on Schedule 1 Part B attached to this Agreement (each a “Founder” and together the “Founders”, and together with the Founder Holdcos, the “Key Holders” and each a “Key Holder”);
5) The Persons listed on Schedule 1 Part C attached to this Agreement (each a “Group Company” and together with the Company, the “Group Companies”);

Each of the Company, the Purchaser, the Key Holders, the HK Company, the Domestic Company and the WFOE shall be referred to individually as a “Party” and collectively as the “Parties”. Capitalized terms used herein shall have the meaning set forth in Schedule 2 attached hereto. Each Purchaser shall become a Party to this Agreement by executing and delivering a counterpart signature page hereto as of such relevant date.

RECATALS

WHEREAS, Parties have entered into a Series E Preferred Shares Purchase Agreement dated August 26, 2016 (the “Original SPA”) and now intend to amend and restate the Original SPA with respect to the rights and obligations among Founders, Founder Holdcos, Group Companies and Weibo.

WHEREAS, the Purchaser desires to purchase from the Company the Purchased Shares and the Company desires to sell the Purchased Shares to the Purchaser pursuant to the terms and subject to the conditions of this Agreement.

NOW, THEREFORE, THE PARTIES HEREBY AGREE AS FOLLOWS:

1. PURCHASE AND SALE OF PREFERRED SHARES.

1.1. Sale and Issuance of Preferred Shares.

Subject to the terms and conditions of this Agreement, Weibo agrees to purchase at the Closing and the Company agrees to sell and issue to Weibo at the Closing 186,878,047 Series E-1 Preferred Shares at a purchase price of US$0.6421 per share for an aggregate purchase price of US$120,000,000 (the “Purchase Price”).

1.2. Closings; Delivery.

(a) The purchase and sale of the Purchased Shares shall take place remotely via the exchange of documents and signatures, on a date specified by the Parties, or at such other time and place as the Company and the Purchaser mutually agreed upon, which date shall be no later than five (5) Business Days after the satisfaction or waiver of each condition to the Closing set forth in Section 2 and Section 3 (which time and place are designated as the “Closing”).

(b) At the Closing, the Company shall (i) cause its register of members to be updated to reflect the Purchased Shares purchased by the Purchaser at the Closing and shall deliver a copy of such updated register of members to the Purchaser certified as a true and correct copy by the Company’s registered agent.

(c) Within five (5) Business Days after the Closing, the Company shall deliver to the Purchaser one or more certificates representing the Purchased Shares being purchased by such Purchaser hereunder at such Closing as set forth on Schedule 1.

(d) At the Closing, the Purchaser shall deposit the Purchase Price by wire transfer of immediately available US$ funds into the Closing Account (as defined below), which account information shall be provided by the Company to the Purchaser in writing not less than five (5) Business Days prior to the Closing.

1.3. Closing Account.

Payment of the Purchase Price by the Purchaser to the Company shall be made by remittance of immediately available funds to a bank account of the Company acceptable to the Purchaser (the “Closing Account”).

2. CONDITIONS TO THE OBLIGATIONS OF THE PURCHASER AT CLOSING(S).

The obligations of the Purchaser to purchase the Purchased Shares at the Closing are subject to the fulfillment, on or before the Closing, of each of the following conditions and such other conditions as set forth on Schedule 9, unless otherwise waived in writing by the Purchaser:

2.1. Completion of Due Diligence.
The Purchaser shall have satisfactorily completed its business, legal and financial due diligence review.

2.2. **Material Adverse Effect.**

Since August 26, 2016, no event, circumstance or change shall have occurred that, individually or in the aggregate with one or more other events, circumstances or changes, have had or reasonably could be expected to have a Material Adverse Effect on the Company or any other Group Company.

2.3. **Proceedings and Documents.**

All corporate and other proceedings in connection with the transactions contemplated at the Closing and all documents incidental thereto shall be reasonably satisfactory in form and substance to the Purchaser, and the Purchaser (or their legal counsel) shall have received all such counterpart original and certified or other copies of such documents as reasonably requested. Such documents may include (i) good standing certificates or analogous certificates of the Company and (ii) all necessary shareholders’ resolutions and/or board resolutions of the Founder Holdcos and the Group Companies. The Group Companies shall have performed and complied with all covenants, agreements, obligations and conditions contained in this Agreement that are required to be performed or complied with by such Group Companies on or before the Closing.

2.4. **Authorizations.**

The Warrantors shall have obtained all authorizations, approvals, waivers or permits of any Person or any Governmental Authority necessary for the consummation of all of the transactions contemplated by this Agreement and other Transaction Documents, including without limitation any authorizations, approvals, waivers or permits that are required in connection with the lawful issuance of the Purchased Shares and the transactions contemplated by the VIE Control Documents, and all such authorizations, approvals, waivers and permits shall be effective as of the Closing. The Company shall have fully satisfied (including with respect to rights of timely notification) or obtained enforceable waivers in respect of any preemptive or similar rights directly or indirectly affecting any of its shares or securities, as applicable.

2.5. **Representations and Warranties.**

The representations and warranties of the Warrantors contained in Schedule 4 shall be true, complete and correct in all material respects as of the Closing, except for those representations and warranties (i) that already contain any materiality qualification, which such representations and warranties, to the extent already so qualified, shall instead be true and correct in all respects as so qualified as of such respective dates and (ii) that address matters only as of a particular date, which representations will have been true and correct in all material respects (subject to clause (i)) as of such particular date.

2.6. **Restated Articles.**

The Fifth Amended and Restated Memorandum and Articles of Association of the Company shall have been amended as set forth in the form attached hereto as Exhibit A (the “Restated Articles”). Such Restated Articles shall have been duly adopted by all necessary actions of the Board of Directors and the members of the Company.

2.7. **Restated Shareholders’ Agreement.**

The Company, the Key Holders, the Domestic Company, the HK Company and the WFOE shall have executed and delivered the Fourth Amended and Restated Shareholders’ Agreement (the “Restated Shareholders’ Agreement”), in a form and substance substantially in the form attached as Exhibit B to this Agreement.

2.8. **Compliance Certificates.**

The Purchaser shall have received a compliance certificate executed and delivered by the chief executive officer of the Company in the form attached hereto as Exhibit C.

2.9. **Investment Committee Approval.**

With respect to the Purchaser’s obligations at the Closing, the investment committee of the Purchaser shall have approved the execution of this Agreement, the other Transaction Documents and the transactions contemplated hereby and thereby.

2.10. **VIE Control Documents.**

The Domestic Company, the WFOE and the relevant shareholders of the Domestic Company shall have entered into VIE Control Documents to the reasonable satisfaction of the Purchaser.

2.11 **Board of Directors.**

The Board of Directors shall have been constituted pursuant to Section 5.1 of the Restated Shareholders’ Agreement.

3. **CONDITIONS TO THE OBLIGATIONS OF THE COMPANY AT CLOSING.**

The obligations of the Company to sell the Purchased Shares to the Purchaser at the Closing are subject to the fulfillment of each of the following conditions by the Purchaser, on or before the Closing, unless otherwise waived in writing by the Company:
3.1. **Representations and Warranties.**

The representations and warranties of the Purchaser contained in Schedule 6 shall be true, complete and correct in all material respects as of the Closing.

3.2. **Performance.**

The Purchaser shall have performed and complied with all covenants, agreements, obligations and conditions contained in this Agreement that are required to be performed or complied with by it on or before the Closing.

3.3. **Qualifications.**

All authorizations, approvals or permits, if any, of any Governmental Authority that are required in connection with the lawful issuance and sale of the Purchased Shares pursuant to this Agreement shall be obtained and effective as of the Closing.

3.4. **Restated Shareholders’ Agreement.**

The Purchaser shall have executed and delivered the Restated Shareholders’ Agreement.

---

4. **REPRESENTATIONS AND WARRANTIES OF THE WARRANTORS.**

The Warrantors, jointly and severally, represent and warrant to the Purchaser that the statements contained in Schedule 4 attached hereto are true, correct and complete with respect to each Warrantor, (i) on and as of August 26, 2016, and (ii) on and as of the date of the Closing (with the same effect as if made on and as of the date of the Closing), except as set forth on the Disclosure Schedule attached hereto as Schedule 5, which exceptions shall be deemed to be representations and warranties as if made hereunder.

5. **REPRESENTATIONS AND WARRANTIES OF THE PURCHASER.**

The Purchaser represents and warrants to the Company that the statements contained in Schedule 6 attached hereto are true, correct and complete with respect to the Purchaser as of the Closing applicable to the Purchaser.

6. **UNDEARTAKINGS.**

The Warrantors hereby undertake to do each of the following and such other undertakings as set forth on Schedule 10.

6.1. **Ordinary Course of Business.**

From August 26, 2016 until the earlier of the Termination Date or the Closing, the Founders shall cause each of the Group Companies to be conducted in the ordinary course of business and shall use its commercially reasonable efforts to maintain the present character and quality of the business, including without limitation, its present operations, physical facilities, working conditions, goodwill and relationships with lessors, licensors, suppliers, customers, employees and independent contractors.

6.2. **Exclusivity.**

From August 26, 2016 until the earlier of the Termination Date or the Closing, except otherwise agreed by Weibo, the Group Companies agree not to (i) discuss the sale of any equity securities or any other instruments convertible into the equity securities of any Group Company with any third party other than with respect to the Closing; (ii) provide any information with respect to any Group Company to a third party in connection with a potential investment by such third party in any equity securities or any other instruments convertible into the equity securities of such Group Company; or (iii) close any financing transaction of any equity securities or any other instruments convertible into the equity securities of any Group Company with any third party (the "Exclusivity Period"). This Section 6.2 shall terminate and be of no further force and effect immediately following the Closing.

6.3. **Use of Proceeds.**

In accordance with the directions of the Company’s Board of Directors, as it shall be constituted in accordance with the Restated Shareholders’ Agreement, the Company will use the proceeds from the sale of the Purchased Shares for the Repurchase contemplated under Schedule 9, general working capital and other general corporate purposes for the Group Companies; provided, however, that the Company may use part of the proceeds from the sale of the Purchased Shares to pay the fees and expenses in accordance with Section 8.8 hereof. Unless otherwise contemplated under this Agreement, the Company shall not use such proceeds to pay any debt of the Group Companies or to repurchase or cancel any securities held by any shareholder of the Group Companies or to make any payments to the shareholders or affiliates of any Group Company or for any other purposes without the prior written consent of the Board (including affirmative vote of the Majority Preferred Directors).

6.4. **Notice of Certain Events.**

If at any time before the Closing, any Warrantor comes to know of any material fact or event which: (i) is in any way materially inconsistent with any of the representations and warranties in this Agreement; (ii) suggests that any material fact warranted hereunder may not be as warranted or may be misleading; or (iii) might affect the willingness of a prudent investor to purchase the Purchased Shares on the terms contained in the Transaction Documents or the amount of the consideration a prudent investor would be prepared to pay for the Purchased Shares; then the Warrantors shall immediately notify the Purchaser in writing, describing the fact or event in reasonable detail.
6.5. **Compliance.**

The Company and each Group Company shall comply with all applicable laws and regulations in all material respect, including without limitation compliance the regulations of social insurance and housing fund.

6.6. **Filing of Restated Articles.**

Within ten (10) Business Days following the Closing, the Restated Articles shall have been duly filed with the Registrar of Companies of the Cayman Islands.

6.7. **SAFE Circular 37 Registration.**

Each of the Founders and any other direct or indirect equity interest holder of the Company shall comply with all applicable SAFE rules and regulations, including without limitation, the SAFE Circular 37 and/or its implementation rules.

6.8. **Founders’ Commitments to the Company.**

Each Founder hereby agrees to devote one hundred percent (100%) of his or her working time to the business and operations of the Group Companies.

6.9. **Availability of Ordinary Shares.**

The Company hereby covenants that at all times there shall be made available, free of any liens, for issuance upon conversion of the Series E Preferred Shares such number of Ordinary Shares or other shares of share capital of the Company.

6.10. **Business Plan.**

As soon as reasonably practicable but in any event within three (3) months after the Closing, the Company shall complete and deliver to the Purchaser a detailed business plan ("Business Plan") and a 12-month budget for the Company ("Budget"), each in a form reasonably satisfactory to the Purchaser.

6.11. **Board of Directors of the Group Companies.**

Upon the written request from the Purchaser, each of the Group Companies other than the Company shall cause such Group Company’s board of directors to have substantially the same composition as the Board to the extent commercially practicable.

6.12. **Risk Control Policies.**

As soon as reasonably practicable after the Closing, the Group Companies shall establish internal risk control and compliance polices suitable for the Group Companies’ development stage with respect to users’ terms of use and data collection, retention, protection and usage pursuant to applicable laws.

6.13. **Use of Purchaser’s Name or Logo.**

Without the prior written consent of the Purchaser, which consent shall not be unreasonably withheld, the Warrantors may not use, publish or reproduce the Purchaser’s English or Chinese name, logo, brand or trademark in any of their marketing, advertising or promotion materials, or claim themselves as partners of the Purchaser.

7. **CURE OF BREACHES; INDEMNITY.**

7.1. **In the event of:**

(a) any breach or violation of, or inaccuracy or misrepresentation in, any representation or warranty made by the Warrantors contained herein or any of the other Transaction Documents,

(b) any breach or violation of any covenant or agreement contained herein or any of the other Transaction Documents (each of (a) and (b), a “Breach”).

the Key Holders shall, jointly and severally, or cause the other Warrantors to, cure such Breach (to the extent that such Breach is curable) to the satisfaction of the Purchaser (it being understood that any cure shall be without recourse to cash or assets of any of the Group Companies). Notwithstanding the foregoing, the Warrantors shall also, jointly and severally, indemnify the Purchaser and its Affiliates, limited partners, members, stockholders, employees, agents and representatives (each, an “Indemnitee”) for any and all losses, liabilities, damages, liens, claims, obligations, penalties, diminution in the value of the Purchaser’s interest in the Company, settlements, deficiencies, costs and expenses, including without limitation reasonable advisor’s fees and other reasonable expenses of investigation, defense and resolution of any Breach paid, suffered, sustained or incurred by the Indemnitees (each, an “Indemnifiable Loss”), resulting from, or arising out of, or due to, directly or indirectly, any Breach.

7.2. Notwithstanding the foregoing, the Warrantors shall, jointly and severally, indemnify and keep indemnified the Indemnitees at all times and hold them harmless against any and all Indemnifiable Losses resulting from, or arising out of, or due to, directly or indirectly, any claim for tax which has been made or may hereafter be made against the Domestic Company and any other Group Company wholly or partly in respect of or in consequence of any event occurring or any income, profits or gains earned, accrued or received by the Domestic Company and any other Group
Company on or before the Closing and any reasonable costs, fees or expenses incurred and other liabilities which the Domestic Company and any other Group Company may properly incur in connection with the investigation, assessment or the contesting of any claim, the settlement of any claim for tax, any legal proceedings in which the Domestic Company or any other Group Company claims in respect of the claim for tax and in which an arbitration award or judgment is given for the Domestic Company or any other Group Company and the enforcement of any such arbitration award or judgment whether or not such tax is chargeable against or attributable to any other person, provided, however, that the Warrantors shall be under no liability in respect of taxation:

(a) that is promptly cured without recourse to cash or other assets of any Group Company;

(b) to the extent that provision, reserve or allowance has been made for such tax in the audited consolidated financial statement of the Company;

(c) if it has arisen in and relates to the ordinary course of business of the Domestic Company since the Statement Date;

(d) to the extent that the liability arises as a result only of a provision or reserve in respect of the liability made in the Financial Report being insufficient by reason of any increase in rates of tax announced after the Closing with retrospective effect; and

(e) to the extent that the liability arises as a result of legislation which comes into force after the Closing and which is retrospective in effect.

The survival period for any indemnity obligation relating to claims for tax matters arising under this Section 7.2 shall be the applicable statute of limitations for tax claims.

7.3. Notwithstanding anything to the contrary in Section 7.1 and 7.2, the Key Holders’ indemnity obligations shall be secondary to those of the Group Companies and shall solely be satisfied with the Ordinary Shares or other equity interests in any of the Group Companies held (either directly or indirectly) or acquired after August 26, 2016 by the Key Holders, with each Ordinary Share, to the extent such shares are used, valued at the higher of (i) the price paid for each Purchased Share hereunder (as adjusted for share splits, combinations, recapitalizations, reclassifications and similar transactions) and (ii) the fair market value of such Ordinary Share (determined pursuant to Section 8.14 if the parties to such dispute cannot agree).

To the extent the Purchaser is able to recover any Indemnifiable Loss from the Group Companies, the Key Holders shall not be obligated to indemnify the Purchaser with respect to such amount of Loss.

7.4. If the Purchaser or other Indemnitee believes that it has a claim that may give rise to an obligation of any Warrantor pursuant to this Section 7, it shall give prompt notice thereof to the Warrantors stating specifically the basis on which such claim is being made, the material facts related thereto, and the amount of the claim asserted. In the event of a third party claim against an Indemnitee for which such Indemnitee seeks indemnification from the Warrantors pursuant to this Section 7, no settlement shall be deemed conclusive with respect to whether there was an Indemnifiable Loss or the amount of such Indemnifiable Loss unless such settlement is consented to by one Key Holder acting on behalf of the other Key Holders, which shall not be unreasonably withheld or delayed. Any dispute related to this Section 7 shall be resolved pursuant to Section 8.14.

7.5. Notwithstanding any other provision contained herein, the Warrantors shall not be liable in respect of a claim unless and until the amount recoverable from the Warrantors in respect of that claim exceeds US$500,000.

7.6. Absent fraud, gross negligence and/or willful misconduct by any of the Warrantors, the aggregate amount of the Indemnifiable Losses of the Purchaser shall not exceed the purchase price actually received by the Company from the Purchaser.

8. MISCELLANEOUS.

The representations and warranties of the Warrantors contained in or made pursuant to this Agreement shall survive the execution and delivery of this Agreement and the Closing for a period of five (5) years following the Closing in respect of tax and two (2) years following the Closing in respect of non-tax.

8.2. Confidentiality.

(a) Disclosure of Terms. The terms and conditions of this Agreement, any term sheet or memorandum of understanding entered into pursuant to the transactions contemplated hereby, all exhibits and schedules attached hereto and thereto, and the transactions contemplated hereby and thereby (collectively, the “Transaction Terms”), including their existence, shall be considered confidential information and shall not be disclosed by any party hereto to any third party except as permitted in accordance with the provisions set forth below.

(b) Permitted Disclosures. Notwithstanding the foregoing, the Company may disclose (i) the existence of the investment to its bona fide prospective purchasers, employees, bankers, lenders, accountants, legal counsels and business partners, or to any person or entity to which disclosure is approved in writing by the Purchaser, such approval not to be unreasonably withheld; and (ii) the transaction terms to its current shareholders, employees, bankers, lenders, accountants and legal counsels, in each case only where such persons or entities are under appropriate nondisclosure obligations substantially similar to those set forth in this Section 8.2, or to any person or entity to which disclosure is approved in writing by the Purchaser, such approval is not to be unreasonably withheld. The Purchaser may disclose (x) the existence of the investment and the Transaction Terms to any Affiliate, partner, limited partner, former partner, potential partner or potential limited partner of the Purchaser or other third parties and (y) the fact of the investment to the public, in each case as it deems appropriate in its sole discretion. Any Party hereto may also provide disclosure in order to comply with applicable Laws, as set forth in Section 8.2(c) below.
8.3. **Transfer; Successors and Assigns.**

The terms and conditions of this Agreement shall inure to the benefit of and be binding upon the respective successors and assigns of the parties, provided that the Purchaser cannot transfer or assign any of its rights and obligations hereunder to any third party except for the Purchaser’s Affiliates. Save as expressly provided in this Agreement, nothing in this Agreement, express or implied, is intended to confer upon any party other than the parties hereto or their respective successors and assigns any rights, remedies, obligations, or liabilities under or by reason of this Agreement.

8.4. **Governing Law.**

This Agreement shall be governed by and construed in accordance with the Law of the State of New York as to matters within the scope thereof, without regard to its principles of conflicts of laws.

8.5. **Counterparts; Facsimile.**

This Agreement may be executed and delivered by facsimile, scanned-copy or other electronic signature and in two or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.

8.6. **Titles and Subtitles.**

The titles and subtitles used in this Agreement are used for convenience only and are not to be considered in construing or interpreting this Agreement.

8.7. **Notices.**

All notices and other communications given or made pursuant to this Agreement shall be in writing and shall be deemed effectively given: (a) upon personal delivery to the party to be notified; (b) when sent by confirmed electronic mail or facsimile if sent during normal business hours of the recipient, and if not so confirmed, then on the next Business Day; (c) five (5) days after having been delivered by registered or certified mail, return receipt requested, postage prepaid; or (d) one (1) day after delivery by an internationally recognized overnight courier, specifying next day delivery, with written verification of receipt. All communications shall be sent to the respective parties at their address as set forth on the signature pages, or Schedule 8, as the case may be, or to such e-mail address, facsimile number or address as subsequently modified by written notice given in accordance with this Section 8.7.

8.8. **Fees and Expenses.**

(a) The Company shall pay all of its own costs and expenses incurred in connection with the negotiation, execution, delivery and performance of this Agreement and other Transaction Documents and the transactions contemplated hereby and thereby.

(b) The Company shall pay or reimburse at the Closing all reasonable costs and expenses incurred or to be incurred by the Purchaser up to US$100,000 in the aggregate, which shall include all expenses and costs, including out-of-pocket expenses and third party consulting or advisory expenses incurred in connection with the transactions contemplated by the Transaction Documents; provided that if the Closing fails to occur (i) in respect to the Purchaser, for any reason not attributable to the Purchaser, or because there exist material negative differences between the findings of the due diligence made by the Purchaser and the information disclosed by the Company, the Company shall reimburse all expenses incurred by the Purchaser within three (3) Business Days upon the demand of the Purchaser; or (ii) for any reason solely attributable to any of the Purchaser, the Purchaser shall bear its own expenses incurred by the Purchaser; or (iii) for any reason not attributable to any Party, each Party shall bear its own Expenses incurred by such Party.

8.9. **Attorney’s Fees.**
8.10. Amendments and Waivers.

Any term of this Agreement may be amended and the observance of any term of this Agreement may be waived, either generally or in a particular instance and either retroactively or prospectively, only with the written consent of (i) the Company and (ii) the Purchaser. Any amendment or waiver effected in accordance with this paragraph shall be binding upon the Company, the Purchaser and all the other Parties. For further avoidance of doubt, this Agreement may not be amended or terminated and the observance of any term hereunder may not be waived with respect to the Purchaser without the written consent of the Purchaser. The Company shall give prompt written notice of any amendment or termination hereof or waiver hereunder to any Party hereto that did not consent in writing to such amendment, termination or waiver. No waivers of or exceptions to any term, condition or provision of this Agreement, in any one or more instances, shall be deemed to be, or construed as, a further or continuing waiver of any such term, condition or provision.

8.11. Severability.

The invalidity or unenforceability of any provision hereof shall in no way affect the validity or enforceability of any other provision.

8.12. Delays or Omissions.

No delay or omission to exercise any right, power or remedy accruing to any party under this Agreement, upon any breach or default of any other party under this Agreement, shall impair any such right, power or remedy of such non-breaching or non-defaulting party nor shall it be construed to be a waiver of any such breach or default, or an acquiescence therein, or of or in any similar breach or default thereafter occurring; nor shall any waiver of any single breach or default be deemed a waiver of any other breach or default theretofore or thereafter occurring. Any waiver, permit, consent or approval of any kind or character on the part of any party of any breach or default under this Agreement, or any waiver on the part of any party of any provisions or conditions of this Agreement, must be in writing and shall be effective only to the extent specifically set forth in such writing. All remedies, either under this Agreement or by law or otherwise afforded to any party, shall be cumulative and not alternative.

8.13. Entire Agreement.

This Agreement (including the Schedules and Exhibits hereto), the Restated Articles and other Transaction Documents constitute the full and entire understanding and agreement between the parties with respect to the subject matter hereof, and any other written or oral agreement relating to the subject matter hereof existing between the parties are expressly canceled.

(a) Any dispute, controversy or claim arising out of or relating to this Agreement, or the interpretation, breach, termination or validity hereof, shall first be subject to resolution through consultation of the parties to such dispute, controversy or claim. Such consultation shall begin within seven (7) days after one Party hereto has delivered to the other Parties involved a written request for such consultation. If within thirty (30) days following the commencement of such consultation the dispute cannot be resolved, the dispute shall be submitted to arbitration upon the request of any Party with notice to the other Parties.

(b) The arbitration shall be conducted in Hong Kong under the auspices of the Hong Kong International Arbitration Centre (the “HKIAC”). There shall be three arbitrators. The complainant and the respondent to such dispute shall each select one arbitrator within thirty (30) days after giving or receiving the demand for arbitration. Such arbitrators shall be freely selected, and the Parties shall not be limited in their selection to any prescribed list. The Chairman of the HKIAC shall select the third arbitrator, who shall be qualified to practice Law in the State of New York. If either party to the arbitration does not appoint an arbitrator who has consented to participate within thirty (30) days after selection of the first arbitrator, the relevant appointment shall be made by the Chairman of the HKIAC.

(c) The arbitration proceedings shall be conducted in English. The arbitration tribunal shall apply the Arbitration Rules of the HKIAC in effect at the time of the arbitration. However, if such rules are in conflict with the provisions of this Section 8.14, including the provisions concerning the appointment of arbitrators, the provisions of this Section 8.14 shall prevail.

(d) The arbitrators shall decide any dispute submitted by the parties to the arbitration strictly in accordance with the substantive Law of the State of New York and shall not apply any other substantive law.

(e) Each Party hereto shall cooperate with any party to the dispute in making full disclosure of and providing complete access to all information and documents requested by such party in connection with such arbitration proceedings, subject only to any confidentiality obligations binding on the Party receiving the request.

(f) The award of the arbitration tribunal shall be final and binding upon the disputing parties, and any party to the dispute may apply to a court of competent jurisdiction for enforcement of such award.

8.15. No Commitment for Additional Financing.

Any party to the dispute shall be entitled to seek preliminary injunctive relief, if possible, from any court of competent jurisdiction pending the constitution of the arbitral tribunal.
The Company acknowledges and agrees that no Purchaser has made any representation, undertaking, commitment or agreement to provide or assist the Company in obtaining any financing, investment or other assistance, other than the purchase of the Purchased Shares as set forth herein and subject to the conditions set forth herein. In addition, the Company acknowledges and agrees that (i) no oral statements made by any Purchaser or its representatives on or after August 26, 2016 shall create an obligation, commitment or agreement to provide or assist the Company in obtaining any financing or investment, (ii) the Company shall not rely on any such statement by any Purchaser or its representatives and (iii) an obligation, commitment or agreement to provide or assist the Company in obtaining any financing or investment may only be created by a written agreement, signed by the Purchaser and the Company, setting forth the terms and conditions of such financing or investment and stating that the parties intend for such writing to be a binding obligation or agreement. Each Purchaser shall have the right, in its sole and absolute discretion, to refuse or decline to participate in any other financing of or investment in the Company, and shall have no obligation to assist or cooperate with the Company in obtaining any financing, investment or other assistance.

8.16. Rights Cumulative.

Each and all of the various rights, powers and remedies of a Party will be considered to be cumulative with and in addition to any other rights, powers and remedies which such Party may have at law or in equity in the event of the breach of any of the terms of this Agreement. The exercise or partial exercise of any right, power or remedy will neither constitute the exclusive election thereof nor the waiver of any other right, power or remedy available to such Party.

8.17. No Waiver.

Failure to insist upon strict compliance with any of the terms, covenants, or conditions hereof will not be deemed a waiver of such term, covenant, or condition, nor will any waiver or relinquishment of, or failure to insist upon strict compliance with, any right, power or remedy power hereunder at any one or more times be deemed a waiver or relinquishment of such right, power or remedy at any other time or times.

8.18. No Presumption.

The Parties acknowledge that any applicable law that would require interpretation of any claimed ambiguities in this Agreement against the Party that drafted it has no application and is expressly waived. If any claim is made by a Party relating to any conflict, omission or ambiguity in the provisions of this Agreement, no presumption or burden of proof or persuasion will be implied because this Agreement was prepared by or at the request of any Party or its counsel.

The Purchaser acknowledges that it is not relying upon any person, firm or corporation, other than the Company and its officers and directors, in making its investment or decision to invest in the Company. The Purchaser agrees that no other purchasers of the Company’s Series E Preferred Shares nor the respective controlling persons, officers, directors, partners, agents, or employees of any of such purchasers shall be liable to it for any action hereof or hereafter taken or omitted to be taken by any of them in connection with the purchase of the Company’s Series E Preferred Shares.

8.20. Third Party Beneficiaries.

Each of the Indemnitees shall be a third party beneficiary of this Agreement with the full ability to enforce Section 7 of this Agreement as if it were a Party hereto.

8.21. Several Signing.

Each Party shall become a party to this Agreement by executing and delivering a counterpart signature page hereto. This Agreement shall be effective as to all Parties as of August 26, 2016 except for any Party whose signature page to this Agreement has not been executed and delivered to the other Parties, with respect to whom this Agreement is effective only upon its execution and delivery of its counter-signed signature page to this Agreement to the other Parties hereto.

8.22. Termination of Agreement.

(a) This Agreement may be terminated before the Closing as follows:

(1) at the election of the Purchaser with respect to itself or the Company on or after November 30, 2016, if the Closing shall not have occurred on or before such date unless such date is extended by the mutual written consent of the Company and the Purchaser; provided that: (i) such electing party is not in material default of any of its obligations hereunder, and (ii) the right to terminate this Agreement pursuant to this Section 8.22(a) shall not be available to a Party if its breach of any provision of this Agreement has been the cause of, or resulted, directly or indirectly in, the failure of the Closing to be consummated by November 30, 2016.

(2) by mutual written consent of the Company and the Purchaser as evidenced in writing signed by each of the Company and the Purchaser; or

(3) by the Purchaser in respect to itself in the event of any material breach or violation of any representation or warranty, covenant or agreement contained herein or in any of the other Transaction Documents by any Warrantor that is not cured or curable within ten (10) Business Days of written notice.

(4) by the Purchaser in respect to itself if any event, circumstance or change have occurred that, individually or in the aggregate with one or more other events, circumstances or changes, have had or is reasonably expected to have a Material Adverse Effect on the Group Companies, provided that, such events, circumstances or changes are not caused by the Purchaser.
(b) Effect of Termination. The date of termination of this Agreement pursuant to Section 8.22(a) hereof shall be referred to as “Termination Date”. In the event of termination by the Company and/or any Purchaser pursuant to Section 8.22(a) hereof, written notice thereof shall forthwith be given to the other Parties and this Agreement shall terminate, and the purchase of the relevant Purchased Shares hereunder shall be abandoned and rescinded with respect to the relevant Purchaser(s), without further action by the Parties hereto. Each of the relevant Parties shall be relieved of their duties and obligations arising under this Agreement after the date of such termination and such termination shall be without liability to the other parties, as applicable; provided that no such termination shall relieve any party hereto from liability for any breach of this Agreement. The provisions of this Section 8.22, Section 7, Section 8.1, Section 8.2, Section 8.8, Section 8.9 and Section 8.14, hereof shall survive any termination of this Agreement.

Dear Sirs,

Weibo Corporation

We have acted as legal advisers as to the laws of the Cayman Islands to Weibo Corporation, an exempted limited liability company incorporated in the Cayman Islands (the “Company”), in connection with the filing by the Company with the United States Securities and Exchange Commission (the “SEC”) of an annual report on Form 20-F for the year ended 31 December 2016 (the “Annual Report”).

We hereby consent to the reference to our firm under the headings “Item 10.B. Additional Information—Memorandum and Articles of Association” and “Item 10.E. Additional Information—Taxation—Cayman Islands Taxation” in the Annual Report, and we further consent to the incorporation by reference of the summary of our opinions under these headings into the Company’s registration statement on Form S-8 (File No. 333-199022) that was filed on 30 September 2014, pertaining to the Company’s 2010 Share Incentive Plan and 2014 Share Incentive Plan.

We consent to the filing with the SEC of this consent letter as an exhibit to the Annual Report. In giving such consent, we do not thereby admit that we come within the category of persons whose consent is required under Section 7 of the Securities Act of 1933, or under the Securities Exchange Act of 1934, in each case, as amended, or the regulations promulgated thereunder.

Yours faithfully,

/s/ Maples and Calder (Hong Kong) LLP

We hereby consent to references to our name under the heading “Item 3.D. Key Information—Risk Factors—Risk Relating to Our Business”, “Item 4.B. Information on the Company—Business Overview—Regulation” and “Item 4.C. Information on the Company—Organizational Structure—Contractual Arrangements with Weimeng and Its Shareholders” in Weibo Corporation’s annual report on Form 20-F for the year ended December 31, 2016 (the “Annual Report”), and further consent to the incorporation by reference into the Registration Statement (Form S-8 No. 333-199022) pertaining to Weibo Corporation’s 2010 Share Incentive Plan and 2014 Share Incentive Plan, of the summary of our opinion under the heading “Item 4.B. Information on the Company—Business Overview—Regulation” and “Item 4.C. Information on the Company—Organizational Structure—Contractual Arrangements with Weimeng and Its Shareholders” in the Annual Report. We also consent to the filing of this consent letter with the U.S. Securities and Exchange Commission as an exhibit to the Annual Report.

In giving such consent, we do not thereby admit that we come within the category of persons whose consent is required under Section 7 of the Securities Act of 1933, or under the Securities Exchange Act of 1934, in each case, as amended, or the regulations promulgated thereunder.

Yours faithfully,

For and on behalf of
